Continuously quoted securities

In preparing this Prospectus, regard has been had to the fact that the Company is a disclosing entity for the purposes of the Corporations Act and that certain matters may reasonably be expected to be known to investors and their professional advisers. This Prospectus is a transaction specific prospectus for an offer of continuously quoted securities (as defined in the Corporations Act) and has been prepared in accordance with section 713 of the Corporations Act. This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX (including the Company's ASX announcements) and does not include all information that would be included in a prospectus for an initial public offering.

Exposure period

No exposure period applies to the Offers.

Speculative investment

An investment in the New Securities should be considered highly speculative. There is no guarantee that, nor forecast made of whether, the New Securities offered pursuant to this Prospectus will make a return on the capital invested, whether dividends will be paid or whether there will be an increase in the value of the New Securities in the future.

Prospective investors should carefully consider whether the New Securities offered pursuant to this Prospectus are an appropriate investment for them in light of their personal circumstances, including their financial and taxation position.

Refer to Section 4 for details of the key (non-exhaustive) risks applicable to an investment in the Company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX (including the Company's ASX announcements), and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

This Prospectus does not take into account the investment objectives, financial or taxation needs or other particular needs of any Applicant. Before making any investment in the Company, each Applicant should consider (without limitation) whether such an investment is appropriate to his/her particular needs, their individual risk profile for speculative investments, investment objectives and individual financial circumstances. If persons considering applying for New Securities have any questions, they should consult their stockbroker, solicitor, accountant or other professional adviser.

Not Investment Advice

The information detailed in this Prospectus is not investment or financial product advice and does not take into account your investment objectives, financial situation or particular needs. This Prospectus should not be construed as financial, taxation, legal or other advice. The Company is not licensed to provide financial product advice in respect of its Shares or any other financial products.

No entity or person named in this Prospectus warrants or guarantees the Company's performance, the repayment of capital by the Company or any return on investment made pursuant to this Prospectus.

Forward-looking statements

This Prospectus contains forward-looking statements which may be identified by words such as 'believes', 'estimates', 'expects', 'intends', 'may', 'will', 'would', 'could', or 'should' and other similar words that involve risks and uncertainties. These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Prospectus, are expected to take place.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and management of the Company. Past performance is not a guide to future performance. Key risks

associated with an investment in the Company are detailed (non-exhaustively) in Section 4. These and other factors could cause actual results to differ materially from those expressed in any forward-looking statements.

The Company has no intention to update or revise forward-looking statements, regardless of whether new information, future events or any other factors affect the information contained in this Prospectus, except where required by law.

The Company cannot and does not give assurances that the results, performance or achievements expressed or implied in the forward-looking statements contained in this Prospectus will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements.

Foreign Investors

No action has been taken to permit the offer of New Securities under this Prospectus in any jurisdiction other than Australia and New Zealand.

The distribution of this Prospectus in jurisdictions outside Australia and New Zealand may be restricted by law and therefore persons into whose possession this document comes should seek advice on and observe any such restrictions. Any failure to comply with these restrictions may constitute a violation of those laws. This Prospectus and any accompanying Application Form do not, and are not intended to, constitute an offer of New Securities in any jurisdiction where, or to any person to whom, it would be unlawful to issue this Prospectus.

This Prospectus does not constitute an offer to sell, or a solicitation of an offer to buy, securities in the United States. The New Securities have not been, and will not be, registered under the *US Securities Act of 1933 (US Securities Act)* or the securities laws of any state or other jurisdiction of the United States. Accordingly, the New Securities may not be offered or sold in the United States except in transactions exempt from, or not subject to, the registration requirements of the US Securities Act and applicable US state securities laws.

Important Information for New Zealand Investors

The Loyalty Options Offer to New Zealand investors is a regulated offer made under Australian and New Zealand law. In Australia, this is Chapter 8 of the Corporations Act and regulations made under that Act. In New Zealand, this is subpart 6 of Part 9 of the *Financial Markets Conduct Act 2013* and Part 9 of the *Financial Markets Conduct Regulations 2014*.

The Loyalty Options Offer and the content of this Prospectus are principally governed by Australian rather than New Zealand law. In the main, the Corporations Act and the regulations made under that Act set out how the Loyalty Options Offer must be made.

There are differences in how financial products are regulated under Australian law. For example, the disclosure of fees for managed investment schemes is different under the Australian regime.

The rights, remedies, and compensation arrangements available to New Zealand investors in

Australian financial products may differ from the rights, remedies, and compensation arrangements for New Zealand financial products.

Both the Australian and New Zealand financial markets regulators have enforcement responsibilities in relation to the Loyalty Options Offer. If you need to make a complaint about the Loyalty Options Offer, please contact the Financial Markets Authority, New Zealand (<http://www.fma.govt.nz>). The Australian and New Zealand regulators will work together to settle your complaint.

The taxation treatment of Australian financial products is not the same as for New Zealand financial products.

If you are uncertain about whether this investment is appropriate for you, you should seek the advice of a financial advice provider.

The Offers may involve a currency exchange risk. The currency for the financial products is not New Zealand dollars. The value of the financial products will go up or down according to changes in the exchange rate between that currency and New Zealand dollars. These changes may be significant. If you expect the financial products to pay any amounts in a currency that is not New Zealand dollars, you may incur significant fees in having the funds credited to a bank account in New Zealand in New Zealand dollars.

If the financial products are able to be traded on a financial product market and you wish to trade the financial products through that market, you will have to make arrangements for a participant in that market to sell the financial products on your behalf. If the financial product market does not operate in New Zealand, the way in which the market operates, the regulation of participants in that market, and the information available to you about the financial products and trading may differ from financial product markets that operate in New Zealand.

Notice to Nominees and Custodians

Shareholders resident in Australia and New Zealand holding Shares on behalf of persons who are resident in other jurisdictions are responsible for ensuring that taking up any New Securities does not breach regulations in the relevant jurisdiction.

Letter to Shareholders

Dear Shareholder,

INVITATION TO PARTICIPATE IN LOYALTY OPTIONS OFFER

On behalf of the Board of 1414 Degrees Limited ("**14D**" or "**the Company**") it is a pleasure to invite Eligible Shareholders to participate in a non-renounceable pro-rata bonus offer to recognise Eligible Shareholders for their ongoing support and engagement and provide them with a greater opportunity to participate in the potential future success of the Company.

Loyalty Options Offer

The Loyalty Options Offer is an offer to Eligible Shareholders of Loyalty Options, at a nil issue price, on the basis of 1 Loyalty Option for every 40 Shares held by Eligible Shareholders as at 7.00pm (AEST) on Thursday, 2 July 2026. Each Loyalty Option will have an exercise price of \$0.18 and will expire on 9 July 2030.

As at the date of this Prospectus, the Company has on issue 607,199,940 Shares and 34,904,762 Options. Refer to Section 3.3 for further details on the Company's current capital structure. Assuming no Convertible Securities are exercised into, or vest into, Shares prior to the Record Date, up to approximately the 15,397,240 Loyalty Options will be issued under the Loyalty Options Offer.

No proceeds will be made from the issue of the Loyalty Options because the Loyalty Options Offer is being made for nil consideration. Funds will be raised by the Company upon exercise of any of the Loyalty Options. If all 15,397,240 Loyalty Options are issued and subsequently exercised, the Company will raise \$2.8 million (before costs).

Use of funds

In the event that any funds are raised through the exercise of the Loyalty Options prior to their expiry date, the Company expects that it will apply such funds for:

- advancing the Aurora Energy Precinct – including completing requirements to access the 275kV transmission line for the grid-scale BESS project;
- accelerating commercialisation initiatives in the data centre and energy-intensive industries sector – the acceleration of SiNTL silicon nanoparticle anode commercialisation; and
- general working capital requirements.

The above proposed use of funds is indicative only and will be subject to modification on an ongoing basis depending on the results obtained from the Company's activities and other factors relevant to the Board's discretion as to usage of funding. Due to market conditions and the development of new opportunities or any number of other factors (including the key risks outlined in Section 4 of this Prospectus), actual use of net proceeds may differ significantly to the above estimates.

Further information

Full details of the Loyalty Options Offer are set out in this Prospectus. This Prospectus also includes details of the March Placement Options Offer, March Lead Manager Options Offer, June Placement Offer and June Lead Manager Options Offer.

Please read this Prospectus carefully before deciding whether or not to invest. An investment in the Company contains specific risks which you should consider before making that decision. A non-exhaustive list of risk factors relevant to an investment in the Company is set out in Section 4. If there is any matter on which you require further information, you should consult your stockbroker, accountant or other professional adviser.

On behalf of the Board of 14D, we thank you for your continued support and are pleased to offer you the opportunity to participate in the Loyalty Options Offer.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Kevin Moriarty', with a stylized flourish at the end.

Dr Kevin Moriarty
Executive Chairman

Topic	Summary	Further Information
Risks Specific to the Company	Investment in the Company should be considered speculative. Some of the key risks of investing in the Company are detailed below. The list of risks is not exhaustive and further details of these risks and other risks associated with an investment in the Company are detailed in Section 4. Going concern risk – The Company's FY25 Financial Report (for the year ended 30 June 2025) and HY26 Financial Report (for the half year ended 31 December 2025) each included a note on the financial condition of the Company and the existence of a material uncertainty about the Company's ability to continue as a going concern. As set out in the HY26 Financial Report, as at 31 December 2025, the consolidated entity incurred a net loss of \$3,856,345 and had a net cash outflow from operating and investing activities of \$2,268,530. Despite these material uncertainties, the directors were, as at 31 December 2025, of the opinion the consolidated entity would continue as a going concern, noting that this was contingent upon generation of cash inflow from its business and / or successfully raising additional capital. Since the date of the HY26 Financial Report, the Directors have implemented a number of initiatives aimed at advancing the Company's commercial programs and improving its financial position. Commercialisation of technology risk – The Company is developing the Aurora BESS project, commercialising multiple technologies across its energy storage platforms, including its SiBox thermal energy storage system, the SiNTL silicon battery anode program and the SiPHyR hydrogen production technology. Each of these programs faces commercialisation risk and there is no guarantee that any will achieve commercial scale on the expected timeline or at all. The Company's growth depends on its ability to attract customers across target sectors including data centres, grid-scale energy storage and heavy industry. While several of these sectors have committed to significant decarbonisation over coming decades, translating that demand into contracted revenue requires the Company to secure long-term customer relationships. Delays in customer engagement, failure to validate technology performance to customer requirements, or a shift in customer decarbonisation priorities could materially disrupt the Company's business plan for its thermal energy storage technology.	Section 4

Topic	Summary	Further Information
	Competition and Intellectual Property risk – 1414 Degrees operates across several markets — including grid-scale battery energy storage, thermal energy storage and advanced battery materials — that are subject to competition from both established energy companies and well-funded technology developers. The Company's ability to compete depends on its capacity to demonstrate cost-competitive and technically superior products, and there is a risk that competing technologies emerge or improve faster than anticipated, reducing the Company's addressable market or pricing power. The Company has invested significant time and resources in developing an intellectual property strategy based on trade secrets and a broad patent portfolio. There is a risk that third parties challenge the validity of the Company's patents or that the Company is unable to enforce its intellectual property rights effectively. Any successful challenge, or an inability to defend against infringement, could have a material adverse impact on the Company's competitive position and prospects. Core technology performance risk – For over 15 years the Company has developed and continues to develop its core silicon-based thermal storage media however the products have not been tested in long-term operation. There is a risk that the storage media does not meet the expectation of a 20 year operating lifetime, and this could delay or prevent the commercialisation of its SiBox technology, with significant adverse effects on investment in the Company. Commercial risks relating to Aurora Energy Precinct – The Company is developing the Aurora Energy Precinct in South Australia, including a 140 MW / 280 MWh grid-scale battery energy storage system (BESS) as a near-term revenue opportunity. The Company has obtained development approvals and transmission connection approval for the site and is working to complete the requirements to access the 275kV transmission line necessary to participate in the national electricity market. There is a risk that the Company does not complete the transmission connection requirements on the expected timeline, or that the cost of access makes the project uneconomical. As previously announced, the Company remains committed to developing the Aurora Energy Precinct and is exploring options to increase its

	50% ownership in the Precinct.¹ As at the date of this Prospectus, no agreements have been reached, and it is not possible for the Company to predict if any discussions will culminate in an agreed outcome, on terms acceptable to the Company or at all, which may adversely affect the Company's ability to advance the Precinct as planned. There is also a risk that projected revenues from the BESS will not be realised due to changes in electricity market regulation, shifts in energy pricing, or the entry of competing projects or technologies into the market. The Company is targeting demand from data centres and other high-energy industries as anchor customers for the precinct, and there is no guarantee that such customers will be secured on commercially acceptable terms or within expected timeframes. • Operating experience and reliance on key personnel risk – The Company has to date been developing and operating a novel technology with limited operating history, and there is a risk that the successful implementation of the Company's business plans will not result in profitability. • Business strategy execution – The Company's future growth, profitability and cash flows depend on the ability of its management to successfully execute its business strategy. There can be no assurance that 1414 Degrees can successfully achieve its business objectives and this could have a material adverse effect on the Company's business, financial condition, and operations. • Future capital requirements – The Company is currently loss making and the Company will require additional financing in the future to sufficiently fund its operations and commercialisation activities. The development of the Aurora BESS project will require substantial investment in Precinct development by the Company. The advancement of the SiNTL program is not expected to entail major investment if manufacturing facilities can be contracted, but there is no guarantee this will be effective. Any additional equity financing may be dilutive to shareholders (who may not have the opportunity to participate in that raising), and may be undertaken at lower prices than any prior offer prices. Should the Company require additional funding, there can be no assurance that additional financing will be available on acceptable terms or at all. Any inability to obtain additional financing, if

The Company's actual cash requirements may vary from those now planned and will depend upon many factors, including the continued progress of its research and development programs, commercialisation activities, the timing and costs of developing the Aurora project, the outcome of customer and partner negotiations and the cost, timing and outcome of submissions for regulatory approval and the status and timing of competitive developments. • Contractual risk – Any dispute or breakdown in the relationship between the Company and counterparties to its contracts including the licensors for its technologies, could adversely impact the business if the Company is in breach of any of its agreements and its counterparties seek to pursue the Company for breach of contract or enforce security interests against the Company's assets (and conversely the Company depends on such counterparties performing their obligations under such agreement).

- (e) make the offer of June Lead Manager Options pursuant to the Lead Manager Mandate; and
- (f) ensure that the on-sale of the New Options and the Shares issued on conversion of the New Options do not breach section 707(3) of the Corporations Act.

The Loyalty Options Offer is made pursuant to *ASIC Corporations (Exposure Period) Instrument 2026/90* which exempts the Company from complying with section 727(3) of the Corporations Act to the extent that this section prohibits the Company from issuing Loyalty Options in the 7 day period after the date of lodgement of the Prospectus with ASIC.

The Loyalty Options Offer is also made pursuant to *ASIC Corporations (Application Form Requirements) Instrument 2017/241* which exempts the Company from complying with section 723(1) of the Corporations Act to the extent that this section only permits an issue of Loyalty Options in response to an application form included in or accompanied by a disclosure document.

If any of the dates are changed, subsequent dates may also change.

You are encouraged to lodge your Application Form as soon as possible after the Opening Date.

The Company will not accept any oversubscriptions in relation to the Offers.

2.10 Not underwritten

The Offers are not underwritten.

2.11 Fractional Entitlements

Fractional Entitlements of a Loyalty Option will be rounded down to the nearest whole number. For this purpose, holdings in the same name are aggregated for calculation of Entitlements, to the extent permitted by the Listing Rules. If the Company considers that holdings have been split to take advantage of rounding, the Company reserves the right to aggregate holdings held by associated Shareholders for the purpose of calculating Entitlements, to the extent permitted by the Listing Rules.

2.12 Issue and dispatch

Any New Securities to be issued under the Offers are expected to be issued on or around the issue date specified in the Indicative Timetable, or such other date as the Directors in their absolute discretion determine, subject to the requirements of the Listing Rules.

It is the responsibility of Applicants to determine their allocation prior to trading in the New Securities. Applicants who sell New Securities before they receive their holding statements will do so at their own risk.

2.13 Application Monies

No Application Monies are payable in respect of the issue of the Loyalty Options, March Options, March Lead Manager Options or June Lead Manager Options.

All Application Monies in respect of the June Placement Offer will be held on trust in a bank account maintained solely for the purpose of depositing Application Monies received pursuant to this Prospectus until the June Shares are issued. 2.15 ASX quotation

The Company intends to apply for Official Quotation of the New Securities offered pursuant to this Prospectus within seven days after the date of this Prospectus.

If the New Options (as applicable) are not admitted to Official Quotation by ASX before the expiration of three months after the date of issue of this Prospectus, or such period as varied by ASIC, the Company will issue the New Options (as applicable) as unquoted options.

ASX takes no responsibility for the contents of this Prospectus. The fact that ASX may grant Official Quotation is not to be taken in any way as an indication of the merits of the Company or the New Options.

2.16 Withdrawal and cooling-off rights

Cooling off rights do not apply to an investment in New Securities under the Offers. You cannot withdraw your payment once it has been accepted unless permitted to do so in accordance with the Corporations Act.

The Directors may at any time decide to withdraw this Prospectus and the Offers, in which case, the Company will return all Application Monies (without interest) in accordance with the Corporations Act.

(an **Eligible Shareholder**).

If you are a Shareholder who does not satisfy each of the criteria listed above, you are an **"Ineligible Shareholder"**. Where this Prospectus has been despatched to Ineligible Shareholders, this Prospectus is provided for information purposes only. The Company reserves the right to determine whether a Shareholder is an Eligible Shareholder or an Ineligible Shareholder.

Ineligible Shareholders are not entitled to participate in the Loyalty Options Offer.

Nominees, trustees or custodians are therefore advised to seek independent professional advice as to how to proceed.

By receiving this Prospectus, you will be taken to have acknowledged and agreed that determination of eligibility of investors for the purposes of the Loyalty Options Offer is determined by reference to a number of matters, including legal and regulatory requirements, logistical and registry constraints and the discretion of the Company and each of the Company and the Lead Manager and each of their respective affiliates disclaim any duty or liability (including for negligence) in respect of that determination and the exercise or otherwise of that discretion, to the maximum extent permitted by law.

The Company has decided that it is unreasonable to make offers under the Loyalty Options Offer to Shareholders who have registered addresses outside Australia and New Zealand, having regard to the number of such holders in those places and the number and value of the New Securities that they would be offered, and the cost of complying with the relevant legal and

regulatory requirements in those places. The Company may (in its absolute discretion) extend the Loyalty Options Offer to Shareholders who have registered addresses outside Australia or New Zealand in accordance with applicable law.

2.18 **Nominees**

The Loyalty Options Offer is only being made to Eligible Shareholders. The Company is not required to determine whether or not any registered holder is acting as a nominee or the identity or residence of any beneficial owners of Shares (e.g., for the purposes of determining whether any such persons may participate in the Loyalty Options Offer).

Where any holder is acting as a nominee for a foreign person, that holder, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Loyalty Options Offer is compatible with applicable foreign laws.

2.19 **Foreign jurisdictions**

This Prospectus does not, and is not intended to, constitute an offer of Securities in any place or jurisdiction in which, or to any person to whom, it would be unlawful to make such an offer or to issue this Prospectus. The Loyalty Options Offer and the Other Offers are not being extended, and New Securities will not be issued, to Shareholders with a registered address which is outside Australia or New Zealand.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions (other than those mentioned above) having regard to the number of overseas Shareholders, the number and value of New Securities these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction.

No action has been taken to permit the offer of New Securities to existing Shareholders in any jurisdiction other than Australia and New Zealand. The distribution of this Prospectus in jurisdictions outside those jurisdictions is restricted by law and persons outside of those jurisdictions should observe such restrictions. Any failure to comply with these restrictions may constitute a violation of applicable securities laws.

This Prospectus does not constitute an offer of New Securities in any jurisdiction in which, or to any person to whom, it would be unlawful to make such an offer. In particular, this Prospectus may not be distributed to any person, and the New Securities may not be offered or sold, in any country outside of Australia except to the extent permitted below:

The Loyalty Options are not being offered to the public within New Zealand other than to existing Shareholders of the Company with registered addresses in New Zealand to whom the offer of these securities is being made in reliance on the mutual recognition regime established under subpart 6 of Part 9 of the *Financial Markets Conduct Act 2013* and Part 9 of the *Financial Markets Conduct Regulations 2014*.

Investors in New Zealand should refer to the warning statement on page 4 under 'Important information for New Zealand investors'.

2.20 **CHESS**

Under CHESS, Applicants will not receive a certificate but will receive a statement of their holding of New Options. If you are broker sponsored, ASX Settlement will send you a CHESS statement.

The CHESS statement will set out the number of New Securities issued under this Prospectus and provide details of your holder identification number, the participant identification number of the sponsor and the terms and conditions applicable to the New Securities.

If you are registered on the Issuer Sponsored subregister, your statement will be dispatched by the Share Registry and will contain the number of New Securities issued to you under this Prospectus and your security holder reference number.

A CHESS statement or Issuer Sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their shareholding changes. Shareholders may request a statement at any other time, however, a charge may be made for additional statements.

2.21 Risk factors

An investment in the New Securities should be regarded as highly speculative. In addition to the general risks applicable to all investments in listed securities, there are specific risks associated with an investment in the Company which are detailed (non-exhaustively) in Section 4.

2.22 Taxation implications

The Directors do not consider it appropriate to give Applicants advice regarding the taxation consequences of subscribing for New Securities under the Offers.

The Company, its advisers and its officers do not accept any responsibility or liability for any such taxation consequences to Applicants. As a result, Applicants should consult their professional tax adviser in connection with subscribing for New Securities under the Offers.

2.23 Privacy

The Company collects information about each Applicant provided on an Application Form for the purposes of processing the Application and, if the Application is successful, to administer the Applicant's security holding in the Company. Such information may be used to assess your Application, service your needs as a holder of Shares or Options, provide facilities and services that you request and carry out appropriate administration.

By submitting an Application Form, each Applicant agrees that the Company may use the information provided by an Applicant on the Application Form for the purposes set out in this privacy disclosure statement and may disclose it for those purposes to the Share Registry, the Company's related bodies corporate, agents, contractors and third party service providers, including mailing houses and professional advisers, and to ASX and regulatory authorities, or as otherwise permitted under the *Privacy Act 1988* (Cth) (as amended).

The information may also be used from time to time by, and disclosed to, persons inspecting the register, bidders for securities in the context of takeovers, regulatory bodies, including the Australian Taxation Office, authorised securities brokers, print service providers, mail houses and the Share Registry.

If you do not provide the information required on the Application Form, the Company may not be able to accept or process your Application.

Shareholders can access, correct and update the personal information that the Company holds about them by contacting the Company or the Share Registry at the relevant contact numbers detailed in this Prospectus. A fee may be charged for access. Collection, maintenance and disclosure of certain personal information is governed by legislation including the *Privacy Act 1988* (Cth) (as amended), the Corporations Act and certain rules such as the ASX Settlement Operating Rules.

2.24 Major activities and financial information

A summary of the major activities and financial information relating to the Company can be found in the Company's consolidated financial statements for the year ended 30 June 2025 lodged with ASX on 23 September 2025 (**FY25 Financial Report**) and its consolidated financial statements for the half year ended 31 December 2025 lodged with ASX on 27 February 2026 (**HY26 Financial Report**). The Company has issued continuous disclosure notices (i.e., ASX announcements) since the lodgement of its FY25 Financial Report and HY26 Financial Report.

The Company's continuous disclosure notices (i.e. ASX announcements) since the lodgement of the Annual Report are listed in Section 6.2.

Copies of these documents are available free of charge from the Company. The Directors strongly recommend that Applicants review these and all other announcements prior to deciding whether or not to participate in the Offers.

2.25 **Application Forms**

Pursuant to the *ASIC Corporations (Application Form Requirements) Instrument 2017/241*, Eligible Shareholders are not required to apply for Loyalty Options under the Loyalty Options Offer and, accordingly, there is no application form attached to this Prospectus for the Loyalty Options Offer.

The Company will send this Prospectus, together with Application Forms, to selected persons whom the Directors determine are eligible to participate in the March Placement Options Offer, March Lead Manager Options Offer, June Placement Offer and / or June Lead Manager Options Offer.

If you are selected by the Directors and you wish to subscribe for New Securities pursuant to the March Placement Options Offer, March Lead Manager Options Offer, June Placement Offer and / or June Lead Manager Options Offer, you should complete and return the Application Form, which will be provided with a copy of this Prospectus by the Company at the Directors' discretion, in accordance with the instructions in the Application Form.

If you are in doubt as to the course of action, you should consult your professional adviser.

If the number of New Securities applied for under the relevant Offer is more than the number of New Securities to which the Placement Participant or Lead Manager (and / or its nominee(s)) (as applicable) is entitled under the relevant Offer, the Company reserves the right to return the Application Form and not issue any New Securities to the Placement Participant or Lead Manager (and / or its nominee(s)) (as applicable), or to accept it in respect of a lesser number of New Securities.

Completed Application Forms must be received by the Company prior to the Closing Date.

2.26 **Acceptance of Application**

Acceptance of a completed Application Form by the Company creates a legally binding contract between the Applicant and the Company for the number of New Securities accepted by the Company. The Application Form does not need to be signed to be a binding Application.

If the Application Form is not completed correctly, it may still be treated as valid. The Directors' decision as to whether to treat the Application Form as valid and how to construe, amend or complete the Application Form is final.

By completing and returning an Application Form, Applicants will be deemed to have represented and warranted on behalf of themselves or each person on whose account they are acting, that the law in their place of residence and/or where they have been given the Prospectus does not prohibit them from being given the Prospectus and that they:

- (a) agree to be bound by the terms of the relevant Offer;
- (b) declare that all details and statements in the Application Form are complete and accurate;
- (c) declare that they are over 18 years of age and have full legal capacity and power to perform all their rights and obligations under the Application Form;
- (d) authorise the Company and its respective officers or agents, to do anything on their behalf necessary for the applicable New Securities to be issued to them;

- (e) acknowledge that the information contained in, or accompanying, the Prospectus is not investment or financial product advice or a recommendation that the securities are suitable for them given their investment objectives, financial situation or particular needs;
- (f) acknowledge that the New Securities have not, and will not be, registered under the securities laws in any other jurisdictions outside Australia and New Zealand; and
- (g) meet the eligibility criteria of the expected target market for the Loyalty Options outlined in the Target Market Determination, a copy of which can be accessed at the Company's website.

3 Purpose and effect of the Offers

3.1 Purpose of the Offers

The purposes of the Offers are as follows:

- (a) the purpose of the Loyalty Options Offer is to recognise the support the Company has received from its Shareholders to date, and to reward existing Eligible Shareholders by making a bonus loyalty offer for nil consideration;
- (b) the March Placement Options Offer is being made to the March Placement Participants as free attaching options pursuant to the terms of the March Placement;
- (c) the March Lead Manager Options Offer is being made to the Lead Manager (and / or its nominee(s)) as part of the fees payable in connection with the March Placement pursuant to the Lead Manager Mandate;
- (d) the purpose of the June Placement Offer is to raise funds up to \$8.45 million (before costs), which the Company intends to apply in the manner set out in Section 3.2;
- (e) the June Lead Manager Options Offer is being made to the Lead Manager (and / or its nominee(s)) as part of the fees payable in connection with the June Placement pursuant to the Lead Manager Mandate; and
- (f) the Offers are also designed to provide the Company with a potential source of ongoing additional capital of up to \$35,103,790.28 if the maximum number of New Options under the Offers are issued and exercised.

3.2 Use of funds

As announced to ASX on 23 June 2026, the Company's proposed use of funds raised under the June Placement is as follows, assuming that all 84,570,435 June Shares are issued and the Company raises approximately \$8.45 million (before costs):

Use of funds	Amount (\$ million)
Aurora Precinct Development ¹	\$4.50
SiNTL commercialisation ²	\$1.00
Costs of the Offers ³	\$0.65
General working capital	\$2.30
Total	\$8.45

Notes:

- 1 Advancing the Aurora Energy Precinct – including completing requirements to access the 275kV transmission line for the grid-scale BESS project. Refer to the Company's ASX announcement dated 23 June 2026 for further information.
- 2 Accelerating commercialisation initiatives in the data centre and energy-intensive industries sector – the acceleration of SiNTL silicon nanoparticle anode commercialisation. Refer to the Company's ASX announcement dated 23 June 2026 for further information.
- 3 Excluding Out of Scope Fees payable to the Lead Manager, which have been offset by the Lead Manager's participation in the June Placement Offer. Refer to Section 6.1 for further information on the offset arrangement. Refer to Section 6.13 for details of the costs of the Offers.
- 4 Working capital includes the normal general and administrative costs associated with running a public company, including but not limited to salaries, general operating expenses and overhead costs, legal fees, rental of office premises, investor relations and finance and accounting fees among other working capital requirements.

Further, if all:

- (a) 296,524,138 March Options and March Lead Manager Options are exercised prior to their expiry date (being 29 January 2028), the Company will raise a total of \$14,826,206.90; and
- (b) 106,545,376 Loyalty Options, June Options and June Lead Manager Options are exercised prior to their expiry date (being 9 July 2030), the Company will raise a total of \$19,178,168.

Accordingly, if all 403,069,514 New Options are exercised prior to their respective expiry dates, the Company will raise a total of \$34,004,374.58.

The manner of application of any funds from the exercise of the New Options will depend on when New Options are exercised and the status of the Company's activities and requirements at the relevant time.

As at the date of this Prospectus, the Company expects that it would apply any such funds raised from the exercise of New Options towards:

- (c) advancing the Aurora Energy Precinct – including completing requirements to access the 275kV transmission line for the grid-scale BESS project;
- (d) accelerating commercialisation initiatives in the data centre and energy-intensive industries sector – the acceleration of SiNTL silicon nanoparticle anode commercialisation; and
- (e) general working capital requirements.

The above proposed use of funds is indicative only and will be subject to modification on an ongoing basis depending on the results obtained from the Company's activities and other factors relevant to the Board's discretion as to usage of funding. Due to market conditions and the development of new opportunities or any number of other factors (including the key risks outlined in Section 4 of this Prospectus), actual use of net proceeds may differ significantly to the above estimates. In light of this, the Board reserves the right to alter the way the funds are applied.

3.3 Effect on Capital Structure

The effect of the Offers on the capital structure of the Company, assuming the maximum number of:

- (a) Loyalty Options are issued pursuant to the Loyalty Options Offer;
- (b) March Options are issued pursuant to the March Placement Options Offer;
- (c) March Lead Manager Options are issued pursuant to the March Lead Manager Options Offer;
- (d) June Shares and June Options are issued pursuant to the June Placement Offer; and
- (e) June Lead Manager Options are issued pursuant to the June Lead Manager Options Offer,

will be to increase the number of Shares currently on issue by a maximum of 84,570,435 Shares (assuming that the Remaining March Shares have already been issued) and the number of Options currently on issue by a maximum of 403,069,514 Options.

Assuming that no further Shares are issued and none of the existing quoted or unquoted Options are exercised, the effect of the Offer on the Company's issued capital as at the date of this Prospectus is as shown in the following table:

Shares	Options
--------	---------

Securities on issue as at the date of this Prospectus	607,199,940 ¹	34,904,762 ²

 - (a) 14DOA – 30,904,762 quoted options exercisable at \$0.05 per option and expiring 28 January 2028; and

Refer to Section 6.1 for further information.
- 8 The terms and conditions of the New Options are set out in Section 5.2.

3.4 Convertible Securityholders

Holders of Convertible Securities will not be able to participate in the Loyalty Options Offer unless:

- (a) those Convertible Securities are converted and exercised into Shares in accordance with their terms, so they are registered as holders of Shares prior to the Record Date; or
- (b) they otherwise participate in the Loyalty Options offer as a result of being a holder of Shares registered on the Share register of the Company at the Record Date.

3.5 **Effect on control**

The Company will manage the Offers, such that none of the Applicants will obtain a relevant interest in Shares of 20% or more. No New Securities will be issued to any Shareholder or Applicant pursuant to this Prospectus if, in the view of the Directors, to do so would increase that Shareholder's or Applicant's Voting Power in the Company above 20% or otherwise result in a breach of the Listing Rules, the Corporations Act or any other applicable law.

The Company does not anticipate that the acquisition of New Options by any Shareholder under any Offers will result in any Shareholder either becoming a substantial Shareholder, or obtaining a relevant interest in Shares of 20% or more albeit that the effect of the Offers on the Voting Power in the Company, for the purposes of the Corporations Act, is dependent upon the number of New Shares issued upon the exercise of the New Options taken up. The Company therefore does not anticipate that the issue of the New Options will have any material effect on control of the Company.

4 Risk Factors

The New Securities are considered highly speculative and carry no guarantee with respect to the payment of dividends or returns of capital. An investment in the Company is not risk free and the Directors strongly recommend that potential investors consult their professional advisers and consider the risks described below, together with information contained elsewhere in this Prospectus, before deciding whether to apply for New Securities.

The following list of risks ought not to be taken as exhaustive of all the risks faced by the Company or by Shareholders. The proposed future activities of the Company are subject to a number of risks and other factors which may impact its future performance. Some of these risks can be managed and mitigated by planning and the use of safeguards and appropriate controls. However, many of the risks are outside the control of the Company or the Directors and cannot be mitigated.

4.1 Risks specific to the Offers

(a) Quotation risk

The Company intends to apply for quotation of the New Options.

The Company makes no guarantee that any such application for quotation will be successful and there is a risk that the Company will not be able to satisfy the ASX requirements for admission to quotation. In the event that the Company is unable to satisfy the ASX requirements, the New Options will still be issued, but will be unquoted Options. If the New Options are admitted to Official Quotation, the price of the New Options is subject to uncertainty and there can be no assurance that an active market for the New Options will develop or continue after the Offers.

(b) Option risk and dilution

Options are, by their nature, only of value at times when the exercise price is lower than the value of the underlying Shares. There is no guarantee that the New Options offered under this Prospectus will, at any particular time, have an exercise price which is lower than the value of the Shares.

There is a risk that the New Options may expire at a time when they have little or no value.

On completion of the Offers, assuming the Offers are fully subscribed and ASX's quotation conditions have been satisfied, there will be up to 403,069,514 additional quoted Options on issue. If exercised, these New Options will be converted into Shares, thereby causing the shareholdings of Shareholders to be diluted. However, each:

- (i) March Option and March Lead Manager Option has an exercise price of \$0.05; and
- (ii) Loyalty Option, June Option and June Lead Manager Option has an exercise price of \$0.18,

which means that the Company will receive additional funds of up to \$34,004,374.58 (before costs) upon exercise of the New Options, assuming all New Options the subject of the Offers are issued and subsequently exercised. There is no certainty that New Options, if issued, will be exercised in full, or at all.

4.2 Risks specific to the Company

(a) Going concern risk

The Company's FY25 Financial Report (for the year ended 30 June 2025) and HY26 Financial Report (for the half year ended 31 December 2025) each included a note on the financial condition of the Company and the existence of a material uncertainty

about the Company's ability to continue as a going concern. As set out in the HY26 Financial Report, as at 31 December 2025, the consolidated entity incurred a net loss of \$3,856,345 and had a net cash outflow from operating and investing activities of \$2,268,530.

Despite these material uncertainties, the directors were, as at 31 December 2025, of the opinion the consolidated entity would continue as a going concern, noting that this was contingent upon generation of cash inflow from its business and / or successfully raising additional capital.

Since the date of the HY26 Financial Report, the Directors have implemented a number of initiatives aimed at advancing the Company's commercial programs and improving its financial position. These measures and initiatives include:

- (i) undertaking a capital raising of approximately \$2.69 million (before costs) under the March Placement;
- (ii) undertaking a capital raising of up to approximately \$8.45 million (before costs) pursuant to the June Placement;
- (iii) progressing the Aurora Energy Precinct by obtaining acceptance of Generator Performance Standards for the proposed 140 MW / 280 MWh BESS, supporting advancement of connection and customer contracting activities, including a potential data centre, EV charging and firmed power applications at the site;
- (iv) submitting a non-binding indicative offer to acquire Vast Solar Aurora Pty Ltd's 50% interest in SiliconAurora Pty Ltd following VSA entering voluntary administration in November 2025, with a view to consolidating the Company's ownership of the Aurora joint venture and removing uncertainty arising from that administration;²
- (v) advancing the SiNTL battery materials program through achievement of specified performance milestones, commencement of scale-up of anode material supply for manufacturing and engaging with battery manufacturers;
- (vi) continuing to develop potential commercial applications for SiNTL, establishing the 14D Aerospace & Defence Division to commercialise SiNTL in the drone, UAV and defence sector, with a six-member Advisory Board, and integration work with SiPHyR-derived carbon materials;
- (vii) entering into a SiNTL Battery Qualification Testing Agreement with Enerгия 2000, a Ukrainian Government-approved defence manufacturer under which SiNTL-based batteries are to be tested across multiple drone platforms; and
- (viii) continuing to commercialise and develop activities across the broader portfolio, including Heat-as-a-Service feasibility work, and technology development.

(b) Commercialisation of technology risk

The Company is developing the Aurora BESS project, commercialising multiple technologies across its energy storage platforms, including its SiBox thermal energy storage system, the SiNTL silicon battery anode program and the SiPHyR hydrogen production technology. Each of these programs faces commercialisation risk and there is no guarantee that any will achieve commercial scale on the expected timeline or at all.

The Company's growth depends on its ability to attract customers across target sectors including data centres, grid-scale energy storage and heavy industry. While several of these sectors have committed to significant decarbonisation over coming decades,

² Refer to the Company's ASX announcement lodged on 22 January 2026 and prospectus dated 22 January 2026 for further information.

translating that demand into contracted revenue requires the Company to secure long-term customer relationships. Delays in customer engagement, failure to validate technology performance to customer requirements, or a shift in customer decarbonisation priorities could materially disrupt the Company's business plan for its thermal energy storage technology.

Achieving its goals also requires the Company to expand its in-house technical and commercial expertise and to build reliable supply chain and manufacturing partnerships. There is a risk that delays in either area slow the Company's path to revenue.

(c) Competition and Intellectual Property risk

1414 Degrees operates across several markets — including grid-scale battery energy storage, thermal energy storage and advanced battery materials — that are subject to competition from both established energy companies and well-funded technology developers. The Company's ability to compete depends on its capacity to demonstrate cost-competitive and technically superior products, and there is a risk that competing technologies emerge or improve faster than anticipated, reducing the Company's addressable market or pricing power.

The Company has invested significant time and resources in developing an intellectual property strategy based on trade secrets and a broad patent portfolio. The Company's intellectual property includes the patents for its thermal energy storage systems and storage media, its trademarks and domain names, and it has licensed patented technologies for hydrogen production through methane pyrolysis (SiPhyR), and silicon nanotechnology for battery anodes (SiNTL). The original technology patent for its thermal energy storage and retrieval system built on the concept of elongated canisters containing silicon metal and made of refractory material (Original Patent) is granted in CN, Germany, AU, NZ, UK and US jurisdictions, granting the Company exclusive rights to commercialise the technology. Subsequent patents include TESS-IND (granted in US and AU; SiBox Storage Media (application in AU, PRC, EU, IN and US); Fluid Reactor (SiPhyR) (application in AU, PRC, IN, and US).

There is a risk that third parties challenge the validity of the Company's patents or that the Company is unable to enforce its intellectual property rights effectively. Any successful challenge, or an inability to defend against infringement, could have a material adverse impact on the Company's competitive position and prospects.

(d) Core technology performance risk

For over 15 years the Company has developed and continues to develop its core silicon-based thermal storage media however the products have not been tested in long-term operation. There is a risk that the storage media does not meet the expectation of a 20 year operating lifetime, and this could delay or prevent the commercialisation of its SiBox technology, with significant adverse effects on investment in the Company.

To mitigate this risk, the Company has been developing and testing alternate silicon storage media in parallel, but there can be no guarantee that any of these media achieve a 20 year operating lifetime. A lesser lifetime would not necessarily make the products uncompetitive but could reduce potential revenue from license fees.

Similarly, SiNTL's laboratory-scale performance results may not be replicable at manufacturing scale, which could delay or prevent commercialisation of the battery anode technology.

(e) Commercial risks relating to Aurora Energy Precinct

The Company is developing the Aurora Energy Precinct in South Australia, including a 140 MW / 280 MWh grid-scale battery energy storage system (BESS) as a near-term revenue opportunity. The Company has obtained development approvals and transmission connection approval for the site and is working to complete the requirements to access the 275kV transmission line necessary to participate in the national electricity market.

There is a risk that the Company does not complete the transmission connection requirements on the expected timeline, or that the cost of access makes the project uneconomical. As previously announced, the Company remains committed to developing the Aurora Energy Precinct and is exploring options to increase its 50% ownership in the Precinct.³ As at the date of this Prospectus, no agreements have been reached, and it is not possible for the Company to predict if any discussions will culminate in an agreed outcome, on terms acceptable to the Company or at all, which may adversely affect the Company's ability to advance the Precinct as planned.

There is also a risk that projected revenues from the BESS will not be realised due to changes in electricity market regulation, shifts in energy pricing, or the entry of competing projects or technologies into the market. The Company is targeting demand from data centres and other high-energy industries as anchor customers for the precinct, and there is no guarantee that such customers will be secured on commercially acceptable terms or within expected timeframes.

(f) Operating experience and reliance on key personnel risk

The Company has to date been developing and operating a novel technology with limited operating history, and there is a risk that the successful implementation of the Company's business plans will not result in profitability.

The Company relies on the experience of its management team and directors. The loss of the services of certain personnel could have an adverse effect on the Company and its activities, including delays in realising the commercial potential of the technology.

(g) Business strategy execution

The Company's future growth, profitability and cash flows depend on the ability of its management to successfully execute its business strategy. There can be no assurance that 1414 Degrees can successfully achieve its business objectives and this could have a material adverse effect on the Company's business, financial condition, and operations.

If circumstances change, the Company will need to rely on the value of the IP and technology to refocus its business strategy.

(h) Future capital requirements

The Company is currently loss making and the Company will require additional financing in the future to sufficiently fund its operations and commercialisation activities. The development of the Aurora BESS project will require substantial investment in Precinct development by the Company. The advancement of the SiNTL program is not expected to entail major investment if manufacturing facilities can be contracted, but there is no guarantee this will be effective. Any additional equity financing may be dilutive to shareholders (who may not have the opportunity to participate in that raising), and may be undertaken at lower prices than any prior offer prices. Should the Company require additional funding, there can be no assurance that additional financing will be available on acceptable terms or at all. Any inability to obtain additional financing, if required, would have a material adverse effect on the Company's business, financial condition and results of operations. The Company's actual cash requirements may vary from those now planned and will depend upon many factors, including the continued progress of its research and development programs, commercialisation activities, the timing and costs of developing the Aurora project, the outcome of customer and partner negotiations and the cost, timing and outcome of submissions for regulatory approval and the status and timing of competitive developments.

³ Refer to the Company's ASX announcement lodged on 22 January 2026 and prospectus dated 22 January 2026 for further information.

(i) Contractual risk

Any dispute or breakdown in the relationship between the Company and counterparties to its contracts including the licensors for its technologies, could adversely impact the business if the Company is in breach of any of its agreements and its counterparties seek to pursue the Company for breach of contract or enforce security interests against the Company's assets (and conversely the Company depends on such counterparties performing their obligations under such agreement).

(j) Defence and geopolitical risk

The Company has entered into a Battery Qualification Testing Agreement with Energia 2000, a Ukrainian Government-approved defence manufacturer, under which SiNTL-based batteries are proposed to be tested across multiple drone platforms, including in live battlefield conditions. There is a risk that the active conflict environment delays, disrupts or prevents testing from proceeding as planned. Geopolitical developments – including changes to sanctions regimes, export controls, or the course of the conflict – could also affect the Company's ability to operate in or conduct business with Ukrainian counterparties. The Company is also subject to applicable Australian export control laws and regulations, and there is a risk that compliance obligations limit or delay the Company's activities in the defence sector.

4.3 General Risks

The following risks have been identified as being some general risks associated with an investment in the Company, noting its publicly listed status:

(a) Economic risks

The operating and financial performance of the Company is influenced by a variety of general economic and business conditions, including levels of consumer spending, inflation, interest rates, access to debt and capital markets, international economic conditions, significant acts of terrorism, hostilities or war or natural disasters, and government fiscal, monetary and regulatory policies. Prolonged deterioration in general economic conditions may have an adverse impact on the Company's business or financial condition. No guarantee can be made that the Company's market performance will not be adversely affected by any such market fluctuations or factors.

(b) Market conditions

An investment in the Company's Securities has the general risks associated with any investment in the share market. Returns from an investment in Securities will depend on general stock market conditions as well as the performance of the Company. The market price of the Company's Securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. The trading price of the Company's Securities may be subject to fluctuations in response to factors such as actual or anticipated variations in the Company's operating results, announcements of new contracts by the Company or its competitors, announcements by the Company or its competitors of significant acquisitions, technological developments, capital commitments, additions or departures of key personnel and other events or factors, many of which are beyond the Company's control.

Further, general share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as: general economic outlook; interest rates and inflation rates; currency fluctuations; changes in investor sentiment; the demand for, and supply of, capital; and terrorism or other hostilities. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(c) Liquidity risk

The market for the Company's Securities may be illiquid. As a consequence, investors may be unable to readily exit or realise their investment.

(d) Force majeure

The Company's contracts now or in the future may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, pandemics, epidemics or quarantine restrictions.

(e) Taxation and government regulations

Changes in taxation and government legislation in a range of areas (for example, the Corporations Act, accounting standards, and taxation law) can have a significant influence on the outlook for companies and the returns to investors. The recoupment of taxation losses accrued by the Company from any future revenues is subject to the satisfaction of tests outlined in taxation legislation or regulations in the jurisdictions in which the Company operates. There is no guarantee that the Company will satisfy all of these requirements at the time it seeks to recoup its tax losses which may impact on the financial performance and cash flows of the Company.

(f) Litigation risk

The Company is not currently engaged in any litigation. However, the Company is exposed to the risk of actual or threatened litigation or legal disputes in the form of customer claims, intellectual property claims, personal injury claims, employee claims and other litigation and disputes. If any claim was successfully pursued it may adversely impact the financial performance, financial position, cash flow, share price and/or industry standing of the Company.

(g) Insurance risk

The Company intends to insure its operations in accordance with industry practice. However, in certain circumstances, the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

4.4 Investment speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company.

The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the New Securities offered under this Prospectus. Therefore, the New Securities to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those New Securities. Potential investors should consider that the investment in the Company is highly speculative and should consult their professional adviser before deciding whether to apply for New Securities pursuant to this Prospectus.

5 Rights and Liabilities Attaching to Securities

5.1 Rights and liabilities attaching to Shares

A summary of the rights attaching to the Shares issued on the exercise of the New Options is detailed below. The Shares issued on the exercise of the New Options will rank *pari passu* in all respects with existing Shares. This summary is qualified by the full terms of the Constitution (a full copy of the Constitution is available from the Company on request free of charge) and does not purport to be exhaustive or to constitute a definitive statement of the rights and liabilities of Shareholders. These rights and liabilities can involve complex questions of law arising from an interaction of the Constitution with statutory and common law requirements. For a Shareholder to obtain a definitive assessment of the rights and liabilities which attach to Shares in any specific circumstances, the Shareholder should seek legal advice.

General meetings	Subject to certain restrictions contained in the Constitution, the Corporations Act and the ASX Listing Rules, each member is entitled to receive notice of, and to attend and vote at general meetings of the Company and to receive all notices, accounts and other documents required to be sent to members under the Constitution, the Corporations Act and the ASX Listing Rules.
Voting rights	Subject to any rights or restrictions for the time being attached to the Shares (whether as a result of the terms of their issue, the Constitution, the Corporations Act or the Listing Rules), at a general meeting of the Company every holder of Shares present in person or by a representative, proxy or attorney is entitled to one vote on a show of hands. On a poll, every holder of Shares present in person or by a representative, proxy or attorney is entitled to one vote per fully paid Share, or in the case of partly paid Shares a fraction of a vote equal to the proportion which the amount paid bears to the total issue price of the Share. A member is not entitled to vote unless all calls and other sums presently payable by the member in respect of Shares have been paid. Where there are two or more joint holders of the Share and more than one of them is present at a meeting and tenders a vote in respect of the Share, whether in person or by proxy or attorney, the Company will count only the vote cast by the member whose name appears before the other(s) in the Company's register of members.
Dividend rights	The Directors may from time to time resolve to pay a dividend if: - the payment of the dividend is fair and reasonable to the Company's members as a whole; and - the payment of the dividend does not materially prejudice the Company's ability to pay its creditors. Subject to the rights of members entitled to shares in the Company with special rights as to dividends, if any, all dividends in respect of shares in the Company, including the Shares, are to be declared and paid proportionally to the amount paid up, not credited as paid up, on the shares in the Company.
Dividend plan	The Directors may adopt and implement a dividend plan under which, among other things, a member may elect that dividends payable by the Company be reinvested by way of subscription for Shares in the Company.
Issue of further Shares	The Directors may, on behalf of the Company, issue, grant options over or otherwise dispose of unissued shares in the Company to any person on the terms, with the rights, and at the times that the Directors decide. However, the Directors must act in accordance with the restrictions imposed by the Constitution, the ASX Listing Rules, the Corporations Act and any rights for the time being attached to special classes of shares in the Company.
Transfer of Shares	Subject to the Constitution, the Corporations Act, the ASX Settlement Operating Rules and the ASX Listing Rules, the Shares are freely transferable. Shares may be transferred by a proper transfer effected in accordance with the ASX Settlement Operating Rules, by any other method of transferring or dealing introduced by the ASX and as otherwise permitted by the Corporations Act or by a written instrument of

	transfer in any usual form or in any other form approved by the directors that is permitted by the Corporations Act. The Board may refuse to register a transfer of Shares in the circumstances described in the Constitution and where permitted to do so under the ASX Listing Rules. If the Board refuses to register a transfer, the Company must, within five business days after the transfer was delivered to the Company, give the lodging party written notice of the refusal and the reasons for refusal. The Board must refuse to register a transfer of shares when required by law, including the Corporations Act, by the ASX Listing Rules or by the ASX Settlement Operating Rules.
Partly paid shares	The Directors may, subject to compliance with the Constitution, the Corporations Act and the ASX Listing Rules, issue partly-paid shares in the Company upon which amounts are or may become payable at a future time in satisfaction of all or part of the unpaid issue price.
Winding up	If the Company is wound up, the liquidator may, with the sanction of a special resolution of the Company, divide among the Shareholders in kind the whole or any part of the property of the Company and may for that purpose set such value as the liquidator considers fair on any property to be so divided and may determine how the division is to be carried out as between the Shareholders or different classes of shareholders. Subject to the rights of holders of shares in the Company with special rights in a winding up, the Constitution and the terms of issue of shares in the Company, if the Company is wound up, members, including holders of Shares will be entitled to participate in any surplus assets of the Company remaining after payment of its debts, in proportion to the shares in the Company held by them respectively irrespective of the amount paid up or credited as paid up on the shares in the Company.
Variation of rights	At present, the Company has on issue one class of shares only, namely the Shares. The rights attached to the shares in any class may be altered only if authorised by a special resolution passed at a separate meeting of the holders of the issued shares in the Company of the affected class, or with the written consent of the holders of at least three quarters of the issued shares of the affected class of shares in the Company.
Directors	The Constitution states that the minimum number of Directors is three.
Powers of the Board	The Directors have the power to manage the business of the Company and may exercise that power to the exclusion of the members, except as otherwise required by the Corporations Act, any other law, the ASX Listing Rules or the Constitution.
Listing Rules	If the ASX Listing Rules require the Constitution to contain a provision or not to contain a provision the Constitution is deemed to contain that provision or not to contain that provision (as the case may be). If any provision of the Constitution is or becomes inconsistent with the Listing Rules, the Constitution is deemed not to contain that provision to the extent of the inconsistency.
Alteration to the constitution	The Constitution can only be amended by special resolution passed by at least 75% of the votes cast by holders of Shares in the Company entitled to vote on the resolution. At least 28 days' written notice, specifying the intention to propose the resolution as a special resolution, is required.

6 Additional Information

6.1 Lead Manager Mandate

The Company appointed Oakley Capital Partners Pty Ltd as lead manager to the March Placement and June Placement pursuant to the Lead Manager Mandate. The Company has also appointed the Lead Manager as its ongoing adviser on equity capital raising matters for a period of 12 months (unless automatically extended for a further 12 months where the Lead Manager raises an aggregate of \$5 million via equity during the initial 12 month term).

The key terms of the Lead Manager Mandate are set out below:

- (a) **Lead Manager services:** In respect of the March Placement, the Lead Manager assisted the Company in marketing and facilitating demand, and has and will provide the same services in respect of the June Placement. The Lead Manager will also provide the Company with ongoing corporate and strategic advisory services.
- (b) **Capital raising fees:**
 - (i) **Cash Fee:** The Company will pay the Lead Manager a capital raising fee of 6% of funds raised from the issue of March Shares under the March Placement and Non-LM June Shares under the June Placement (respectively).
 - (ii) **March Lead Manager Shares:** The Company has issued 12,500,000 fully paid ordinary Shares to the Lead Manager (and/or its nominee(s)). The issue of these shares was subject to shareholder approval, which the Company received at its extraordinary general meeting held on 29 May 2026.
 - (iii) **March Lead Manager Options:** The Company has agreed to issue up to 111,196,552 March Lead Manager Options (exercisable at \$0.05 per option and expiring on 29 January 2028) on the basis of 0.6 of a March Lead Manager Option for every one March Option issued under the March Placement (with fractional entitlements to a March Lead Manager Option rounded up to the nearest whole March Lead Manager Option) to the Lead Manager (and / or its nominee(s)). The March Lead Manager Options will have the same terms and conditions as the March Options.

The issue of the March Lead Manager Options was subject to shareholder approval, which the Company received at its extraordinary general meeting held on 29 May 2026.

 - (iv) **June Lead Manager Options:** The Company has agreed to issue up to 48,862,918 June Lead Manager Options (exercisable at \$0.18 per option and expiring on 9 July 2030) on the basis of 0.65 of a June Lead Manager Option for every one Non-LM June Share issued under the June Placement (with fractional entitlements to a June Lead Manager Option rounded up to the nearest whole June Lead Manager Option) to the Lead Manager (and / or its nominee(s)).

The Lead Manager has provided a firm commitment to the Company to subscribe for up to 9,396,715 June Shares (and attaching June Options) under the June Placement Offer (for a total value of \$939,671.50). Accordingly, the maximum number of June Lead Manager Options to be issued under the June Lead Manager Options Offer is calculated based on 75,173,720 Non-LM June Shares.

The Company intends to issue the June Lead Manager Options using its existing placement capacity under Listing Rules 7.1 and / or 7.1A.  - (ii) **Block trades:** The Lead Manager will be entitled to a fee equal to 6% of the gross proceeds of any block trade of shares held by Lind Global Fund II LP and The Lind Partners LLC (and its related entities) that is arranged by the Lead Manager within 3 months after completion of the Placement, but no fee is payable in respect of on-market sales conducted independently by Lind Partners without the involvement of the Lead Manager.
 - (iii) **Out of Scope Corporate Fees:** The Lead Manager will invoice the Company for out of scope corporate advisory and business development services, additional marketing, promotion and general structural advice to the amount of \$939,671.50. The Company's obligation to pay this fee will be offset via Oakley's subscription of up to 9,396,715 June Shares (and attaching June Options) under the June Placement Offer (for a total value of \$939,671.50).
- (d) **Termination:** Either party may terminate the Lead Manager Mandate immediately by written notice if there is cause, or in the event of fraud or wilful misconduct by the other party.

6.2 Company is a disclosing entity

The Company is a 'disclosing entity' (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act, and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all ASX-listed companies, the Company is (subject to certain exceptions) required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company's securities. The Shares have been quoted on the official list of the ASX during the three months prior to the issue of this Prospectus.

This Prospectus is a 'transaction specific prospectus' to which the special content rules under section 713 of the Corporations Act apply. That provision allows the issue of a more concise prospectus in relation to an offer of securities, or options to acquire securities, in a class which has been continuously quoted by ASX in the three months prior to the date of the prospectus. In general terms 'transaction specific prospectuses' are only required to contain information in relation to the effect of the issue of new Shares on the Company and the rights and liabilities attaching to the new Shares. It is not necessary to include general information in relation to all of the assets and liabilities, the financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX, and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquiries as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act states that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with the ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of the ASIC; and
- (c) it will provide a copy of each of the following documents, free of charge, to any person on request between the date of issue of this Prospectus and the Closing Date (inclusive of both dates):
 - (i) the Annual Report being the most recent annual financial report of the Company lodged with the ASIC before the issue of this Prospectus; and
 - (ii) any continuous disclosure notices announced by the Company to the ASX after the lodgement of the Annual Report referred to in paragraph (i) above and before the lodgement of this Prospectus with ASIC.

Copies of documents lodged with the ASIC in relation to the Company may be obtained from, or inspected at an ASIC office.
