Pointerra Secures Multi-Year Contract with US Energy Utility Avista Corporation

Highlights

- **Three-year enterprise SaaS subscription executed with Avista Corporation, a vertically integrated Pacific Northwest electric and gas utility**
- **Subscription covers Pointerra3D Core and Utility Explorer, with SSO, MFA, and AWS-hosted data sovereignty in the US**
- **Additional Poles and Wires Analytics billed monthly at tiered consumption rates**
- **Total prepaid minimum contract value of A$0.22 million, with meaningful 3-year upside from Analytics usage as Avista scales its program**
- **Agreement establishes a persistent digital twin environment and provides an important platform for expansion of analytics mileage and user seats over the three-year contract term**

Pointerra Limited (ASX: 3DP) ("Pointerra"; "Company") is pleased to announce the execution of a three-year enterprise SaaS subscription agreement (“Agreement”) with Avista Corporation ("Avista"), a vertically integrated electric and gas utility headquartered in Spokane, Washington, serving customers across Washington, Idaho, and Oregon.

Under the Agreement, Avista will deploy Pointerra3D as its engineering-grade cloud data environment for a lidar-based digital twin across its transmission and distribution infrastructure. The subscription covers the Pointerra3D Core platform, providing Avista with a cloud-based Common Data Environment for grid asset intelligence, and Utility Explorer, a custom-configured asset engineering interface with pole inventory management, span geometry tools, and program management dashboards. Access is provisioned for users across Avista's vegetation management, engineering, design, and operations functions.

The Agreement also includes Pointerra's Poles and Wires Analytics billed monthly at contracted rates based on actual miles processed by Avista and allows Pointerra to grow ARR from Analytics usage as Avista expands the geographic scope of its digital twin program across its service territory.

The Agreement is subject to normal commercial terms and conditions, with Avista retaining perpetual, irrevocable ownership of all its digital twin assets produced under the Agreement, reinforcing Pointerra's positioning as an operational intelligence platform that builds durable internal customer capability.

This announcement has been approved by the Board.

About Avista Corporation

Avista Corporation is a Pacific Northwest investor-owned utility engaged in the generation, transmission, and distribution of electricity and the distribution of natural gas. Avista serves electric and natural gas customers in a service territory covering eastern Washington, northern Idaho, and parts of southern and eastern Oregon.

About Pointerra Limited (ASX: 3DP)

Pointerra Limited (ASX: 3DP) is an ASX-listed geospatial technology company that has developed Pointerra3D, a patented, AI-driven, cloud-based SaaS platform for the storage, processing, analysis and visualisation of massive 2D & 3D geospatial datasets. The platform enables organisations across utilities, defence and intelligence, survey and mapping, mining, oil and gas, and architecture, engineering and construction to develop persistent digital twins of physical infrastructure assets, using cloud-native analytics to drive condition-based operations, capital planning, and regulatory compliance, helping asset owners prioritise repairs and maintenance more precisely to reduce operating expenditure, while better targeting and sequencing capital works to optimise capital expenditure.
