archTIS Completes U.S. Department of Defense Development Project

Custom Development Milestone Delivered, Further Progressing U.S. DoD Enterprise Licensing Opportunity

Highlights

- Custom software development work for the U.S. Department of Defense (U.S. DoD) project that was announced in October 2025 has been completed, and the solution is now production-ready.
- Final third-party integration component on track for completion by the first week of February, with acceptance criteria agreed and timing confirmed by all parties.
- Both milestones support continued U.S. DoD engagement and progression toward a larger-scale licensing opportunity, consistent with previously disclosed strategic objectives.

archTIS Limited (ASX:AR9, OTCQB:ARHLF) (“archTIS” or the “Company”), a global provider of data-centric security solutions for the secure collaboration of sensitive information, provides the following update in relation to the U.S. Department of Defense custom development project announced in October 2025, which was initiated to deliver mission-specific capability enhancements and support progression toward a broader enterprise licensing arrangement.

The Company advises that all development work associated with this project has been completed and delivered, consistent with the objectives outlined in the October 2025 announcement. The only remaining activity relates to a third-party integration component that requires direct input and enablement from an external provider. The completion of this component is expected by early February.

All parties have acknowledged the completion and delivery criteria and have a shared understanding of the scope and timing of the remaining work.

As outlined in the October 2025 announcement, the successful completion of this custom development project is intended to support expanded deployment within secure Microsoft DoD365 environments and advance discussions regarding a larger-scale licensing opportunity. archTIS continues to engage constructively with relevant stakeholders as part of the go-forward process.

Kurt A. Mueffelman, Chief Strategy Officer and U.S. President, stated, “This milestone demonstrates archTIS’ ability to execute against U.S. DoD requirements and convert contracted development activities into production-ready capabilities. It also opens opportunities for collaboration with other coalition alliances and countries facing similar challenges.”

archTIS will provide further updates to the market as appropriate.
