

Exploration Report

Until June 30, 2026, ANTAM's total exploration preliminary unaudited cost of Rp72.60 billion focusing on gold, nickel and bauxite.

Jakarta, July 10, 2026

PT ANTAM (Persero) Tbk (ANTAM; IDX: ANTM; ASX: ATM) is pleased to announce its exploration report for periods ended June 30, 2026 in accordance with the Indonesia Stock Exchange listing rules.

ANTAM's exploration activities until June 30, 2026 were focused on gold, nickel and bauxite with total unaudited preliminary cost of Rp72.60 billion.

GOLD

Until June 30, 2026, ANTAM conducted gold exploration activities in Pongkor, West Java. In Pongkor, ANTAM conducted in underground drilling, surface drilling, traverse survey, geological mapping, sampling and geochemical analysis and also laboratory analysis.

NICKEL

ANTAM's nickel exploration activities as of 30 June 2026, were conducted in Southeast Sulawesi, specifically in Konawe Utara and Pomalaa, in North Maluku, including Morimoi and the Mining Business License Area (IUP) of ANTAM's subsidiary, PT Sumberdaya Arindo (PT SDA), located in Buli.

In Konawe Utara, exploration activities included single-tube drilling, geological mapping, grid surveying, core sampling, and laboratory analysis. In Pomalaa, activities comprised single-tube drilling, geological mapping, sampling, and chemical analysis.

In Morimoi, exploration activities carried out included single-tube drilling, geological mapping, sampling, and chemical analysis. Meanwhile, within PT SDA's Production Operation (OP) IUP area, exploration activities were primarily focused on completing the forestry permitting process.

Exploration Report

BAUXITE

ANTAM's bauxite exploration activities as of 30 June, 2026 were conducted in the Tayan and Landak areas of West Kalimantan. In Tayan, exploration activities included land permit identification, drilling, geological mapping, geodetic surveying, and geochemical analysis. In Landak, exploration activities included drilling, geological mapping, geodetic and geochemical surveys.

ANTAM through the Geomin Unit undertakes integrated mineral exploration activities which include area survey activities, geological exploration, geophysical exploration, geodesy survey, drilling, physical and chemical analysis, calculation of mineral reserves and resources supported by integrated Geographic Information System (GIS). Exploration activities conducted to ensure the adequacy of the Company's strategic mineral resources and reserves potential.

ANTAM'S EXPLORATION AREAS UNTIL JUNE 30, 2026

The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr. Bronto Sutopo who is a Member of The Australasian Institute of Mining and Metallurgy. Mr. Bronto Sutopo is a full-time employee of the company. Mr. Bronto Sutopo has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Bronto Sutopo consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
