QUARTERLY REPORT
PT ANTAM (PERSERO) TBK
(*Unaudited*)

For the Six-Month Period Ended June 30, 2026
ARBN - 087 423 998
Securities Ticker: ASX: ATM, IDX: ANTM

ANTAM integrates sustainability principles covering environmental, social, and governance (ESG) aspects through the implementation of responsible mining practices to generate long-term value for stakeholders.

HIGHLIGHTS

ANTAM recorded a 12% increase in gold production from its mines in 2Q26 to 232 kg (7,459 troy oz.), and gold production in 1H26 reached 433 kg (13,921 troy oz.). During the same period, gold sales totaled 18,080 kg (581,286 troy oz.).

Optimal nickel ore production and sales performance in 1H26 was in line with domestic demand, with production volume reaching 7.78 million wmt and sales volume totaling 6.77 million wmt.

Ferronickel sales in 1H26 increased by 32% to 7,605 TNi, with the all volume absorbed by export markets. During the same period, ferronickel production reached 7,788 TNi.

Bauxite sales in 1H26 rose by 24% to 1.26 million wmt, meanwhile bauxite production totaled 1.28 million wmt. Chemical Grade Alumina production and sales in 1H26 increased by 12% and 10% respectively, reaching 100,257 tons of alumina and 100,437 tons of alumina.

PRODUCTION AND SALES

During the first six month ended June 30, 2026 (January–June 2026, 1H26), ANTAM recorded positive production and sales performance amid the dynamics of the mining industry and fluctuating market conditions.

This achievement was supported by the implementation of operational excellence, production capacity optimization, and adaptive marketing strategies, enabling the Company to sustain sales volume growth and further strengthen its operational performance.

In addition to its focus on operational performance, ANTAM consistently integrates sustainability principles to its business activities through the implementation of responsible mining practices. This approach encompasses the integrated management of environmental, social, and governance aspects as part of the Company's commitment to creating long-term value and delivering sustainable benefits to all stakeholders.

GOLD

During the second quarter of 2026 (April–June 2026, 2Q26), gold production from Company's mine reached 232 kg (7,459 troy oz.), representing a 12% increase compared to gold production in the second quarter of 2025 (April–June 2025, 2Q25) of 208 kg (6,687 troy oz.). In 1H26, ANTAM recorded total gold production of 433 kg (13,921 troy oz.).

On the sales side, ANTAM gold sales volume in 2Q26 recorded 9,615 kg (309,129 troy oz.), resulting in cumulative gold sales volume in 1H26 of 18,080 kg (581,286 troy oz.).

ANTAM continues to offer high-quality and trusted Precious Metals products with greater accessibility through partnerships with domestic strategic partners. This collaborations also support to strengthening the national gold industry ecosystem and increasing the utilization of domestically sourced gold raw materials.

In line with evolving market demand, ANTAM continues to enhance its product offerings, services, and distribution channels to improve customer experience, expand market reach, and sustain the competitiveness of its gold business.

NICKEL ORE

In line with the optimization of mining activities and operational management, ANTAM's nickel ore production in 2Q26 reached 3.90 million wet metric tons (wmt). As a result, total nickel ore production in 1H26 amounted to 7.78 million wmt.

In 2Q26, nickel ore sales amounted to 3.37 million wmt. With these results, total nickel ore sales in 1H26 to 6.77 million wmt.

All nickel ore sales were allocated to the domestic market, both to meet internal requirements as feedstock for ANTAM's ferronickel plants and for sales to third parties, particularly domestic nickel smelters. This strategy is aligned with the Company's commitment to supporting the strengthening of the national mineral downstream industry ecosystem through the provision of reliable and sustainable raw material supply.

FERRONICKEL

In 2Q26, ANTAM’s ferronickel production amounted to 3,813 tons of nickel in ferronickel (TNi). Cumulatively, ferronickel production in 1H26 reached 7,788 TNi. ANTAM also carried out scheduled maintenance activities at its production facilities to support the management of ferronickel operations.

On the sales side, ANTAM recorded ferronickel sales volume of 4,802 TNi in 2Q26, an increase of 420% compared with sales in 2Q25 of 924 TNi. Cumulatively, ferronickel sales in 1H26 reached 7,605 TNi, an increase 32% compared to sales in 1H25 of 5,763 TNi. In line with this growth, ANTAM continues to optimize its marketing strategy and customer fulfillment efforts.

All ferronickel sales were absorbed by export markets, with the main destinations to China, India, and South Korea serving, which are key markets for the global stainless steel industry.

BAUXITE

ANTAM recorded bauxite production volume in 2Q26 of 650,791 wmt. Meanwhile, bauxite production in 1H26 reached 1.28 million wmt. ANTAM continues to manage its mining activities and washing plant facilities in accordance with operational conditions in the field.

ANTAM's bauxite production is utilized both as feedstock for the Chemical Grade Alumina (CGA) plant in Tayan, operated by PT Indonesia Chemical Alumina (PT ICA), and for sales to domestic customers.

On the sales side, bauxite sales volume in 2Q26 amounted to 663,942 wmt, an increase of 38% compared with bauxite sales in 2Q25 of 481,204 wmt. Meanwhile, bauxite sales in 1H26 reached 1.26 million wmt, an increase 24% compared to bauxite sales in 1H25 of 1.01 million wmt. All of ANTAM's bauxite sales were absorbed by the domestic market, in line with the Company's role in supporting the raw material requirements of the domestic processing industry.

CHEMICAL GRADE ALUMINA

In line with ANTAM's strategy to optimize the operations of its CGA plant, PT Indonesia Chemical Alumina (PT ICA) recorded Chemical Grade Alumina (CGA) production of 50,690 tons of alumina in 2Q26, an incresae 12% compared to 45,334 tons of alumina in 2Q25. Alumina production in 1H26 reached 100,257 tons of alumina, an increase 12% compared alumina sales in 1H25 of 89,385 tons of alumina.

Meanwhile, alumina sales volume in 2Q26 reached 51,364 tons of alumina, growing 9% compared to 47,060 tons of alumina in 2Q25. The alumina growth in 2Q26, contributed to total alumina sales in 1H26 of 100,437 tons of alumina, an increase of 10% compared to alumina sales in 1H25 of 91,109 tons of alumina.

STRENGTHENING THE MINERAL DOWNSTREAMING ECOSYSTEM FOR SUSTAINABLE CORPORATE BUSINESS

ANTAM continues to strengthen its business transformation through the development of integrated mineral downstream projects as a key pillar of its long-term growth strategy. This initiative is aligned with the Government's Asta Cita framework in promoting the downstream processing and industrialization of natural resources to enhance sustainable value creation within the country.

Through various strategic downstream projects, ANTAM plays a role in strengthening the national mineral industry value chain and supporting the enhancement of Indonesia's position in the global mineral value chain. These initiatives are aimed at developing a competitive and sustainable industrial ecosystem while increasing value creation for the national economy.

In the gold segment, ANTAM is developing a precious metals manufacturing facility within the Java Integrated Industrial and Ports Estate (JIIPE) in Gresik, East Java. The project represents a strategic initiative to increase manufacturing capacity, expand domestic market penetration, and enhance value creation from the precious metals business amid growing demand. The project is currently in the pre-execution phase in preparation for construction.

In the nickel segment, ANTAM has achieved several key milestones in its partnership project with HKCBL (CATL Group) to develop Indonesia's EV battery ecosystem. These milestones include the completion of preliminary works, permitting processes, and financing preparations to support the timely completion of construction. The project has entered the construction phase in East Halmahera, marked by the commencement of EPC construction activities in the fourth quarter of 2025 as part of the development of the national EV battery ecosystem.

ANTAM has also continued to demonstrate its strategic role in supporting the development of an integrated national battery ecosystem through a subsequent initiative with PT Industri Baterai Indonesia or Indonesia Battery Corporation (IBC) and strategic partner HYD Investment Limited, a consortium led by global corporation Zhejiang Huayou Cobalt Co., Ltd.

ANTAM, IBC, and HYD partner have signed a Framework Agreement as an initial framework to support the nickel downstream program and investment in an integrated battery ecosystem, which held on 30 January 2026. The Framework Agreement serves as the foundation for the development of an integrated investment covering the entire value chain, from nickel resource management and processing and refining activities to battery production.

Meanwhile, in the nickel segment ANTAM has undertaken the Government’s special assignments in order to accelerate nickel downstreaming and the development of the national electric vehicle battery ecosystem. The assignment comprises the development of an integrated nickel-based battery ecosystem from upstream to downstream activities, including mining, development of RKEF/RKSBF plants, HPAL facilities, refineries, precursor, cathode, battery cell manufacturing, as well as battery recycling facilities. The development of this ecosystem is expected to enhance the value added of national mineral resources, diversify the Company’s revenue streams, strengthen long-term business resilience, and support sustainable growth for stakeholders.

As part of its efforts to strengthen the downstream bauxite industry, ANTAM continues to drive the integration of the national aluminium industry through the commercial operation of the Phase I Smelter Grade Alumina Refinery (SGAR) Project in Mempawah, which commenced in February 2026 with a production capacity of 1 million tons of alumina per year. The project is operated by PT Borneo Alumina Indonesia (BAI), a joint venture between ANTAM and PT Indonesia Asahan Aluminium (Persero) (INALUM).

Following the start of commercial operations, ANTAM and its partner also conducted the groundbreaking ceremony for the SGAR Phase II Project in February 2026. The project is planned to add up to 1 million tons of alumina production capacity per year, to be developed in stages. This initiative is aimed at supporting the national downstreaming agenda while expanding ANTAM's role in enhancing raw material availability for the domestic manufacturing sector, as part of strengthening the national industrial value chain.

EXPLORATION ACTIVITIES

Exploration activities were undertaken to support the sustainability of the Company's mineral resource and reserve base, which is essential for long-term business growth. ANTAM's exploration efforts are focused on gold, nickel, and bauxite commodities to support operating activities and development projects. Total exploration expenditure in 1H26 (preliminary, unaudited) amounted to Rp72.60 billion.

As part of its strategy to expand its gold resource and reserve portfolio, ANTAM is prioritizing the identification of additional gold resources within existing IUP areas as well as other prospective areas.

ANTAM through the Geomin Unit undertakes integrated mineral exploration activities which include area survey activities, geological exploration, geophysical exploration, geodesy survey, drilling, physical and chemical analysis, calculation of mineral reserves and resources. This activities are supported by Geographic Information System (GIS).

GOLD

In 1H26, ANTAM conducted gold exploration activities in Pongkor, West Java. In Pongkor, ANTAM conducted in underground drilling, surface drilling, traverse survey, geological mapping, sampling and geochemical analysis and also laboratory analysis.

In line with its efforts to strengthen and expand its gold portfolio, ANTAM has been granted three Exploration and Research Assignment blocks by the Ministry of Energy and Mineral Resources in preparation of Mining Business License Areas in East Java. Across these blocks, the Company plans to conduct geological and geophysical mapping and survey activities in areas designated as Non-Forest Use. Meanwhile, for areas located within forest zones, the required survey permits will be obtained prior to the commencement of field activities.

NICKEL

In 1H26 ANTAM's nickel exploration activities were conducted in Southeast Sulawesi, specifically in North Konawe and Pomalaa, in North Maluku, including Marimoi and the Mining Business License Area (IUP) of ANTAM's subsidiary, PT Sumberdaya Arindo (PT SDA), located in Buli.

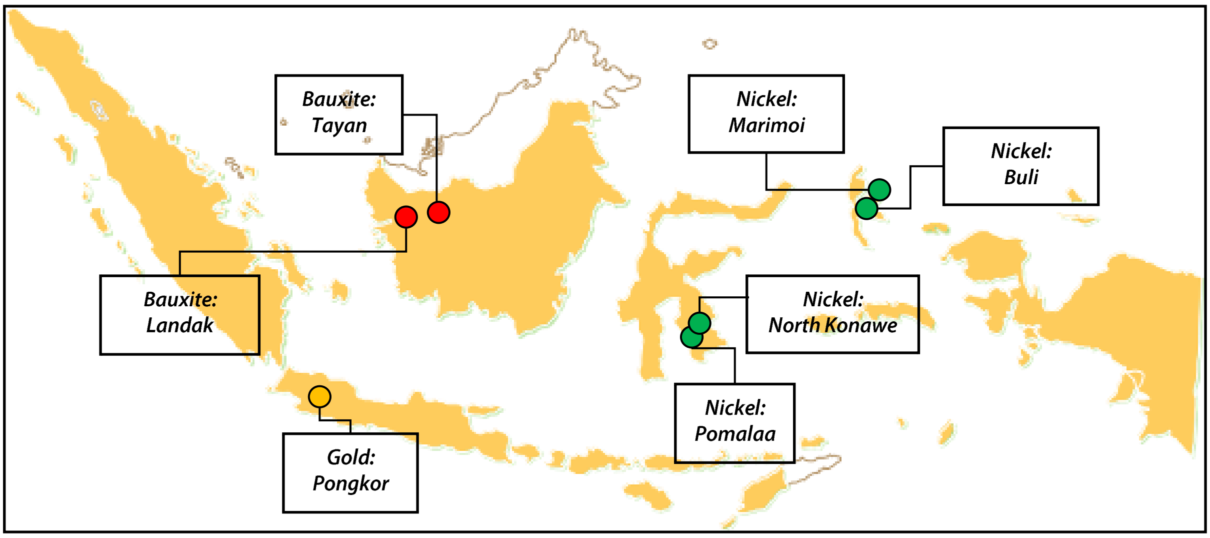
In North Konawe, exploration activities included single-tube drilling, geological mapping, grid surveying, core sampling, and laboratory analysis. In Pomalaa, activities comprised single-tube drilling, geological mapping, sampling, and chemical analysis.

In Marimoi, exploration activities carried out included single-tube drilling, geological mapping, sampling, and chemical analysis. Meanwhile, within PT SDA's Production Operation (OP) IUP area, exploration activities were primarily focused on completing the forestry permitting process.

BAUXITE

ANTAM's bauxite exploration activities in 1H26 were conducted in the Tayan and Landak areas of West Kalimantan. In Tayan, exploration activities included land permit identification, drilling, geological mapping, geodetic surveying, and geochemical analysis. In Landak, exploration activities included drilling, geological mapping, geodetic and geochemical survey.

ANTAM'S EXPLORATION AREAS AS OF JUNE 30, 2026



The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr. Bronto Sutopo who is a Member of The Australasian Institute of Mining and Metallurgy. Mr. Bronto Sutopo is a full-time employee of the company. Mr. Bronto Sutopo has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Bronto Sutopo consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

EXPLORATION & EXPLOITATION AREA (UNAUDITED)

ANTAM has exploration and exploitation areas covered by various mining business licenses with the following data:

Location	Exploration Mining Business Permits (IUP)	Operation Production IUP (IUP OP), Contract of Work (KK), Industrial Business License (IUI), Specific Mining Business License (IUP-OPK) for Processing and Refining
Owned by the Company

CORPORATE NEWS

ANTAM RECEIVES GREEN PROPER, STRENGTHENS COMMITMENT TO SUSTAINABLE ENVIRONMENTAL MANAGEMENT

On April 9, 2026, ANTAM has remains reaffirmed its commitment to sustainable environmental management by receiving the Green PROPER Award from the Ministry of Environment. This award was received by five ANTAM business units, namely Gold Mining Business Unit, West Kalimantan Bauxite Mining Business Unit, Precious Metals Processing and Refinery Business Unit, Kolaka Nickel Mining Business Unit, and the subsidiary PT Indonesia Chemical Alumina (ICA).

The Green PROPER achievement serves as recognition of ANTAM's efforts in implementing environmental and social management that goes beyond compliance, as well as its consistency in applying sustainability principles across all operational lines of the Company.

ANTAM consistently implements various environmental initiatives, including responsible waste management, energy efficiency, greenhouse gas emission reduction, and reclamation and revegetation programs in its operational areas. In addition, the Company also develops environment-based community empowerment programs that provide added value to the surrounding communities.

ADVANCING THE BULLION INDUSTRY, BSI AND ANTAM EXPAND THEIR SYNERGY

On April 13, 2026, PT Bank Syariah Indonesia (Persero) Tbk (BSI) and ANTAM have established a strategic partnership to accelerate the development of an integrated gold ecosystem while encouraging the public to the adoption of modern, digital gold investment solutions. This strategic move was marked by the signing of a Memorandum of Understanding (MoU) on gold product development and business collaboration.

This collaboration is not merely a continuation, but an expansion of a partnership that has been built over more than 10 years. It reflects a strong commitment to advancing the government's Asta Cita agenda by strengthening the role of bullion banks through gold monetization and a sustainable gold ecosystem.

BSI and ANTAM have agreed to enhance collaboration across physical gold trading through digital access, strengthening retail distribution, and synergizing marketing, literacy, and public education on gold investment.

Through this partnership, BSI and ANTAM are committed to elevating their capabilities by strengthening an accessible and secure gold ecosystem. This initiative also reflects a commitment to "Serving with Heart," by upholding Good Corporate Governance (GCG) principles and ensuring all implementations comply with applicable regulations.

STRENGTHENING THE NATIONAL GOLD ECOSYSTEM, PT PEGADAIAN AND ANTAM FORGE A STRATEGIC PARTNERSHIP IN PRECIOUS METALS TRADING

On May 25, 2026, as part of efforts to strengthen the national gold ecosystem and reinforce synergy among State-Owned Enterprises, PT Pegadaian (Pegadaian) and ANTAM officially signed a Precious Metals Product Sale and Purchase Agreement. This strategic initiative is focused on optimizing supply availability and expanding the distribution network for precious metals products across Indonesia.

The partnership reflects the shared commitment of both companies to strengthen a secure and integrated supply chain for precious metals products in the domestic market. Leveraging ANTAM's strengths as a leading precious metals producer and Pegadaian's position as a market leader in the gold ecosystem, this collaboration is expected to further expand the gold businesses of both companies.

Through the signing of this agreement, both companies reaffirm their commitment to making a tangible contribution to national economic stability by strengthening access to safe-haven investment instruments that are secure and internationally standardized.

ANTAM HELD ANNUAL GENERAL MEETING OF SHAREHOLDER FOR FINANCIAL YEAR 2025

On June 10, 2026 ANTAM held Annual General Meeting of Shareholder for Financial Year 2025 ("**AGMS 2025**") in Jakarta. At the AGMS 2025, shareholders approved including the allocation of the Company's net profit, and changes in the composition of management.

In the AGMS 2025, shareholders also approved the Company's plan to accept a special assignment from the Government in order to accelerate the nickel downstreaming program and the development of the national electric vehicle battery ecosystem.

The assignment comprises the development of an integrated nickel-based battery ecosystem from upstream to downstream activities, including mining, development of RKEF/RKSBF plants, HPAL facilities, refineries, precursor, cathode, battery cell manufacturing, as well as battery recycling facilities.

AGMS 2025 also approved changes to the composition of the Company's management, as well as changes to the nomenclature of positions within the Company's Board of Directors. In addition, the shareholders approved the reassignments of duties among the member of Company's Board of Directors.

ANTAM INVOLVES 551 BLOOD DONORS TO SUPPORT PUBLIC HEALTH SERVICES AND CANCER PATIENTS

On June 19, 2026, ANTAM continues to strengthen its commitment to supporting public health through a blood donation program, implemented as part of the company's Fit Forward Program and employee volunteering initiatives. Throughout the period of January to June 2026, this activity successfully involved 551 blood donors who contributed to meeting the blood needs of healthcare facilities, including cancer patients who require ongoing blood transfusions.

The implementation of the blood donation program is carried out through a series of stages, starting from socialization and participant registration, health screening, the blood donation process, post-donation condition monitoring, to the distribution of blood to the Dharmais Cancer Hospital and PMI to broadly support public health services.

In addition to providing direct benefits to the recipients, this program also strengthens a culture of care, solidarity, and the spirit of volunteerism in the workplace. This initiative also supports the achievement of the Sustainable Development Goals (SDGs), particularly Goal 3: Good Health and Well-being, and Goal 17: Partnerships for the Goals.

ANTAM REJOINS THREE KEHATI ESG INDICES FOR THE JUNE - NOVEMBER 2026 PERIOD

On June 19, 2026, ANTAM remains part as a constituent of three leading Environmental, Social, and Governance (ESG) indices in the Indonesian capital market, namely the SRI-KEHATI Index, ESG Quality 45 IDX KEHATI Index, and ESG Sector Leaders IDX KEHATI Index for the June–November 2026 period. This recognition further strengthens ANTAM's position as a national mining company that consistently implements sustainable business practices and good corporate governance.

The SRI-KEHATI Index, ESG Quality 45 IDX KEHATI Index, and ESG Sector Leaders IDX KEHATI Index are index developed by the IDX in collaboration with the KEHATI Foundation to recognize companies that demonstrate excellence in sustainability performance, governance quality, and the creation of sustainable economic value.

ANTAM's inclusion in these three indices reflects the Company's progress in integrating ESG principles into its business strategy, risk management, and corporate decision-making processes. The recognition further enhances ANTAM's visibility among investors who consider ESG factors in their investment decisions. ANTAM remains committed to strengthening the integration of ESG principles across its business strategy, risk management, and corporate governance to support responsible mining practices and sustainable long-term growth.

ANTAM RECEIVES RECOGNITION AT THE 16TH INSTITUTIONAL INVESTOR CORPORATE AWARDS 2026

On June 29, 2026, ANTAM achieved another international recognition. At the 16th Institutional Investor Corporate Awards 2026, organized by Alpha Southeast Asia, ANTAM won awards in four categories.

The four awards received by ANTAM were 1st rangking for Best Senior Management IR Support, 1st ranking for Most Consistent Dividend Policy, 2nd ranking for Strongest Adherence to Corporate Governance, and 4th rangking for Most Organised Investor Relations. In addition, ANTAM's Director of Finance and Risk Management was recognized as the Best CFO in Indonesia.

The awards presented by Alpha Southeast Asia were based on the results of voting conducted among approximately 580 investors and analysts from Southeast Asia, the United States, and Europe. The survey was carried out from late January to late April 2026 and involved a broad range of financial professionals, including fund managers, insurance companies, pension funds, fixed-income brokers, and analysts.
