

Cleansing Notice under Section 708A(5)(e)

MINNEAPOLIS, United States and BRISBANE, Australia July 31, 2026: Anteris Technologies Global Corp. (Anteris or the Company) (NASDAQ: AVR, ASX: AVR) a global healthcare company committed to designing, developing, and commercializing cutting-edge medical devices to restore healthy heart function, announces that on July 29, 2026 US Eastern time (July 30, 2026 AEST), the Company issued 3,000 CHES Depositary Interests in the Company (**Shares**) to investors upon the conversion of 3,000 unlisted CDI warrants at A\$11.50 each raising A\$34,500.

Anteris gives notice under section 708(5)(e) of the *Corporations Act 2001* (Cth) (the **Corporations Act**)¹, that:

1. the Company issued the Shares without disclosure to investors under Part 6D.2 of the Corporations Act²;
2. as at the date of this Notice, the Company has complied with:
 - (a) section 601CK of the Corporations Act; and
 - (b) sections 674 and 674A of the Corporations Act; and
3. as at the date of this Notice, there is no 'excluded information' of the type referred to in sections 708A(7) and 708A(8) of the Corporations Act which is required to be disclosed by Anteris under section 708A(6)(e) of the Corporations Act.

ENDS

¹ As modified by ASIC Corporations (Offers of CHES Depositary Interests) Instrument 2025/180.

² The reference to disclosure is a reference to a disclosure document issued under the Corporations Act.

About Anteris

Anteris Technologies Global Corp. (NASDAQ: AVR, ASX: AVR) is a global healthcare company committed to designing, developing, and commercializing cutting-edge medical devices to restore healthy heart function. Founded in Australia, with a significant presence in Minneapolis, USA, Anteris is a science-driven company with an experienced team of multidisciplinary professionals delivering restorative solutions to structural heart disease patients.

Anteris' lead product, the DurAVR® Transcatheter Heart Valve ("THV"), was designed in collaboration with the world's leading interventional cardiologists and cardiac surgeons to treat aortic stenosis – a potentially life-threatening condition resulting from the narrowing of the aortic valve. The balloon-expandable DurAVR® THV is the first biomimetic valve, which is shaped to mimic the performance of a healthy human aortic valve and aims to replicate normal aortic blood flow. DurAVR® THV is made using a single piece of molded ADAPT® tissue, Anteris' patented anti-calcification tissue technology. ADAPT® tissue, which is FDA-cleared, has been used clinically for over 10 years and distributed for use in over 55,000 patients worldwide. The DurAVR® THV System is comprised of the DurAVR® valve, the ADAPT® tissue, and the balloon-expandable ComASUR® Delivery System.
