1. HIGHLIGHTS

- The Company and MinRes continues to advance the Marillana Project in accordance with the agreed Indicative Development Proposal for the project.
- Mineral Resources Ltd continues to work with Hancock Prospecting Pty Ltd to progress studies and arrangements that will eventuate into an infrastructure solution for the Marillana product.
- Social Surrounds consultation with the Traditional Owners of Marillana Project continued during the quarter.

2. PROJECT ACTIVITIES

Exploration Activities

Marillana

Brockman Iron Pty Ltd ("Brockman Iron") and Polaris Metals Pty Ltd ("Polaris"), a wholly owned subsidiary of Mineral Resources Limited ("MinRes"), entered into a farm-in and joint venture agreement ("FJV Agreement") pursuant to which subject to the terms and conditions therein, Polaris may farm-in by satisfying the farm-in obligations and earn a 50% interest in the Marillana Project. For details of the transaction please refer to the Company's announcement dated 26 July 2018.

On the 22 April 2021, Brockman Iron and Polaris signed an Amended and Restated FJV Agreement and Deed of Amendment and Restatement (collectively the "Agreement"). Both Brockman Iron and Polaris concluded that the Farm-in Obligations under the Agreement had been satisfied and the parties formed the Joint Venture on that date. As such, Polaris now holds a 50% interest in the Marillana Project ("the Farm-in interest").

MinRes has prepared for the Brockman /MinRes Joint Venture indicative Development Proposals, which include the following:

1. Development of the Marillana and Ophthalmia Projects.
2. Following the establishment of the Joint Venture, MinRes (or its Related Party) agrees to provide the Joint Venturers with funding by way of a project loan sufficient to allow the Joint Venturers to fund the forecast project capital costs for each development.
3. A build own and operate arrangement between the Joint Venturers and MinRes for certain non-processing infrastructure at Marillana.
4. A build own and operate arrangement for the crushing plant at Ophthalmia.

5. A logistics system to transport the ore from the mines to the port stockyard at Port Hedland.
6. Construction of a berth in Port Hedland (subject to the approval from the State Government of Western Australia).
7. An estimate of the project capital and operating costs, including the logistics service costs for transporting the ore from mine to ship.

Initial Development Works

Confirmatory technical and due diligence studies by Polaris are completed. This work has shown that a modified process flow sheet could provide enhanced yields of over 45% whilst maintaining product quality above 61.5% Fe. Sinter testwork on the resulting product has shown that Marillana Fines can substitute for other Australian fines products in a typical Chinese coastal steel mill blend whilst maintaining good physical and metallurgical properties and sinter performance. Materials handling testwork for Marillana ore, product, waste, and intermediate process streams has been completed and the results indicate no materials handling issues.

Work continues to focus on development of updated environmental management and monitoring plans to support development of the project. Water management and greenhouse gas modelling and management plans are being revised and continued monitoring of ecological communities, weeds and regional hydrological baseline data has also been carried out. This work ensures continued compliance with all existing approvals.

Extensive Social Surrounds consultation with the Traditional Owners has commenced and will continue through 2026. The requirement for Social Surrounds consultation is a recent (post issue of the Marillana Project Ministerial Statement in February 2011) of the amendment to the Western Australian environmental approvals legislation and so has not previously been carried out.

The Brockman and MinRes JV continuously reviews various solutions and options to

ensure Marillana products can reach export markets in the most efficient manner.

Infrastructure

In November 2021 MinRes announced that they had entered into an agreement with Hancock Prospecting Pty Limited ("Hancock") and Roy Hill Holdings Pty Limited ("Roy Hill") in which MinRes and Hancock will jointly investigate the development of a new iron ore export facility at the port of Port Hedland's Stanley Point Berth 3 ("SP3") in South West Creek. Roy Hill will provide services to both MinRes and Hancock for development and operation of their projects, including rail haulage.

On 1 February 2022, the Government of Western Australia announced that it had granted a port capacity allocation to the MinRes – Hancock JV, at Stanley Point Berth 3 in South West Creek. MinRes has advised that based on this allocation the Marillana Project has available port capacity to meet the joint operation production requirements. The new iron ore export facility at SP3 remains subject to various approvals and agreements to develop and operate, along with a positive final investment decision by MinRes and Hancock. MinRes continues to work with Hancock and Roy Hill to provide an infrastructure solution for the Marillana Project and to advance the consents, approvals and engineering studies required to support the final investment decision.

Ophthalmia

Under the joint venture cooperation between Polaris and Brockman, Polaris is

responsible for the programme of works for the Ophthalmia Iron Ore Project. Both Polaris and Brockman have subsequently agreed to reduce the programme of works in the absence of an infrastructure solution for the project. A workable solution is being explored.

Regional development

During the quarter, the Company completed the ethnographic and archaeological heritage survey at Duck Creek East. The Company will review the findings of the heritage survey when they become available.

Mining Production and Development Activities

No mining production and development activities, including expenditure has been undertaken or recognised for the quarter.
