ASX Announcement 30 April 2026

Bridge March 2026 Quarterly Update

Bridge SaaS Limited (ASX: BGE) ('Bridge' or the **'Company')** provides the following update on its activities for the quarter ended 31 March 2026, together with its Appendix 4C Quarterly Cash Flow Report. Bridge is the parent entity of an operating group delivering disability and community-based services across Australia.

The Company holds a 51% controlling interest in Brightside Disability Support & Respite Pty Ltd ('**Brightside'**) and has established Bridge Disability Support Pty Ltd in New South Wales, a wholly owned subsidiary, as part of its planned national expansion strategy.

Operating focus

During the quarter, Bridge continued to operate and refine its existing disability services footprint, including community-based supports, respite services and Supported Independent Living ('SIL') homes. This operating base provides Bridge with direct insight into participant needs, support-worker availability, rostering, continuity of care, incident management, compliance, documentation and the practical requirements of delivering safe, high-quality NDIS supports.

Bridge is using these learnings to inform the next stage of development of its core software suite. The Company's objective is to develop a technology-enabled model that supports more efficient participant and worker matching, onboarding, rostering, care notes, handovers, incident reporting, compliance workflows and communication between participants, families, support workers and providers.

Software platform opportunity

Bridge considers there is a clear market opportunity for software-led disability support models that combine the flexibility of platform businesses with the governance, compliance and service quality required in the regulated NDIS environment. The Company's product direction is informed by Australian care and disability platforms such as HireUp and Mable, which have demonstrated the demand for digital models that connect participants with support workers and care teams.

Recent media reporting regarding Mable, including reports of a potential liquidity transaction or listing pathway, highlights the scale and strategic value that may attach to technology-enabled care platforms in Australia. Bridge's strategy is to build from its own operating base, using practical service-delivery experience to develop software tools that are designed for the realities of NDIS-funded supports.

AI, automation and robotics

Bridge has also commenced early-stage work assessing how AI-enabled tools, automation and robotics may assist the delivery of disability supports, particularly in home and SIL environments.

Potential applications include AI-assisted rostering and worker matching, automated care documentation, escalation prompts for incidents and missed supports, smart-home monitoring, medication and routine reminders, falls and movement detection, and robotics or assistive devices that can support daily living tasks. Over time, these technologies may help reduce avoidable administration, minimise duplicated or inefficient service delivery, improve visibility over support outcomes and assist providers to deliver safer care at lower cost.

The Company notes ongoing public and government focus on NDIS sustainability, including cost growth, provider oversight, fraud prevention and participant outcomes. Bridge believes that technology, AI and robotics have the potential to support the long-term sustainability of the NDIS by improving efficiency while also enhancing safety, quality and participant choice.

Brightside and NSW expansion

Brightside continued to deliver stable and high-quality services during the quarter, with a focus on participant engagement, family support, workforce consistency and continuity of care. Brightside remains an important operating asset for Bridge and continues to provide practical insights into the systems, processes and technologies required to deliver compliant and scalable disability supports.

In New South Wales, Bridge continued to progress its operations through Bridge Disability Support Pty Ltd. The Company's first SIL residence in Southwest Sydney, which opened in November 2025, continues to provide Bridge with direct exposure to supported accommodation and the operational requirements of SIL service delivery. These learnings are expected to inform Bridge's broader software, AI and assistive-technology roadmap.

Cash and expenditure.

During the quarter, cash receipts totalled approximately $2,789,886 including Brightside. The Company had a total cash balance of $202,879 as of 31 Mar 2026.

Financing activities include the final earn-out payment relating to the prior acquisition of Brightside. No further earn-out obligations remain.

The following table sets out the information as required by ASX Listing Rule 4.7C.3 regarding payments to related parties of the entity and their associates was $22,000.

This announcement was authorised for release by the Board of BGE.
