Amended Appendix 5B & Quarterly Report

Following the release of the June 2026 Quarterly Activities Report and Appendix 5B, the Company identified an Excel data error affecting certain reported amounts. The Company has corrected the error and released revised versions of the Quarterly Activities Report and Appendix 5B.

Release authorised by the Board of Battery Age Minerals Ltd.

Forward-Looking Statement

Appendix 5B

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Name of entity

BATTERY AGE MINERALS LTD

ABN	Quarter ended ("current quarter")
80 085 905 997	30 June 2026

Consolidated statement of cash flows		Current quarter $A'000	Year to date (12 months) $A'000
1.	**Cash flows from operating activities**		
1.1	Receipts from customers	-	-
1.2	Payments for		
	(a) exploration & evaluation	(11)	(142)
	(b) development	-	-
	(c) production	-	-
	(d) staff costs	(97)	(819)
	(e) administration and corporate costs	(391)	(1,769)
1.3	Dividends received (see note 3)	-	-
1.4	Interest received	17	23
1.5	Interest and other costs of finance paid	-	-
1.6	Income taxes paid	-	-
1.7	Government grants and tax incentives	-	-
1.8	Other (provide details if material	-	-
1.9	**Net cash from / (used in) operating activities**	**(482)**	**(2,707)**

2.	**Cash flows from investing activities**		
2.1	Payments to acquire or for:		
	(a) entities	-	-
	(b) tenements	-	-
	(c) property, plant and equipment	-	-
	(d) exploration & evaluation	(120)	(3,315)
	(e) investments	-	-
	(f) other non-current assets	-	-

	Consolidated statement of cash flows	Current quarter $A'000	Year to date (12 months) $A'000
2.2	Proceeds from the disposal of:		
	(a) entities	-	-
	(b) tenements	-	-
	(c) property, plant and equipment	-	-
	(d) investments	-	-
	(e) other non-current assets	-	-
2.3	Cash flows from loans to other entities	-	-
2.4	Dividends received (see note 3)	-	-
2.5	Other (provide details if material)	-	-
2.6	**Net cash from / (used in) investing activities**	**(120)**	**(3,315)**

3.	**Cash flows from financing activities**		
3.1	Proceeds from issues of equity securities (excluding convertible debt securities)	-	8,500
3.2	Proceeds from issue of convertible debt securities	-	-
3.3	Proceeds from exercise of options	-	-
3.4	Transaction costs related to issues of equity securities or convertible debt securities	-	(522)
3.5	Proceeds from borrowings	-	-
3.6	Repayment of borrowings	(14)	(42)
3.7	Transaction costs related to loans and borrowings	-	-
3.8	Dividends paid	-	-
3.9	Other (leases)	-	-
3.10	**Net cash from / (used in) financing activities**	**(14)**	**7,936**

4.	**Net increase / (decrease) in cash and cash equivalents for the period**		
4.1	Cash and cash equivalents at beginning of period	2,571	41
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(482)	(2,707)
4.3	Net cash from / (used in) investing activities (item 2.6 above)	(120)	(3,315)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	(14)	7,936

Consolidated statement of cash flows		Current quarter $A'000	Year to date (12 months) $A'000
4.5	Effect of movement in exchange rates on cash held	-	-
4.6	**Cash and cash equivalents at end of period**	**1,955**	**1,955**

5.	**Reconciliation of cash and cash equivalents** at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	**Current quarter $A'000**	**Previous quarter $A'000**
5.1	Bank balances	55	165
5.2	Call deposits	1,900	2,406
5.3	Bank overdrafts	-	-
5.4	Other (Directors Capital Raise Feb 25)	-	-
5.5	**Cash and cash equivalents at end of quarter (should equal item 4.6 above)**	**1,955**	**2,571**

6.	**Payments to related parties of the entity and their associates**	**Current quarter $A'000**
6.1	Aggregate amount of payments to related parties and their associates included in item 1	(49)
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

7.	**Financing facilities** *Note: the term "facility' includes all forms of financing arrangements available to the entity.* *Add notes as necessary for an understanding of the sources of finance available to the entity.*	**Total facility amount at quarter end $A'000**	**Amount drawn at quarter end $A'000**
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other	-	-
7.4	**Total financing facilities**	-	-

7.5	**Unused financing facilities available at quarter end**	-

7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.

8.	**Estimated cash available for future operating activities**	**$A'000**
8.1	Net cash from / (used in) operating activities (item 1.9)	(482)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(120)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(602)
8.4	Cash and cash equivalents at quarter end (item 4.6)	1,955
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	1,955
8.7	**Estimated quarters of funding available (item 8.6 divided by item 8.3)**	3.25

Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: NA

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: NA

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer**:** NA

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: 31 July 2026

Authorised by: The Board of Battery Age Minerals Ltd
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the

[*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.

Battery Age Minerals

June 2026 Quarterly Activities Report

Key highlights:

- **Multiple Priority Targets Defined at Apex**
  High-resolution satellite remote sensing and structural interpretation across the Apex North, East and South tenements defined 14 first-priority and 7 second-priority target areas, several in geological settings analogous to the historic high-grade Apex Mine. Battery Age plans to commence field exploration at the Apex Project during the next quarter, comprising surface geological mapping and rock chip/soil sampling of the priority targets identified through the hyperspectral remote sensing survey completed during the Quarter.

- **Additional Bleiberg Drilling Permits Submitted**
  Battery Age submitted additional drilling permit applications to the Austrian authorities for drill holes testing potential strike extensions of mineralisation directly to the west of the historic Bleiberg operation.

- **Germanium Technology Licence Finalised**
  Exclusive worldwide commercial licence agreement over germanium-related technology portfolio, converting the Company's evaluation licence into a commercial arrangement and strengthening downstream specification know-how.

- **Admitted to U.S. Defense Industrial Base Consortium (DIBC)**
  Battery Age was accepted as a member of the DIBC, a U.S. Government-supported consortium operating under the Department of War's Other Transaction Authority, opening a direct channel to engage with DOW- sponsored critical minerals programs and defence supply chain initiatives.

- **Strong Cash and Listed Investment Position**
  The Company closed the Quarter with cash and cash equivalents of A$1.955 million, in addition to listed company investment holdings valued at approximately A$1.3 million at 30 June 2026, supporting ongoing exploration activities across the Company's project portfolio and advancement of its integrated germanium strategy.

Battery Age Minerals Ltd (ASX: BM8, "Battery Age" or "the Company") presents this Quarterly Activities Report for the three-month period ended 30 June 2026 ("Quarter"), summarising exploration, technical, financial and corporate activities undertaken across the Company's project portfolio in Austria, Argentina, the United States and Canada and progress of its integrated germanium initiatives to build exposure to a secure, Western-aligned supply of germanium, a critical material used across advanced technology supply chains.

Project Activities

Apex Germanium-Gallium project (Utah, USA)

Following the staking of an additional 51 unpatented lode mining claims reported in the prior Quarter, which expanded the Apex Project landholding by approximately 40% to 186 claims covering approximately 3,728 acres (15.09 km²), and secured the Apex East block of prospective ground immediately adjacent to the historic high-grade Apex Mine, the Company advanced target definition across the enlarged tenure during the Quarter.

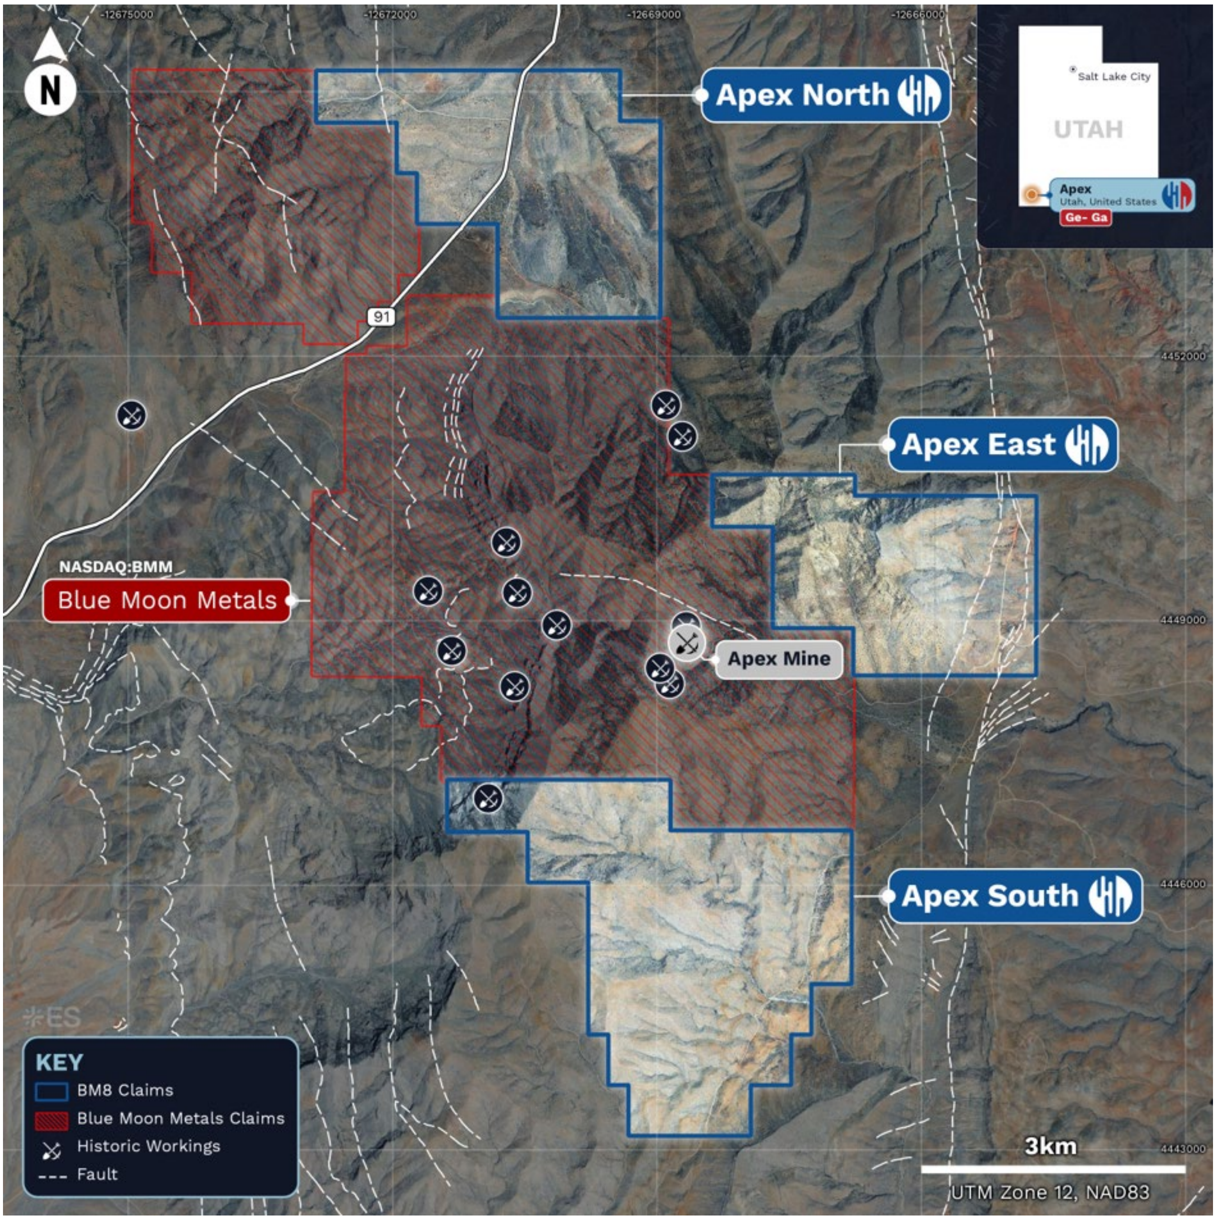

Figure 1: Location of the Apex claim blocks.

Battery Age completed a high-resolution satellite-based remote sensing and structural interpretation study over its Apex Germanium-Gallium Project, covering the North, East and South tenements in Washington County, Utah, USA. The survey, interpreted by Brisbane based remote sensing consultancy Geo Spectra Pty Ltd, integrated newly-acquired WorldView-3 satellite imagery (0.31 m panchromatic; 1.24 m VNIR) with publicly available

ASTER and Sentinel-2A multispectral data and a LiDAR-derived Digital Elevation Model, across approximately 65 km² of detailed coverage within a broader ~1,500 km² regional study area.

Integration of mineral alteration, structural and geological datasets generated 14 first-priority and 7 second-priority targets across the three Apex tenements. Target generation focused on discrete iron oxide and goethite anomalies, clay-carbonate-silica alteration responses, and northwest- and northeast-trending fault corridors and their intersections with north-south striking faults, interpreted as potential structural controls on carbonate-hosted polymetallic (Cu-Pb-Zn-Ga-Ge) mineralisation. Several priority targets occur in geological and structural settings considered analogous to the historic high-grade Apex Mine, a past-producing carbonate-hosted germanium-gallium-copper operation recently acquired by NASDAQ-listed Blue Moon Metals.

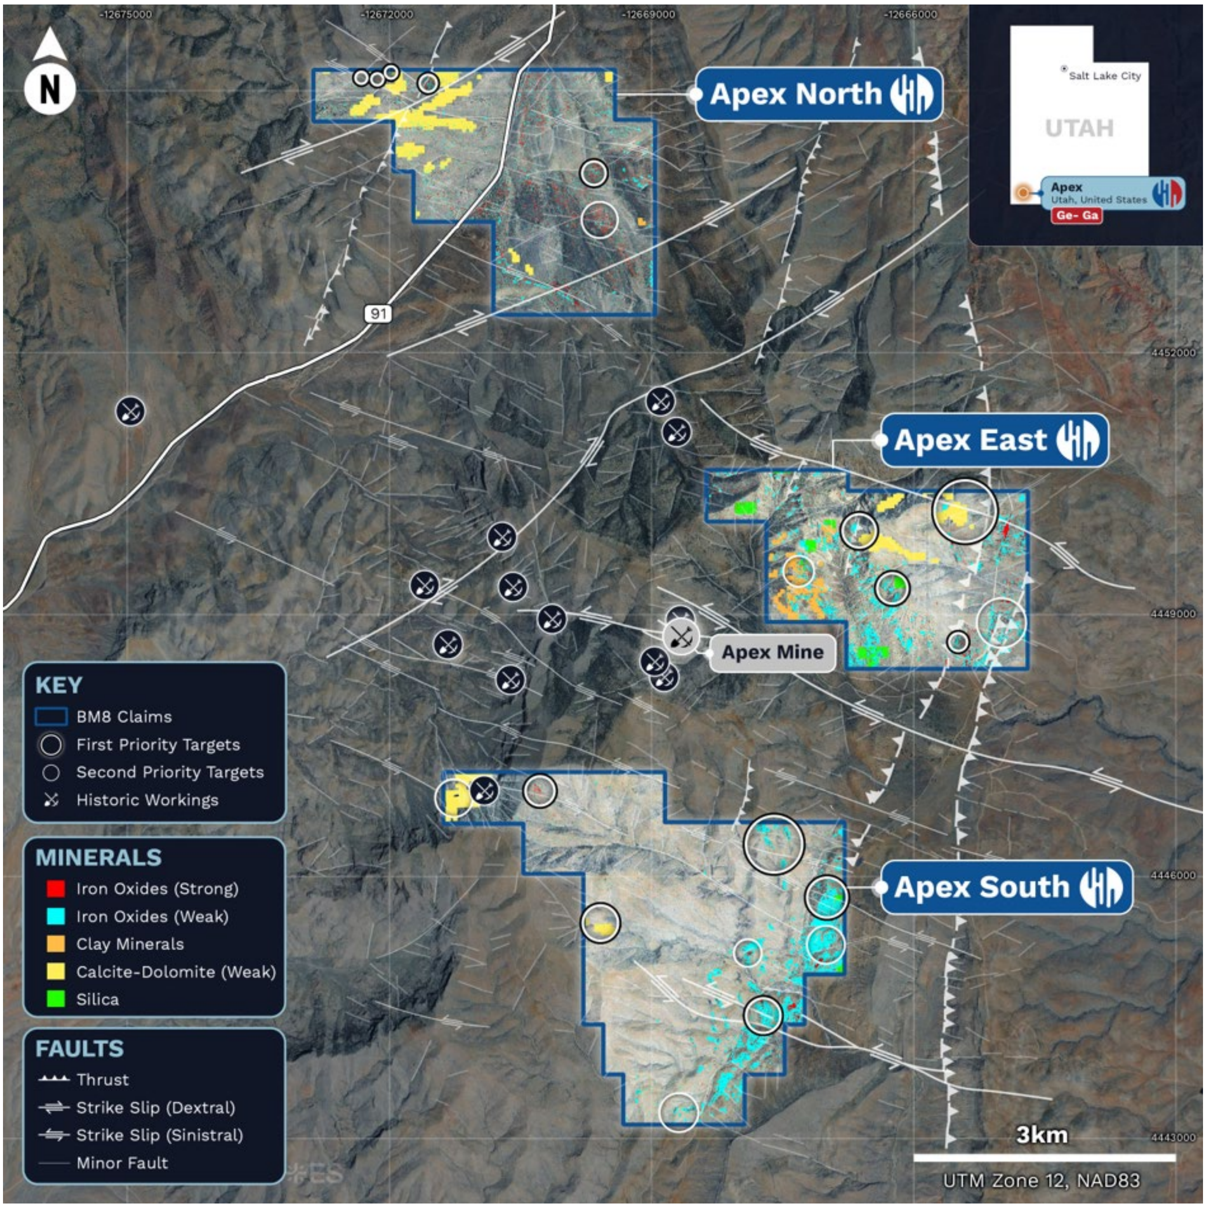

Figure 2: BM8 Apex project claim blocks, structural interpretation and multispectral alteration map and targets.

No new sampling, drilling or assay results were reported during the Quarter in respect of the Apex Project; the remote sensing study represents a geological interpretation only, with identified targets requiring validation through field mapping, sampling and, where appropriate, drilling.

Cautionary Statement - This announcement reports the results of remote sensing analysis and target generation only. The geological, alteration and structural interpretations described in this announcement are derived from satellite imagery and digital elevation model datasets and represent geological interpretations only. The identified targets require validation through field mapping, sampling and, where appropriate, drilling. There is no certainty that further exploration will result in the discovery of mineralisation. The Company notes that mineralisation at the historic Apex Mine is not necessarily indicative of mineralisation on the Company's surrounding tenements. The remote sensing study has identified target areas for follow-up exploration only and no mineralisation has been discovered or confirmed by the Company.

Bleiberg Zinc-Lead-Germanium Project (Carinthia, Austria)

During the Quarter, the Company planned and submitted additional drilling permit applications to the Austrian authorities for drill holes targeting potential mineralisation immediately west of the historic Bleiberg operation. The historical Bleiberg mine produced approximately 174 tonnes of germanium over its historical operating life, ranking it as the world's sixth-largest germanium producer at the time of its closure in 1993[1]. With germanium designated a critical raw material by the European Union and refined supply concentrated in China, Bleiberg stands out as one of very few brownfield germanium opportunities within Europe. The Company's CEO, Sebastian Kneer, undertook a site visit to Bleiberg during the Quarter. The visit included an on-ground review of the project geology, an assessment of site access and local infrastructure, and meetings with local stakeholders to discuss the Company's plans for Bleiberg. Engagement was constructive, and the visit strengthened the Company's understanding of operating conditions in the region and its relationships on the ground.

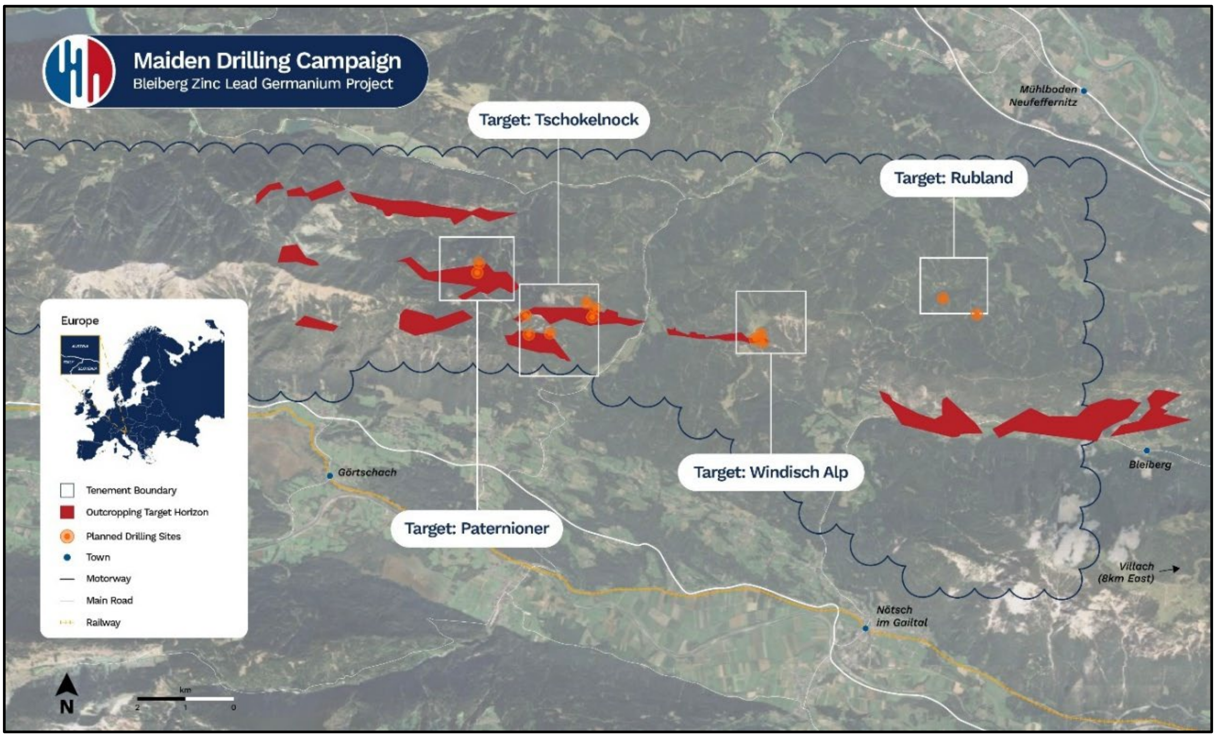

Figure 3: Bleiberg maiden targeted program.

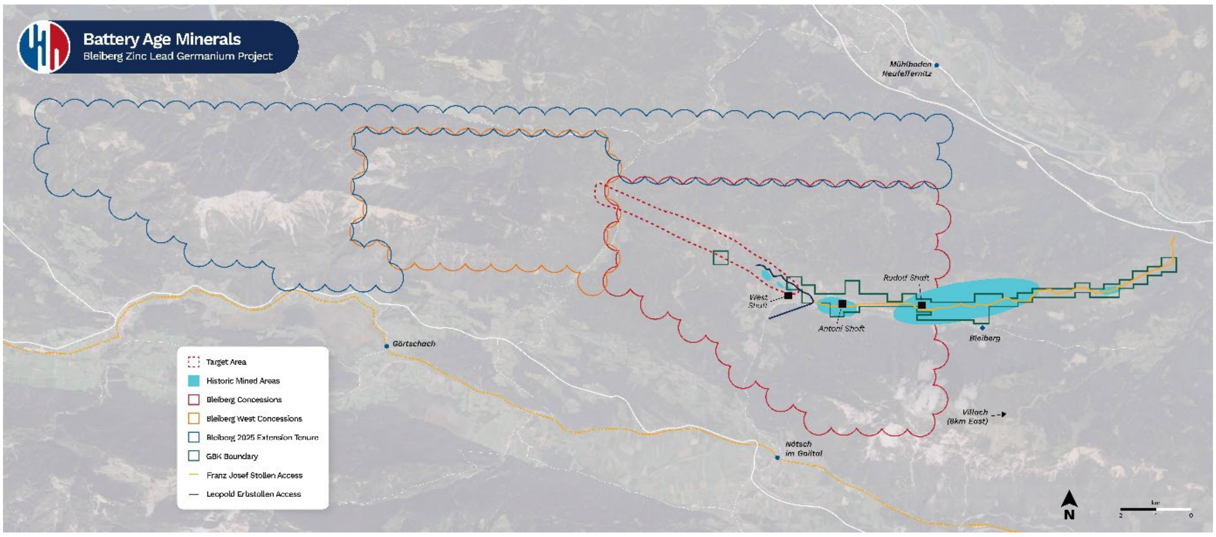

Figure 4: Bleiberg concessions and target area. Illustrating exploration tenure, historic mining corridor and shafts (GBK tenure) in green. 100% staked claims identified in blue & orange (Bleiberg West concessions) and existing earn-in claims shown in red (Bleiberg concessions).

Germanium Technical Evaluation and Processing Studies

The Company completed its Exclusive Patent and Know-How Licence Agreement with NTUitive Pte Ltd, the innovation and enterprise company of Nanyang Technological University, Singapore, covering NTUitive's portfolio of germanium-related technologies. Execution of the commercial licence follows the Company's evaluation licence arrangement with NTU Singapore (refer announcement 9 March 2026).

The licence supports Battery Age's integrated germanium strategy, which spans exploration at its Bleiberg (Austria) and Apex (Utah, USA) projects together with a downstream specification and processing pathways workstream. Battery Age's approach targets two linked technical areas: downstream specification context, to better understand product parameters and qualification requirements relevant to end users of germanium in semiconductor and optoelectronic applications; and upstream processing optionality, assessing pathways intended to reduce chemical intensity and energy input while improving consistency and responsible sourcing outcomes. This work is intended to ensure resource development decisions across the Company's germanium projects are informed by long-term end-market and supply-chain considerations.

Beyond its established roles in infrared optics and fibre-optic dopants, germanium is increasingly recognised as an enabling material for next-generation optical interconnects, as AI data centres reach the physical limits of copper wiring for high-speed, short-distance data transmission. This represents one of a number of rapidly emerging application areas for germanium, alongside advanced semiconductor and photonic technologies more broadly.

Following the exclusive global licensing of the technology, Battery Age will look to advance its germanium technology portfolio to address the growing photonics market, a segment considered critical to the cloud computing and data centre industries as global computing demand continues to scale.

This work is intended to complement the Company's upstream mineral projects as part of its broader integrated germanium strategy.

U.S. Defense Industrial Base Consortium Membership

Battery Age was accepted as a member of the U.S. Defense Industrial Base Consortium ("DIBC"), a U.S. Government-supported consortium administered by Advanced Technology International on behalf of the U.S. Department of War ("DOW"). The DIBC operates under the DOW's Other Transaction Authority, a flexible contracting mechanism designed to accelerate engagement between the Department and non-traditional defence suppliers, including resource developers.

The membership reflects the strategic relevance of the Company's germanium-focused exploration and technology portfolio, opening a direct channel to engage with DOW-sponsored critical minerals programs and defence supply chain initiatives including U.S. defence and advanced-technology supply chains, in which germanium underpins infrared optics, fibre-optic communications, satellite solar cells and next-generation silicon-germanium semiconductors.

China controls approximately 70% of global refined germanium production and has progressively tightened export licensing since 2023; the United States currently has no primary domestic germanium production. Through DIBC membership, Battery Age intends to engage with Department program offices on germanium-specific supply chain requirements and capability gaps, and to consider targeted proposals into DIBC solicitations and related funding programs.

University of Sydney Collaboration

During the Quarter, the Company continued technical work in collaboration with the University of Sydney's School of Chemical and Biomolecular Engineering, focused on the assessment of advanced germanium recovery techniques.

The program is evaluating electromagnetic-based processing methods for germanium extraction, with the objective of improving understanding of recovery behaviour and process responses relevant to germanium-bearing materials. Work undertaken during the Quarter remained at a technical evaluation stage and focused on laboratory-scale assessment of processing concepts.

This research activity complements the Company's broader germanium-focused technical work and ongoing exploration programs by supporting improved understanding of potential processing pathways applicable to germanium mineralisation at the Bleiberg Zinc–Lead–Germanium Project and the Apex Germanium–Gallium Project, in addition to recovery of Ge from e-waste.

El Aguila Gold-Silver Project (Santa Cruz, Argentina)

No new exploration activities were conducted during the Quarter. The El Aguila Project is currently being reviewed in-house, with the Company integrating geological, geochemical and geophysical data to refine interpretation of the broader mineralised corridor and prioritise areas for follow-up exploration

Falcon Lake Lithium Project (Ontario, Canada)

No exploration activities were conducted during the Quarter.

Jessie Lake Lithium Project (Ontario, Canada)

No exploration activities were conducted during the Quarter.

King Tut Project (Argentina)

No exploration activities were conducted during the Quarter.

Bloom Lake Project (Bloom Lake, Canada)

No exploration activities were conducted during the Quarter.

Corporate

Appointment of Non-Executive Director

During the Quarter, Battery Age Minerals Ltd announced the appointment of Mr Raunaq Miah as a Non-Executive Director of the Company, effective 17 April 2026. Mr Miah holds a Bachelor of Commerce (Entrepreneurship) from Macquarie University and brings experience in finance, institutional operations and business development from previous roles with Australian Investment Exchange Ltd (AUSIEX) and Allianz Australia. Mr Miah joins the Board as an independent director and will be considered for election as a Non-Executive Director at the Company's 2026 Annual General Meeting.

Chief Financial Officer Transition

During the Quarter, the Company announced that current Chief Financial Officer (CFO) Mr Paul Hughes will transition from his role effective 15 August 2026, with Mr Jay Stephenson appointed Chief Financial Officer effective 1 August 2026. Mr Stephenson brings more than 35 years' experience in business development and corporate advisory roles, including approximately 29 years as a Director, CFO and Company Secretary across listed and unlisted resources-sector entities in Australia and overseas, and holds an MBA along with Chartered Accountant, CPA Australia, Chartered Professional Accountant (Canada), Certified Management Accountant (Canada) and Governance Institute of Australia credentials. Mr Stephenson will work alongside Mr Hughes during a transition period to ensure an orderly handover.

Business Development

Looking ahead, the Company intends to continue evaluating business development opportunities aligned with its strategy and complementary to its existing asset base. In addition to its focus on germanium-related initiatives, the Company is reviewing projects across a broader range of commodities and jurisdictions, including under-explored or overlooked regions that may offer potential for the discovery of large-scale, high-quality mineral resources.

These reviews are expected to focus on geological prospectivity, technical merit and jurisdictional factors, with the objective of identifying opportunities that could enhance portfolio quality and long-term value creation. All such opportunities will remain subject to further technical, commercial and strategic assessment. There is no certainty that these forward-looking reviews or discussions will result in the acquisition of any additional projects or assets.

Appendix 5B

The Appendix 5B quarterly cashflow report for the Quarter is submitted separately.

The Group closed the Quarter with a cash balance of $1,955k. Exploration expenditure during the Quarter totalled $131k (unaudited).

The Company currently holds 34.5m shares in Eminence Minerals Ltd (ASX: EMA) which has a market value at the end of the Quarter of: $1.3m at $0.038 per share (share price 30 June 2026).

Payments to Related Parties

Pursuant to section 6 of the Company's Appendix 5B, and as required under ASX Listing Rule 5.3.5, during the Quarter the Company paid $49k to the Directors for remuneration.

Capital Structure

The capital structure at the end of the Quarter was as follows:

- 221,477,559 Ordinary Shares.
- 34,500,005 Options.
- 2,550,000 Performance Rights.

Interests in Mining Tenements as at 30 June 2026

Location	Tenement Reference	Interest during Quarter	Interest at the end of Quarter
Western Australia[1]	M47/1450	(4.19)%	18.00%

1. Battery Age's interest in the Hamersley Iron Ore Project is held indirectly by way of its investment held in Eminence Minerals Limited. Reduced interest as a result of dilution due to equity placements completed by EMA during the period.
2. The Company may acquire the final 10% of the above identified Falcon Lake tenements by paying an amount equal to the lower of (i) the price determined by an independent valuation, or (ii) A$2,000,000.
3. The Company may acquire a further 14% interest (total 65%) in the above Bleiberg tenements within 36 months of acquiring the abovementioned 36% interest by incurring an additional C$3,500,000 in expenditure on the project.
   The Company may acquire the final 15% interest (total 80%) in the above Bleiberg tenements within 6.5 years from executing the Bleiberg Addendum Agreement upon completion of a Bankable Feasibility Study that is compliance to JORC and indicates the project will have a production rate of at least 100,000 tonnes per year. Refer to Bleiberg earn-in terms and structure set out in the Company's Prospectus dated 7 December 2022, and announcement 16 May 2024.
4. As announced on 31 March 2026, BM8 has staked an additional 51 unpatented lode mining claims
5. As announced on 31 January 2025, the Company has entered into a Farm-In Agreement with Fredonia Mining Inc. to earn up to 80% to 100% ownership of the El Aguila Project in the Santa Cruz province, Argentina (Aguila I, No423.460/W/10., Aguila II No427.885/W/11. and Winki No406.199/W/02.) . Refer to announcement dated 31 January 2025 for full terms and conditions of the Farm-In Agreement. At 30 June 2026, the Company is at stage 1 of the earn-in agreement, earning up to 51% interest over time.

Forward Looking Statements

Information included in this release constitutes forward-looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "continue", and "guidance", or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs. Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licenses and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation. Forward looking statements are based on the Company and its management's good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company's business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company's business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company's control. Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the company does not undertake any obligation to publicly update or revise any of the forward-looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.
