Founder and CEO, Zane Yoshida, commented:

"Achieving our highest ever monthly revenue of \$910,767 is a defining milestone for The Calmer Co. The wholesale channel's record performance of \$340,131 in a single month, with year-to-date sales already exceeding FY25 annual results, clearly demonstrates the accelerating global demand for high-quality, traceable kava ingredients.

“This momentum is further supported by recent regulatory advancements in the United States, where the U.S. Food and Drug Administration has confirmed that traditionally prepared kava beverages qualify as food under federal law. This landmark clarification provides regulatory certainty and a clearer compliance pathway for kava products in the world’s largest consumer market, de-risking broader retail distribution and digitally-led growth. Traditionally brewed kava beverages are now recognised under conventional food law, while other product formats, including tinctures, capsules and flavoured kava shots, continue to sit within the dietary supplement framework. This dual-category clarity aligns with our multi-format portfolio strategy and strengthens our ability to scale in the U.S. market.

With over 21 million Americans now consuming kava, our expanding USA portfolio of dietary supplement formats, combined with the strength of our Australian grocery footprint and accelerating wholesale demand, positions the Company for sustained, profitable growth in FY26.”

This announcement has been approved by the Board of Directors.
