CDE | 26th March 2026

CDE launches QuantumAI SECURE Website – now live

- **QuantumAI Secure Trademark filed with IP Australia**
- **QuantumAI Secure platform now live at www.quantumaisecure.com.au**
- **Platform enables quantum-secure file transfers on a self-service SaaS model**
- **Designed for immediate onboarding across fintech, healthcare, legal and enterprise sectors**
- **Launch marks a key commercial milestone following completion of the AntennaTransfer acquisition announced 16 February 2026**

Codeifai Limited (ASX:CDE) - ("Codeifai" or the "Company") is pleased to announce the official launch of the QuantumAI Secure website and self-service platform, now publicly accessible at www.quantumaisecure.com.au. The launch represents a significant commercial step forward for the Company, bringing quantum-resilient security technology to market in a fully self-service format.

In parallel, the Company has applied with IP Australia for a Trademark as per the below logo:

About the QuantumAI Secure Platform

The QuantumAI Secure platform provides organisations and individuals with access to post-quantum file transfers. Built on lattice-based cryptography using the Kyber algorithm, the platform is designed to withstand both classical and quantum computing attacks - addressing an urgent and growing vulnerability in conventional digital infrastructure.

The platform's core capabilities include:

- **Quantum-Secure Payments Gateway:** Enables banks, fintechs and payment processors to transact via quantum-encrypted QR codes, resistant to retroactive decryption by quantum-equipped adversaries.
- **Quantum-Secure File Transfer Gateway:** Allows highly sensitive documents - including financial contracts, intellectual property and health records - to be transferred securely with payment locks that prevent access until payment is complete, protecting the intellectual property of content creators and businesses alike.
- **Two-Factor Authentication and Automated Transactions:** Every transfer is protected by two-factor authentication and seamless automation from payment initiation through to final receipt, ensuring accuracy and security at every stage.

Immediate Self-Service Access

The platform has been built for immediate onboarding, with users able to register and begin transacting at www.quantumaisecure.com.au without requiring technical implementation support. This self-service Software as a Service (SaaS) model is a direct extension of Codeifai's existing SaaS philosophy and positions QuantumAI Secure to be scaled efficiently across a broad range of target sectors, including fintech, healthcare, legal, government to name a few.

The platform enables smooth migration paths toward quantum readiness for transactions and verifications which can be conducted via quantum-encrypted QR codes.

Strategic Context

The website launch follows the successful completion of the AntennaTransfer acquisition, announced on 16 February 2026, through which Codeifai acquired the underlying QuantumAI Secure technology from Credissential Inc. Platform keys and all software were transferred to Codeifai's technical team, with all purchase conditions met by the Seller.

QuantumAI Secure is highly complementary to Codeifai's existing platform, which leverages QR codes for authentication, supply chain transparency, consumer engagement and data verification in many sectors such as Mining, FMCG and Food to name a few. Together, the two platforms create an end-to-end trust layer - from the origin of a physical or digital asset tracked via Codeifai's system, through to its secure transfer or transaction protected by QuantumAI Secure. Codeifai intends to increase the use of Artificial Intelligence (AI) across both platforms, creating a seamless, quantum-hardened trust infrastructure that is user-friendly, data-rich and future-proof.

The Company sees significant opportunity to expand QuantumAI Secure into emerging market segments including defence, mining, agriculture and security infrastructure, in addition to its primary fintech and enterprise software focus.

About Codeifai Limited (ASX:CDE)

Codeifai develops and sells high-margin, self-service SaaS platforms at the intersection of artificial intelligence, post-quantum cryptography, and serialised data technology. Our solutions serve clients across fintech, mining, healthcare, legal, government, and digital content sectors worldwide. Our suite of self-service SaaS solutions enables brands, manufacturers, enterprises and end users to connect deeper, faster, and smarter with their customers, supply chains, and data, with the AI and security infrastructure to protect it - Codeifai empowers organisations to engage, authenticate, and scale with confidence.

This announcement has been authorised by the Board of Codeifai Limited.
