DOME GOLD MINES

ASX Announcement **ASX Code: DME** **31 July 2026**

ACTIVITIES REPORT FOR THE JUNE QUARTER 2026

Dome Gold Mines Limited ("Dome" or "Company") (ASX code: DME) is pleased to report activities at its industrial sand-magnetite-heavy mineral Sigatoka project and the Nadrau copper-gold projects in Fiji for the period ended 30 June 2026.

Highlights

- **Sigatoka Magnetite and Construction Sand Feasibility Study Update**
- **Resumption of Exploration of Nadrau (SPL1452) Project**
- **Fund Raising Program**

SIGATOKA PROJECT UPDATE (SPL1495)

Feasibility Study Progress

During the June Quarter, work continued on the Sigatoka Feasibility Study, which is now reaching its concluding stages involving the mine plan needed to provide the final major technical information prior to commencement of the overall mine engineering design, financial model and completion of the study later this year.

NADRAU (SPL1452) PORPHYRY COPPER-GOLD

Dome is preparing for resumption of exploration for porphyry copper-gold-silver deposits on SPL1452. As previously reported, the property is contiguous with the nearby world-class Namosi porphyry copper-gold deposit. Based on soil, stream and rock chip sampling Nadrau is prospective for porphyry hosted copper-gold-silver and/or vein hosted gold-silver mineralisation.

For more information on SPL1452 see www.domegoldmines.com.au

ONO ISLAND (SPL1451) GOLD

As reported in the March Quarterly activities report, relinquishment documentation was prepared and submitted to the Mineral Resources Department (MRD). Site visits to villages on Ono Island were also completed in the accompaniment of MRD representatives to explain the reasons for discontinuing exploration and to hand over stored diamond drill core to the MRD. As at the date of this report formal written notification of acceptance of the relinquishment had not been delivered by the MRD and that is expected shortly. The management and Board of Dome again thanks the residents of Ono Island for their assistance and cooperation during our exploration programs.

CORPORATE FUND RAISING

The Company has issued a funding proposal using Convertible Notes to raise up to $2,000,000 to provide capital to complete its principal objectives;

1) Fund the final work programs necessary for compilation and sign-off of the Sigatoka Feasibility Study to obtain a Mining Lease.
2) Fund penetrative airborne geophysical programs over an area of anomalous copper, gold and silver geochemistry on SPL1452 to focus future geological exploration and drilling.
3) Fund the employment of senior technical and marketing management with experience in the successful development and operation of magnetite and construction sand projects as planned for Sigatoka.
4) Working capital.

CORPORATE AND ADDITIONAL INFORMATION

Dome Gold Mines Limited ("Dome" or "the Company") provides this additional information regarding the quarterly activities report for the quarter ended 30 June 2026.

During the Quarter the Company expended $39K on exploration and related activities. The majority was spent on exploration activities at the Sigatoka Project in Fiji, which is wholly owned by Dome. Approximately $31K was spent on Sigatoka FS program, which includes Fiji office operations, consultants' fees and other travel related costs. The balance was expended on sundry exploration and tenement, accounting and administration related costs. No expenditure was incurred during the Quarter on mining production and development activities.

No payments were made to related parties of the entity and their associates for operating and investing activities during the June 2026 quarter. As at 30 June 2026, Dome had a nil cash position. The Company is operating on the loan facilities.

For further information about Dome and its Fijian projects, please refer to the Company's website www.domegoldmines.com.au or contact the Company at (02) 8203 5620.

This quarterly report has been approved by the Board of Dome Gold Mines Ltd.

Chairman

Competent Persons Statement

The information in this Quarterly Report that relates to Exploration Results is based on information compiled by John V McCarthy. Mr McCarthy is the non-executive Chairman of the Company and a Member of the Australasian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activities which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr McCarthy, through his family superannuation fund, holds shares in the Company and is paid fixed directors fees for his services. He consents to the inclusion in this Quarterly Report of the matters based on his information in the form and context in which it appears.

No Material Changes

The Company confirms it is not aware of any new information or data that materially affects the information included in this quarterly activities report and that all material assumptions and technical parameters underpinning the exploration activities in this market announcement continue to apply and have not materially changed.

ABOUT DOME

Dome is an Australian mining company that listed on the ASX on the 22 October 2013. The Company is focussed on gold-copper and magnetite (iron ore) and industrial sands in Fiji, where it presently holds three exploration tenements. Dome's objective is to become a major force in the mining industry of Fiji by the discovery and development of mineral resources within its Fijian tenements.

Sigatoka is a heavy mineral sand project containing abundant magnetite and construction sand. Drilling to establish an initial resource estimate for the project has been completed, and final stages of a feasibility study are well underway. Commencement of production magnetite concentrate and construction sand at Sigatoka by conventional sand mining and wet processing is anticipated.

Dome's Nadrau project warrants additional exploration programs for copper-gold porphyry and/or vein gold-silver deposits are warranted given the property is contiguous with the world-class Namosi porphyry copper-gold deposit. Plans are in place to resume field programs followed by airborne geophysics to define drill targets.

Ono Island was selected for its potential as a volcano hosted epithermal gold prospect. Soil geochemical sampling was followed by Induced Polarisation geophysics and then an initial exploration diamond drilling that was completed in early July 2018 with inconclusive results.

Dome's Board and Management team has a high level of experience in Fiji, where the Company has been actively exploring since 2008.
