Activities since previous market update

An update is provided on key operational and financial matters:

Product Expansion

- Core virtual consultation pathway improvements have continued, enhancing the overall patient experience and increasing conversion. A key focus has been the integration of the prescription fulfilment journey with our strategic pharmacy partner, providing patients with greater choice and flexibility.
- Clinical pilots delivering digital treatment pathways across Musculoskeletal (MSK), Skin Cancer, and Mental Health have progressed strongly. Early feedback and outcomes are

encouraging, demonstrating clear value for both clients and patients. In MSK specifically, the introduction of DCA physiotherapists prescribing digital exercise programmes has driven an 80% reduction in onward referrals and an 80% improvement in reported pain scores. This not only helps our patients but materially reduces downstream costs for our clients.

- Product development has advanced well across new proposition areas, including corporate weight management and preventative health assessments, both of which remain on track for launch in 2026.

Operating model transformation

Following H1 transformation, Q4 focused on converting efficiencies into profit and growth momentum.

- Streamlined operations and cost reductions are now delivering tangible benefits for patients and clients, while freeing up resources for growth.
- We are continuing to streamline operations and reduce costs to improve business profitability.
