About EGL

The Environmental Group Limited has four business divisions, all committed to the protection of the environment by improving air quality, reducing carbon emissions, enhancing waste treatment, and lifting water quality.

EGL Clean Air has a range of technologies which reduce dust, odours, and harmful gasses from the environment.

EGL Baltec produces inlet and exhaust systems for gas turbines, which are used to complement and augment solar and wind energy production.

EGL Energy offers a network of service offices across Australia providing 24/7 service, maintenance and repairs of both proprietary equipment and other OEM equipment. The division also provides an essential link in our strategy to build a bio/waste to energy platform.

EGL Waste Services provides tailored waste recovery solutions, in partnership with Turmec, supplies Kadant Paal Balers for waste management solutions and continues to develop our patented technologies using foam fractionation sustainable methods for treating PFAS from Water, Soil & Biosolids, in collaboration with Victoria University.
