

QUARTERLY ACTIVITIES REPORT

30 June 2026

European Metals Holdings Limited (ASX & AIM: EMH, OTCQX and OTCQB: EMHXY and EMHLF) (“European Metals” or the “Company”) is pleased to provide an update on its activities during the three-month period ending 30 June 2026.

The Company continued the development of the Cinovec Lithium Project (“**Cinovec**” or “**Project**”), building further on the significant developments of the previous two quarters. The June 2026 quarter was highlighted by important progress in the Environmental Impact Assessment process, and significant project improvements identified in the ongoing optimisation work.

CINOVEC PROJECT ENVIRONMENTAL IMPACT ASSESSMENT

On 7 May 2026, the Company announced progress in environmental permitting of the Cinovec Project, including the scheduling of the anticipated public hearing, the publication of the Environmental Impact Assessment (“**EIA**”) by the Czech Ministry of Environment, and the commencement of the cross-border EIA process for the mining area.

This progress is encouraging and important for the Company, with the publication of the EIA by the Czech Ministry of the Environment being a critical path item with regards to obtaining the final EIA approval and progressing the Project.

The Company further announced (on 24 June 2026) that the EIA public hearing took place as planned on 17 June 2026. No new substantial questions or comments about the Project were raised by local stakeholders that have not been encountered in dialogue with the Project’s management team previously, and all questions were answered by Project executives at the hearing. The EIA process is expected to conclude by the end of 2026. Once completed the EIA process will enable the Project company, Geomet s.r.o. to apply for both the Mining and Construction permits which once issued will enable the construction of the Cinovec underground mine as well as the Dukla transfer portal and the Lithium Chemical Plant (“**LCP**”).

CINOVEC LCP OPTIMISATION DELIVERS POTENTIAL SIGNIFICANT SAVINGS

On 24 June 2026 the Company announced preliminary results for the design optimisation of the lithium chemical plant for the Cinovec Project. This was a very significant development for the Project with the key highlights being:

- Potential to reduce consumption of major reagents by US\$51m per annum (based on Definitive Feasibility Study (“**DFS**”) reagent pricing).
- Potential to reduce power consumed in the LCP post-roast and leach filtration by more than 25% or US\$3.4m per annum (based on DFS power pricing).

CORPORATE INFORMATION ASX EMH AIM EMH OTCQX and OTCQB EMHXY and EMHLF Frankfurt E861.F SHARES/ DIs ON ISSUE 237.82M

- Taken together, these reductions represent the potential to increase the pre-tax NPV8 of US\$1.455bn established in the December 2025 DFS, however the exact quantum of such increase based upon the revised assumptions will only be known once the Project DFS is updated.¹

TUNNEL KILN TESTWORK POINTS TO POTENTIAL CAPEX SAVING

Post quarter end, on 8 July 2026, the Company announced further optimisation preliminary results, in this instance with regards to testwork and design of a tunnel kiln for the Project. The highlights of this announcement were:

- Potential for change from two gas fired rotary kilns to a single gas / electric tunnel kiln for the Cinovec Project.
- Gas-fired tunnel kiln estimated to materially reduce capex by between US\$70m and US\$110m per annum, and opex by US\$10m per annum (compared to the DFS Rotary Kilns). The Company notes the effect that this reduction in capex and opex will have on the Project DFS will not be known until the Project DFS is updated.
- Tunnel kiln provides flexibility to remove the Project's dependence on gas and enables the project to be run solely on green power supplied by project partner CEZ².
- Switch to Tunnel Kiln not expected to impact Project timeline.
- The combination of the tunnel kiln and the optimisation of the LCP Flowsheet³, if adopted, are anticipated to reduce capex by between US\$70 to \$110m and reduce opex by US\$64m (\$10m Tunnel Kiln and \$54m LCP flowsheet optimisation) per annum. The Company notes the effect that this anticipated reduction in capex and opex will have on the Project DFS will not be known until the Project DFS is updated.

The Company confirms that the potential cost savings above are preliminary in nature, and reiterates that it has not undertaken detailed studies at this stage to provide updated financial forecast information to which ASX Listing Rule 5.17 applies. The financial forecast information released in the Company's announcement dated 23 December 2025 titled "Successful Completion - Cinovec Definitive Feasibility Study" still applies. Should the Company adopt the tunnel kiln option and optimisation of the LCP flowsheet, it will endeavour to update the DFS released December 2025 (refer to the Company's ASX / AIM release dated 23 December 2025) (Successful Completion - Cinovec Definitive Feasibility Study) to include these revisions by end of 2026 (noting that this remains an indicative timeframe).

¹ The Company confirms that the material assumptions underpinning the DFS reagent and power pricing continue to apply and have not materially changed

CORPORATE AND ADMINISTRATION

ISSUED CAPITAL

A total of 1,200,000 performance rights were issued following shareholder approval at the Company's annual general meeting held on 29 May 2026.

QUARTERLY CASH FLOW REPORT

In accordance with the ASX Listing Rules, the Company will also today lodge its cashflow report for the quarter ended 30 June 2026. There were no cash outflows during the quarter for Cinovec associated costs with respect to the Company's investment in the Cinovec Lithium Project in the Czech Republic.

The Company's total cash was \$0.75 million as at 30 June 2026.

PAYMENTS TO RELATED PARTIES

As outlined in the attached Appendix 5B (section 6.1), during the quarter approximately \$210,000 in payments were made to related parties and their associates for director salaries, consultancy fees, superannuation and other related costs. A portion of these expenses is to be reimbursed directly from Geomet.

GEOMET TENEMENT SCHEDULE

Table 1: Geomet Tenements

Permit	Code	Deposit	Interest at beginning of Quarter	Acquired / Disposed	Interest at end of Quarter
Exploration Area	Cinovec	N/A	100%	N/A	100%
	Cinovec II		100%	N/A	100%
	Cinovec III		100%	N/A	100%
	Cinovec IV		100%	N/A	100%
Preliminary Mining Permit	Cinovec II	Cinovec South	100%	N/A	100%
	Cinovec III	Cinovec East	100%	N/A	100%
	Cinovec IV	Cinovec Northwest	100%	N/A	100%

This announcement has been approved for release by the Board.

PROJECT OVERVIEW

Cinovec Lithium Project

Geomet s.r.o. controls the mineral exploration licenses awarded by the Czech State over the Cinovec Lithium Project. Geomet has been granted a preliminary mining permit by the Ministry of Environment and the Ministry of Industry. The company is owned 49% by EMH and 51% by CEZ a.s. through its wholly owned subsidiary, SDAS. Cinovec hosts a globally significant hard rock lithium deposit with a total Measured Mineral Resource of 54.4Mt at 0.58% Li₂O, Indicated Mineral Resource of 378.23Mt at 0.41% Li₂O and an Inferred Mineral Resource of 309.49Mt at 0.39% Li₂O containing a combined 7.45 million tonnes Lithium Carbonate Equivalent (refer to the Company's ASX/ AIM release dated 23 December 2025) (**Cinovec DFS Confirms Long-life Battery Grade Lithium Carbonate Producer Strategically Positioned to supply European EV and Energy-storage Sectors**)⁴.

A Proven and Probable Ore Reserve of 54.4Mt at 0.58% Li₂O has been declared to cover the first 26 years mining at an output of 37,500tpa of lithium carbonate (refer to the Company's ASX/ AIM release dated 23 December 2025) (**Cinovec DFS Confirms Long-life Battery Grade Lithium Carbonate Producer Strategically Positioned to supply European EV and Energy-storage Sectors**)⁵.

The Definitive Feasibility Study ("DFS") confirmed the economic viability of the Cinovec Project with steady-state production of 37,500 tpa of battery-grade lithium carbonate ("Li₂CO₃"), representing ~5.2% of EU demand in 2030 and sufficient for >900,000 50kWh EV batteries annually. Cinovec will have a 28+ year operating life, underpinned by a 748Mt Resource @ 0.19% Li₂O and a 55.4Mt Ore Reserve, with expansion optionality (refer to the Company's ASX/ AIM release dated 23 December 2025) (**Cinovec DFS Confirms Long-life Battery Grade Lithium Carbonate Producer Strategically Positioned to supply European EV and Energy-storage Sectors**)⁶.

This makes Cinovec the largest hard rock lithium deposit in Europe and by far the largest hard rock lithium deposit in the European Union.

Cinovec has been designated a Strategic Project by the European Union under the Critical Raw Materials Act (refer to the Company's ASX/ AIM release dated 25/26 March 2025) (**Cinovec declared a Strategic Project under EU Critical Raw Materials Act**) and a Strategic Deposit by the Czech Government (refer to the Company's ASX/ AIM release dated 7 March 2025) (**Cinovec declared Strategic Deposit by Czech Government**).

Cinovec has received recent impetus from the EU and the Czech Government in the form of grants of USD36 million from the EU Just Transition fund (refer to the Company's ASX/ AIM release dated 28 April 2025) (**USD 36 million Just Transition Fund Grant Approved for Cinovec Project**) and up to EUR360 million by the Czech Government (refer to the Company's ASX/ AIM release dated 7 March 2025) (**Approval of up to €360 Million Czech Government Grant**).

The deposit has previously had over 400,000 tonnes of ore mined as a trial sub-level open stope underground mining operation.

⁴ The Company confirms that the material assumptions underpinning the Resource estimates continue to apply and have not materially changed.

⁵ The Company confirms that the material assumptions underpinning the Reserve estimates continue to apply and have not materially changed.

⁶ The Company confirms that the material assumptions underpinning the Reserve and Resource estimates and forecast financial information continue to apply and have not materially changed.

Cinovec is centrally located for European end-users and is well serviced by infrastructure, with a sealed road adjacent to the deposit, rail lines located 5 km north and 8 km south of the deposit, and an active 22 kV transmission line running to the historic mine. The deposit lies in an active mining region.

The Cinovec processing plant comprises of a Front-End Comminution and Beneficiation circuit ("FECAB") and Lithium Chemical Plant circuit ("LCP") in combination producing Lithium Carbonate end products and will be located on the Prunéřov 1 Power Station site located approximately 59km by rail from the Cinovec mine site (refer to the Company's ASX/ AIM releases dated 26 April 2024 (**New Lithium Plant Site Expected to Improve Project Permitting and Economics**) and 27 November 2024 (**Cinovec Project Update**)).

BACKGROUND INFORMATION ON CEZ

Headquartered in the Czech Republic, CEZ a.s. is one of the largest companies in the Czech Republic and a leading energy group operating in Western and Central Europe. CEZ's core business is the generation, distribution, trade in, and sales of electricity and heat, trade in and sales of natural gas, and coal extraction. The foundation of power generation at CEZ Group are emission-free sources. The CEZ strategy named Clean Energy for Tomorrow is based on ambitious decarbonisation, development of renewable sources and nuclear energy. CEZ announced that it would move forward its climate neutrality commitment by ten years to 2040.

The largest shareholder of its parent company, CEZ a.s., is the Czech Republic with a stake of approximately 70%. The shares of CEZ a.s. are traded on the Prague and Warsaw stock exchanges and included in the PX and WIG-CEE exchange indices. CEZ's market capitalization is approximately EUR 28.2 billion.

As one of the leading Central European power companies, CEZ intends to develop several projects in areas of energy storage and battery manufacturing in the Czech Republic and in Central Europe.

CEZ is also a market leader for E-mobility in the region and has installed and operates a network of EV charging stations throughout Czech Republic. The automotive industry in the Czech Republic is a significant contributor to GDP, and the number of EV's in the country is expected to grow significantly in the coming years.

COMPETENT PERSONS AND QUALIFIED PERSON FOR THE PURPOSES OF THE AIM NOTE FOR MINING AND OIL & GAS COMPANIES

Information in this release that relates to the FECAB metallurgical testwork is based on, and fairly reflects, technical data and supporting documentation compiled or supervised by Mr Walter Mädel, a full-time employee of Geomet s.r.o an associate of the Company. Mr Mädel is a member of the Australasian Institute of Mining and Metallurgy ("**AUSIMM**") and a mineral processing professional with over 27 years of experience in metallurgical process and project development, process design, project implementation and operations. Of his experience, at least 5 years have been specifically focused on hard rock pegmatite Lithium processing development. Mr Mädel consents to the inclusion in this release of the matters based on this information in the form and context in which it appears. Mr Mädel is a participant in the long-term incentive plan of the Company.

Information in this release that relates to exploration results is based on, and fairly reflects, information and supporting documentation compiled by Dr Vojtech Sesulka. Dr Sesulka is a Certified Professional Geologist (certified by the European Federation of Geologists), a member of the Czech Association of Economic Geologist, and a Competent Person as defined in the JORC Code 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and

Ore Reserves. Dr Sesulka consents to the inclusion in this release of the matters based on his information in the form and context in which it appears. Dr Sesulka is an independent consultant with more than 10 years working for the EMH or Geomet companies. Dr Sesulka does not own any shares in the Company and is not a participant in any short- or long-term incentive plans of the Company.

Information in this release that relates to metallurgical test work and the process design criteria and flow sheets in relation to the LCP is based on, and fairly reflects, information and supporting documentation compiled by Mr Grant Harman (B.Sc Chem Eng, B.Com). Mr Harman is an independent consultant and the principal of Lithium Consultants Australasia Pty Ltd with in excess of 14 years of lithium chemicals experience. Mr Harman consents to the inclusion in this release of the matters based on his information in the form and context that the information appears. Mr Harman is a participant in the long-term incentive plan of the Company.

The information in this release that relates to Mineral Resources and Exploration Targets is based on, and fairly reflects, information and supporting documentation prepared by Mr Lynn Widenbar. Mr Widenbar, who is a Member of the Australasian Institute of Mining and Metallurgy and a Member of the Australasian Institute of Geoscientists, is a full-time employee of Widenbar and Associates and produced the estimate based on data and geological information supplied by European Metals. Mr Widenbar has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the JORC Code 2012 Edition of the Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves. Mr Widenbar consents to the inclusion in this release of the matters based on his information in the form and context that the information appears. Mr Widenbar does not own any shares in the Company and is not a participant in any short- or long-term incentive plans of the Company.

The information that relates to production targets for the Cinovec Lithium Project is based on information compiled by Mr Graeme Fulton, a Competent Person who is a Fellow of the Australasian Institute of Mining & Metallurgy. Mr Fulton is an Employee of Bara Consulting who are a consultant to the Company. Mr Fulton does not own any shares, options / performance rights in the Company and is not a participant in the Company's short or long-term incentive plan. Mr Fulton has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Fulton consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources, Ore Reserves, exploration and production targets, and forecast financial information, that all material assumptions and technical parameters underpinning the information in the relevant market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

CAUTION REGARDING FORWARD LOOKING STATEMENTS

Information included in this release constitutes forward-looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "continue", and "guidance", or other similar words and may include, without limitation, statements regarding plans, strategies and

objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the company's actual results, performance, and achievements to differ materially from any future results, performance, or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward looking statements are based on the Company and its management's good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the company's business and operations in the future. The company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the company's business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the company or management or beyond the company's control.

Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the company does not undertake any obligation to publicly update or revise any of the forward looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.

LITHIUM CLASSIFICATION AND CONVERSION FACTORS

Lithium grades are normally presented in percentages or parts per million (ppm). Grades of deposits are also expressed as lithium compounds in percentages, for example as a percent lithium oxide (Li_2O) content or percent lithium carbonate (Li_2CO_3) content.

Lithium carbonate equivalent ("**LCE**") is the industry standard terminology for, and is equivalent to, Li_2CO_3 . Use of LCE is to provide data comparable with industry reports and is the total equivalent amount of lithium carbonate, assuming the lithium content in the deposit is converted to lithium carbonate, using the conversion rates in the table included below to get an equivalent Li_2CO_3 value in percent. Use of LCE assumes 100% recovery and no process losses in the extraction of Li_2CO_3 from the deposit.

Lithium resources and reserves are usually presented in tonnes of LCE or Li.

The standard conversion factors are set out in the table below:

Table: Conversion Factors for Lithium Compounds and Minerals

Convert from		Convert to Li	Convert to Li ₂ O	Convert to Li ₂ CO ₃	Convert to LiOH.H ₂ O
Lithium	Li	1.000	2.153	5.325	6.048
Lithium Oxide	Li ₂ O	0.464	1.000	2.473	2.809
Lithium Carbonate	Li ₂ CO ₃	0.188	0.404	1.000	1.136
Lithium Hydroxide	LiOH.H ₂ O	0.165	0.356	0.880	1.000
Lithium Fluoride	LiF	0.268	0.576	1.424	1.618

4.5	Effect of movement in exchange rates on cash held	-	-
4.6	Cash and cash equivalents at end of period	752	752

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	721	1,741
5.2	Call deposits	31	31
5.3	Bank overdrafts	-	-
5.4	Term deposit less than 3 months	-	-
5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)	752	1,772

6.	Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	210
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

The amount at 6.1 includes payments of director fees and salaries and accounting and Company Secretary fees (inclusive of GST).

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7.	Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>			
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (please specify)	-	-
7.4	Total financing facilities	-	-
7.5	Unused financing facilities available at quarter end		-
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(997)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(997)
8.4	Cash and cash equivalents at quarter end (item 4.6)	752
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	752
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	0.75
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>		
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: The Company expects to have similar operating cashflows for the foreseeable future as it continues development of the globally significant Cinovec Lithium Project.	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	Answer: The Company will require additional capital to support its operating costs as well as capital requirements of the project company Geomet. The Company completed a successful capital raise during the March 2026 quarter to support ongoing development of the Cinovec Lithium Project and general working capital. The Board is continuing to assess a range of future funding options available to the Company, including potential equity or debt funding. Based on recent market engagement and the success of the most recent capital raise, the Company is confident that it would be able to secure additional funding when appropriate.	

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer:

The Company expects to be able to continue its activities, noting that the directors are aware that the Group has the option, if necessary, to defer certain expenditure or to reduce administration costs in order to minimise cash outflows. The directors also remain confident that, when required, the Company will be successful in raising additional funds through the issue of new equity.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 31 July 2026

Authorised by: The Board
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
