Forward looking statement

These materials prepared by Evolution Mining Limited ('Evolution' or 'the Company') include forward looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as 'may', 'will', 'expect', 'intend', 'plan', 'estimate', 'anticipate', 'continue', and 'guidance', or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licenses and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward looking statements are based on the Company and its management's good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company's business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company's business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company's control.

Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward-looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.

Non-International Financial Reporting Standards (IFRS) financial information

Investors should be aware that financial data in this presentation includes 'non-IFRS financial information' under ASIC *Regulatory Guide 230: Disclosing non-IFRS financial information* published by ASIC and also 'non-GAAP financial measures' within the meaning of Regulation G under the U.S. *Securities Exchange Act* of 1934. Non-IFRS/non-GAAP measures in this presentation include gearing, sustaining capital, major product capital, major mine development, and production cost information such as All-in Sustaining Cost and All-in Cost. Evolution believes this non-IFRS/non-GAAP financial information provides useful information to users in measuring the financial performance and conditions of Evolution. The non-IFRS financial information do not have a standardised meaning prescribed by the Australian Accounting Standards ('AAS') and, therefore, may not be comparable to similarly titled measures presented by other entities, nor should they be construed as an alternative to other financial measures determined in accordance with AAS. Investors are cautioned, therefore, not to place undue reliance on any non-IFRS/non-GAAP financial information and ratios included in this presentation. Non-IFRS financial information in this presentation has not been subject to audit or review by the Company's external auditor.

This presentation has been approved for release by Evolution's Chair, Jake Klein.

All amounts expressed in Australian dollars unless stated otherwise.

All production and financial information in this presentation represents Evolution's share unless otherwise stated.

Caring for our most important asset

~30% of workforce
FIFO & DIDO

~50% annual growth in
employee assistance calls

~ $\frac{2}{3}$ calls related to
personal issues

The world order is changing....

Structural not cyclical:

- Precious metal prices increasingly reflect shifts away from globalisation and a changing world order

Central bank buying

- Rebalancing reserves - away from USD toward gold

US national debt growing

- Currently ~US\$40 trillion¹ and growing
- Rate of US spending not expected to change
- Average daily US interest cost is ~\$3B⁴

Long term gold price forecast up by ~100% in 2 years

The price estimates above represent the consensus long term price expectation 3-5 years ahead of the year in which they were originally forecast (i.e. 2024 long term price estimate relates to 2027- 2029).

- As at 31 July 2026, sourced from the US Department of Treasury at <https://www.treasurydirect.gov/mobile/#/publicdebt>.
- Analyst consensus as at April 2024, May 2025 and June 2026.

A high margin business is a safe bet in these times

1. Industry AISC margin source: Canaccord Genuity, for more information on CY2015-CY2024 see ASX announcement titled "Macquarie Conference Presentation" dated 7 May 2025.

2. The 2025 EVN AISC margin is the FY25 H2 & FY26 H1 actual and is calculated using achieved price (\$5,240/oz) less All-in Sustaining Cost (\$1,463/oz) (AISC) for continuing operations; 2026E EVN AISC margin is the FY26 H2 actual and is calculated using achieved price (\$6,343/oz) less AISC (\$1,895) for continuing operations.

Copper differentiation: significant value for shareholders

FY26 Revenue split

High margin copper assets (C1 cost):

Ernest Henry USD\$0.65/lb
Northparkes USD\$1.23/lb

Projects to consume 3Mtpa+ latent mill capacity or further grow production

Ernest Henry:

- Acquisition of Carnaby Resources¹
- Bert underground mine²
- Corella³

Northparkes:

- E22 block cave²
- Plant expansion study underway to increase the mill by 40-100%

1. For more information on the acquisition of Carnaby Resources see ASX announcement titled "Evolution agrees to acquire Carnaby Resources" dated 27 July 2026.
2. For more information on the Bert and E22 Project see ASX announcement titled "Growth Projects Approved to Deliver high Returns", dated 11 February 2026.
3. For more information on the Corella exploration program see ASX announcement titled "Exploration Update", dated 15 April 2026.

Investment to further enhance portfolio quality

Improving portfolio quality delivers higher shareholder returns

1. OPC IRR calculated using a base case gold price of \$3,300/oz and upside gold price of \$6,500/oz.

2. E48, E22, Coarse Particle Flotation Project and Bert IRRs calculated using base case metal prices of \$14,350/t copper and \$4,000/oz gold and January 2026 upside metal prices of \$18,000/t copper, and \$6,500/oz gold. All reported metrics are Evolution's attributable share post stream unless otherwise noted.
