About Felix Gold

Felix Gold Limited (ASX: FXG) is advancing two complementary opportunities in Alaska's Fairbanks Mining District: near-term antimony production and additional gold mineralisation.

Antimony: Felix Gold is building America's Antimony Solution – a fully integrated domestic supply chain from proven U.S. ore. The Treasure Creek Antimony Project hosts one of the only proven sources of high-grade antimony ore in the United States. With ~90%¹ antimony-bearing minerals and virtually no deleterious elements, Felix Gold has demonstrated military-grade antimony concentrate – results that, to the Company's knowledge, no other Western project has publicly achieved.

Gold: Felix Gold is the largest landholder in the Fairbanks Mining District, with inferred 831,000 oz at 0.84g/t of JORC gold resources² located 30km from Kinross's Fort Knox mill — a Tier 1 operation actively seeking third-party ore.

The same infrastructure, permitting pathway, and team serve both commodities. Mineralisation outcrops at surface adjacent to year-round paved road with grid power, just 30km from Fairbanks. No federal land significantly reduces permitting timeframes compared to other U.S. critical minerals projects, and the company is participating in the State of Alaska OPMP coordinated permitting process, a step in coordinating the State agency reviews required for the longer-term Plan of Operations.

Previous Disclosure – 2012 JORC Code

The information in this release that relates to Exploration Results, Mineral Resources and Exploration Targets for Felix's Fairbanks Projects was extracted from the following ASX Announcements:

19 Nov 2025 FXG: Ultra-High Ore Purity Achieves Military-Grade Antimony Concentrate
