ABOUT G50 CORP

Map: Location of G50 Corp's Golconda Project in Arizona and White Caps Project in Nevada

G50 Corp is an exploration company progressing critical minerals and precious metals projects in the United States, including the Golconda Project in Arizona and the White Caps Project in Nevada.

GOLCONDA PROJECT, ARIZONA

The Golconda Project is located in NW Arizona, a well-established mining jurisdiction with a long history of base and precious metals production. The project comprises a historical zinc, lead, gold and silver mine and is proximal to the Mineral Park copper, molybdenum and silver mine. Exploration has identified high-grade gold and silver mineralisation and a significant gallium discovery, highlighting the project's potential for both precious and critical metals.

WHITE CAPS PROJECT, NEVADA

The White Caps Project is located in Nevada, a premier mining jurisdiction with a long history of gold production. The project is a historical gold mine that was previously drilled by Freeport McMoRan between 1982 to 1984. Exploration has identified gold and antimony mineralisation, and the project is located proximal to Scorpio Gold Corp's Manhattan Gold Project. Highlighting its potential within a well-endowed mineral district.
