Cue Project (GDR 80%)

The Cue project comprises two exploration licences under application (E20/1072 and 1073), one granted exploration licence (E20/1071) and two granted mining leases (M20/455 and M20/327) over a contiguous area of 612.8 km².

Exploration work to date has confirmed a strong correlation between gold mineralisation and major regional structures, including the Big Bell Anticline, Big Bell Shear Zone (BBSZ), Cuddingwarra Shear, and several north–south trends. Large areas under transported cover remain underexplored, offering significant upside.
