Manna Lithium Project continues to advance with submission of MDCP and key project appointments

Global Lithium Resources Limited (**ASX: GL1**, “**Global Lithium**” or “the **Company**”), is pleased to confirm the Mining Development and Closure Proposal (MDCP) for GL1’s Manna Lithium Project has been lodged with the Department of Mines, Petroleum and Exploration (DMPE) in Western Australia.

The MDCP includes detailed plans for the development of essential infrastructure required for the Manna Project, located on Kakarra Country about 110km east of Kalgoorlie in WA in the Eastern Goldfields region of Western Australia.

Subject to its assessment and approval, the MDCP will permit the development of project components including the accommodation village, open pits, processing plant and access roads. Importantly, this proposal also encompasses the full mine closure strategy, aligning with the highest standards of environmental stewardship.

GL1 Managing Director Dr Dianmin Chen said the submission of the MDCP represents a further substantial step forward in de-risking and advancing the Manna Project towards a Final Investment Decision (FID).

“This detailed proposal reflects our thorough planning across the entire project lifecycle, from development through to effective closure, and acknowledges the expectations of our community partners, the Kakarra People,” Dr Chen said.

To further bolster the Manna Project’s development and underscore our commitment to bringing it into production, Global Lithium is also pleased to announce several key appointments to our project leadership team:

- **Wei Xie** joins as Project Director, bringing extensive experience as a proven business executive and operational manager with a track record in managing complex, multi-pit mining operations and high-profile projects across diverse commodities globally. His leadership will be critical in driving Manna through its development phases;
- **Tony Itzstein** is appointed as Contracts Manager, a highly experienced professional with a deep background in contracts and procurement management for major mining and EPCM projects in Australia and internationally. Tony's expertise in contract administration and cost reduction will be invaluable; and

- **Phoebe Yan** takes on the role of Marketing Manager, with more than 18 years of extensive experience in the lithium chemicals and mining sectors. Phoebe's expertise in off-take negotiations, international trade, pricing strategy and building strategic partnerships with Tier 1 customers will be instrumental in positioning Manna's product and strengthening our market presence.

These strategic hires reflect GL1's focus on building a robust, experienced team capable of executing the Manna Project effectively and efficiently as we advance towards FID.

Approved for release by the Board of Global Lithium Resources Limited
