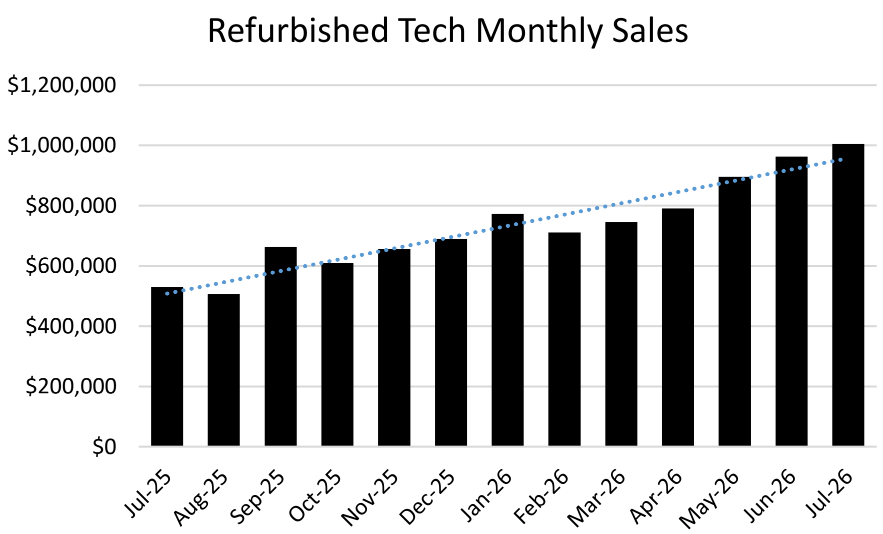
Monthly Refurbished tech sales surpass $1 Million

Highlights:

- Refurbished Technology division exceeds **$1.0 million** in monthly sales for the first time during July 2026
- Milestone follows more than two years of strategic investment in the higher-margin refurbished technology category
- Refurbished technology has become Harris Technology's largest revenue contributor and earnings driver

Pure-play online retailer **Harris Technology Group Limited (ASX: HT8)** ("Harris Technology" or "the Company") is pleased to announce that monthly sales from its Refurbished Technology division exceeded $1.0 million for the first time in July 2026.

Monthly sales increased from approximately $530,000 in July 2025 to more than $1.0 million in July 2026, **representing 89.4% year-on-year growth**.



Since entering the Refurbished Technology market in December 2023, Harris Technology has built out its refurbishment capability, supplier network and product range. Refurbished Technology is now the Company's largest revenue category and primary earnings driver, consistently delivering stronger margins and returns than traditional new IT hardware.

The Company believes the Australian refurbished technology market remains in the early stages of development and expects continued growth as it expands its refurbishment capability and product offering. Harris Technology is well positioned to benefit from this growing demand, with a trusted brand built over more than 30 years in the Australian IT/CE retail market.

The Company will build on this reputation by consistently delivering quality refurbished products that delight customers, further strengthening consumer trust and enhancing Harris Technology's standing as demand for refurbished technology continues to grow.

Harris Technology CEO, Garrison Huang, commented, "Surpassing $1 million in monthly Refurbished Technology sales validates the strategy we commenced in late 2023.

“Australian consumers continue to seek premium tech products that deliver exceptional value, and we believe demand for professionally refurbished devices will continue to grow.

“This milestone is not our destination - it's another step towards building Australia's leading online retailer of refurbished technology products."
