

1 July 2026

ASX RELEASE

HyTerra Webinar

HyTerra Ltd (ASX: HYT) invites investors to receive a Company update via an investor webinar to be held at 11:00am AEST (Brisbane/Sydney/Melbourne) / 9:00am AWST (Perth) on Thursday, 2 July 2026.

HyTerra Chief Executive Officer, Mr Riley Kemp will be joined by Executive Directors Mr Ben Mee and Mr Avon McIntyre to provide an update on the upcoming production test of the McCoy-1 well scheduled for the week of 13 July 2026 at the Company's 100% owned Nemaha Project in Kansas, USA. Production testing is the next stage in the commercial pathway for geologic hydrogen which remains HyTerra's key focus. Helium has the potential to provide an additional revenue stream and create further value.

The presentation will be followed by a Q&A session where Mr Kemp, Mr Mee and Mr McIntyre will attend to any questions raised by participants.

Participants may submit questions in advance to management during registration or via the webinar. A recording will also be made available following the event on the company's website.

Webinar Details

Time: 11:00am AEST / 9:00am AWST on Thursday 2 July 2026.

HYTERRA. A WORLD OF OPPORTUNITY.

Exploring for natural hydrogen and helium resources near major industrial hubs.

White hydrogen's potential as a low-carbon feedstock or fuel has spurred millions in new investment and created a world rich with opportunities for first movers.

HyTerra was the first company to list on the ASX with a focus on white hydrogen, which is generated naturally by the Earth. White hydrogen potentially has much lower production costs and carbon emissions than man-made hydrogen.

Our Nemaha Project in Kansas, USA, holds 100% owned and operated leases across the emerging Nemaha Ridge natural hydrogen and helium play fairway. Our Geneva Project in Nebraska, USA, is a 16% earn-in interest in a Joint Development with Natural Hydrogen Energy LLC targeting natural hydrogen and helium.

Both projects could be connected via existing transport infrastructure to multiple nearby off-takers, including ammonia manufacturers, and petrochemical plants.
