ITECH RECEIVES ALL APPROVALS FOR REYNOLDS RANGE GOLD-ANTIMONY DRILLING

HIGHLIGHTS

- iTech has received all drilling approvals for its upcoming gold-antimony focussed drilling program at Reynolds Range in the Northern Territory
- Earthworks, including drill pad preparation, drill sumps and track clearing have commenced in preparation for the arrival of the drill rig later this month
- iTech has planned twelve (12) drill holes across three prospects at Sabre, Falchion and Lander
- Each prospect has outcropping high grade antimony and gold mineralisation extending for up to 300m
- iTech will provide an update when drilling has commenced

Figure 1. Preparation of drill pads at the Sabre Antimony-gold Prospect, Reynolds Range

"With all necessary approvals now in place, iTech has started ground works in preparation for the arrival of the drill rig at Reynolds Range. The Company is excited to drill test beneath high grade, outcropping antimony and gold mineralisation at the Sabre, Falchion and Lander Prospects. The drill program will test the subsurface extent and grade of antimony and gold mineralisation across a 2.6km long mineralised corridor within a broader 6km long by 2km wide soil anomaly."

– Managing Director Mike Schwarz –

Reynolds Range Project Background

The Reynolds Range project consists of four granted Exploration Licences (EL23655, EL23888, EL28083 and EL33881), 100% owned by iTech Energy Pty, Ltd, a wholly owned subsidiary of iTech Minerals Ltd (Figure 3). The project covers a total of 791km² of the Aileron Province, part of the Paleoproterozoic North Australian Craton and is subject to a joint venture with SQM International Pty Ltd who have the option to earn up to 70% of the lithium mineral rights on the project area. iTech retains the right to 100% of all other commodities. The Project is located 90-230km NNW of Alice Springs with access available from the Stuart Highway and then the un-sealed Mt Denison road. The project area is part of the >42km long Stafford Gold Trend with 50 kilometres of strike coincident with the Trans-Tanami regional structure.

Upcoming drilling program at the Sabre, Falchion and Lander Prospects

iTech has received drilling approvals for its gold-antimony program at Reynolds Range, Northern Territory. Earthworks have started in preparation for the drill rig's arrival later this month with twelve drill holes planned across three prospects: Sabre, Falchion, and Lander, each with high-grade antimony and gold mineralisation extending up to 300m. Updates will follow when drilling begins.

Drilling is expected to take up to three weeks to complete with samples submitted for assay at the completion of each prospect. Drill results are expected to be received by late November/early December this year.

ABOUT iTECH MINERALS LTD

iTech Minerals Ltd (**ASX: ITM**, **iTech** or **Company**) is an ASX listed mineral exploration company exploring for and developing battery materials and critical minerals within its 100% owned Australian projects. The Company is exploring for graphite, and developing the Lacroma and Campoona Graphite Deposits in South Australia and copper-gold-antimony and lithium in the Reynolds Range Project in the NT. The Company also has extensive exploration tenure prospective for Cu-Au porphyry mineralisation, IOCG mineralisation and gold mineralisation in South Australia and tin, tungsten, and polymetallic Cobar style mineralisation in New South Wales.

iTech confirms that the Company is not aware of any new information or data that materially affects the information included in the announcement: "Detailed Soils Define Antimony and Gold Potential" on 15 October 2025, "New Geophysics Targets – Reynolds Range Antimony-Gold Project" on 22 August 2025, "High Grade Antimony Identified at Reynolds Range" on 19 August 2025, "182 g/t Au in Rock Chips from Reynolds Range" on 5 July 2024, "Up to 22% Antimony at Reynolds Range Prospects" on 3 September 2024 and "Expanded Gold and Antimony Prospectivity at Reynolds Range" on 29 May 2025. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original announcements.
