DRIVING THE FUTURE OF ZERO EMISSION TRANSPORT

ASX: ANNOUNCEMENT

29 July 2026

JANUS ELECTRIC EXPANDS GLOBAL INVESTOR REACH WITH FRANKFURT LISTING AND EUROPEAN INVESTOR RELATIONS PROGRAM

Janus Electric Holdings Limited (ASX: JNS; FSE: E3C) ("Janus" or "the Company") is pleased to announce that its shares have been admitted for trading on the Open Market (Quotation Board) segment of the Frankfurt Stock Exchange ("FWB"). The Frankfurt listing will broaden the Company's exposure to European institutional and retail investors and support its growing international profile as the global transition toward low-emission freight transport accelerates.

In conjunction with the listing, Janus has appointed **Dr. Reuter Investor Relations**, one of Germany's leading investor relations and capital markets advisory firms, to support the Company's investor communications and engagement activities across Germany and continental Europe.

Key Highlights

- Janus shares have commenced trading on the Frankfurt Open Market, providing a secondary trading venue for European investors.
- The listing expands Janus' access to one of the world's largest capital markets at a time of increasing investment in transport electrification and decarbonisation.
- Janus has engaged Dr. Reuter Investor Relations to lead investor relations activities across Germany and selected European markets.
- Europe is emerging as a key market for electric heavy transport, following the introduction of the continent's first CO_2 standards for heavy-duty vehicles.

The Frankfurt listing marks an important milestone for Janus as the Company continues to execute its strategy of accelerating the electrification of heavy road transport through its proprietary truck conversion and battery-swapping ecosystem.

Europe represents an increasingly important potential investor market for Janus. The introduction of the European Union's first CO_2 reduction targets for heavy-duty vehicles has accelerated investment in zero-emission freight solutions.

Comment from Janus Electric CEO Ben Hutt

"The admission of Janus shares to trading on the Frankfurt Stock Exchange is an important step in expanding the Company's international profile. Europe is at the forefront of the transition towards lower-emission freight transport, and we believe there is growing recognition that technologies such as battery swapping and fleet conversion can play a meaningful role alongside the production of new electric vehicles."

"Our engagement with Dr. Reuter Investor Relations will strengthen our ability to communicate Janus' strategy and commercial progress to investors across Germany and Europe. As we continue to scale our operations in Australia and North America, we look forward to engaging with investors who understand the long-term opportunity associated with freight electrification."

Comment from Dr Eva Reuter, CEO of Dr. Reuter Investor Relations

"The electrification of heavy transport has become one of the most important investment themes in Europe. Following the introduction of the first CO_2 standards for heavy-duty vehicles in July 2025, the share of newly registered electric trucks has increased significantly, rising to 5.6% from 3.5% in the preceding twelve months."

"Janus Electric's approach, combining truck conversions with battery-swapping infrastructure, provides exposure to a rapidly evolving segment of the transport market. We look forward to introducing the Company's strategy and growth plans to retail and sophisticated investors across Germany and continental Europe."

The Frankfurt listing does not involve the issue of new shares and will not result in any dilution to existing shareholders. Janus' existing ordinary shares will be available for trading in euros on the Frankfurt Open Market.

The Company believes the Frankfurt listing and engagement of Dr. Reuter Investor Relations represent a cost-effective opportunity to broaden Janus' shareholder base, increase awareness of its business model and align its investor profile with the significant opportunities emerging in the global freight electrification sector.

The impact of the Frankfurt listing and investor relations program on trading volumes and investor participation will depend on market conditions.

– Ends –

This announcement has been authorised for release by the Board of Directors.

About Janus Electric

Janus Electric is an Australian innovator in heavy vehicle electrification, offering a turnkey solution through its patented battery swap platform, truck conversion kits, charging infrastructure and integrated fleet management software. Janus delivers a zero-emissions, full-service electrification model for the freight and logistics sector, supporting operations across New South Wales, Victoria, Queensland, South Australia, and Western Australia, with international deployments active in the United States and Canada. Its Central Coast-based production facility underpins its national and international deployment strategy.

About Dr. Reuter Investor Relations

Dr. Reuter Investor Relations is a Frankfurt-based investor relations and capital markets advisory firm specialising in connecting listed growth companies with institutional and retail investors across Germany and continental Europe. The firm provides strategic communications, investor outreach and capital markets support across a range of sectors, including technology, energy transition and industrial innovation.
