National Ministers Attend Kinetiko Brakfontein Site Visit and Gas Flaring Demonstration

Kinetiko Energy Ltd (ASX: KKO) (**Kinetiko** or the **Company**) is developing an energy solution for South Africa, focused on commercialising 100% owned advanced shallow conventional gas wells in the Mpumalanga Province.

Kinetiko is pleased to report the successful site visit held at its Brakfontein gas project on Friday, 10 October 2025, attended by more than 100 guests, including South Africa's Minister of Mineral and Petroleum Resources, Mr Gwede Mantashe, and Deputy Minister, Ms Phumzile Mgcina.

The delegation observed a live demonstration of gas flaring from Kinetiko's Brakfontein well cluster, confirming consistent and commercial gas flow performance from the pilot production wells. The demonstration followed record gas flow results from the Company's optimised drilling program, which confirmed commercial production potential from the shallow sandstone reservoir.

The event represented a major milestone in Kinetiko's pathway toward near-term gas commercialisation, showcasing the significance, simplicity, and low-cost development potential of its onshore conventional gas fields. The Brakfontein cluster serves as the foundation for Project Alpha, a joint development with FFS Refiners to establish a micro-LNG plant with an initial production capacity of 5,000 tonnes per annum (tpa), scalable to 125,000 tpa.

The event was also attended by representatives of South Africa's petroleum and minerals regulators whom indicated their ongoing support for the Company's projects.

Kinetiko Executive Chairman Adam Sierakowski commented:

> *"Last Friday Kinetiko had the privilege of hosting the honorable Minister of minerals and petroleum resources Gwende Mantashe, Deputy Minister Mgcina, and senior government officials at Brakfontein. Their attendance and strong support for the development of domestic gas reinforces Kinetiko's role in delivering an energy solution for South Africa."*

Kinetiko extends appreciation to all attendees, including representatives from its joint development partners the Industrial Development Corporation of South Africa (IDC), FFS Refiners, regional farmers and the local community representatives.

About Kinetiko Energy

Kinetiko Energy is a gas exploration company with a focus on advanced onshore shallow conventional gas opportunities in South Africa.

Kinetiko's tenements are located in South Africa's primary power-producing region, near aging coal-fired power stations and infrastructure. As South Africa shifts towards modern power solutions, the gas from Kinetiko's deposits is expected to provide base load power and act as backup to renewables as part of the country's long-term energy future.

The Company has achieved maiden gas reserves with positive economics and has 6 trillion cubic feet (Tcf) of 2C contingent resources (alternatively described as having 2.8 Tcf of 1C contingent resources),[1] establishing a substantial world-class onshore gas project. Kinetiko's vision is to commercialise an energy solution for South Africa.
