

ASX RELEASE

ASX: KTK

4 August 2026

KTEK Investor Webinar

KTEK Aerosystems Ltd (ASX: KTK) (KTEK or the Company) is pleased to advise that it will host an Investor Webinar on Wednesday, 5 August 2026 at 4.30pm AEST (2.30pm AWST).

Chairman Howard Digby and **Managing Director Dekel Keisar** will provide an update on the Company's operations and review its results for the June 2026 quarter.

The webinar comes at an important time for KTEK as the Company progresses the ramp-up of operations and deliveries.

Investors and shareholders are encouraged to attend. The presentation will be followed by a live question-and-answer session.

Webinar details

Date: Wednesday, 5 August 2026

Time: 4.30pm AEST / 2.30pm AWST

About KTEK Aerosystems

KTEK Aerosystems (ASX: KTK) is a Tier-2 supplier of composite airframes and electromechanical assemblies for military and commercial UAVs. The Company delivers built-to-spec, Full Turn-Key (FTK) sub-assemblies - combining mechanical, electrical and firmware components into qualified ship-ready units - across five product lines:

- composite airframes (UAV fuselage structures, wings and control surfaces, lightweight aerospace composites);
- electromechanical assemblies (actuation modules, avionics trays and mounts, power distribution systems);
- rugged defence systems (shock-isolated racks and cabinets, EMC-hardened enclosures, mission system infrastructure); and
- systems integration and kitting (MIL-spec harnessing, PCBA integration, firmware loading and acceptance testing); and
- SATCOM components and sub-assemblies (RF-transparent radomes, lightweight antenna structures and integrated assemblies for mobile defence and commercial platforms). The result is Tier-1 rigour without Tier-1 overhead.

KTEK operates a scalable, asset-light “Cordless Factory” model, retaining engineering design, structural analysis and quality assurance in-house while outsourcing physical manufacturing to a certified global partner network across Israel, Europe, Thailand and the United States.

This structure enables rapid production scaling in response to new customer demand without the capital expenditure of a traditional defence manufacturer. Positioned as a “picks and shovels” supplier into the defence ecosystem, KTEK benefits from structural tailwinds in global military spending and UAV adoption without the complexity of direct government contracting. Beyond defence, the Company also supplies agricultural and delivery drone operators, providing a further growth dimension independent of defence budget cycles.

KTEK is led by Founder and Managing Director Dekel Keisar, a former IDF Infantry Company Commander (Major) and Mechanical Engineer (B.Sc., Tel Aviv University) with hands-on experience across more than 20 military UAV platforms and previously Head of UAV Structural Engineering at Israeli Aerospace Industries. The Board is chaired by Howard Digby, who brings 25+ years managing technology businesses in Asia-Pacific, 13 years of involvement with ASX-listed companies, and is the founding Non-Executive Director of Elsie Ltd (ASX: ELS) - a defence-focused drone communications company that grew from an ~A\$18 million IPO to a market capitalisation exceeding A\$1.5 billion. Non-Executive Director Winton Willesee contributes 25+ years in capital markets with expertise in company development, corporate governance, M&A and company secretarial practice across listed and private companies. Non-Executive Director Chris Baxter adds 30+ years in financial services and private equity, with recent focus on Ukrainian military UAV technology, advisory roles with leading drone OEM Skyeton, and strong networks across UK and European defence customers and Ministries of Defence.
