

QUARTERLY ACTIVITIES REPORT

For the period ending 31 Dec 2025

HIGHLIGHTS:

- **Drilling continued at Gidginbung during this quarter, delivering significant wide, high-grade gold intercepts including:**
 - 21m @ 2.72g/t Au Eq from 149m and 31m @ 2.46g/t Au Eq from 176m 80m south of Gidginbung pit (GBRCD010).
 - 21m @ 3.03g/t Au Eq from 145m 160m south of Gidginbung open pit (GBRCD011).
 - 52m @ 1.14g/t Au Eq from 102m (GBRC008).
- **Maiden drilling campaign commenced at the adjacent Dam Au-Cu deposit and at the Mandamah Cu-Au deposit in the central zone.**

Subsequent to the Reporting Period:

- **Assays were received at the Dam, yielding significant gold and copper intersections including:**
 - 144m @ 1.0g/t Au Eq from 84m (TDRCD001).
 - 142m @ 1.01g/t Au Eq from 121m (TDRCD002).
 - 130m @ 1.0g/t Au Eq from 108m (TDRCD003).
- **Successful \$15.4m raising via a heavily oversubscribed institutional placement to accelerate drilling.**
- **Strong balance sheet with ~\$20m cash post completion (after costs).**
- **Further assays are pending from Gidginbung and Mandamah and drilling to recommence shortly in the Southern Zone.**

LinQ Minerals Limited (ASX: **LNQ**) ("**LinQ**" or the "**Company**") is pleased to provide shareholders and investors with an operations overview to accompany the Appendix 5B for the quarter ending 31 December 2025 ("**Quarter**" or the "**Reporting Period**").

During the Quarter, LinQ continued active exploration across its flagship Gilmore Gold-Copper Project, with drilling continuing at the Gidginbung deposit and a maiden drilling program commencing at the Dam and Mandamah deposits. The programs targeted extensions of known mineralisation, aimed to confirm higher-grade zones and collect samples for metallurgical test work.

LinQ Minerals Executive Chair, Clive Donner commented:

"The Company continued its drilling program in the Southern Zone around Gidginbung and the Dam during the December quarter. Drilling results at Gidginbung were exceptional for a phase 1 drill program demonstrating significant higher-grade zones of thick intercepts and continuity, particularly stepping out to the south of the current pit. This drill

program together with the geochemical review undertaken recently, will continue to provide us with valuable data and input in the Southern and Central Zones. Metallurgical sampling was also undertaken this quarter.”

Continuation of Drilling Program at Gidginbung Gold Deposit

During the Reporting Period, LinQ continued the maiden drill program at the Gidginbung Gold deposit, located within the Southern Zone of the Gilmore Gold-Copper Project in New South Wales (**Figure 1 & 3**) marking the first exploration activity at the Gidginbung deposit in more than two decades. Gidginbung is a high-sulphidation epithermal gold system that previously produced approximately 540,000 ounces of gold from open pit operations between 1987 and 1996, when the gold price was approximately A\$460/oz. Along with the Dam deposit, Gidginbung forms part of a broader six-kilometre mineralised corridor that also includes three additional prospects, Mag H1, Fields, and Woolshed (**Figure 2**).

The program was designed to prove down dip and strike continuity of gold mineralisation and generate representative samples for metallurgical test work. Encouragingly the initial drilling confirmed that the Gidginbung system remains open along strike both north and south and also down dip. Additional drilling at Gidginbung throughout the quarter included two RC pre-collared holes, GBRC011 & 013, and an abandoned RC hole, GBRC012 for a total of 673m. Total drill metres completed to date at Gidginbung is 3,402m.

Assay results have been received for the first 10 holes, and partial assays for the 11th hole, GBRC011.

Additionally, a selection of quarter cored, diamond core samples from the recent Gidginbung drilling were submitted to ALS Global Metallurgy Services, Perth, with test work set to commence in 2026.

Highlights of the Phase 1 drill campaign include:^{1, 2}

- GBRC010 (80m step out south of open pit)
 - **21m @ 2.72g/t Au Eq** from 149m, including **3m @ 9.46g/t Au Eq**; and
 - **31m @ 2.46g/t Au Eq** from 176m, including **5m @ 12.69g/t Au Eq**.
- GBRC011 (160m step out south of open pit) (**Figure 4**)
 - **21m @ 3.03g/t Au Eq** from 145m; and
 - **14.3m @ 1.29g/t Au Eq** from 188m.
- GBRC008 (beneath open pit)
 - **20m @ 2.44g/t Au Eq** within a broader intercept of **52m @ 1.14g/t Au Eq** from 102m.
- GBRC004 (beneath open pit)
 - **11m @ 2.26g/t Au Eq** within a broader intercept of **19m @ 1.47g/t Au Eq** from 159m.
- GBRC007 (beneath open pit)
 - **24m @ 1.18g/t Au Eq** and **13m @ 1.19g/t Au Eq** both within a broader intercept of **82m @ 0.86g/t Au Eq** from 102m.
- GBRC006 (beneath open pit)

¹Gold Equivalent (AuEq) values – Requirements under JORC Code

- Assumed commodity prices for calculation of Gold Equivalent (AuEq) is Au US\$2,500/Oz, Cu US\$10,000/t
- Recoveries (Gidginbung) are assumed from similar deposits Au = 91%, Cu = 93%
- Preliminary recoveries from Gilmore porphyry sulphide resources Cu = 80 - 94%, Au = 50 - 73%
- AuEq (g/t) was calculated using the following formula: = ((Au (g/t)) + (Cu (g/t)*0.01/80.37681)).
- LNQ confirms that it is the Company's opinion that all elements included in the metal equivalent calculation have a reasonable potential to be recovered and sold.

²Refer to ASX Announcement: LNQ 8 October 2025 and 3 December 2025.

- **49m @ 0.79g/t Au Eq** from 128m.
- GBRC002 (beneath open pit)
 - **40m @ 0.50g/t Au Eq** from 143m.

Figure 1: Gilmore Gold-Copper Project.

Figure 2: Southern Zone resources and prospects over background reduced to pole aeromagnetic image. Note the gravity low represents the Gidginbung North porphyry target. Gidginbung resource reported at a 0.5g/t Au cut off, Dam resource reported at a 0.4% CuEq cut off.

Figure 3: Gidginbung/ Dam plan image illustrating the location of drilling results and pending assays.

Figure 4: Gidginbung cross section illustrating the results from hole GBRC011.

Commencement of Maiden Drilling Program at the Dam

During the Reporting Period, LinQ commenced a maiden drill program at the Dam Gold-Copper deposit, located approximately 600m east of Gidginbung within the Southern Zone of the Gilmore Gold-Copper Project in New South Wales (**Figure 1 and 3**). This marked the first exploration activity at the Dam deposit since 2012. The Dam has been drilled over a strike length of 1.2km remaining open along strike and at depth. The system strikes northwest and dips steeply east. The west margin of the deposit is bound by a reverse, steep east dipping footwall fault. Previous higher-grade gold and copper intercepts include¹:

- **Hole DD93GB45:** 167m @ 1.87g/t Au Eq (1.03g/t Au, 0.69% Cu);
- **Hole DD94GB72:** 85m @ 1.58g/t Au Eq (0.94g/t Au, 0.52% Cu);
- **Hole DD93GB32:** 118m @ 0.97g/t Au Eq (0.50g/t Au, 0.38% Cu); and
- **Hole DD94GB62:** 161m @ 0.82g/t Au Eq (0.38g/t Au, 0.35% Cu)

The deposit forms part of a broader six-kilometre mineralised corridor that also includes three additional prospects, Mag H1, Fields, and Woolshed (**Figure 2**).

Figure 5: Drill Rig mobilised at the Dam deposit.

Figure 6: Drone shot of the eastern Gidginbung pit wall towards the nearby Dam deposit.

The maiden drill program was designed to confirm and expand downdip and along strike continuity of the higher-grade gold-copper core to a vertical depth of approximately 200m. The drilling was primarily aimed to step out from historical hole DD93GB45 which intersected 167m @ 1.87g/t AuEq. Additionally, the program will generate samples for metallurgical test work.

By quarter end, 4 holes were completed, 3 RC pre-collared diamond holes, TDRCD001-003, and 1 RC hole, TDRCD004, for a total of 997m.

Subsequent to the end of the Reporting Period, LinQ received assay results from the four holes completed at the Dam. Results include^{1,3};

- **144m @ 1.0g/t Au Eq (0.55g/t Au, 0.36% Cu) from 84m to the footwall fault (TDRCD001).**
- **142m @ 1.01g/t Au Eq (0.50g/t Au, 0.41% Cu) from 121m to the footwall fault (TDRCD002).**
- **130m @ 1.0g/t Au Eq (0.53g/t Au, 0.38% Cu) from 108m to the footwall fault (TDRCD003).**
- **96m @ 0.52g/t Au Eq (0.24g/t Au, 0.22% Cu) from 45m to the footwall fault (TDRCD004).**

The results from TDRCD001, TDRCD002 & TDRCD003 significantly extend the thickness of shallow gold and copper mineralisation and additionally, demonstrates continuous high grade (>100 gram/metres Au Eq) mineralisation over a 300m strike (**Figure 8**). The high-grade strike remains open at depth and also, considerable scope remains for the discovery of additional high-grade cores within wide spaced drilling across the northern strike extent of the deposit. LinQ is highly encouraged by the assay results returned from the 2025 Dam drilling campaign, which coupled with the

³Refer to ASX Announcement: LNQ 8 January 2026, 14 January 2026 and 20 January 2026.

recent results from the adjacent Gidginbung drilling program strongly enhance the significant economic potential of LinQ's Southern Zone.

Collectively, the Gidginbung and Dam deposits host a Mineral Resource Estimate of 55Mt, containing approximately 1.2Moz of gold and 120Kt of copper⁴. Our maiden drill program represents a critical step in LinQ's strategy to systematically test the Southern Zone, which has seen minimal exploration drilling beyond the immediate resource areas since 2001.

The broader campaign aims to test both deposits further along strike and down dip supporting future assessment of potential open pit development. Additional priority targets within the six-kilometre mineralised corridor will also be followed up.

Figure 7: Dam cross section illustrating the results from hole TDRCD001 (local northing 8880N).

⁴ MRE is based of Sulphide Porphyry MRE at a 0.4% CuEq Cut-off (Dam) & Gidginbung MRE at a 0.5g/t Au Cut-off. For further details refer to Schedule 3 – Independent Technical Assessment Report within the IPO Replacement Prospectus, released on the ASX dated 25 June 2025.

Figure 8: Dam long section illustrating the results from LinQ holes TDRCD001, TDRCD002, TDRCD003 & TDRCD004 along with historical holes DD93GB45 and DD94GB72.

Mandamah Drilling Program

LinQ completed a single hole drill program at the Mandamah Gold-Copper deposit, within the Central Zone of the Gilmore Gold-Copper Project in New South Wales. The deposit has been drilled over a strike length of 0.6km remaining open along strike and at depth. The system strikes northwest and dips sub vertical.

The deposit forms part of a broader 16km long mineralised corridor that also includes reported gold and copper MRE's at the Estoril and Culingerai deposits along with two advanced prospects, Donnington and Monza (**Figure 1**).

Hole MDACD001 was completed to a final depth of 350m. Designed to confirm along strike continuity of the higher-grade gold-copper core, MDACD001 was completed with an aircore pre-collar to 96m followed by a diamond core tail.

Assay results are pending.

Subsequent to the end of the Reporting Period, LinQ announced that it has received firm commitments to raise A\$15.4m (before costs) via a share placement to institutional, sophisticated and professional investors at A\$0.55 per share with approximately 28 million new fully paid ordinary shares to be issued. Participants in the placement will

receive one (1) free attaching option for every two (2) new shares allocated under the offer, expiring 2 years from the date of issue with an exercise price of A\$0.78⁵.

The Company anticipates holding a General Meeting of Shareholders in late March to approve the T2 Placement and the Issue of the Attaching Options. Further details will be provided in the notice of meeting anticipated to be issued in February.

Summary of Expenditure

At 31 December 2025, LinQ Minerals Limited and its subsidiary held A\$6,237,709 in cash reserves. Further details can be found in the Appendix 5B released with this announcement.

Of the total expenditure of the Company during the Quarter, A\$2.12m of the Company's expenditure was on activities related to the Company's tenements (A\$1m) and exploration and development of the current projects (\$1.12m) as detailed in the Cashflow Report (Appendix 5B – Item 1.2(a)) and Item 2.1(b) appended to this report. The Company did not incur any expenditure related to mining, production and development activities during the Quarter.

Payments to related parties of the Company and their associates during the Quarter totalled approximately \$186k (Director remuneration \$178k and rent to an entity related to certain Directors \$8k). Refer to Appendix 5B – Item 6.1 appended to this report.

Use of Funds

LinQ Minerals Limited provides the following disclosure required by ASX listing rule 5.3.4 regarding a comparison of its actual expenditure to 31 December 2025 against the 'use of funds'* statement in its replacement prospectus dated 27 May 2025.

Expenditure	Funds allocated under the prospectus	Actual to 31 December 2025	Variance
Exploration expenditure EL 5864	3,215,000	1,285,299	1,929,701
Exploration expenditure EL 6845	2,150,000	96,877	2,053,123
Exploration expenditure EL 8292	45,000	42,276	2,724
Exploration expenditure EL 8397	50,000	44,676	5,324
Exploration expenditure EL 9738	40,000	40,893	(893)
Deferred consideration	1,500,000	1,000,000	500,000
Costs of the offer	772,088	722,337	49,751
Working Capital	2,227,912	529,933	1,697,979
Total	10,000,000	3,762,291	6,237,709

*The use of funds statement was a statement of current intentions, investors should note that the allocation of funds set out in the table may change depending on a number of factors including the results of exploration, outcome of development activities, regulatory developments, market and general economic conditions.

⁵Refer to ASX Announcement: LNQ 27 January 2026.

Tenement Table

The Company provides the following disclosure required by ASX listing rule 5.3.3 regarding Mining Tenement interests held at the end of the quarter and their location.

Tenement Reference	Location	Nature	Status	Interest
EL 5864	New South Wales	Direct	Granted	100%
EL 6845	New South Wales	Direct	Granted	100%
EL 8292	New South Wales	Direct	Granted	100%
EL 8397	New South Wales	Direct	Granted	100%
EL 9738	New South Wales	Direct	Granted	100%

The mining tenement interests relinquished during the quarter and their location: Nil.

The mining tenement interests acquired during the quarter and their location: Nil.

Beneficial percentage interests in farm-in or farm-out agreements acquired or disposed of during the quarter: Nil.

Gilmore Gold-Copper Project

LinQ's 100% owned flagship Gilmore Project is located between West Wyalong and Temora in New South Wales and is situated within the Macquarie Arc province in the Lachlan Fold Belt. This region is recognised as Australia's premier gold-copper province home to multiple large-scale operating mines. The Gilmore Project hosts the full suite of the Macquarie Arc intrusive gold-copper systems, analogues to the nearby Cadia, Cowal and Northparkes Systems (**Figure 9**):

Figure 9: Regional Geological setting of the Gilmore Project (Green shade represents Macquarie Arc volcanics).

The Company holds ~597km² of tenements with a 60km belt of +20 known prospects and 6 mineral resource deposits. The extensive tenement package positions the Company as a major player in the region offering advanced brownfield and greenfield opportunities for copper-gold porphyry and epithermal gold deposits. Gilmore hosts a Global Mineral Resource Estimate of 516Mt containing ~3.7Moz Au & ~1.2Mt Cu metal⁶.

Authorised for release by the Board of Directors of LinQ Minerals Limited.

Forward Looking Statements and Cautionary Statements

This announcement contains forward-looking information about the Company and its operations. In certain cases, forward-looking information may be identified by such terms as "anticipates", "believes", "should", "could", "estimates", "target", "likely", "plan", "expects", "may", "intend", "shall", "will", or "would". These statements are based on information currently available to the Company and the Company provides no assurance that actual results will meet management's expectations. Forward-looking statements are subject to risk factors associated with the Company's business, many of which are beyond the control of the Company.

It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially from those expressed or implied in such statements. There can be no assurance that actual outcomes will not differ materially from these statements.

Notes to the Mineral Resource Estimate (JORC 2012):

- 1) Copper Equivalent values calculated using a copper price of \$US8500/tonne and gold price of \$US2100/Oz. $\text{Cu Equiv (\%)} = ((\text{Cu (g/t)}) + (\text{Au (g/t)} * 67.515 / 0.0085)) / 10000$.
- 2) Molybdenum is not used in the calculation of a copper equivalent value.
- 3) Preliminary copper floatation recoveries for the porphyry sulphide resources range from 80 to 94% for copper and 50 to 73% for gold.
- 4) All tonnage, grade and ounce values have been rounded to relevant significant figures. Slight errors may occur due to rounding of these values.
- 5) Dam, Estoril and Gaining reported to approximately 300m depth, Culingera, Mandamah to approximately 350m depth and Yiddah to approximately 450m depth.
- 6) It is LinQ's opinion that the metals included in the Estimate (Copper and Gold) have a reasonable potential to be recovered and sold.

For further details on the MRE, refer to Schedule 3 – Independent Technical Assessment Report within the IPO Replacement Prospectus, released on the ASX dated 25 June 2025.

For further details on historical drill results referred to in this announcement refer to Schedule 3 – Independent Technical Assessment Report within the IPO Replacement Prospectus, released on the ASX dated 25 June 2025 and prior ASX Announcements referenced in this release.

Competent Persons and Compliance Statement

The information in the referenced announcements footnoted below 1 to 3 that relates to Exploration Results that have previously been released on the ASX. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcement and, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

Mineral Resources - Gilmore Project (other than Gidginbung)

The information in this announcement which relates to previously announced estimate of mineral resources for the Gilmore Project (other than Gidginbung) were first released by the Company in its replacement prospectus dated 27 May 2025 for its ASX listing a copy of which is available under LinQ Minerals profile and released to the ASX platform on 25 June 2025. LinQ Minerals confirms that it is not aware of any new information or data that materially affects the estimates for the Gilmore Project and that all material assumptions and technical parameters underpinning the estimate (as detailed in the Prospectus) continue to apply and have not materially changed.

Mineral Resources - Gidginbung

The information in this announcement which relates to previously announced estimate of mineral resources for the Gidginbung, were first released by the Company in its replacement prospectus dated 27 May 2025 for its ASX listing a copy of which is available under LinQ Minerals profile released to the ASX platform on 25 June 2025. LinQ Minerals confirms that it is not aware of any new information or data that materially affects the estimates for Gidginbung and that all material assumptions and technical parameters underpinning the estimate (as detailed in the Prospectus) continue to apply and have not materially changed.

Authorised by: the Board of LinQ Minerals Limited

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
