

ASX Announcement

30 April 2026

QUARTERLY ACTIVITIES REPORT FOR THE PERIOD ENDING 31 MARCH 2026

Projects - Edjudina Project

- Heritage agreement continuing to progress with aim to undertake heritage surveys at Yilgange and El Capitan
- New highly prospective zones at Yilgange prospect with geological similarities to the adjacent Porphyry Gold Mine owned by Northern Star
- Review of previous drilling at El Capitan indicated further prospective zones on strike that are recommended to be drilled by independent geophysics consultants
- Drill planning continues with initial work to focus on AC drilling at Yilgange and El Capitan extensions following completion of heritage surveys

Corporate

- Cash balance of ~\$1.72m as of 31 March 2026 positioning the Company well for future exploration plans
- Ongoing evaluation of resource projects for potential acquisition

M3 Mining Limited (ASX: M3M) (M3 Mining, the Company) is pleased to provide an update on corporate and exploration activities during the March 2026 Quarter. The Company is exploring for orogenic gold deposits at its Edjudina Project and sedimentary-hosted copper deposits at its Victoria Bore Project, both located in tightly held regions of Western Australia.

Non-Executive Director, Tyler Formica: *"Progress continues on the heritage agreement at Edjudina. With new drill targets at Yilgange and potential for extensions to the known areas of mineralisation at El Capitan, The Company is well funded to execute our plans at Edjudina to test these exciting new targets following completion of heritage surveys."*

Recent Activities

During the quarter, The Company announced the completion of a geological review of all previous work at Edjudina (as announced on 12 January 2026) and in addition, Resource Potentials geophysics consultants have been engaged to undertake a geophysical review and targeting exercise across the Project to provide further regional context and provide a comprehensive suite of geophysical images.

Work continues on a heritage agreement with the aim to undertake heritage surveys at Yilgangie and El Capitan. Comprehensive drill planning continues in order to test the exciting new targets at Yilgangie and El Capitan.

Yilgangie Prospect

As part of the geological review, the Company noted that the Porphyry Gold Mine (located 10 km to the east of the Yilgangie prospects) is hosted in alkalic porphyry intrusives and the recently completed review indicates this host rock is a key control for gold mineralisation. The geological review highlighted several key historic exploration results from Yilgangie (see announcement dated 12 January 2026 for full details).

Corporate

During the quarter, the Company has also assessed multiple resource project opportunities with preliminary commercial discussions currently underway.

Financial

Cash held as of 31 March 2026 was approximately \$1.72m.

For the purpose of Section 6 of the Appendix 5B, all payments made to related parties have been paid in relation to director fees.

About M3 Mining

M3 Mining Limited (ASX:M3M) is a Perth-based mineral exploration company focused on creating value for shareholders through exploration and development of a high-quality base metal and gold exploration portfolio. M3 Mining's projects are strategically located in regions surrounded by majors and has experienced minimal modern, systematic exploration across both projects. The Company's strategy is to apply a systematic approach to the assessment and prioritisation of its projects, all of which have the potential to produce material discoveries.

Investors should refer to previously stated announcements for additional details on exploration results and associated competent person statement.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the earlier released announcements.

Edjudina Gold Project

The Edjudina Project is located approximately 150km northeast of Kalgoorlie in Western Australia. It covers a section of the established mineralised trend along the Keith-Kilkenny Tectonic Zone which hosts multiple significant gold discoveries (see Figure 3). No large-scale mining has occurred within the tenement area, however, historical near surface workings can be observed throughout the region, particularly within and along strike of the previous mines in the Yilgarn Mining Field. The Company's tenements (both granted and under application) are proximal to Northern Star's operations at both the Porphyry and Carosue Dam operations (see Figure 3).

Victoria Bore Copper Project

The Victoria Bore Copper Project is centred on the historic Victoria Copper Mine which produced high grade copper averaging circa 32.7% Cu for 62.5t of copper from near surface in the 1950's. The Victoria Bore Project is located approximately 120km south of the town of Onslow and 130km southeast of Exmouth in Western Australia. The tenements lie adjacent to the Northwest Coastal Highway and are readily accessible (see Figure 4).
