About Marimaca Copper

Marimaca is a TSX (TSX:MARI) and ASX (ASX:MC2)-listed copper company focused on the development of high quality copper assets in northern Chile. The Company’s flagship asset is the Marimaca Oxide Deposit Project (“MOD”), located in Chile’s prolific Antofagasta region. It is one of the few globally significant greenfield copper discoveries made in the last decade and represents a low-risk development opportunity, given the proximity to the city of Antofagasta and port of Mejillones, with substantial exploration upside. The Company also controls additional exploration properties at Pampa Medina and Madrugador within the Sierra de Medina region, located 30 kilometers from the MOD, where recent drilling has identified both oxide extensions and high-grade sulphide mineralization at depth.

This news release is authorized for release by the Board of Directors of Marimaca.
