Project Overview. Construction of the Makhado steelmaking hard coking coal Project (“**Makhado Project**” or “**Makhado**”) progressed well, with C3 commissioning of the CHPP reached in May 2026. During the quarter, more project development milestones were successfully achieved, whilst maintaining regulatory compliance performance that have become a recognizable feature of the venture to date. The colliery will be South Africa’s largest hard coking coal (**HCC**) producer, designed to produce 800,000 tonnes a year of HCC 64 Mid Vol, once steady-state operation for the foundation phase is reached. The life-of-mine (**LOM**) for the Makhado Colliery is planned to be 28 years. Contiguous to the Makhado Project are the satellite Greater Soutpansberg Projects (**GSP**), that are all at granted Mining Right status, also endowed with steelmaking HCC potential, and scheduled to be the focus of mine planning, once the Makhado Project is commissioned.

C4 Hot commissioning and plant start-up is underway and performance testing is scheduled for early August 2026. The CHPP will process ROM coal to produce a primary product of HCC 64 Mid Vol and a secondary product of 5,500kcal thermal coal ("TC"). Work is continuing on the planning of the expansion strategy once the foundation phase is commissioned. Environmental and Process Technologies (**Enprotec**), the lead contractors for building the Coal Plant, peaked at a staff compliment of 450 persons on site, across 16 different sub-contractors, with 140 of these employees having been recruited from the host communities.

- *Bulk water supply:* - Bulk water systems (eastern wellfields) were installed and commissioned for provision of process water to the CHPP and the remainder of the system (western wellfields) are planned for commissioning during the next quarter.

- *Product logistics:* - Product logistics infrastructure, including two weighbridges (80 tonnes certified) were commissioned during the quarter and Makhado is ready for product delivery to port.
- *Logistics contractors:* - Logistics contractors were shortlisted and are preparing for trial runs to port during August.

Outlook. Hot commissioning activities and start-up of the Coal Plant has progressed well and the performance testing is expected to be completed early August, whereafter the plant's production will ramp up to full capacity before the end of the quarter.
