

MICRO-X APPOINTS NEW CHIEF FINANCIAL OFFICER

Further strengthening financial and commercial leadership to support growth

Adelaide, Australia, 27 March 2026: Australian hi-tech company Micro-X Ltd (ASX:MX1) (**Micro-X** or the **Company**), a global leader in cold cathode X-ray technology for health and security markets, is pleased to announce the appointment of Mr Peter Dickman as Chief Financial Officer effective 30 March 2026.

Peter brings senior financial expertise, developed over more than 20 years in large, complex listed organisations operating across multiple markets. His experience includes delivering disciplined financial stewardship, capital oversight and enterprise planning. Prior to joining Micro-X, Peter was Group Chief Performance Officer at Domino's Pizza Enterprises Ltd, with enterprise-level responsibility for financial planning, performance oversight and capital planning across 12 international markets. He brings strong analytical capability and significant experience leading and developing high-performing finance teams.

Micro-X Chief Executive Officer Kingsley Hall commented:

"We are extremely pleased to welcome Peter Dickman to the leadership team at Micro-X as we continue to work towards our immediate strategic goals of growing Rover revenue, monetising our security platform and completing Head CT imaging trials. Peter brings valuable financial expertise across multi-market environments, with a strong focus on disciplined governance, planning and performance. His strategic financial expertise will be invaluable as we continue to build our global commercial business. We are delighted to have appointed Peter, who will join Micro-X on Monday 30 March."

This ASX Announcement is authorised by the Board of Micro-X.

About Micro-X

Micro-X Limited is an ASX listed hi-tech company developing and commercialising a range of innovative products for global health and security markets, based on proprietary cold cathode, carbon nanotube (CNT) emitter technology. Electronically controlled emitters enable x-ray products with significant reduction in size, weight and power requirements, enabling greater mobility and ease of use in existing x-ray markets and a range of new and unique security applications. Micro-X has a fully vertically integrated design and production facility in Adelaide, Australia. A growing technical and commercial team based in Seattle is rapidly expanding Micro-X's US business.

Micro-X's product portfolio spans four high margin product applications in health and security. The first mobile digital radiology products are currently sold for diagnostic imaging in global healthcare, military and veterinary applications. The US Department of Homeland Security has contracted Micro-X to design a next generation airport security checkpoint. A miniature brain CT imager for pre-hospital stroke diagnosis in ambulances is being developed with funding from the Australian Government's Medical Research Future Fund. Micro-X is developing a full body CT under contract by US Government agency ARPA-H. For more information visit: www.micro-x.com
