

ASX:**NFL**

30 April 2026

QUARTERLY ACTIVITIES REPORT

FOR THE PERIOD ENDED 31 MARCH 2026

Norfolk Metals Limited (ASX:NFL) (**Norfolk** or the **Company**) is pleased to report on its activities during the 3-month period ended 31 March 2026.

Highlights of Quarter Ending 31 March 2026

- Norfolk suspended from trading in relation to a proposed material acquisition in Chile and a proposed re-compliance under Listing Rule 11.1 (See announcement 11th March 2026)
- Maiden Drill Campaign Phase #1 RC completed at the Carmen Copper Project with all assays received (See announcement 11th December 2025 and 14th January 2026)

HIGHER GRADE DRILLING INTERCEPTS:

- o **CCRC-25-030 - 53m (30.9m TW) @ 1.1% Cu from 62m; incl. 4m @ 1.3% Cu from 64m, and 13m @ 1.9% Cu from 85m; and 13m @ 1.6% Cu from 100m**
- o **CCRC-25-033 - 32m (19.9m TW) @ 1.3% Cu from 97m; incl. 9m @ 2.2% Cu from 99m, 4m @ 1.8% Cu from 113m; 2m @ 1.9% Cu from 119m; and 3m @ 2.1% Cu from 125m**
- o **CCRC-25-034 - 26m (21.9m TW) @ 0.8% Cu from 37m; incl. 6m @ 1.3% Cu from 39m; and 4m @ 2.2% Cu from 52m**
- o **CCRC-25-020 - 22m (19.2 TW) @ 0.5% Cu from 0m; incl. 6m @ 1.0% Cu from 12m**
- o **CCRC-25-035 - 18m (15.6m TW) @ 0.5% Cu from 40m; incl. 5m @ 0.9% Cu from 52m**
- o **CCRC-25-036 - 12m (10.3m TW) @ 0.8% Cu from 79m; incl. 3m @ 1.3% Cu from 79m**
- o **CCRC-25-027 - 17m (13.7 TW) @ 0.9% Cu from 14m; incl. 3m @ 1.4% Cu from 16m and 5m @ 1.5% Cu from 24m**

[#] True width(s) (TW) have been calculated using method as outlined in "Orientation of data in relation to geological structure" in JORC Table 1 at rear of ASX release January 14th 2026

- Norfolk closed a successful capital raise of \$2,100,000 via the Company's capacity under ASX listing rules 7.1 and 7.1A (which includes \$100,000 in director participation subject to shareholder approval) including sophisticated resource investors who approached the Company as a cornerstone.
- Strong capital position at March 31 2026 of A\$2.06M in cash

Suspension

Norfolk Metals Ltd (**Norfolk** or the **Company**) has been operating in Chile for the majority of 2025 and all of 2026, having first been introduced to the Carmen Copper Project in late 2024. On 11 March 2026, the Company announced its suspension from trading on the ASX in connection with a proposed material acquisition in Chile and an associated proposed re-compliance with Listing Rule 11.1.

The Company is progressing all necessary Chilean regulatory approvals and ASX approvals required for the proposed material acquisition, with a view to reaching a stage at which a comprehensive update can be provided to the market. Norfolk currently anticipates releasing this update in May 2026, including an indicative timeline for the proposed completion of the acquisition and the Company's readmission to trading on the ASX.

Phase #1 drilling complete at the Carmen Copper Project

Norfolk reported the assay results from the final six RC holes of the Maiden Drill Campaign, totalling 945m, which completes Phase #1 of the 2025 Maiden Drill Campaign with 37 RC holes drilled, totalling 3,401m, with no personal safety, process safety or environmental incidents incurred.

The Project hosts a foreign copper oxide mineral resource estimate of 5.6Mt at 0.6% Cu reported in accordance with Canadian National Instrument 43-101 (Carmen NI 43-101 MRE)^{1,2} (See Annexure A and 31st March 2025 ASX release). The RC drilling Phase #1 concentrated on the Carmen Main target area with a focus on targets along strike of the Carmen-Tabaco Thrust Fault (**Carmen Tabaco Thrust** or **CT Thrust** or **CTTF**) system and confirmation of known mineralisation within the historical resource area, with some twinning of important historical drill holes.

Figure 1: Carmen Cu Project Carmen Main Maiden Drill Campaign RC Phase #1

¹ Independent Technical Report prepared by SRK Consulting Chile S.A. (SRK) for International PBX Ventures Ltd. (IPBX) published 25 January 2007 (Carmen NI 43-101 MRE).

² This is a foreign estimate not reported in accordance with the JORC Code. The supporting information required by Listing Rule 5.12 was first disclosed to ASX on 31 March 2025 and has not materially changed. The Carmen NI 43-101 mineral resource estimate is a foreign estimate and is not reported in accordance with the JORC Code. A Competent Person has not yet undertaken work to classify the foreign estimate as a Mineral Resource in accordance with the JORC Code. It is uncertain whether further evaluation will result in the estimate being able to be

Maiden Drill Campaign Results

Phase #1 of the Maiden Drilling Campaign has been completed consisting of 37 RC holes drilled totalling 3,401m. The results of the higher grade intersections from the drill program have been summarised below (**Table 1**). Refer to Table 4 for further details of the results of Phase #1 drilling.

Hole ID	From	To	Length (m)*	True Width (m)	Average Grade % Cu	Higher Grade Intercepts % Cu	Including
CCRC-25-030	62	115	53	30.9	1.13	53m @ 1.1% Cu	4m @ 1.3% Cu from 64m; 13m @ 1.9% Cu from 85m; 13m @ 1.6% Cu from 100m
CCRC-25-034	37	63	26	21.9	0.80	26m @ 0.8% Cu	6m @ 1.3% Cu from 39m; 4m @ 2.2% Cu from 52m
CCRC-25-033	97	129	32	19.9	1.34	32m @ 1.3% Cu	9m @ 2.2% Cu from 99m; 4m @ 1.8% Cu from 113m; 2m @ 1.9% from 119m; 3m @ 2.1% Cu from 125m
	69	78	9	5.7	0.60	9m @ 0.6 % Cu	3m @ 0.9% Cu from 70m
CCRC-25-029	15	19	4	3.3	1.48	4m @ 1.5% Cu	3m @ 1.8% Cu from 15m
CCRC-25-020	0.00	22.00	22.00	19.2	0.46	22m @ 0.5 % Cu	6m @ 1.0 % Cu from 12m
CCRC-25-035	40	58	18	15.6	0.54	18m @ 0.5% Cu	5m @ 0.9% Cu from 52m
CCRC-25-027	14	31	17	13.7	0.89	17m @ 0.9% Cu	3m @ 1.4% Cu from 16m; 5m @ 1.5% Cu from 24m
CCRC-25-036	79	91	12	10.3	0.77	12m @ 0.8% Cu	3m @ 1.3% Cu from 79m; 2m @ 1.1% Cu from 85m
CCRC-25-028	18	27	9	7.7	0.64	9m @ 0.6% Cu	4m @ 0.9% Cu from 23m
CCRC-25-031	76	89	13	3.7	0.62	13m @ 0.6% Cu	5m @ 1.3% Cu from 84m

Table 1: Carmen Main Higher Grade Intercepts

Overall, the RC drilling results validated the historical Cu Oxide and Cu Sulphide intersections used in the Carmen NI 43-101 MRE and confirmed the higher grades contained within the sulphide mineralisation. **Drilling along the downdip margins of the CT Thrust has confirmed the continuity of the Cu oxide ore data used in the historic Carmen NI 43-101 MRE, and indicates mineralisation remains open at depth, outlining the potential to identify resources in the sulphide section of the ore body.**

The results of the last six holes of the RC drilling program have shown the following:

Carmen Main Results

1. Testing down dip extent of the mineralisation within the Copper Oxide Zone (COZ) and CT Thrust at depth.

Drill holes CCRC-25-035 and CCRC-25-036 successfully tested/confirmed (**Table 2**) the down dip extensions of the COZ located within the western extent of the Carmen NI 43-101 MRE (**Figure 1**). The significant mineralisation observed in both holes suggests that the western side (down dip) remains open and, with further drilling and verification, could potentially add significant oxide/sulphide resources in addition to the Carmen NI 43-101 MRE (**Figure 2**).

Section Line	NFL Drill Hole	Intersection	IPBX Hole	Intersection
10,150NE	CCRC-25-035	19m @ 0.5% Cu	TAB-08A	21.5m @0.4% Cu
10,350NE	CCRC-25-036	12m @ 0.77% Cu	TAB-067	12m @ 0.79% Cu

Table 2: Results comparison of twin CCRC/IPBX holes

Both holes were extended to test the CT Thrust which is believed to be the conduit or main feeder for the copper mineralisation within the Carmen Main zone. Both holes intersected the CT Thrust targets but the zones did not contain any anomalous copper mineralisation. This suggests that these fault structures and other secondary NNW, N/S, and NNE striking faults are potentially part of a complex system, and that intersections between faults structurally control the mineralisation that is propagating along the CT Thrust. The possible outcome is a shoot direction plunging steeply along the line of intersection between the CT Thrust and other cross-cutting faults.

Figure 2: Carmen Main Section 10350mNE – Open at Depth

- Deeper RC holes on section 10,000mNE (Figure 2) further confirmed Cu sulphide potential at depth and northern oxide extension

Drill hole CCRC-25-033 was drilled vertically as partial infill and to confirm the mineralisation between holes TAB 01A (Historical Drill Hole) and CCRC-25-030 (Maiden Drill Campaign RC hole). The hole intersected strong mineralisation, and the assays confirmed the high grade Cu sulphide mineralisation observed from the immediate surrounding holes (**Figure 3**).

Significant intercepts of Cu Oxide and Cu Sulphide mineralisation were observed starting from 32m depth and below. The deeper RC drilling on the 10,000mNE section confirmed the potential of the Cu sulphide mineralisation that **remains open at depth and will be a prime target for the Phase #2 diamond drilling program**.

Drill hole CCRC-25-034 was drilled approximately 50m to the north of hole CCRC-25-033 (**Figure 4**). The drill hole intersected the Cu oxide/sulphide transition zone within the meta-sediments from 79m and is open at depth. The metasediment and andesite contact was intersected at 102m (CTTF). The hole was then extended past 200m to test the Tabaco Fault, but no further copper mineralisation was intersected. The drilling suggests that the mineralisation is open to the west and that there may be a shoot controlling the mineralisation that is plunging steeply in the NNW direction. This will be tested during the next phase of Diamond Drilling.

Figure 3: Carmen Main Section 10,000mNE

Figure 4: Carmen Main Section 10,050mNE – open at depth

\$2.1m Capital Raise Completed

The Company completed a capital raise with support from sophisticated resource investors as cornerstones, existing shareholders and directors to raise \$2,100,000 (before costs) through a placement of up to a total of 21,000,000 fully paid ordinary shares at an issue price of \$0.10 each (**Placement Shares**), together with one free attaching unquoted option for every Placement Share subscribed for (**Placement Options**) (the **Placement**) (director commitments subject to shareholder approval). The Placement Shares will represent approximately 25% of the Company's existing shares on issue.

The issue price represented a 4.76% discount to the last traded price of \$0.105 on 13 January 2026 and a 3.85% discount to the 15-day volume-weighted average price (**VWAP**) of \$0.104.

The Placement Shares (excluding the Director Placement Shares referred to below) were issued under the Company's available placement capacity under Listing Rule 7.1 (11,919,886 Shares) and Listing Rule 7.1A (8,080,114 Shares). The Placement Options will have an exercise price of \$0.15 each and will expire 3 years from the date of issue (subject to shareholder approval).

The Board has committed to subscribe for 1,000,000 Placement Shares (\$100,000) (**Director Placement Shares**) and 1,000,000 free attaching Options on the same terms as other participants in the Placement (together, the **Director Placement Securities**). This amount forms part of the total \$2,100,000 (before costs) to be raised under the Placement.

Carmen Copper Project Updates

Further to the Carmen Copper Project update released on 23 February 2026, the Company confirms that it has formally lodged a Declaración de Impacto Ambiental (DIA) for the project in Chile. The DIA represents a key regulatory milestone within the Chilean Environmental Impact Assessment System and is required to secure environmental approval for the proposed project activities. Since submission, the application has progressed through the initial phases of review by the relevant Chilean authorities, including standard completeness and technical assessments of the documentation.

Following this review, the Company received feedback identifying a number of matters requiring clarification, supplementation and/or rectification. These items are typical of the early-stage DIA process and primarily relate to requests for additional technical detail and supporting information for environmental baseline studies and project descriptions; clarification of certain assumptions, methodologies and data inputs used in the assessment; further information regarding potential environmental impacts and proposed mitigation measures; and administrative and formatting matters to ensure consistency with applicable requirements.

The Company is presently working through a structured response process, coordinating with local technical consultants and advisors in Chile to prepare the required supplementary information and responses within prescribed timeframes. Requests of this nature are a normal feature of the DIA evaluation process and do not, in themselves, indicate any adverse determination, but rather reflect the iterative nature of the Chilean environmental approvals regime, under which applications are progressively refined through regulator feedback. The Company will continue to keep shareholders informed of any material developments as the approval process advances.

During 2026, the Company has advanced multiple parallel workstreams at the Carmen Copper Project focused on refining drill targeting and de-risking future programs. Field mapping, sampling and structural interpretation have been completed across the Carmen Main area and along strike, including the Higuieritas Belt, to improve understanding of controls on high-grade copper mineralisation and to inform Phase 2 drilling priorities. In parallel, approximately 1,000 metres of historically mineralised diamond core has been re-assayed to validate and enhance confidence in historical datasets, and these outcomes will underpin the planned Phase 2 diamond drilling campaign, which is being refined in line with ongoing geological interpretation, assay results and regional IP geophysical targets.

In addition, preliminary water supply investigations are nearing completion, supported by an independent study assessing both on-site and third-party sourcing options, to support the project's longer-term development ambitions.

Existing project developments in the reporting period

Both the Orroroo Uranium Project and the Roger River Project remain as assets of the Company since Norfolk's listing in March 2022.

Norfolk has previously announced the intention to consider further geophysics for target generation at the Orroroo Uranium Project (**Figure 6**). The Company continues to work with Orroroo stakeholders via the Company's local correspondent and the Department of Energy and Mining in South Australia to evaluate tenement tenure obligations and the exploration potential of the project.

The Orroroo Uranium Project comprises three granted exploration licenses, EL6552, EL6814 and EL6948, which together cover 723km², located approximately 274km northwest of the capital city of Adelaide, South Australia, within the Walloway Basin, which is an elongate Tertiary Basin approximately 50km long and up to 15km wide. It consists of Tertiary and Quaternary sediments unconformably underlain by Adelaidian basement.

Figure 6: Orroroo Uranium Project

The Roger River Project comprises the granted exploration license EL20/2020, which covers 26km², located 410km northwest of the capital city of Hobart, Tasmania. The Project is prospective for gold and copper as indicated by the intense silicification, argillisation and diatreme breccias in close proximity to the Roger River Fault along with carbonate-rich host rocks.

Revised expenditure commitments were previously established for Tasmanian permits EL20/2020, and proposals were prepared for future drilling upon receipt of all required approvals. Planning for future drill testing of priority

continued with the resubmission of a previously approved drilling plan to Mineral Resources Tasmania (MRT) in December 2025 with approval progressing with MRT and stakeholders of the region.

Figure 5: Roger River Project

Financials

The cash flows relating to the March 2026 quarter included a total of \$655k in exploration and evaluation spend on the Carmen Copper, Roger River and Orroroo projects, \$1,071k on option payments split between: \$710k (US\$500k) which is the payment of a non-refundable option payment to secure the proposed material acquisition in Chile, and \$361k (US\$250k) option payment to the vendors of the Carmen Copper Project as part of the binding offer to acquire the Carmen Copper Project (refer to ASX announcement 31 March 2025), and \$238k in staff, corporate and admin costs managing the corporate requirements of the Company. No expenditure was incurred for mining production or development activities during the quarter.

The Company had a closing cash balance of \$2.06 million.

Payments of approximately \$112,000 were made to related parties of the Company, as shown in the attached Appendix 5B. These payments relate to current fees and consulting fees paid to directors.

Tenement Status

The Company confirms that all of its tenements remain in good standing.

Tenement ID	Holder/Applicant	Interest at start of quarter (%)	Interest at end of quarter (%)
EL20/2020	Roger River Resources Pty Ltd	100%	100%
EL6552	Black Lake Pty Ltd	100%	100%
EL6814	Black Lake Pty Ltd	100%	100%
EL6948	Black Lake Pty Ltd	100%	100%

END

This announcement has been authorised for release to the ASX by the Board of Directors of Norfolk Metals Ltd

About Norfolk Metals

The Carmen Copper Project (CCP) is located in the Huasco Province, Atacama Region in Chile. The Project encompasses twenty-two contiguous exploration and exploitation licenses totalling 46.6km². There are multiple mineralised targets over an extensive strike length with intensive copper mineralisation from surface. Only 16km to the northeast of the CCP is the Nueva Unión joint venture between Teck and Newmont. Nueva Unión is currently developing the multi-billion-dollar Relincho and Fortuna (previously called El Morro) deposits. Whilst the CCP currently presents as a copper oxide project with highly soluble copper oxide mineralisation from surface; it also hosts significant sulphide potential as demonstrated in historical drill intercepts that warrant further investigation and follow-up drilling programs. Norfolk is aiming to establish the Carmen Copper Project as a low-cost, high-margin, value-accretive copper heap leaching operation producing copper cathode at the mine gate.

The Orroroo Uranium Project comprises three granted exploration licenses, EL6552, EL6814 and EL6948, which together cover 723km², located approximately 274km northwest of the capital city of Adelaide, South Australia within the Walloway Basin, which is an elongate Tertiary Basin approximately 50km long and up to 15km wide. It consists of Tertiary and Quaternary sediments unconformably underlain by Adelaidean basement.

The Roger River Project is comprised of one granted exploration license EL20/2020 which covers 26km², located 410km northwest of the capital city of Hobart, Tasmania. The Project is prospective for gold and copper as indicated by the intense silicification, argillisation and diatreme breccias in close proximity to the Roger River Fault along with carbonate-rich host rocks.

Forward Looking Statements

This announcement includes “forward looking statements” within the meaning of securities laws of applicable jurisdictions. Forward looking statements can be identified by the use of forward looking terminology, including, without limitation, the terms “believes”, “estimates”, “anticipates”, “expects”, “predicts”, “intends”, “plans”, “goals”, “targets”, “aims”, “outlook”, “guidance”, “forecasts”, “may”, “will”, “would”, “could” or “should” or, in each case, their negative or other variations or comparable terminology. These forward looking statements include all matters that are not historical facts. By their nature, forward looking statements involve known and unknown risks, uncertainties and other factors because they relate to events and depend on circumstances that may or may not occur in the future and may be beyond the Company’s ability to control or predict which may cause the actual results or performance of the Company to be materially different from the results or performance expressed or implied by such forward-looking statements. Forward looking statements are based on assumptions and are not guarantees or predictions of future performance. No representation is made that any of these statements or projections will come to pass or that any forecast result will be achieved, nor as to their accuracy, completeness

or correctness. Similarly, no representation is given that the assumptions upon which forward looking statements may be based are reasonable. Forward looking statements speak only as at the date of this release and the Company and its affiliates, related bodies corporate (as that term is defined in the Corporations Act) and its directors, employees, officers, representatives, agents, partners, consultants and advisers disclaim any obligations or undertakings to release any update of, or revisions to, any forward-looking statements in this announcement.

Disclaimers

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this release. To the maximum extent permitted by law, none of the Company, its related bodies corporate, shareholders or respective directors, officers, employees, agents or advisors, nor any other person accepts any liability, including, without limitation, any liability arising out of fault or negligence for any loss arising from the use of information contained in this release. The Company will not update or keep current the information contained in this release or to correct any inaccuracy or omission which may become apparent, or to furnish any person with any further information. Any opinions express in this release are subject to change without further notice.

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this release. To the maximum extent permitted by law, none of the Company, its related bodies corporate, shareholders or respective directors, officers, employees, agents or advisors, nor any other person accepts any liability, including, without limitation, any liability arising out of fault or negligence for any loss arising from the use of information contained in this release.

This release does not constitute an invitation, offer or recommendation to apply for or purchase securities and does not contain any application form for securities. This release does not constitute an advertisement for an offer or proposed offer of securities. Neither this release nor anything contained in it shall form the basis of any contract or commitment, and it is not intended to induce or solicit any person to engage in, or refrain from engaging in, any transaction.

Streamline Competent Person's Statement

This report contains information extracted from previous ASX releases, which are referenced in the report. The Company is not aware of any new information or data that materially affects the information included in the original market announcements.

The Company confirms that the form and content in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

The information in this announcement that relates to previously reported exploration results is extracted from the Company's ASX announcements dated 31 March 2025, 12 May 2025, 30 October 2025, 11 December 2025, 14 January 2026 and 23 February 2026 (**Original Announcements**). The Company confirms that it is not aware of any new information or data that materially affects the information contained in the Original Announcements.

Annexure A – NI 43-101 – Mineral Resources and Reserves
Compliance Statements (information required by ASX Listing Rule 5.13)

The Mineral Resource Estimate at the Carmen Copper Project is a foreign estimate prepared in accordance with Canadian National Instrument 43-101 and is not reported in accordance with the JORC Code 2012. A competent person has not done sufficient work to classify the foreign estimate as a mineral resource in accordance with the JORC Code 2012, and it is uncertain whether further evaluation and exploration will result in an estimate reportable under the JORC Code 2012.

The Company initially announced the foreign estimate for the Carmen Copper Project on 31 March 2025 in accordance with ASX Listing Rule 5.12. The Company confirms that the supporting information included in the announcement of 31 March 2025 continues to apply and has not materially changed. The information in this section relates solely to the foreign estimate previously disclosed under ASX Listing Rule 5.12 and does not constitute new exploration results.

Norfolk confirms that it is not in possession of any new information or data relating to the foreign estimate that materially impacts the reliability of the estimates or Norfolk's ability to verify the foreign estimates as mineral estimates in accordance with Appendix 5A (JORC Code).

It is the Company's intention to validate the results of the foreign estimate through re-logging of historical drill holes and completion of the proposed maiden drilling program. The results of the maiden drill program (including twinning of historical holes) will determine the next phase of drilling to facilitate the course towards the Company's aim to construct a 2012 JORC Resource estimate. In addition, it is also the intent of the Company to use the rejects (remaining samples not sent for analysis) from the RC drilling to conduct additional metallurgical studies to confirm the leaching results of the previous study and possibly determine a more suitable/economic leaching strategy.

Table: Carmen NI 43-101 MRE

Cautionary Statement - Carmen NI 43-101 MRE

In accordance with ASX Listing Rule 5.12.9, the Company provides the following cautionary statement regarding the Carmen NI 43-101 MRE shown in the Table:

- The Carmen NI 43-101 MRE is a foreign estimate and is not reported in accordance with the JORC Code;
- A competent person has not done sufficient work to classify the foreign estimate as a mineral resources in accordance with the JORC Code; and
- It is uncertain that following evaluation and/or further exploration work that the foreign estimate will be able to be reported as mineral resources in accordance with the JORC Code.

Within the Carmen Tabaco Belt, the Carmen NI 43-101 MRE has been defined over 600m of strike, to a depth of 30m in the Carmen Oxide Zone (COZ). The Carmen NI 43-101 MRE excludes historic higher-grade drilling and

covers no more than 20% of the COZ. The COZ presents as potentially continuous between drill holes and sections along structural and lithology-controlled zones, which are mainly sub-parallel to the Tabaco Thrust.

Appendix 5B

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Name of entity

Norfolk Metals Limited

ABN

38 652 438 385

Quarter ended ("current quarter")

31 March 2026

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (9 months) \$A'000
1.	Cash flows from operating activities		
1.1	Receipts from customers	-	-
1.2	Payments for		
	(a) exploration & evaluation	-	-
	(b) development	-	-
	(c) production	-	-
	(d) staff costs	(73)	(330)
	(e) administration and corporate costs	(165)	(480)
1.3	Dividends received (see note 3)	-	-
1.4	Interest received	18	52
1.5	Interest and other costs of finance paid	-	-
1.6	Income taxes paid	-	-
1.7	Government grants and tax incentives	-	-
1.8	Other (provide details if material)	-	-
1.9	Net cash from / (used in) operating activities	(220)	(758)

2.	Cash flows from investing activities		
2.1	Payments to acquire or for:		
	(a) entities	(1,071)	(1,071)
	(b) tenements	-	-
	(c) property, plant and equipment	-	-
	(d) exploration & evaluation	(655)	(3,326)
	(e) investments	-	-
	(f) other non-current assets	-	-

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (9 months) \$A'000
2.2	Proceeds from the disposal of:		
	(a) entities	-	-
	(b) tenements	-	-
	(c) property, plant and equipment	-	-
	(d) investments	-	-
	(e) other non-current assets	-	-
2.3	Cash flows from loans to other entities	-	-
2.4	Dividends received (see note 3)	-	-
2.5	Other (provide details if material)	-	-
2.6	Net cash from / (used in) investing activities	(1,726)	(4,397)

3.	Cash flows from financing activities		
3.1	Proceeds from issues of equity securities (excluding convertible debt securities)	2,000	5,500
3.2	Proceeds from issue of convertible debt securities	-	-
3.3	Proceeds from exercise of options	-	-
3.4	Transaction costs related to issues of equity securities or convertible debt securities	(132)	(386)
3.5	Proceeds from borrowings	-	-
3.6	Repayment of borrowings	-	-
3.7	Transaction costs related to loans and borrowings	-	-
3.8	Dividends paid	-	-
3.9	Other (provide details if material) – receipt/(payment) of insurance funding facility	-	(6)
3.10	Net cash from / (used in) financing activities	1,868	5,108

4.	Net increase / (decrease) in cash and cash equivalents for the period		
4.1	Cash and cash equivalents at beginning of period	2,135	2,104
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(220)	(758)
4.3	Net cash from / (used in) investing activities (item 2.6 above)	(1,726)	(4,397)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	1,868	5,108

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (9 months) \$A'000
4.5	Effect of movement in exchange rates on cash held	-	-
4.6	Cash and cash equivalents at end of period	2,057	2,057

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	1,651	1,729
5.2	Call deposits	406	406
5.3	Bank overdrafts	-	-
5.4	Other (Corporate Credit Card)	-	-
5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)	2,057	2,135

6.	Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	94
6.2	Aggregate amount of payments to related parties and their associates included in item 2	18
<i>Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.</i>		

7.	Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (please specify)	-	-
7.4	Total financing facilities	-	-
7.5	Unused financing facilities available at quarter end		-
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
	N/A		

	8. Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(220)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(655)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(875)
8.4	Cash and cash equivalents at quarter end (item 4.6)	2,057
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	2,057
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	2.35
	<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: N/A	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	Answer: N/A	
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
	Answer: N/A	
	<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 30 April 2026

Authorised by: By the Board
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: *Exploration for and Evaluation of Mineral Resources* and AASB 107: *Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
