

ASX RELEASE

26 June 2026

ASX: NVU

Capital Raising Completion and Cleansing Statement

Nanoveu Limited (ASX: NVU, OTCQB: NNVUF) ("Nanoveu" or the "Company"), a technology company specialising in advanced semiconductor, visualisation and materials sciences, announces that, as approved by shareholders at the 2026 Annual General Meeting, the Company has completed the director placement of 1,363,637 Shares, 681,819 attaching Options, and issued 5,000,000 performance rights pertaining to the board appointment of Mohammed M. Sabry on 1 December 2025.

Please refer to the Company's Notice of Annual General Meeting dated 29 April 2026 for further details.

Notice given under section 708a(5) of the Corporations Act

The Company gives this notice pursuant to section 708A(5)(e) of the Corporations Act 2001 (Cth) ("Act"). On 26 June 2026, the Company issued the abovementioned Shares without disclosure to the investors under Part 6D.2 of the Act. In accordance with Section 708A(5)(e) of the Act, as at the date of this notice:

- (a) the Company has complied with the provisions of Chapter 2M of the Act; and section 674 and 674A of the Act;
- (b) there is no excluded information for the purposes of sections 708A(7) and 708A(8) of the Act.

This announcement has been authorised for release by the Board of Directors.

About Nanoveu Limited

Further details on the Company can be found at <https://nanoveu.com/>.

EMASS is a pioneering technology company specialising in the design and development of advanced systems-on-chip (SoC) solutions. These SoCs enable ultra-low-power, AI-driven processing for smart devices, IoT applications, and 3D content transformation. With its industry-leading technology, EMASS will enhance Nanoveu's portfolio, empowering a wide range of industries with efficient, scalable AI capabilities, further positioning Nanoveu as a key player in the rapidly growing 3D content, AI and edge computing markets.

EyeFly3D™ is a comprehensive platform solution for delivering glasses-free 3D experiences across a range of devices and industries. At its core, EyeFly3D™ combines advanced screen technology, sophisticated software for content processing, and now, with the integration of EMASS's ultra-low-power SoC, powerful hardware.

Nanoshield™ is a self-disinfecting film that uses a patented polymer of embedded Cuprous nanoparticles to provide antiviral and antimicrobial protection for a range of applications, from mobile covers to industrial surfaces. Applications include Nanoshield™ Marine, which prevents the growth of aquatic organisms on submerged surfaces like ship hulls, and Nanoshield™ Solar, designed to prevent surface debris on solar panels, thereby maintaining optimal power output.

Forward Looking Statements This announcement contains 'forward-looking information' that is based on the Company's expectations, estimates and projections as of the date on which the statements were made. This forward-looking information includes, among other things, statements with respect to the Company's business strategy, plans, development, objectives, performance, outlook, growth, cash flow, projections, targets and expectations and related expenses. Generally, this forward-looking information can be identified by the use of forward-looking terminology such as 'outlook', 'ambition', 'anticipate', 'project', 'target', 'potential', 'likely', 'believe', 'estimate', 'expect', 'intend', 'may', 'mission', 'would', 'could', 'should', 'scheduled', 'will', 'plan', 'forecast', 'evolve' and similar expressions. Persons reading this announcement are cautioned that such statements are only predictions, and that the Company's actual future results or performance may be materially different. Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance, or achievements to be materially different from those expressed or implied by such forward looking information.
