## Operations Review

### Overview

During the half year, Oceana Metals Limited (“Oceana” or the “Company”) carried out exploration activities across its projects in Western Australia (Bangemall Project), the Northern Territory (Napperby Project), and Ceará State, Brazil (Solonópole Project). Key activities for the period included:

- the completion of a geophysical data review and the planning of a ground MLTEM and gravity program at the Bangemall Project, Western Australia;
- the progression of tenement rationalisation and permitting in Brazil alongside planning and execution of trenching and sampling at the Solonópole Project, Brazil; and
- continued technical assessment and stakeholder engagement steps at the Napperby Project, Northern Territory.

Following Board and Management changes and shareholder approval in November 2025, the Company changed its name to Oceana Metals Limited and increased its focus on targeting new project acquisition opportunities for the Company, aligned with precious metals, strategic metals and critical minerals.

### Bangemall Base Metals Project, Western Australia

#### Geophysics & Targeting

During the period, Southern Geoscience Consultants (“SGC”) completed a review of historical AEM data (TEMPEST, 2014), identifying a thickened, east–west conductive package in the central licence area, bounded by interpreted NNE–SSW faults. Given the broad spacing of the AEM lines (~1,000m), Oceana planned a follow-up ground Moving Loop Transient EM (“MLTEM”) survey (~5 lines; ~8–10km total with 100m station spacing) to refine discrete targets potentially indicative of base metal sulphide mineralisation. A concurrent ground gravity survey was also scheduled to improve density contrast resolution over the same corridor. However, adverse weather conditions and contractor availability resulted in the surveys being postponed until the 2026 field season, with activities expected to commence in the second quarter of 2026.

#### Geological Context & Prior Work

The Bangemall Project (being exploration licence E52/4393) covers 93.54 km<sup>2</sup> and is situated within the Mesoproterozoic Bangemall Basin over the Capricorn Orogen and exhibits significant faulting, including a basement structure parallel to the regionally significant Tangadee lineament. Historic work by Rio Tinto Exploration (prior to 2000) included two RC holes into carbonaceous/dolomitic shales that intersected anomalous base metals up to 15m @ 0.2% Zn (refer to ASX release dated 26 September 2024). The RC holes did not penetrate deep enough to test the depth extent of the modelled EM response.

## Operations Review Continued

### Solonópole Project, Ceará State, Brazil

#### Tenure & Access

The project comprises seven exploration permits (~124 km<sup>2</sup>) held by wholly owned subsidiary Ceará Lítio. During 2024, selected licences were relinquished following a prospectivity review, while priority licence 800241/2016 remained under an extension request with the Brazilian Mines Department (Agência Nacional de Mineração (ANM)) due to access constraints at the Nira Prospect. Environmental permits for trenching and drilling at Bom Jesus de Baixo, Lapinha and Urubu were granted by SEMACE ("Superintendência Estadual do Meio Ambiente - Estado do Ceará", the environmental agency of Ceara State) and remain valid to 24 June 2026.

#### Field Activities

A trenching and mapping program at Bom Jesus de Baixo–Lidiane was completed, comprising seven N–S trenches totalling ~526m across ~200m of strike to test for fertile LCT pegmatites. A total of 88 pegmatite-bearing samples were collected, with 50 priority samples submitted to SGS Geosol, Belo Horizonte for analysis. Assay results are expected in Q1 2026. Integration of soils, 138 line-km of mapping, geophysics, trenching and ~2,000m of RC drilling will inform 2026 work programs in light of improving lithium market conditions.

## Operations Review Continued

### Napperby Project, Northern Territory

#### Project Overview

The project encompasses a granted exploration licence (EL32836) covering ~650 km<sup>2</sup> and an exploration licence application (ELA32841) covering a further ~512 km<sup>2</sup>. The project area is located within the Arunta Province near the settlement of Ti Tree, with access via the Stuart Highway in the Northern Territory and proximity to established rail and port infrastructure. The province is prospective for uranium, rare earth elements and base metals; with “hot granite” intrusions such as the Wangala and Ennugan bodies showing high U/Th ratios largely within Oceana tenure.

#### Activities & Stakeholders

A comprehensive data review was completed in June 2024, followed by field reconnaissance targeting granite and unconformity-related uranium systems. Interpretation from this work indicates the presence of a potential major shear zone in the southwest portion of EL32836. In relation to ELA32841, Consent to Negotiate with the Central Land Council (“CLC”) was received in 2021; however, scheduling of an on-country meeting with Traditional Owners remains outstanding. Oceana intends to re-engage with the CLC to progress access arrangements.

## Operations Review Continued

### New Project Opportunities

The Board and Management changes announced in November 2025 saw the Company increase its focus on Project Generation opportunities. Oceana's technical and business development teams have since concentrated on identifying more advanced precious metals, strategic metals and critical minerals project acquisition opportunities that complement the existing portfolio, across Australia and Latin America.

On 12 February 2026 the Company requested a halt in trading of its securities on the ASX pending the release of a response to a price query and a proposed acquisition. Trading was subsequently suspended from quotation on 16 February 2026 and remains suspended as at the date of this report pending release of the response and an announcement.

The Company confirms that it has been in discussions in relation to potential project acquisitions and while there is no certainty that these discussions will form a binding agreement, the Company will keep the market updated in accordance with its continuous disclosure obligations.

## Compliance Statements

The information in this report that relates to previously reported exploration results is extracted from ASX announcements dated 26 September 2024, 14 October 2025 and 22 January 2026 which are available to view on the Company's website ([www.oceanametals.com](http://www.oceanametals.com)). Oceana confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcements.

## Forward Looking Statements

This report may contain certain forward-looking statements and projections, including statements regarding Oceana's plans, forecasts and projections with respect to its mineral properties and exploration programs. Although the forward-looking statements contained in this release reflect management's current beliefs based upon information currently available to management and based upon what management believes to be reasonable assumptions, such forward looking statements/projections are estimates for discussion purposes only and should not be relied upon. They are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors many of which are beyond the control of the Company.

The forward-looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved. For example, there can be no assurance that Oceana will be able to confirm the presence of Mineral Resources or Ore Reserves, that Oceana's plans for development of its mineral properties will proceed, that any mineralisation will prove to be economic, or that a mine will be successfully developed on any of Oceana's mineral properties. The performance of Oceana may be influenced by a number of factors which are outside the control of the Company, its directors, staff or contractors.

The Company does not make any representations and provides no warranties concerning the accuracy of the projections and disclaims any obligation to update or revise any forward-looking statements/projections based on new information, future events or otherwise except to the extent required by applicable laws.

## Directors' Report

Your directors present their report on the consolidated entity consisting of Oceana Metals Limited, (formerly Oceana Lithium Limited) ("Oceana" or "the Company") and the entities it controlled (the "Group") at the end of, or during, the half-year ended 31 December 2025.

### 1. Directors and Company Secretaries

The following persons were directors and company secretaries of Oceana Metals Limited during the half-year and up to the date of this report:

#### Directors

### 2. Financial Performance and Position

The net operating loss after tax for the half-year ended 31 December 2025 was \$1,088,119 (31 December 2024: 507,087).

As at 31 December 2025 the Company had cash of \$2,523,255 (30 June 2025: \$3,084,480).

### 3. Significant Changes in the State of Affairs

#### Appointment of Managing Director, Michael Wilson

On 3 November 2025, the Company announced the appointment of experienced resources executive Michael Wilson as Managing Director. Mr Wilson played a key role in the establishment of Bellavista Resources Ltd (ASX:BVR) as the foundational Executive Director, including in the preparations for the Company's mid-2022 IPO on the ASX and advancing its Brumby Project in WA. Following his appointment as Managing Director of Oceana, Mr Wilson transitioned to Non-Executive Director of BVR.

Mr Wilson is a geologist with over 28 years' experience in precious and base metals exploration and development. He graduated from Australian National University with an economics degree and an honours science degree, majoring in geology and is a member of AusIMM. He has played key roles in discovering and defining a number of precious and base metal deposits globally, having been involved in the listing of five ASX Companies throughout his career. In 2016, he led a team that was awarded the inaugural NSW Mineral Council Explorer of the Year.

Mr Wilson has held various executive Board positions with ASX listed companies, including Technical Director, Executive Director and Managing Director. Mr Wilson remains a technical Non-Executive Director at Bellavista Resources Limited and Midas Minerals Limited.

### 3. Significant Changes in the State of Affairs (continued)

#### Appointment of Non-Executive Director, Samuel Brooks

On 3 November 2025, the Company announced the appointment of highly regarded geologist and founding chief geologist of Bellevue Gold Limited (ASX 200) as Non-Executive Director.

Mr Brooks is a geologist and mining executive with more than 20 years' experience spanning project generation, exploration, resource drill-outs, economic studies, project development and M&A transactions.

Until recently, he was founding Chief Geologist of ASX 200 Company Bellevue Gold Limited (ASX:BGL), where he is credited with leading the Company's geology team on the path from discovery to production of the 3Moz Bellevue Gold Mine near Leonora WA.

He was also Chief Geologist at Gryphon Minerals (ASX 200) when the Company established a 3Moz inventory at its Banfora (Wahgnion) gold project in Burkina Faso prior to its takeover by Teranga Gold Corporation and subsequent takeover by Endeavour Mining PLC.

#### Changes in Securities

##### Share Placements

On 15 August 2025, following receipt of shareholder approval at the General Meeting held on 13 August 2025, the Company issued 469,565 fully paid ordinary shares at an issue price of \$0.023 per share, to Non-Executive Chairman, Martin Helean under Tranche 2 of the Placement announced on 21 May 2025 to raise a total of \$10,800 before issue costs.

##### Unlisted Options

On 15 August 2025, pursuant to the Placement announced on 21 May 2025 and following shareholder approval at a General Meeting held on 13 August 2025, the Company issued a total of 13,000,000 Unlisted Options with an exercise price of \$0.05 per Option, expiring on 15 August 2028, as detailed below:

- 5,000,000 Unlisted Options were issued to Lead Manager, Westar Capital Limited for providing lead manager services to the Company pursuant to the Placement; and
- 8,000,000 Unlisted Options were issued to Consultants as part consideration for assisting the Company with its future initiatives pursuant to the Placement.

### 4. Shareholder Meetings

Oceana held its Annual General Meeting on 28 November 2025, and General Meeting of shareholders on 01 December 2025 and at which all resolutions were passed.

### 5. Post Balance Date Events

On 12 February 2026 the Company requested a halt in trading of its securities on the ASX pending the release of a response to a price query and a proposed acquisition. Trading was subsequently suspended from quotation on 16 February 2026 and remains suspended as at the date of this report pending release of the response and announcement.

The financial statements have not been adjusted for this event and the financial impact of the underlying matter cannot presently be determined.

There were no other events occurring after 31 December 2025, that in the opinion of the Directors of the Company significantly affect the operations of the Group and the results of these operations.

## Consolidated Notes to the Financial Statements

### For the Half-Year ended 31 December 2025

#### 1. Summary of Material Accounting Policies

##### Basis of preparation of half-year report

This general purpose interim financial report for the half-year reporting period ended 31 December 2025 has been prepared in accordance with Accounting Standard AASB 134 *Interim Financial Reporting* and the Corporations Act. Compliance with Australian Accounting Standards ensures compliance with International Financial Reporting Standards IAS 34: Interim Financial Reporting.

This interim financial report does not include all the notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the annual report for the year ended 30 June 2025 and any public announcements made by Oceana Metals Limited during the interim reporting period in accordance with the continuous disclosure requirements of the Corporations Act.

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period.

The interim report has been prepared on a historical cost basis, modified where applicable by the measurement of fair value of selected financial assets and financial liabilities. The Company is domiciled in Australia and all amounts are presented in Australian dollars, unless otherwise noted.

The same accounting policies and methods of computation have been followed in this interim financial report as were applied in the most recent annual financial statements, other than as disclosed below.

##### Comparative figures

When required by Accounting Standard comparative figures have been adjusted to conform to changes in the presentation for the current and/or prior financial period.

##### New and revised accounting standards and interpretations adopted by the Group

The same accounting policies and methods of computation have been followed in this interim financial report as were applied in the most recent annual financial statements. The Group has considered the implications of new and amended Accounting Standards but determined that their application to the financial statements is either not relevant or not material.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

##### Critical accounting estimates and judgements

Estimates and assumptions are continually evaluated and are based management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

During the half-year ended 31 December 2025, the Group has not identified any additional areas where significant judgments, estimates and assumptions were required apart from those disclosed in the annual report for the year ended 30 June 2025.

## Consolidated Notes to the Financial Statements

### For the Half-Year ended 31 December 2025

#### 2. Segment information

Management has determined the operating segments based on the reports reviewed by the chief operating decision maker that are used to make strategic decisions. For the purposes of segment reporting the chief operating decision maker has been determined as the board of directors. The board monitors the entity primarily from a geographical perspective, and has identified two operating segments, being exploration for mineral reserves within Brazil and Australia and the corporate/head office function.

The segment information provided to the board of directors for the reportable segments for the half-year ended 31 December 2025 is as follows:

##### Fair Value of unlisted options granted

The fair value of the equity-settled share based payment granted is estimated at the grant date using either a Black-Scholes or a Binomial model, which takes into account factors including the exercise price, the volatility of the underlying share price, the risk-free interest rate, the market price of the underlying share at grant date, historical and expected dividends and the expected life of the options or right, and the probability of fulfilling the required hurdles.

| Grant date | Underlying share price | Exercise price | Risk free interest rate | Share price volatility | Expiry date | Value per options (Rounded) |

The following table illustrates the number of, and movements in, performance rights for half-year and financial year ended 31 December 2025 and 30 June 2025.

Each performance right converts to one fully paid ordinary share in the Company upon satisfaction of the relevant vesting condition attached to the performance right. The performance rights do not carry any other privileges. The fair value of the performance rights granted is determined based on the number of performance rights awarded multiplied by the share price of the Company on the date awarded. There are performance rights issued with market conditions and monte-carlo simulation was used to determine the fair value of these performance rights.

Management has then assessed the likelihood of the vesting conditions being achieved and applied that percentage of the value that is recognised on a straight-line basis over the vesting period (in this case from the award date to the expiry date) within the relevant expense or equity account. The probability is reviewed each period and if judged to have varied any relevant adjustment is recognised in the period.

## Directors' Declaration

### For the half-year ended 31 December 2025

In the directors' opinion:

- (a) the consolidated financial statements and notes set out on pages 13 to 27 are in accordance with the *Corporations Act 2001 (Cth)*, including:
  - (i) complying with Accounting Standard AASB 134 *Interim Financial Reporting*, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and
  - (ii) giving a true and fair view of the consolidated entity's financial position as at 31 December 2025 and of its performance for the half-year ended on that date; and
- (b) there are reasonable grounds to believe that Oceana Metals Limited will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of the directors.

**INDEPENDENT AUDITOR'S REVIEW REPORT  
TO THE MEMBERS OF  
OCEANA METALS LIMITED**

**Report on the Half-Year Financial Report**

**Conclusion**

We have reviewed the half-year financial report of Oceana Metals Limited, ("the Company") and its controlled entities (collectively "the Group") which comprises the statement of financial position as at 31 December 2025, the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the half-year ended on that date, condensed notes comprising a summary of material accounting policies and other explanatory information, and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that causes us to believe that the accompanying half-year financial report of the Group does not comply with the *Corporations Act 2001* including:

- (a) giving a true and fair view of the Group's financial position as at 31 December 2025 and of its performance for the half-year ended on that date; and
- (b) complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

**Basis for Conclusion**

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the Auditor's Responsibilities for the Review of the Financial Report section of our report. We are independent of the Company in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001* which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's review report.

**Responsibility of the Directors for the Financial Report**

The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

***Auditor's Responsibility for the Review of the Financial Report***

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Company's financial position as at 31 December 2025 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
