

Drilling Program Underway at Tuckanarra

Odyssey Gold Limited (ASX:ODY) (“Odyssey” or “Company”) is pleased to advise that a reverse circulation (“RC”) drill rig has commenced drilling a new 5,000-metre program at the Company’s Tuckanarra Gold Project (“Tuckanarra” or “Project”).

The RC drilling program will focus initially on resource definition and extensional drilling at the Highway deposit as well as further defining the new Cable Hangingwall vein encountered in the previous drilling program, which included a hole intersecting 20m @ 7.1g/t from 47m, in a new structure west of the main Cable East and Cable West structures.

The drilling program is expected to be completed by the end of November 2025. See Figure 2 for a preliminary drill plan of proposed holes for the campaign.
