Canaccord Genuity Global Metals & Mining Conference

19 – 21 May 2026

Forward Looking Statements, Important Notices and Disclaimers

Forward Looking Statements and Important Notice. This investor presentation is dated 15 May 2026 and has been prepared by Predictive Discovery Limited (ASX: PDI) (TSX: PDI) ("PDI" or the "Company") based on information available at the time of preparing this presentation (the "Investor Presentation"). This Investor Presentation incorporates information provided by Robex Resources Inc. (formerly listed on the TSX Venture Exchange under TSX-V: RBX and with CHESS Depositary Interests ("CDIs") previously quoted on the Australian Securities Exchange ("ASX") under ASX: RXR) ("Robex") and information in relation to PDI's acquisition of all of the issued and outstanding common shares in the capital of Robex, and common shares represented by CDIs, by way of a statutory plan of arrangement under the *Business Corporations Act* (Québec) pursuant to an arrangement agreement (the "Transaction"), which was completed on 15 April 2026 ("Completion").

This Investor Presentation contains certain forward-looking information and forward-looking statements within the meaning of applicable securities legislation and may include future-oriented financial information or financial outlook information (collectively "forward-looking statements"). Forward-looking statements may generally be identified by the use of forward-looking terminology, including, without limitation, the terms "believes", "estimates", "anticipates", "expects, "predicts", "intends", "plans", "goals", "targets", "aims", "outlook", "guidance", "forecasts", "may", "will", "would", "could" or "should" or, in each case, their negative or other variations or comparable terminology. All statements, other than statements of historical fact, that address circumstances, events, activities or developments that could or may or will occur are forward-looking statements. Forward-looking statements may include, but are not limited to, statements relating to: the strategic vision for the Company; expectations regarding exploration and development potential; production capabilities and future financial or operating performance of the Company, including investment returns; cash flows; share price performance; production and cost guidance; the potential valuation of the Company; the accuracy of the pro forma financial position and outlook of the Company following the Completion of the Transaction; obtaining the required regulatory approvals; the success of PDI and Robex in combining operations upon Completion of the Transaction; expectations for the potential development of the Bankan Project; expectations for production capabilities of the Kiniero Project and the Nampala Project; mineral resource expectations; the ability to obtain funding; the anticipated exercise of warrants and options; the potential for inclusion in certain financial market indices; the potential of the Company to meet industry targets, public profile and expectations; the expectations regarding institutional reach and access to capital; and future plans, projections, objectives, estimates and forecasts and the timing related thereto. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which because of their nature may cause the actual results or performance of PDI to be materially different from the results or performance expressed or implied by such forward-looking statements. Such forward-looking statements are based on numerous assumptions regarding PDI's present and future operations and the political and economic environment in which PDI will operate in the future and are not guarantees or predictions of future performance. Although PDI believes that such expectations, estimates and forecast outcomes are based on reasonable assumptions, PDI cannot give any assurance that these will be achieved. Such forward-looking statements are based on numerous assumptions regarding PDI's present and future operations and the political and economic environment in which PDI will operate in the future, including (without limitation) assumptions regarding commodity prices, foreign exchange fluctuations, capital and operating cost estimates, the availability and timing of funding, the timing of development and project schedules, the ability to obtain necessary approvals, licenses and permits, and technical parameters and outcomes. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary approvals, licenses and permits and diminishing quantities or grades of reserves or resources, political, geopolitical and social risks (including, but not limited to, in Guinea, Ivory Coast, Mali, West Africa more broadly and the Middle East), changes to the legal and regulatory framework within which PDI operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation. Unless stated otherwise, forward-looking statements speak only as at the date of this Investor Presentation or the dates of the relevant project studies or technical reports (as applicable).

To the maximum extent permitted by applicable laws, neither PDI nor its related bodies corporate, affiliates and their respective officers, directors, employees, agents and advisers ("Related Parties"), nor any other person, make any representation or give any assurance, guarantee or warranty, express or implied as to, and take no responsibility for and assume no liability for, the authenticity, validity, accuracy, suitability or completeness of, or any errors in, or omissions from, any information, statement or opinion contained in this Investor Presentation (including, without limitation, the achievement or accuracy of any forecasts, projections or other forward-looking statements contained or referred to in this Investor Presentation). Except as required by applicable laws, PDI and its related bodies corporate, affiliates and their respective Related Parties disclaim any obligation to update or revise any forward-looking statement in this Investor Presentation. To the maximum extent permitted by applicable laws, neither PDI nor its related bodies corporate, affiliates and their respective Related Parties, nor any other person, accept any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this Investor Presentation or its contents or otherwise arising in connection with it.

Investors should make and rely upon their own enquiries and investigations before deciding to deal in PDI's securities. To the extent any forward-looking statement in this Investor Presentation constitutes "future-oriented financial information" or "financial outlooks" within the meaning of Canadian securities laws, such information is provided to demonstrate the respective internal projections of PDI and to help readers understand their expected financial results. Readers are cautioned that this information may not be appropriate for any other purpose and readers should not place undue reliance on such information. Future-oriented financial information and financial outlooks, as with forward-looking statements generally, are, without limitation, based on the assumptions, and subject to the risks and uncertainties, described above.

Historical Information. Information about the past performance of PDI contained in this Investor Presentation is given for illustrative purposes only and cannot be relied upon as an indicator of (and provides no guidance as to) future performance, including future share price performance of the Company. Any such historical information is not represented as being, and is not, indicative of PDI's view on its future financial condition and/or performance.

Summary Information. By reviewing or retaining these materials, or attending or participating in this Investor Presentation, you acknowledge and represent that you have read, understood and accepted the terms of this "Forward Looking Statements, Disclaimer and Compliance". This Investor Presentation contains summary information about PDI and its activities current only at the date of this Investor Presentation. This Investor Presentation is for information purposes only and does not constitute an offer. The information in the Investor Presentation is of a general nature only and does not purport to be complete. This Investor Presentation should be read in conjunction with PDI's periodic and continuous disclosure announcements lodged with the ASX, which are available at www.asx.com.au, and PDI's public disclosure record in Canada, including documents available at www.sedarplus.ca under PDI's profile, and on PDI's website at www.predictivediscovery.com. Certain information in this Investor Presentation may have been obtained from research, surveys or studies conducted by third parties, including industry or general publications. Neither PDI nor its representatives have independently verified any such information sourced from third parties or industry or general publications.

Not Investment Advice. This Investor Presentation does not constitute in any way an offer or invitation to subscribe for securities in PDI pursuant to the *Corporations Act 2001* (Cth), Canadian securities laws or any other applicable securities laws and has not been lodged with the Australian Securities and Investments Commission, any Canadian securities regulatory authority or any other securities regulatory authority. This Investor Presentation does not constitute investment advice and has been prepared by PDI without taking into account the recipient's investment objectives, financial circumstances or particular needs. Each recipient must make his/her own independent assessment and investigation of PDI and its respective businesses and assets when deciding if an investment is appropriate and should not rely on any statement or the adequacy and accuracy of any information. This Investor Presentation is in summary form and does not propose to be exhaustive. This Investor Presentation should be read in conjunction with PDI's periodic and continuous disclosure announcements lodged with the ASX, which are available to download at www.asx.com.au. PDI does not make any representation or warranty (either express or implied) as to the accuracy, reliability or completeness of the information in this Investor Presentation. PDI and its directors, employees, agents and consultants shall have no liability (including liability to any person by reason of negligence or negligent misstatement) for any statements, opinions, information or matters (express or implied) arising out of, contained in or derived from, or for any omissions from the Investor Presentation, except liability under statute that cannot be excluded.

Forward Looking Statements, Important Notices and Disclaimers

Not an Offer

This Investor Presentation is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this Investor Presentation nor anything in it shall form the basis of any contract or commitment whatsoever. This Investor Presentation has been prepared for publication in Australia and Canada and may not be released to United States wire services or distributed in the United States of America. This Investor Presentation does not constitute an offer to sell, or a solicitation of an offer to buy, securities in the United States or any other jurisdiction. Any securities described in this Investor Presentation have not been, and will not be, registered under the US Securities Act of 1933 and may not be offered or sold in the United States except in transactions registered under the US Securities Act or exempt from, or not subject to, the registration requirements of the US Securities Act and applicable US state securities laws.

Non IFRS Measures

This presentation includes non IFRS measures such as Cash Margin from Operations and all-in sustaining cost (AISC). These measures are not defined under IFRS and may not be comparable to those used by other companies.

Mineral Resource and Ore Reserve Estimates

The Mineral Resource estimates for the NEB and BC projects referred to in this presentation were released to ASX on 7 August 2023 in an announcement by PDI titled "Bankan Mineral Resource Increases to 5.38Moz" and the Mineral Resource estimates in respect of the Fouwagbe and Sounsoun projects were released to the ASX on 23 April 2025 in an announcement by PDI titled "Maiden Argo Mineral Resource Estimate of 153koz". The Ore Reserve estimate in respect of the Bankan Gold Project referred to in this presentation was released to ASX on 25 June 2025 in an announcement by PDI titled "Bankan DFS Confirms Outstanding Project Economics".

The Mineral Resources and Mineral Reserves estimates referred to in this presentation in respect of Robex's Kiniero Gold Project were released to ASX on 22 August 2025 in an announcement by Robex titled "Amendment to Kiniero Gold Project Technical Report", and in respect of the Nampala Project in an ASX announcement by Robex dated 6 May 2025 titled "Replacement Prospectus".

PDI confirms that it is not aware of any new information or data that materially affects the Mineral Resource, Ore Reserve or Mineral Reserve estimates included in the relevant market announcements and all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed noting that PDI intends to appeal the Argo (and Bokoro) revocations announced on 28 May 2025 in accordance with the Mining Code, and that the Argo Inferred Mineral Resources account for just 2.8% of the Bankan Project's overall Mineral Resource.

Production Targets

The Production Targets and forecast financial information in respect of the Bankan Gold Project referred to in this presentation were released to the ASX on 25 June 2025 in an announcement by PDI titled "Bankan DFS Confirms Outstanding Project Economics".

The Production Targets and forecast financial information in respect of the Kiniero Gold Project referred to in this presentation were released to the ASX on 22 August 2025 in an announcement by Robex titled "Amendment to Kiniero Gold Project Technical Report", and in respect of the Nampala Project in an ASX announcement by Robex dated 6 May 2025 titled "Replacement Prospectus".

PDI confirms that all the material assumptions underpinning the Production Targets and forecast financial information derived from the Production Targets in the relevant market announcements continue to apply and have not materially changed.

Exploration Results

The information in this announcement that relates to prior Exploration Results in respect of the Bankan Gold Project have been extracted from previous ASX market announcements by PDI which are listed in the "Material ASX Releases" slide in the Appendix. PDI confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcement.

JORC Code and CIM Definition Standards

The term "Ore Reserve" defined by the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves prepared by the Joint Ore Reserves Committee of the Australasian Institute of Mining and Metallurgy, Australian Institute of Geoscientists and Minerals Council of Australia ("JORC Code") is equivalent to the term "Mineral Reserve" defined by the CIM Definition Standards for Mineral Resources & Mineral Reserves adopted by the Canadian Institute of Mining, Metallurgy and Petroleum May 19, 2014 ("CIM Definition Standards"). "Inferred Mineral Resources", "Indicated Mineral Resources" and "Measured Mineral Resources" have the same meaning under both the JORC Code and CIM Definition Standards. "Proved Ore Reserves" under the JORC Code has the same meaning as "Proven Mineral Reserves" under the CIM Definition Standards, and "Probable Ore Reserves" under the JORC Code has the same meaning as "Probable Mineral Reserves" under the CIM Definition Standards. The JORC Code is an acceptable foreign code under National Instrument 43-101 - *Standards of Disclosure for Mineral Projects*.

Disclaimer

No persons other than PDI have authorised or caused the issue, release, submission, distribution or provision of this presentation, or takes any responsibility for, or makes or purports to make, any statements, representations or undertakings in this presentation. PDI, to the maximum extent permitted by applicable law, expressly excludes and disclaims all liability (including, without limitation, any liability arising out of fault or negligence on the part of any person) for any direct, indirect, consequential or contingent loss or damage, or for any costs or expenses, arising from the use of this presentation or its contents or otherwise arising in connection with it or the Transaction. PDI does not make any representations or warranties (express or implied) to you about the Transaction or about the currency, accuracy, reliability or completeness of the information, opinions and conclusions in this presentation (including, without limitation, any financial information, any estimates or projections and any other financial information). By accepting, accessing or reviewing this presentation (or by attending any investor briefing at which this presentation is made), you represent, warrant and agree that you have not relied on any statements made by PDI in this presentation (including in relation to the Transaction) and that you have read and agree to the terms set out above, and you acknowledge that this presentation is for information purposes only, is of a general nature only and does not purport to be complete, and should be read in conjunction with PDI's periodic and continuous disclosure announcements lodged with the ASX (available at www.asx.com.au) and PDI's public disclosure record in Canada (including documents available at www.sedarplus.ca).

Authorisation

This presentation has been authorised for release by Matthew Wilcox, Chief Executive Officer and Managing Director of PDI.

PDI Overview

Pathway to becoming a leading West African gold producer

Two producing mines:
Kiniero (Guinea) and Nampala (Mali)

2026 guidance of **198-220koz**
Targeted production by 2029 of **>400kozpa**[1]

Board and management with track record of developing and operating African gold mines

Tier-1 development project:
Bankan (Guinea)

9.5Moz Resources
incl **4.5Moz Reserves**[2]

De-risked funding and construction of Bankan

Bankan Gold Project
250kozpa for 12 yrs[1]
(FID in 2026 post grant of exploitation permit)

Kiniero Gold Mine
139kozpa for 9 yrs[1]
(2026 guidance of 157-174koz)

Nampala Gold Mine
41-46koz for 2026
(extend mine life and/or divest)

Catalysts to drive further share price re-rate:

- Consolidation of Kiniero production and cash flow generation
- Grant of Bankan and Mansounia exploitation (mining) permits; awaiting Presidential sign-off
- Final investment decision for Bankan
- Exploration to increase Resources and mine life
- Platform for further growth, leveraging the competitive advantage in mine building
- Expected index up-weightings / passive buying

1. Production and mine life based on the Definitive Feasibility Study for the Bankan Gold Project (as released by PDI to ASX on 25 June 2025 titled "Bankan DFS Confirms Outstanding Project Economics") and the Kiniero Report (see Robex's ASX announcement titled "Amendment to Kiniero Gold Project Technical Report" dated 22 August 2025). Refer to "Forward Looking Statements and Important Notice" on slide 2
2. Includes 4.5Moz of Mineral Reserves, 2.1Moz of Measured and Indicated Mineral Resources which are exclusive of Mineral Reserves, and 2.9Moz of Inferred Mineral Resources; Refer to Appendix slides 21 and 22 for the Mineral Resource statements.

Corporate Overview

US$3.6Bn gold company with a strong financial platform and high-quality institutional shareholder base

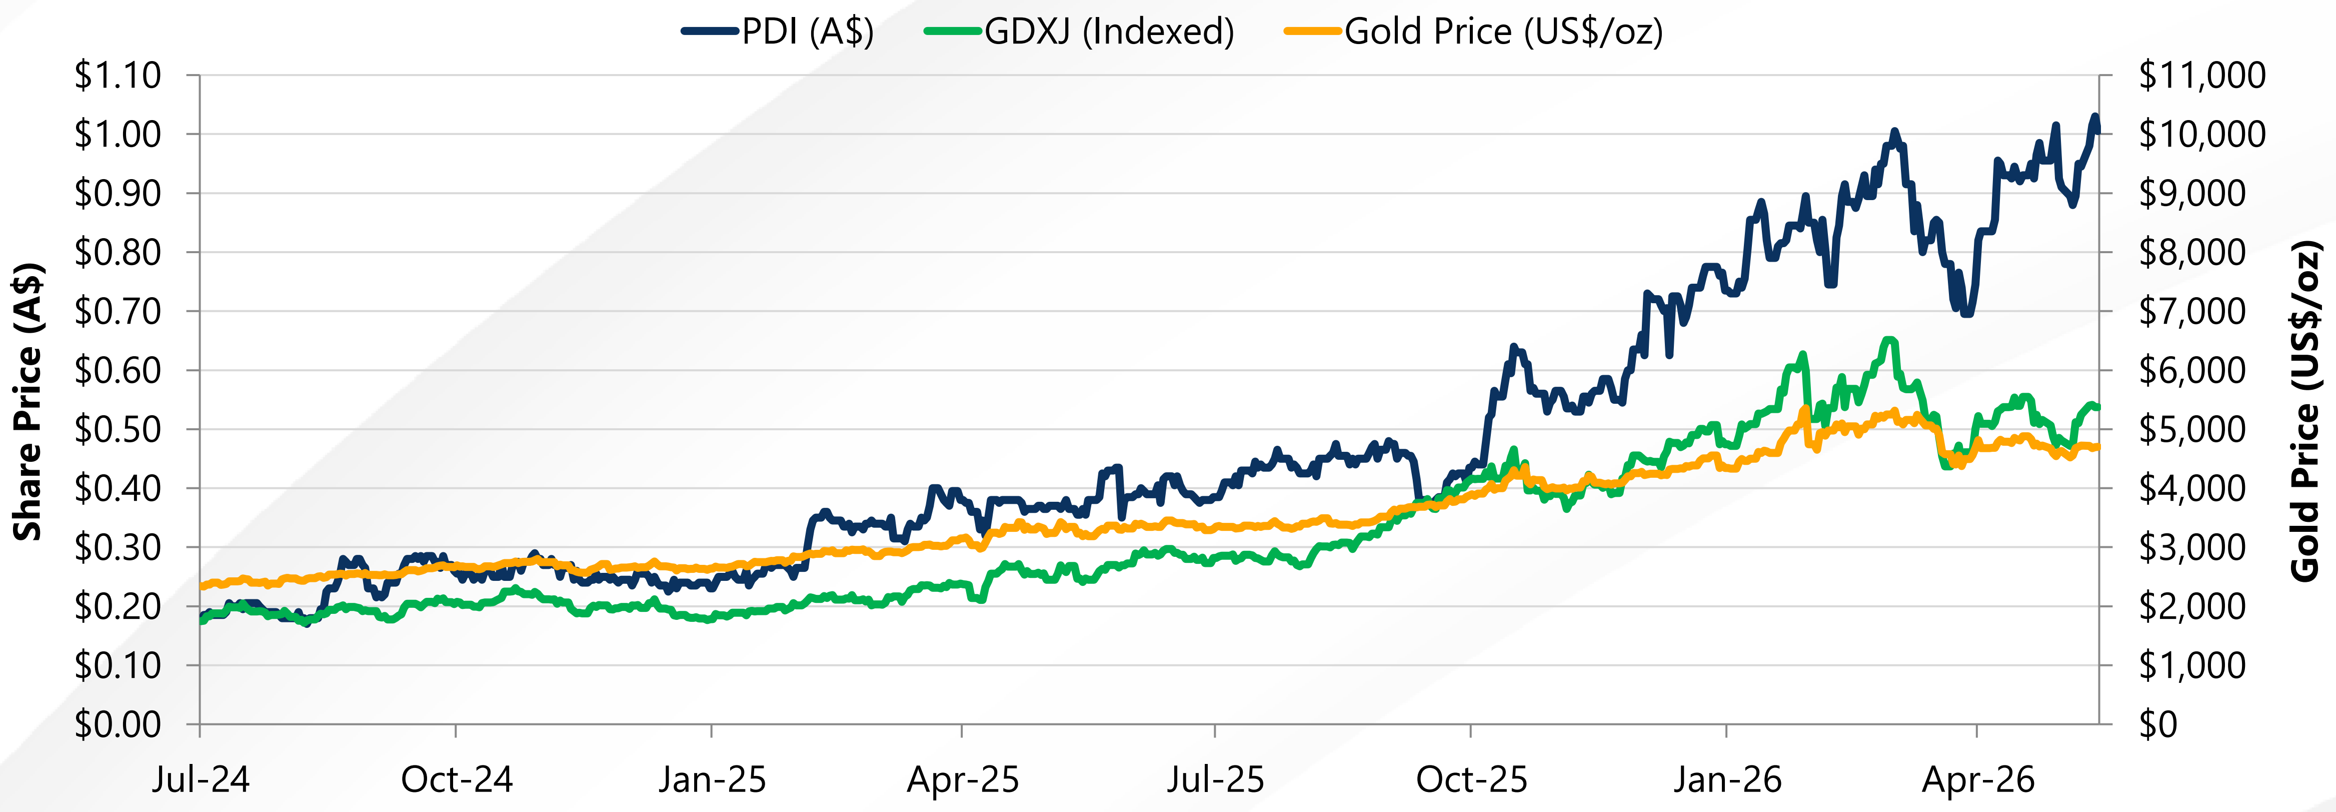
Capitalisation[1,2]

Ordinary Shares Outstanding	**4,893m**
Unlisted Options/Warrants/Performance Rights	**195m**
Fully-Diluted Shares Outstanding	**5,088m**
Share Price (14-May-26)	**A$1.005**
Undiluted Market Capitalisation	**A$4.9Bn | US$3.6Bn**
Pro-forma Debt (31-Mar-26)	**A$190m | US$130m**
Pro-forma Cash (31-Mar-26)	**A$384m | US$263m**

PDI Share Price Performance



1. Debt and cash US dollar amounts based on AUD:USD of 0.6845 as at 31-Mar-26. Market capitalisation US dollar amounts based on AUD:USD of 0.7258 as at 14-May-26
2. Pro-forma cash includes US$80M of restricted cash held in a liquidity reserve account and a US$10M term deposit maturity on 9 April 2026. Pro-forma cash doesn't factor in transaction costs associated with the PDI/Robex merger

Board & Management

Experienced leadership team with proven track-record of building and operating mines in Africa, including Guinea

Board

Andrew Pardey
Non-Executive Chair

Andrew is a geologist with over 30 years of experience. He was CEO of Centamin where he led construction and operation of the Tier-1 Sukari gold mine. He also held senior management roles at the Siguiri and Lefa gold mines in Guinea

Matthew Wilcox
CEO & Managing Director

Matthew is an experienced mining professional with a strong track record of building mines in West Africa including the Kiniero, Abujar, Sanbrado, Bissa and Bouly projects. He was also GM of the Lefa gold mine in Guinea

Alain William
Executive Director, Chief Legal and Government Relations Officer

Alain has 25+ years of experience in capital markets and served as CFO of Robex for the past three years, also overseeing stakeholder engagement

Simon Jackson
Lead Independent Non-Executive Director

Simon is a chartered accountant with 25+ years' experience in the management of resource companies, particularly in Africa, including Red Back Mining, Orca Gold and Resolute Mining

Steven Michael
Non-Executive Director

Steven has 25+ years of professional and corporate experience at global finance leaders Rothschild, Macquarie Bank and RBC, in financial advisory

Alberto Lavandeira
Non-Executive Director

Alberto is a mining engineer with 40+ years of experience. He is currently the CEO and a board member at Atalaya

Howard Golden
Non-Executive Director

Howard is a mining executive with 40 years' global experience; led major projects at Syama, Oyu Tolgoi, Agbaou, West Musgrave, and served as Exploration GM at Rio Tinto

Management

Clinton Bennett
Chief Operating Officer

Clinton has extensive operational and metallurgical experience across international mining operations. Previous roles include COO of Tietto and GM of Endeavour's Ity gold mine

Ross McLean
Chief Financial Officer

Ross has 15+ years experience in mining and energy finance in Africa and Australia. Previous roles include General Manager of Finance for Robex and Finance and Administration Director for Assala Energy in Gabon

Dimitrios Felekis
Chief Development Officer

Dimitrios has 20+ years of development and design experience, focused on West Africa. He was responsible for Kiniero's construction and has worked on the Abujar, Bissa and Agbaou projects

Justin Rivers
Chief Exploration Officer

Justin has extensive experience in exploration and resource development. Previous roles include Head of Geology at Lithium Universe, CEO of Convertible Resources and Group Chief Geologist at London Mining Associates

Gwendal Bonno
Chief Human Resources Officer

Gwendal has extensive international HR experience in the natural resources sector. He previously held senior HR roles with Assala Energy, Nordgold, ArcelorMittal Mining and Eramet

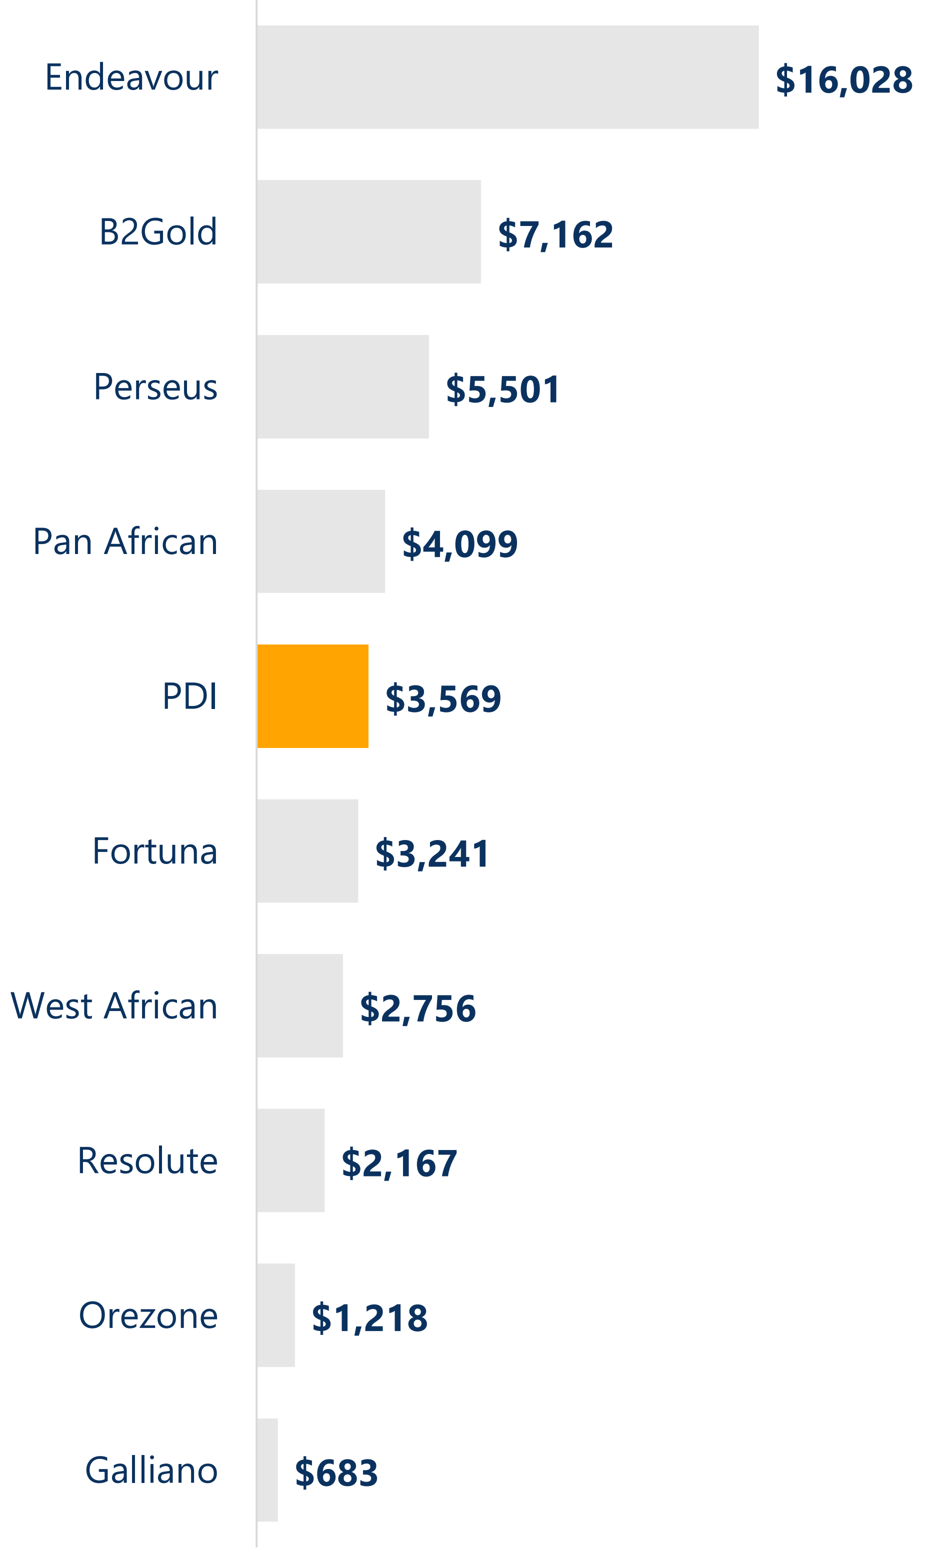
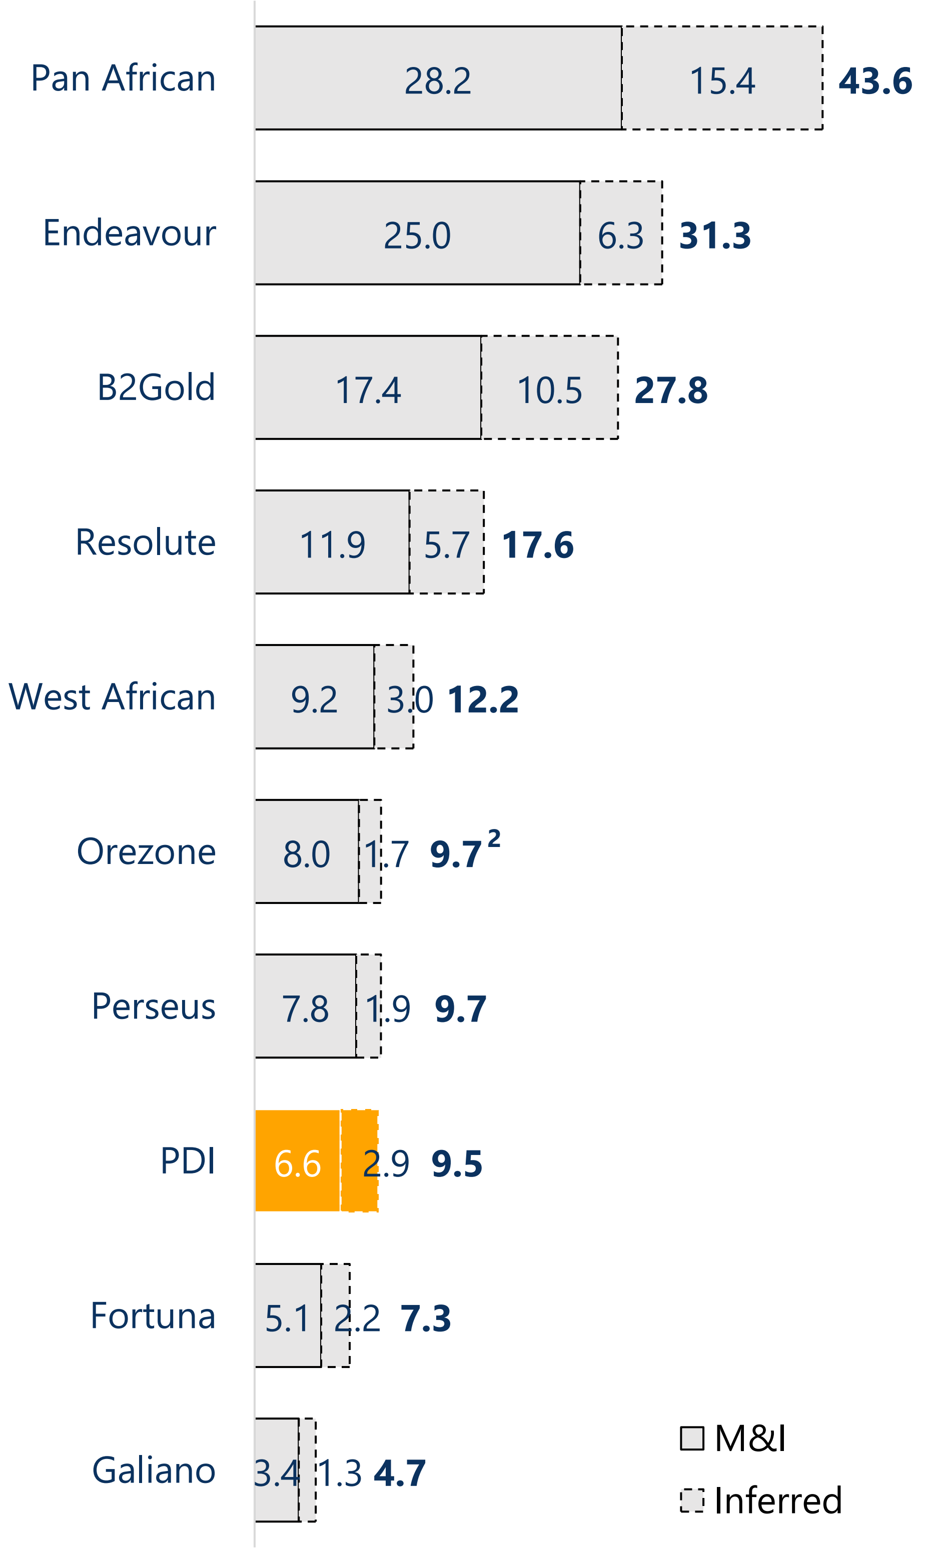
Pathway to Becoming one of West Africa's Leading Gold Producers

PDI positioned to become one of the largest low-cost gold producers among African gold miners

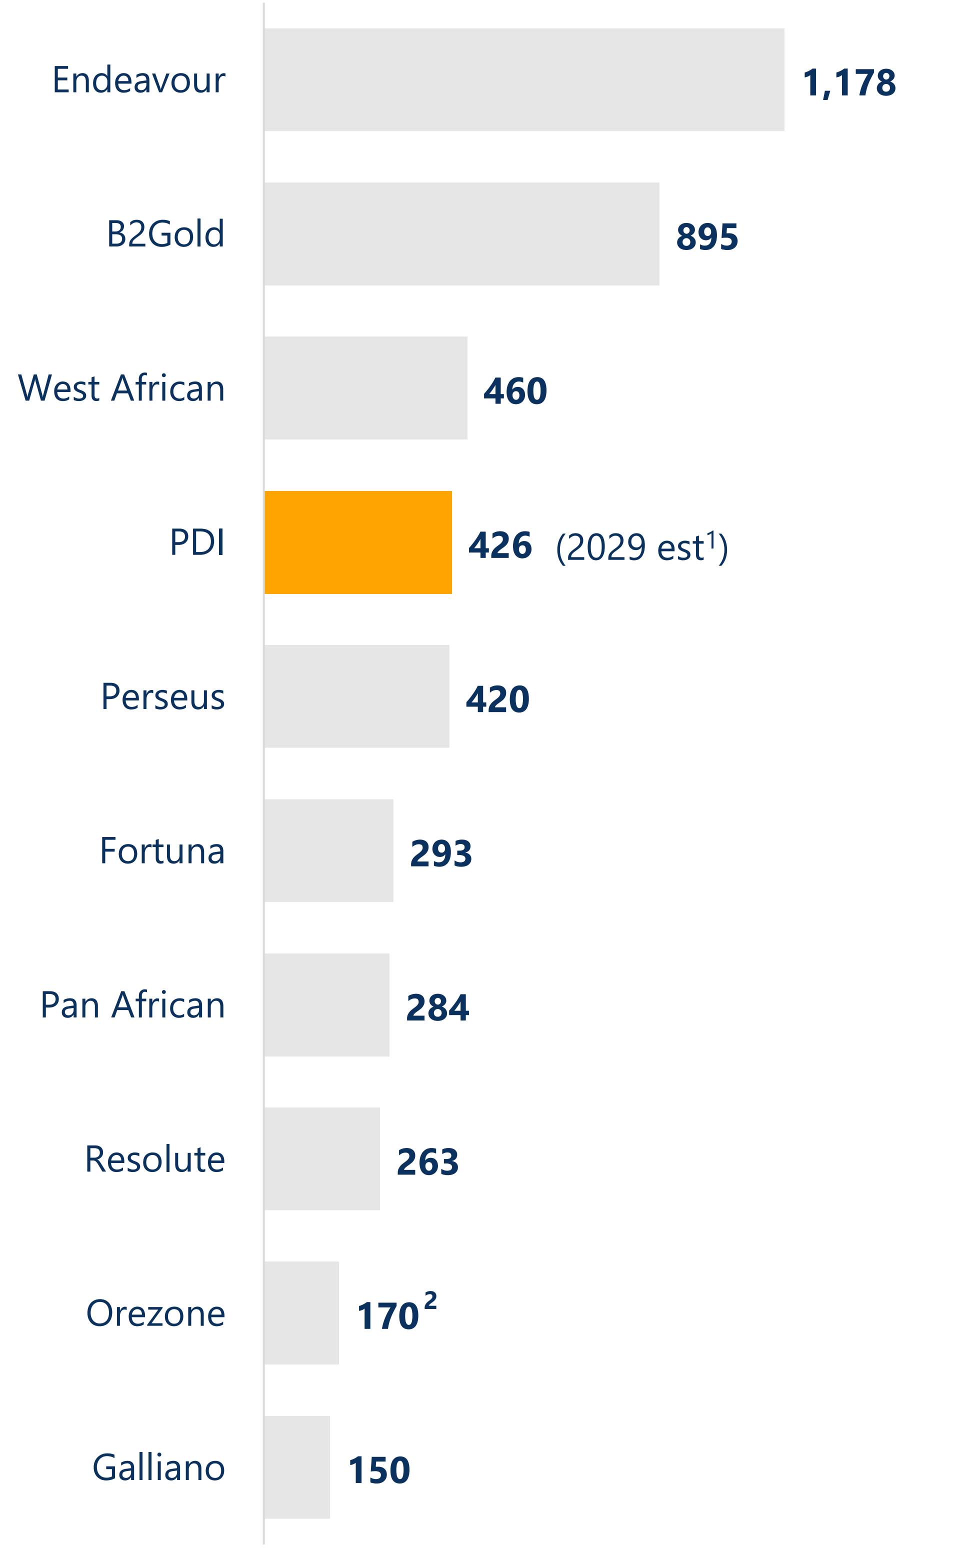
Market Capitalisation (US$m)



Mineral Resources (Moz Au Eq.)



2026 Production Guidance (koz Au Eq.)



2026 AISC Guidance (US$/oz Au Eq.)

predictive discovery

Source: Company public filings, FactSet, PDI ASX release "Bankan DFS Confirms Outstanding Project Economics" dated 25 June 2025, Kiniero Report (see Robex's ASX announcement titled "Amendment to Kiniero Gold Project Technical Report" dated 22 August 2025). Refer to "Sources for Total Mineral Resources, 2026 Production and AISC Guidance" slide 23 in the Appendix. Note: Peer set is based on mid-cap and large-cap gold producers with predominantly West African based operations. Total mineral resources and production shown on a 100% basis

1. PDI 2029 production and AISC based on the Definitive Feasibility Study for the Bankan Gold Project (as released by PDI to ASX on 25 June 2025 titled "Bankan DFS Confirms Outstanding Project Economics") and the Kiniero Report (see Robex's ASX announcement titled "Amendment to Kiniero Gold Project Technical Report" dated 22 August 2025). 2029 AISC based on a US$4,500/oz gold price assumption, updated from the original assumptions of US$2,400/oz for Bankan and US$1,800/oz for Kiniero
2. Orezone Mineral Resources is based on Bombore and Casa Berardi; 2026 guidance is based on Bombore operation only

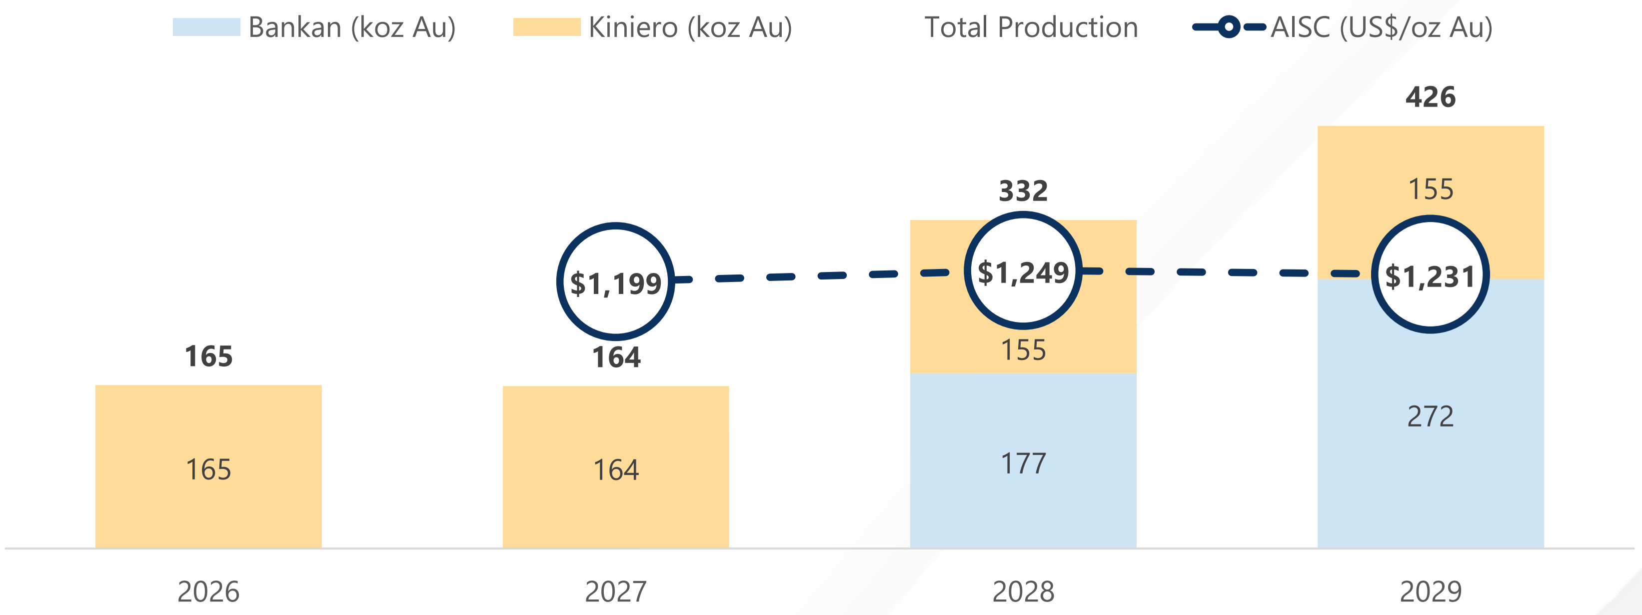
Building Guinea's Leading Gold Producer

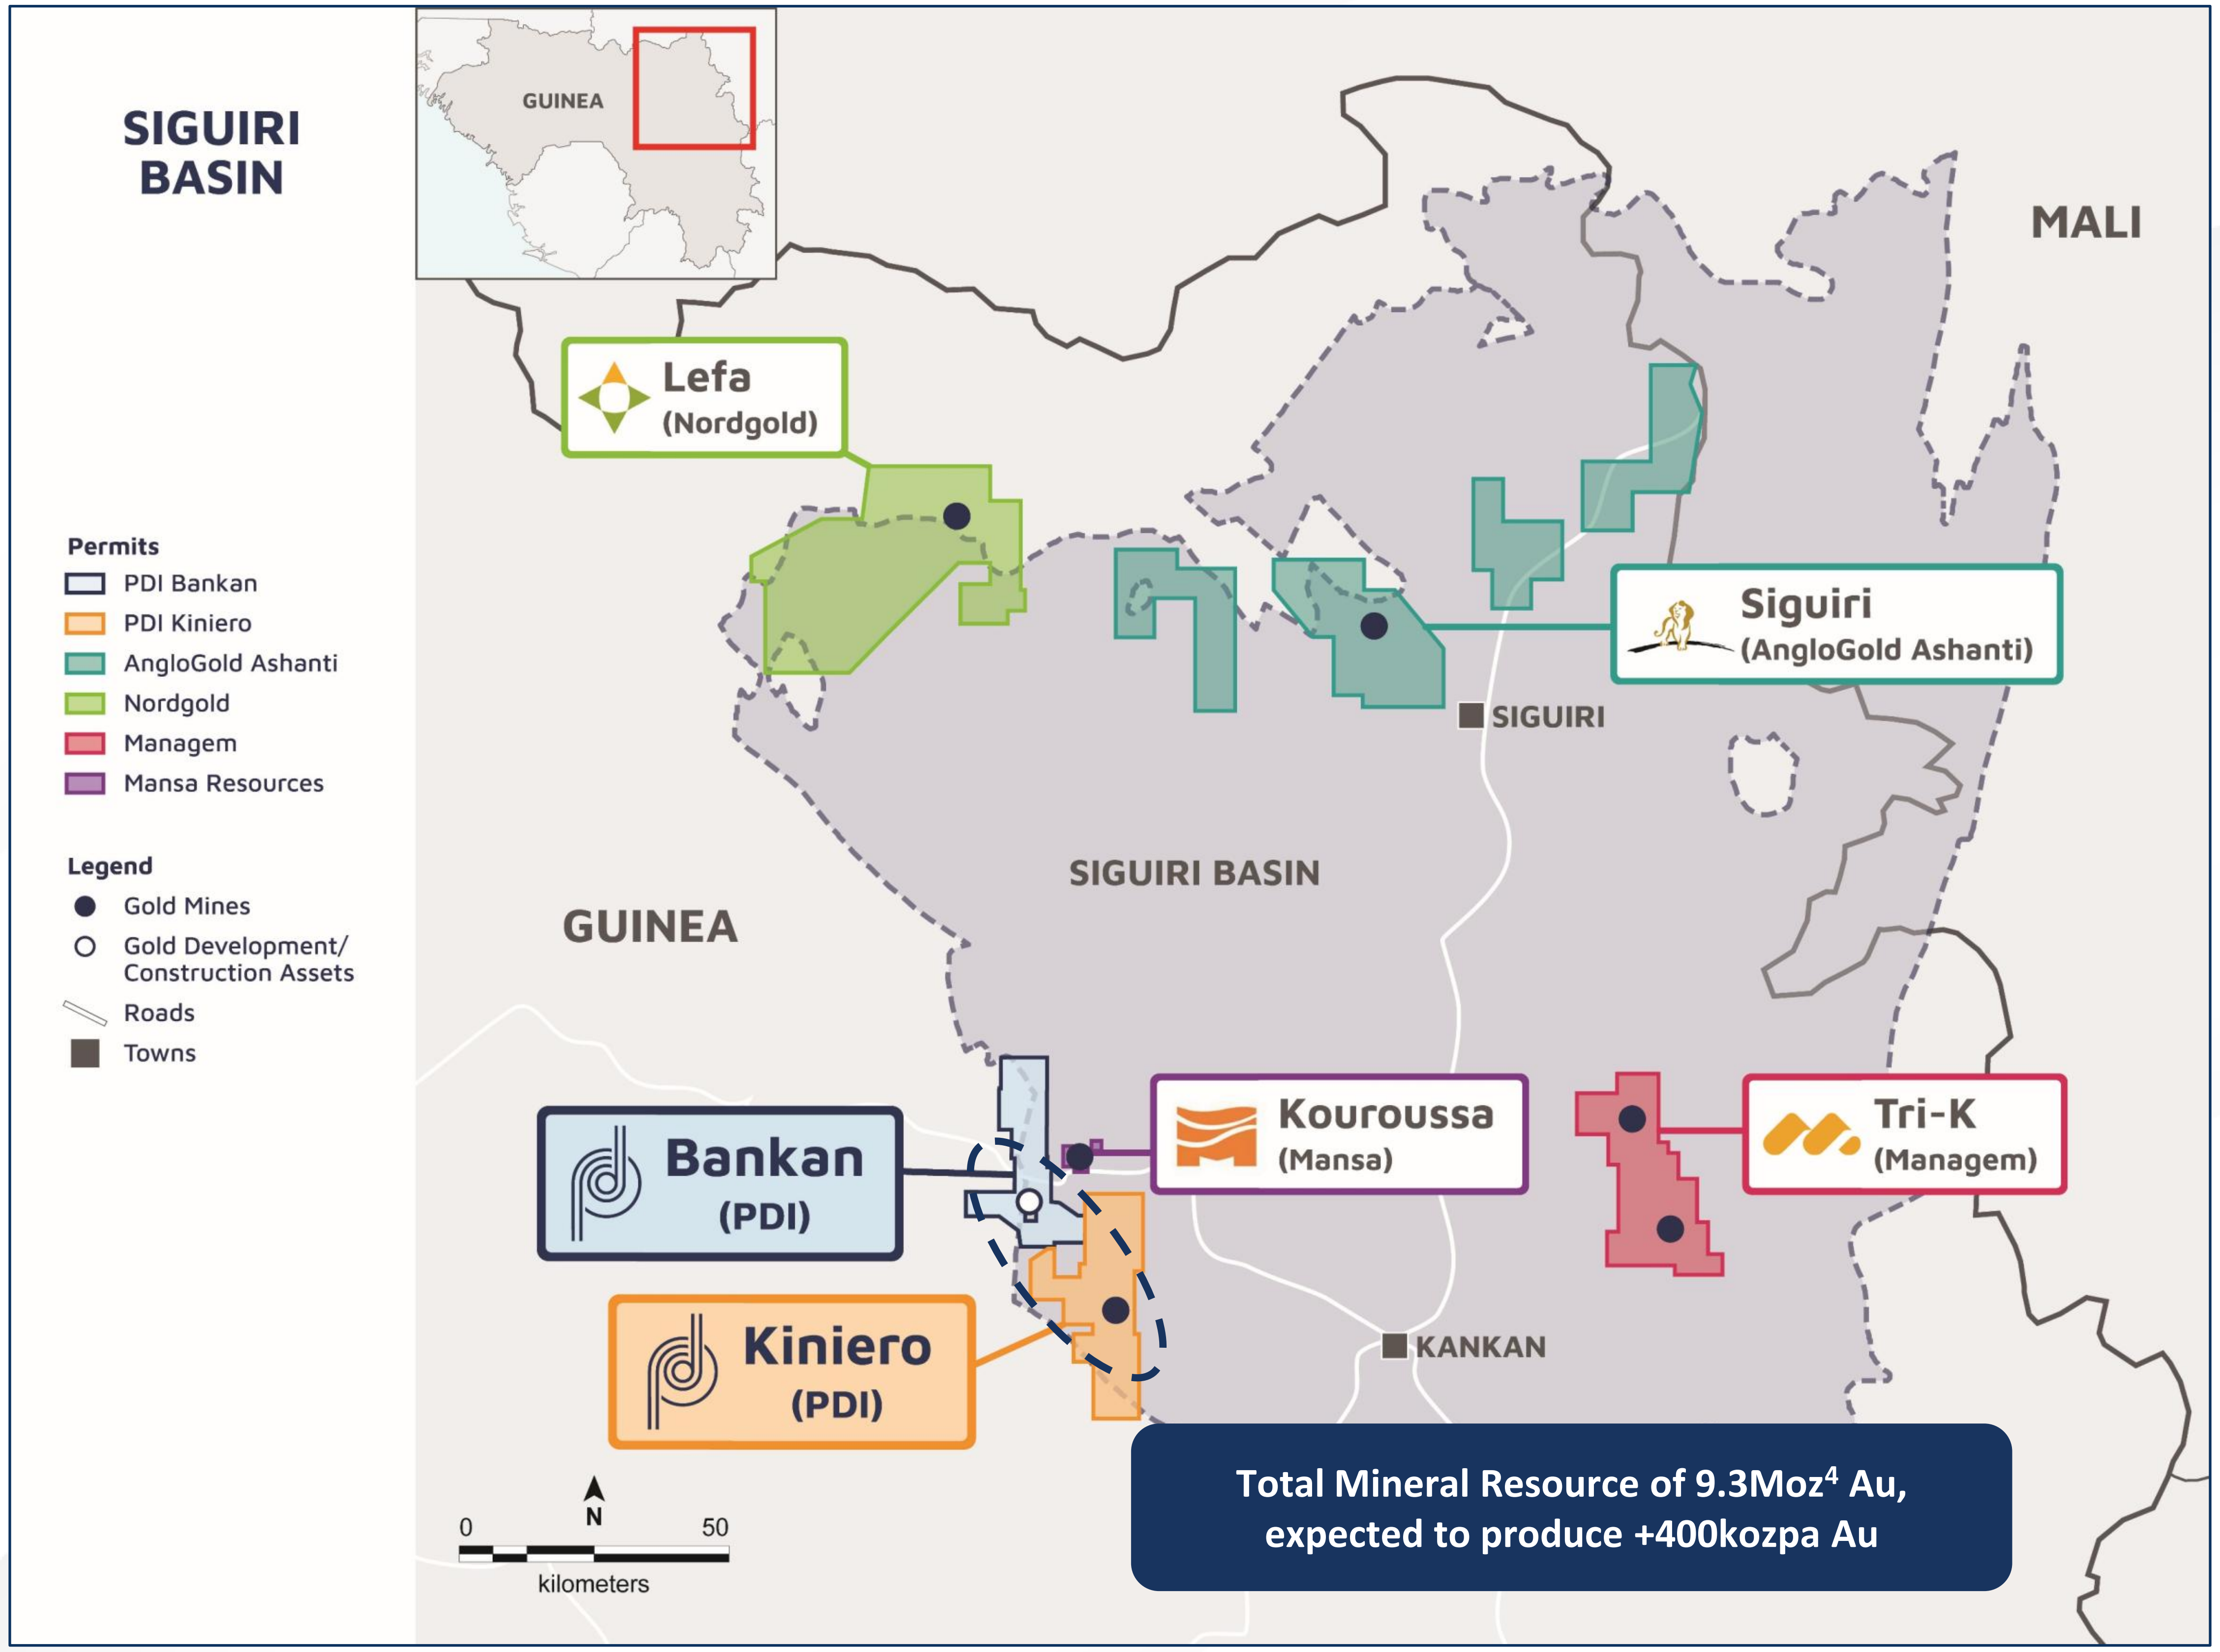
Consolidation of two major assets to create the largest gold producer in the Siguiri Basin

Project Metrics

	Units	Bankan	Kiniero
Mine Life	*years*	12	9
Ore Mined / Processed	*Mt*	55	39
Processing Rate	*Mtpa*	4.5	5.0
LOM Avg. Recovery	*%*	93%	86%
LOM Avg. Head Grade	*g/t Au*	1.86	0.97
LOM Avg. Gold Production	*koz Au*	249	139
Initial Capital Costs	*US$m*	$463	Spent
LOM Avg. AISC (Updated to US$4,500/oz Au)[1]	*US$/oz*	$1,183	$1,241

2026 – 2029 Pro Forma Gold Production (koz Au) and AISC (US$/oz)[1,2,3]





Total Mineral Resource of 9.3Moz[4] Au, expected to produce +400kozpa Au

Source: PDI ASX release "Bankan DFS Confirms Outstanding Project Economics" dated 25 June 2025, Kiniero Report (see Robex's ASX announcement titled "Amendment to Kiniero Gold Project Technical Report" dated 22 August 2025)

1. AISC updated to be based on US$4,500/oz gold price assumption, from assumptions in the original announcements of US$2,400/oz for Bankan and US$1,800/oz for Kiniero
2. Kiniero based on midpoint of guidance for 2026 and based on the Kiniero Report thereafter (subject to footnote 1)
3. Bankan assumes first production occurs in April 2028 as per DFS schedule
4. Includes 4.4Moz of Mineral Reserves, 1.9Moz of Measured and Indicated Mineral Resources which are exclusive of Mineral Reserves, and 2.9Moz of Inferred Mineral Resources; Refer to Appendix slides 21 and 22 for the Mineral Resource statements. Mineral Resources are inclusive of Mineral Reserves

predictive discovery

Kiniero Overview

High-margin gold project with robust economics, strong production profile, and significant growth potential

Large resource with potential for further reserve conversion

1.4Moz mineral reserve
(45.5Mt @ 0.97g/t)
2.2Moz indicated mineral resource[1]
(71.2Mt @ 0.96g/t)
1.5Moz inferred mineral resource
(45.3Mt @ 1.05g/t)

Significant exploration potential

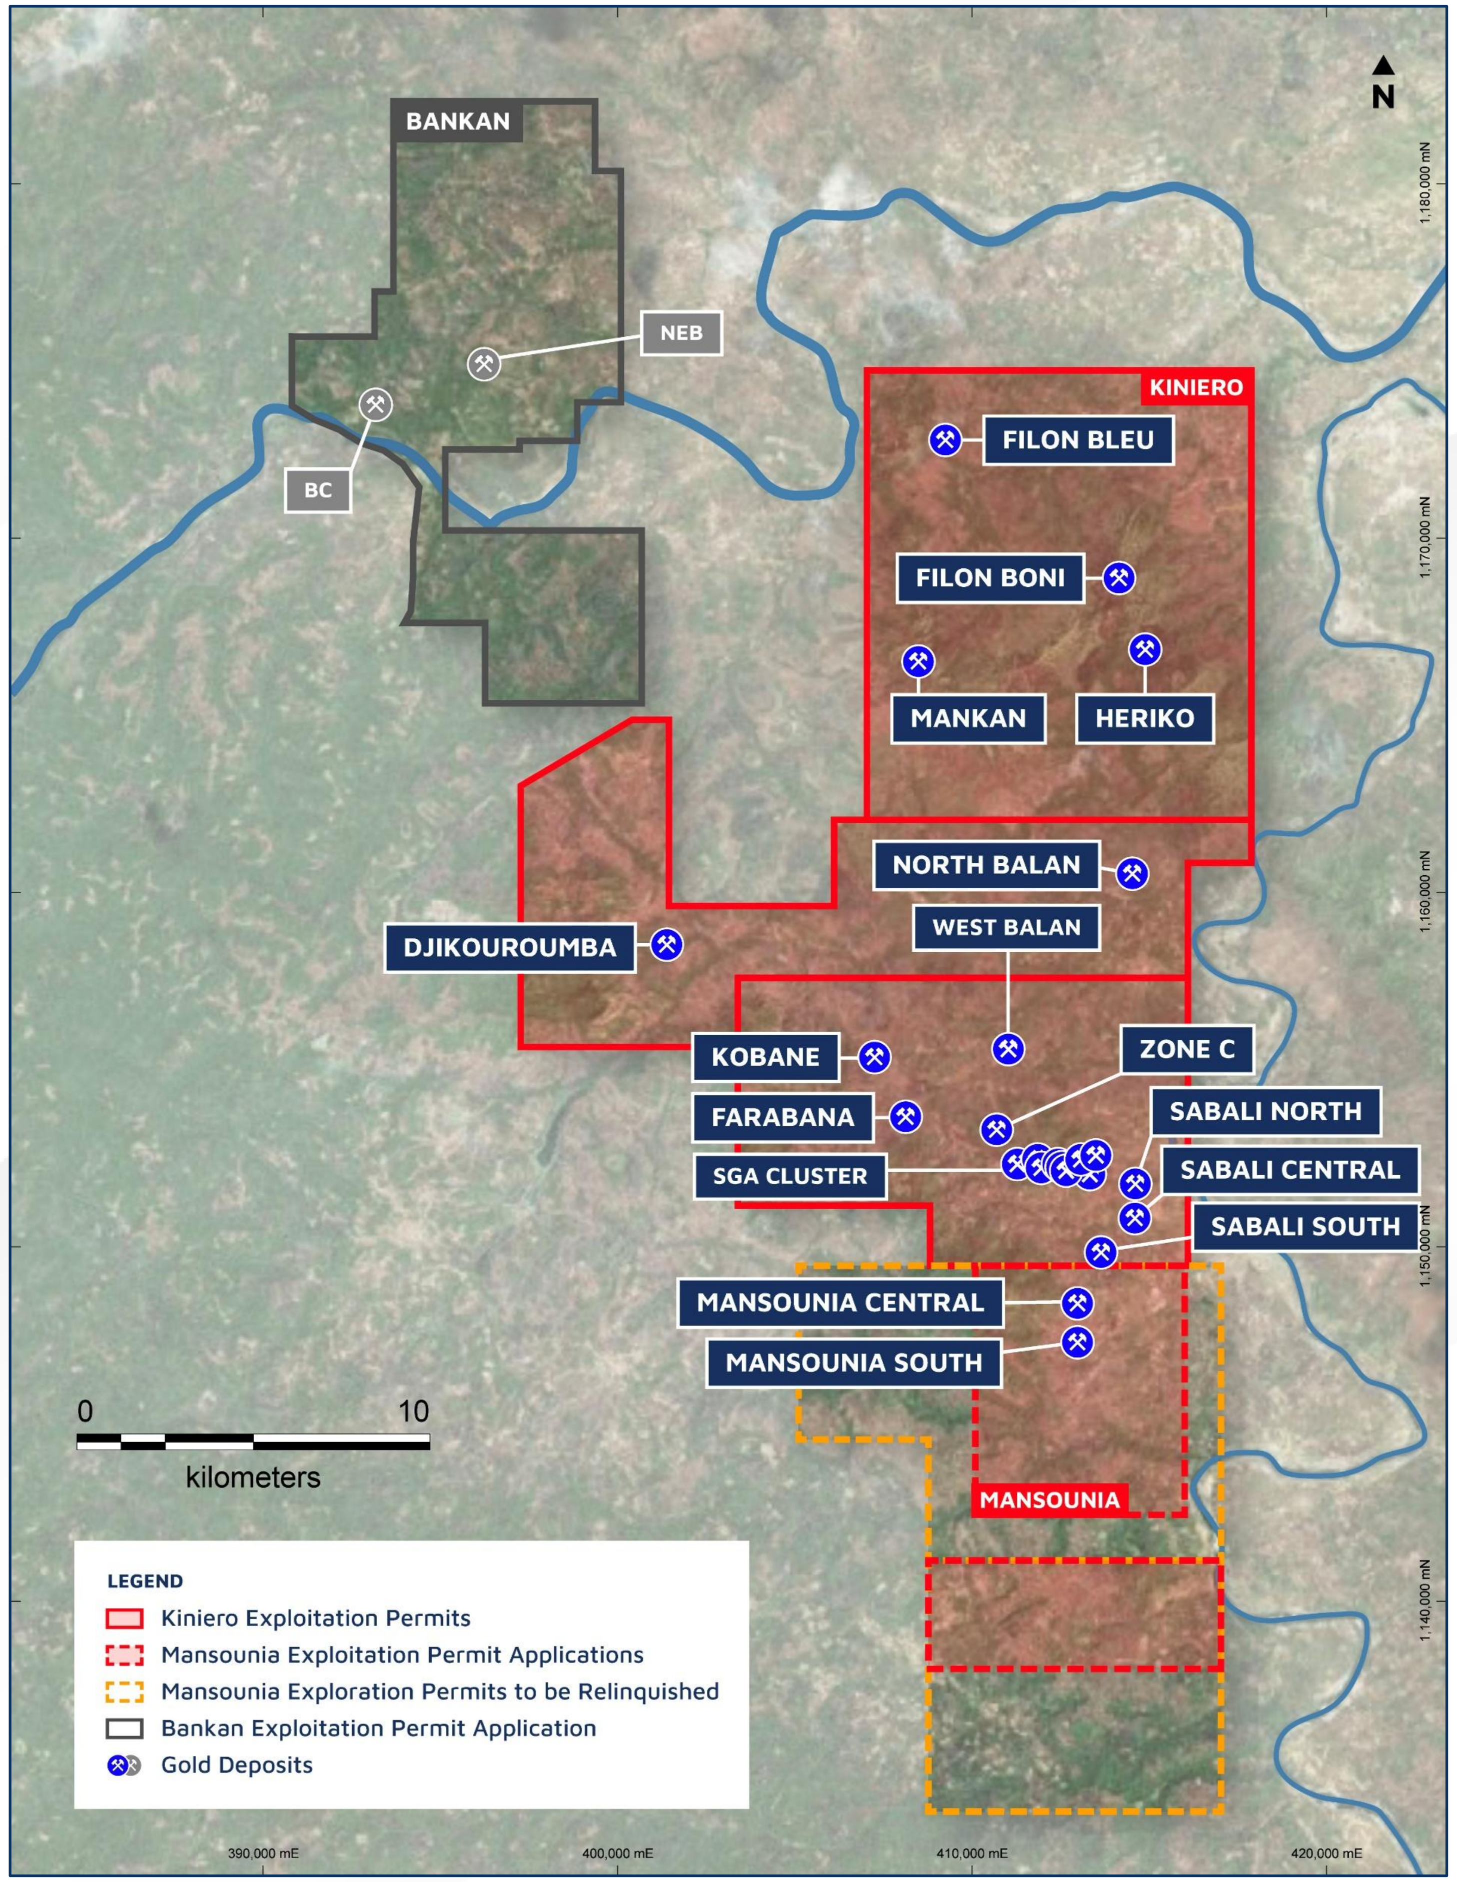
Average annual gold production

Conventional open pit mining

5Mtpa CIL processing plant

~139kozpa average gold production over a **9-year mine life**

First gold pour achieved in December 2025 and commercial production in February 2026



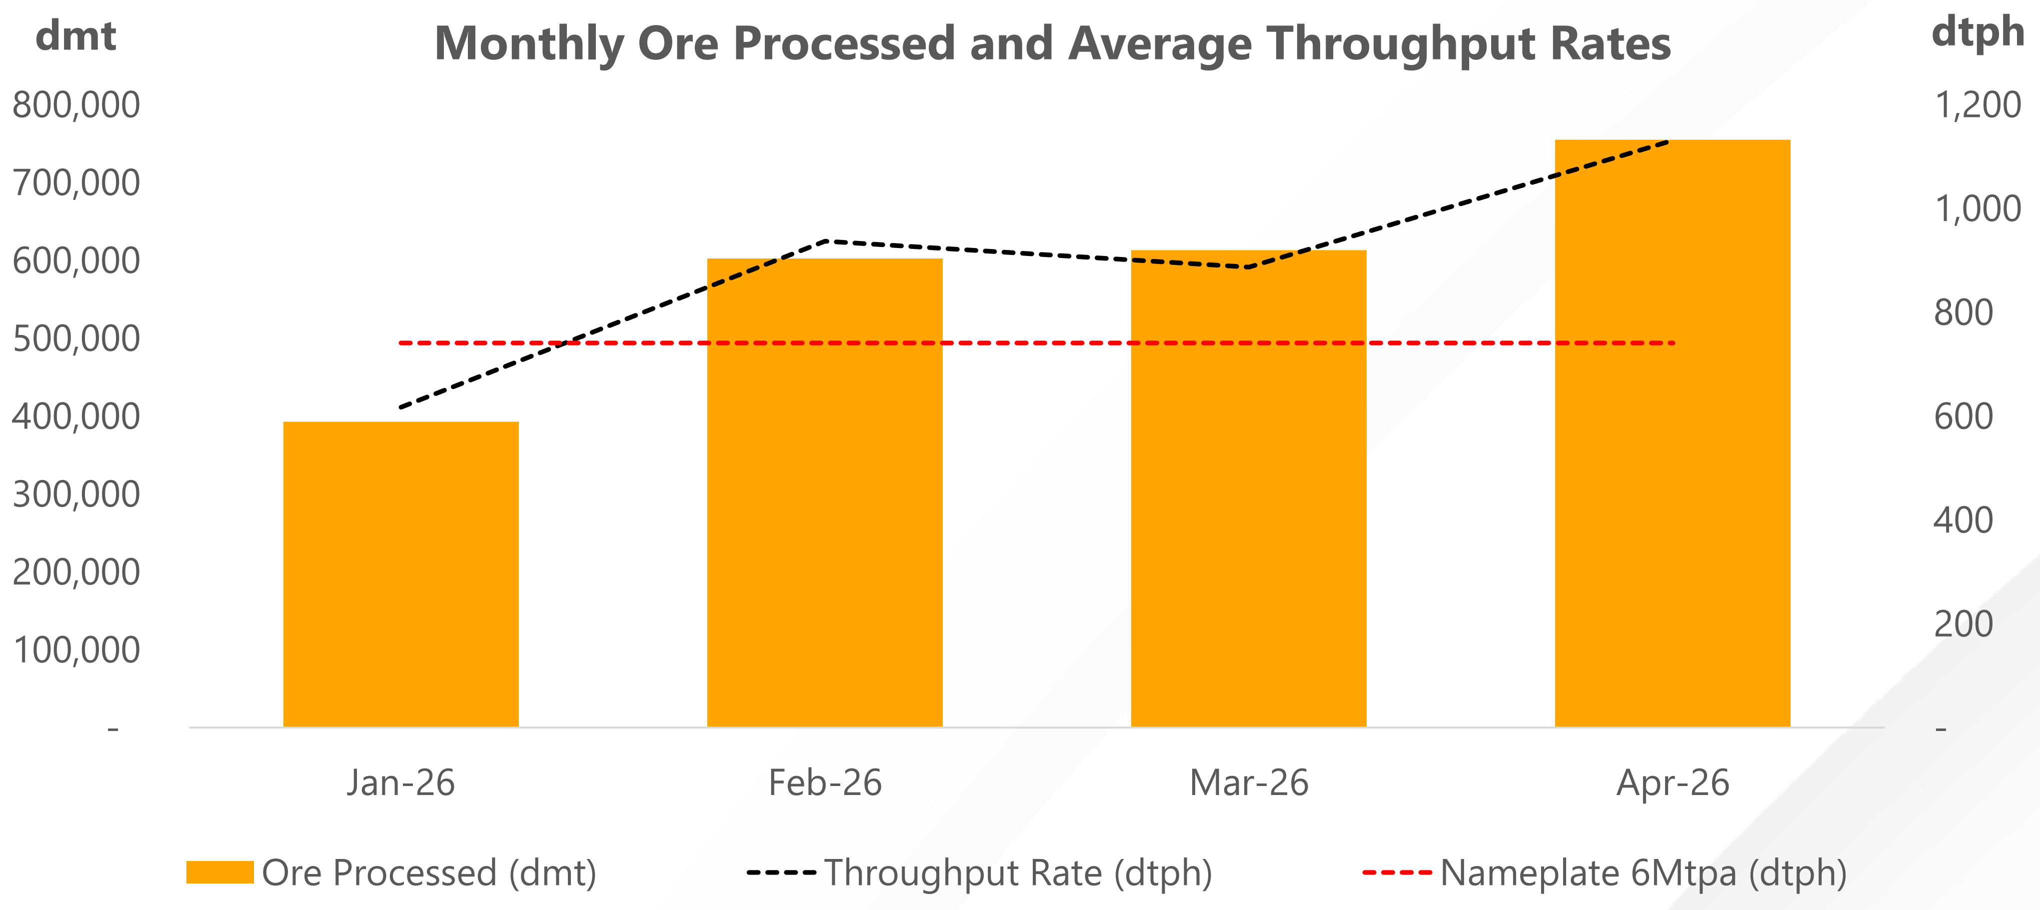
Source: Kiniero Report (see Robex's ASX announcement titled "Amendment to Kiniero Gold Project Technical Report" dated 22 August 2025)
1. Inclusive of mineral reserves

Kiniero Operations Update

Strong ramp-up driven by mining and processing performance exceeding plan

Summary Operational Metrics

	Units	Mar-26 Quarter	Dec-25 Quarter	Var %
Ore Mined	*dmt*	2,137,273	1,133,860	88%
Total Material Mined	*dmt*	5,105,131	2,345,251	118%
Stripping Ratio	*t:t*	1.4	1.1	30%
Ore Processed	*dmt*	1,607,851	126,998	1,166%
Head Grade	*g/t*	0.87	0.96	(9%)
Recovery	*%*	90.1	80.0	13%
Gold Production	*oz*	38,178	790	4,733%



- **Strong operational ramp-up:** March 2026 quarter outperformed plan following mid-December commissioning and commercial production in February
- **Ore mined & material moved:** Ore mined **2.14Mt**; total material moved **5.11Mt**; driven by improved fleet utilisation and operating efficiency
- **Ore processed: 1.61Mt** of ore processed, reflecting successful plant commissioning and rapid throughput ramp-up post start-up
- **Metallurgical performance & production:** Gold poured of **38,178oz Au**; recovery improved to 90.1%
- **All-in sustaining cost (AISC)** of **US$1,043/oz** recorded for the first quarter of operations at Kiniero, reflecting an efficient ramp-up
- **Overall performance:** Results supported by strong mine-to-mill integration, effective commissioning, and continued progress toward steady-state production
- **2026 production guidance:** 157,000-174,000oz Au

Kiniero Exploration & Resource Growth

Systematic brownfields expansion and greenfields drilling to extend mine life and support long-term production growth

Exploration Strategy & System Focus

- District-scale exploration strategy combining brownfields expansion with greenfields discovery
- Near-term free dig oxide resources underpinned by a large primary sulphide system for long-term growth
- Exploration priorities aligned with sustaining, replacement and growth options at Kiniero

FY26 Drilling Program

- ~133,000m planned across ~1,500 holes
- Drilling mix: 72% RC, 10% diamond, 18% auger / AC
- Program designed to balance near-mine definition with regional target advancement

Brownfields Expansion – Sabali-Mansounia Corridor

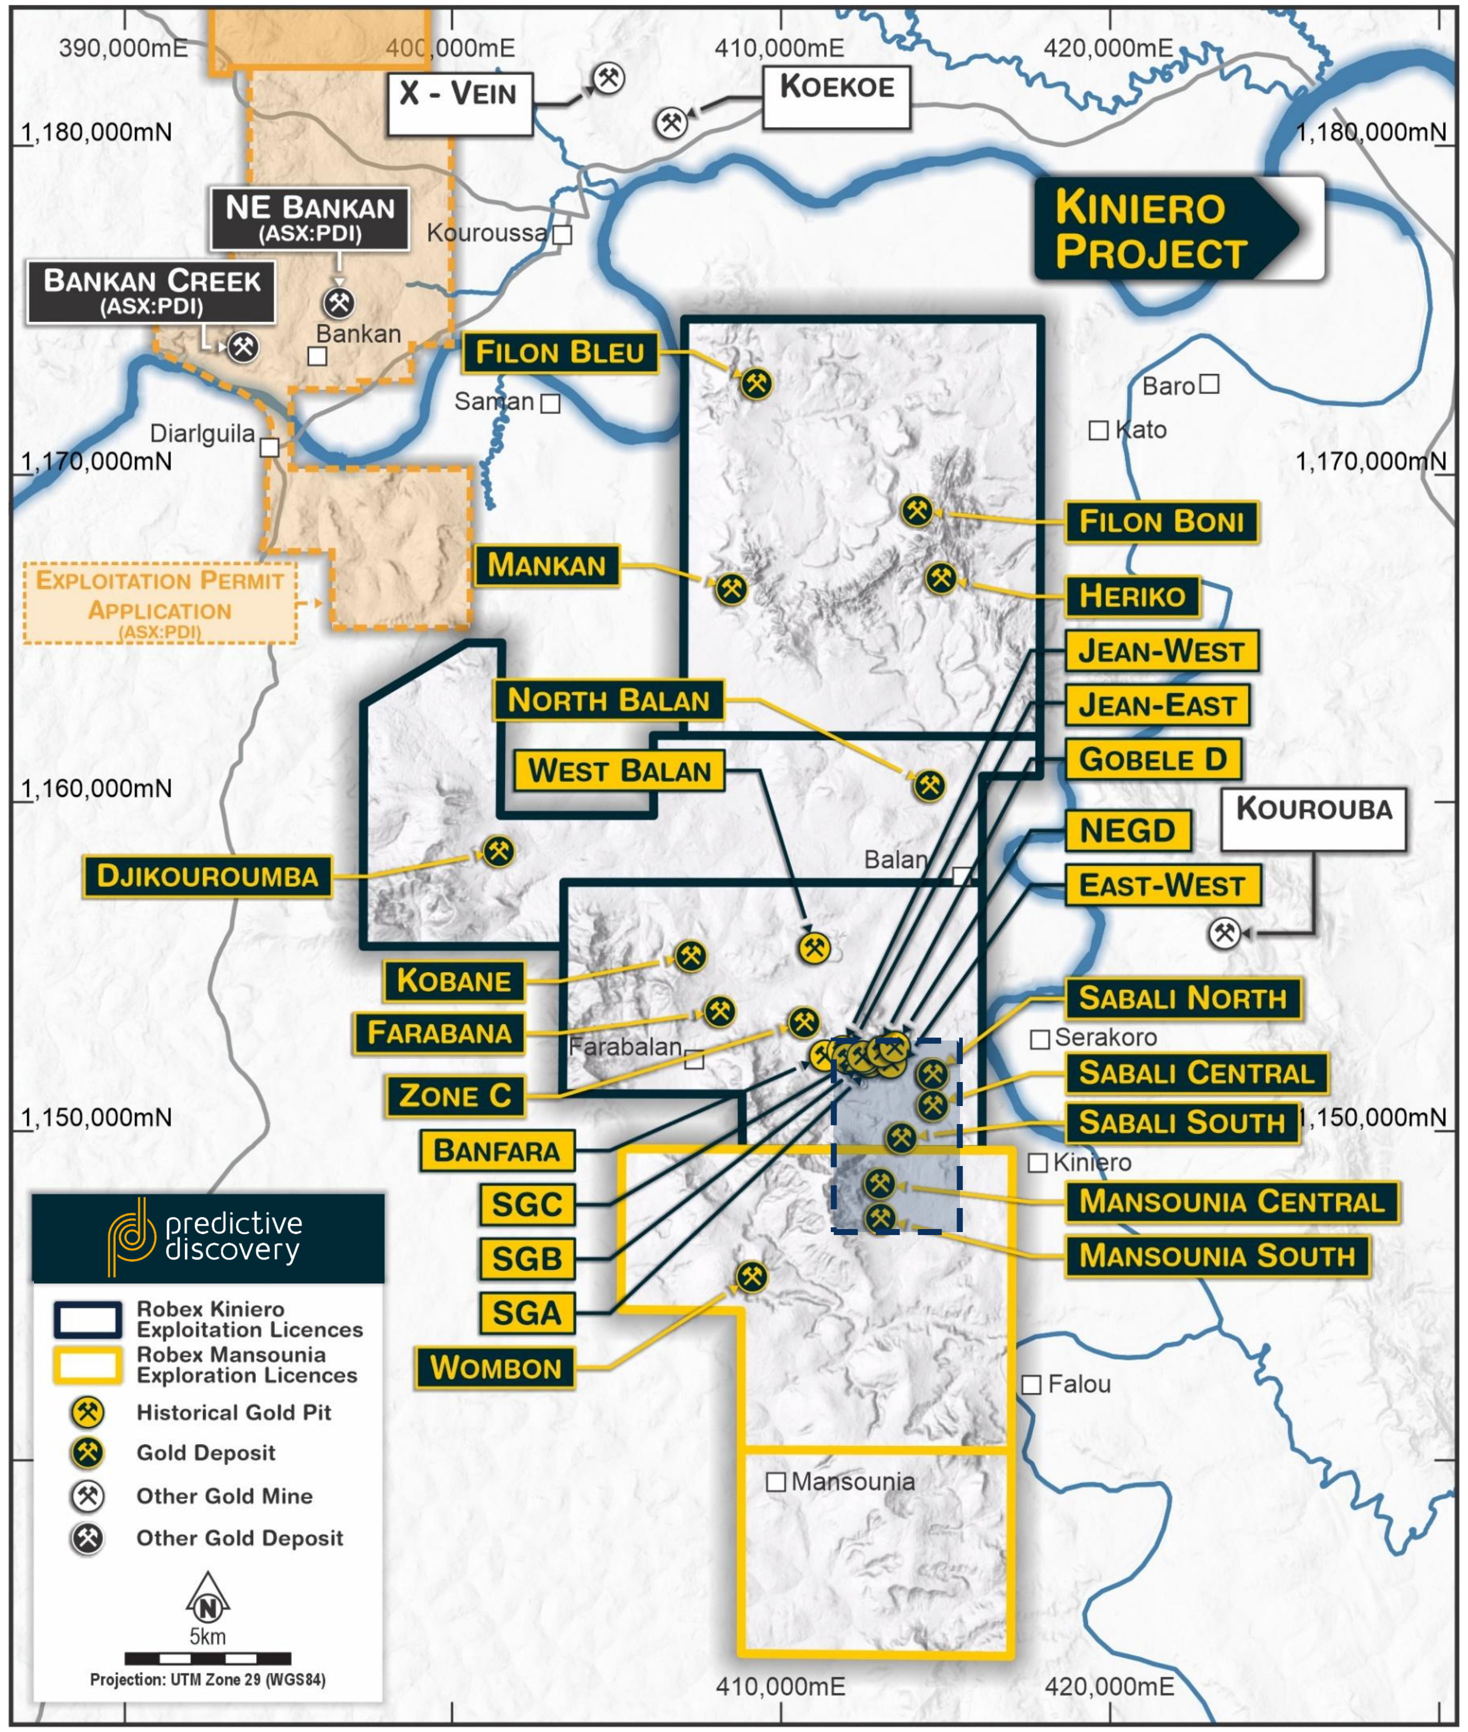
- Targeting expansion of the Gobele pit and development of Kiniero “super-pit”
- Continuous mineralised corridor supports pit growth and depth extensions
- Focus on oxide and transitional material to support near-term production flexibility

Northern Target Achievement

- Drilling advancing at Mankan, Filon Bleu, Filon Boni and Heriko
- Targets progressing toward maiden Inferred Resource estimates
- Improved geological and structural understanding across northern prospects

Resource Definition & Mine Life Extension

- Infill drilling converting near-mine Inferred Resources to Indicated classification
- Supports life-of-mine planning, Mineral Reserve conversion and production scheduling
- Strategic optimisation of strip ratio, grade, recovery and AISC



Bankan Overview

Large-scale, long-life gold development project with compelling economics and strong leverage to the current gold price environment

Significant reserves & resources

2.95Moz ore reserve
(51.6Mt @ 1.78g/t)

5.53Moz mineral resource[1]
(103.6Mt @ 1.66g/t)

Significant exploration potential

Competitive capex & opex[2]

US$463m pre-production capex

~US$1,057/oz LOM average AISC

Exceptional production profile

Conventional open pit and underground mining

4.5Mtpa CIL processing plant; 92.8% LOM ave recovery

~250kozpa average gold production
over a **12-year mine life**

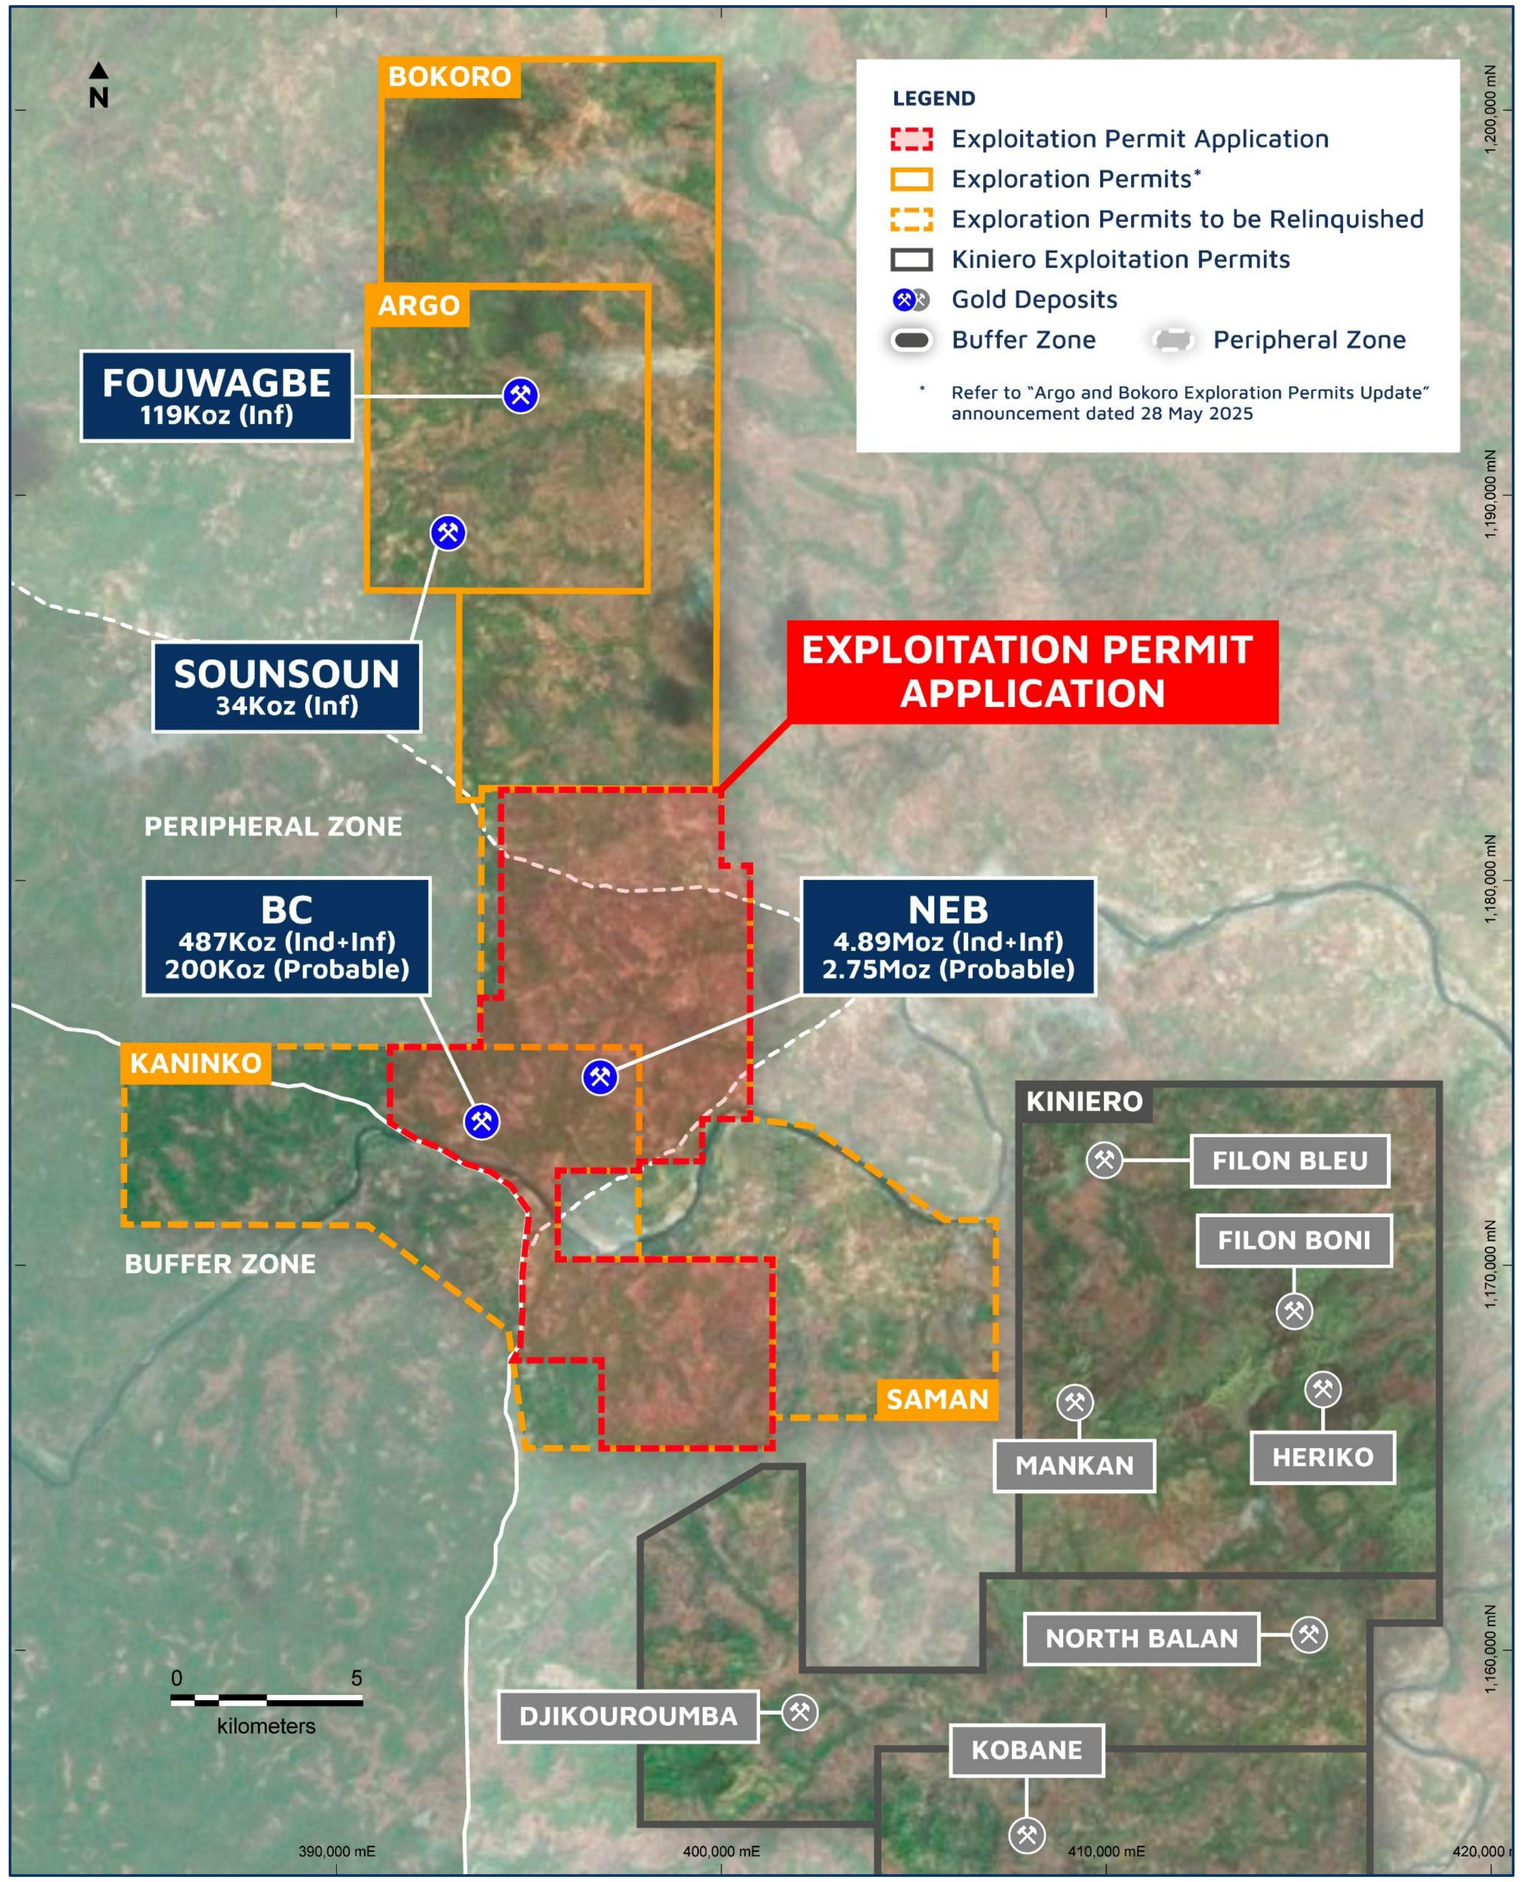
One of the largest and most advanced gold development projects in Africa

Strong financials[2]

US$1.6bn NPV$_{5\%}$ and IRR of 46%
(at US$2,400/oz gold price)

US$2.9bn NPV$_{5\%}$ and IRR of 73%
(at US$3,300/oz gold price)

Each US$100/oz adds ~US$140m NPV



Source: PDI ASX announcement titled "Bankan DFS Confirms Outstanding Project Economics" dated 25 June 2025

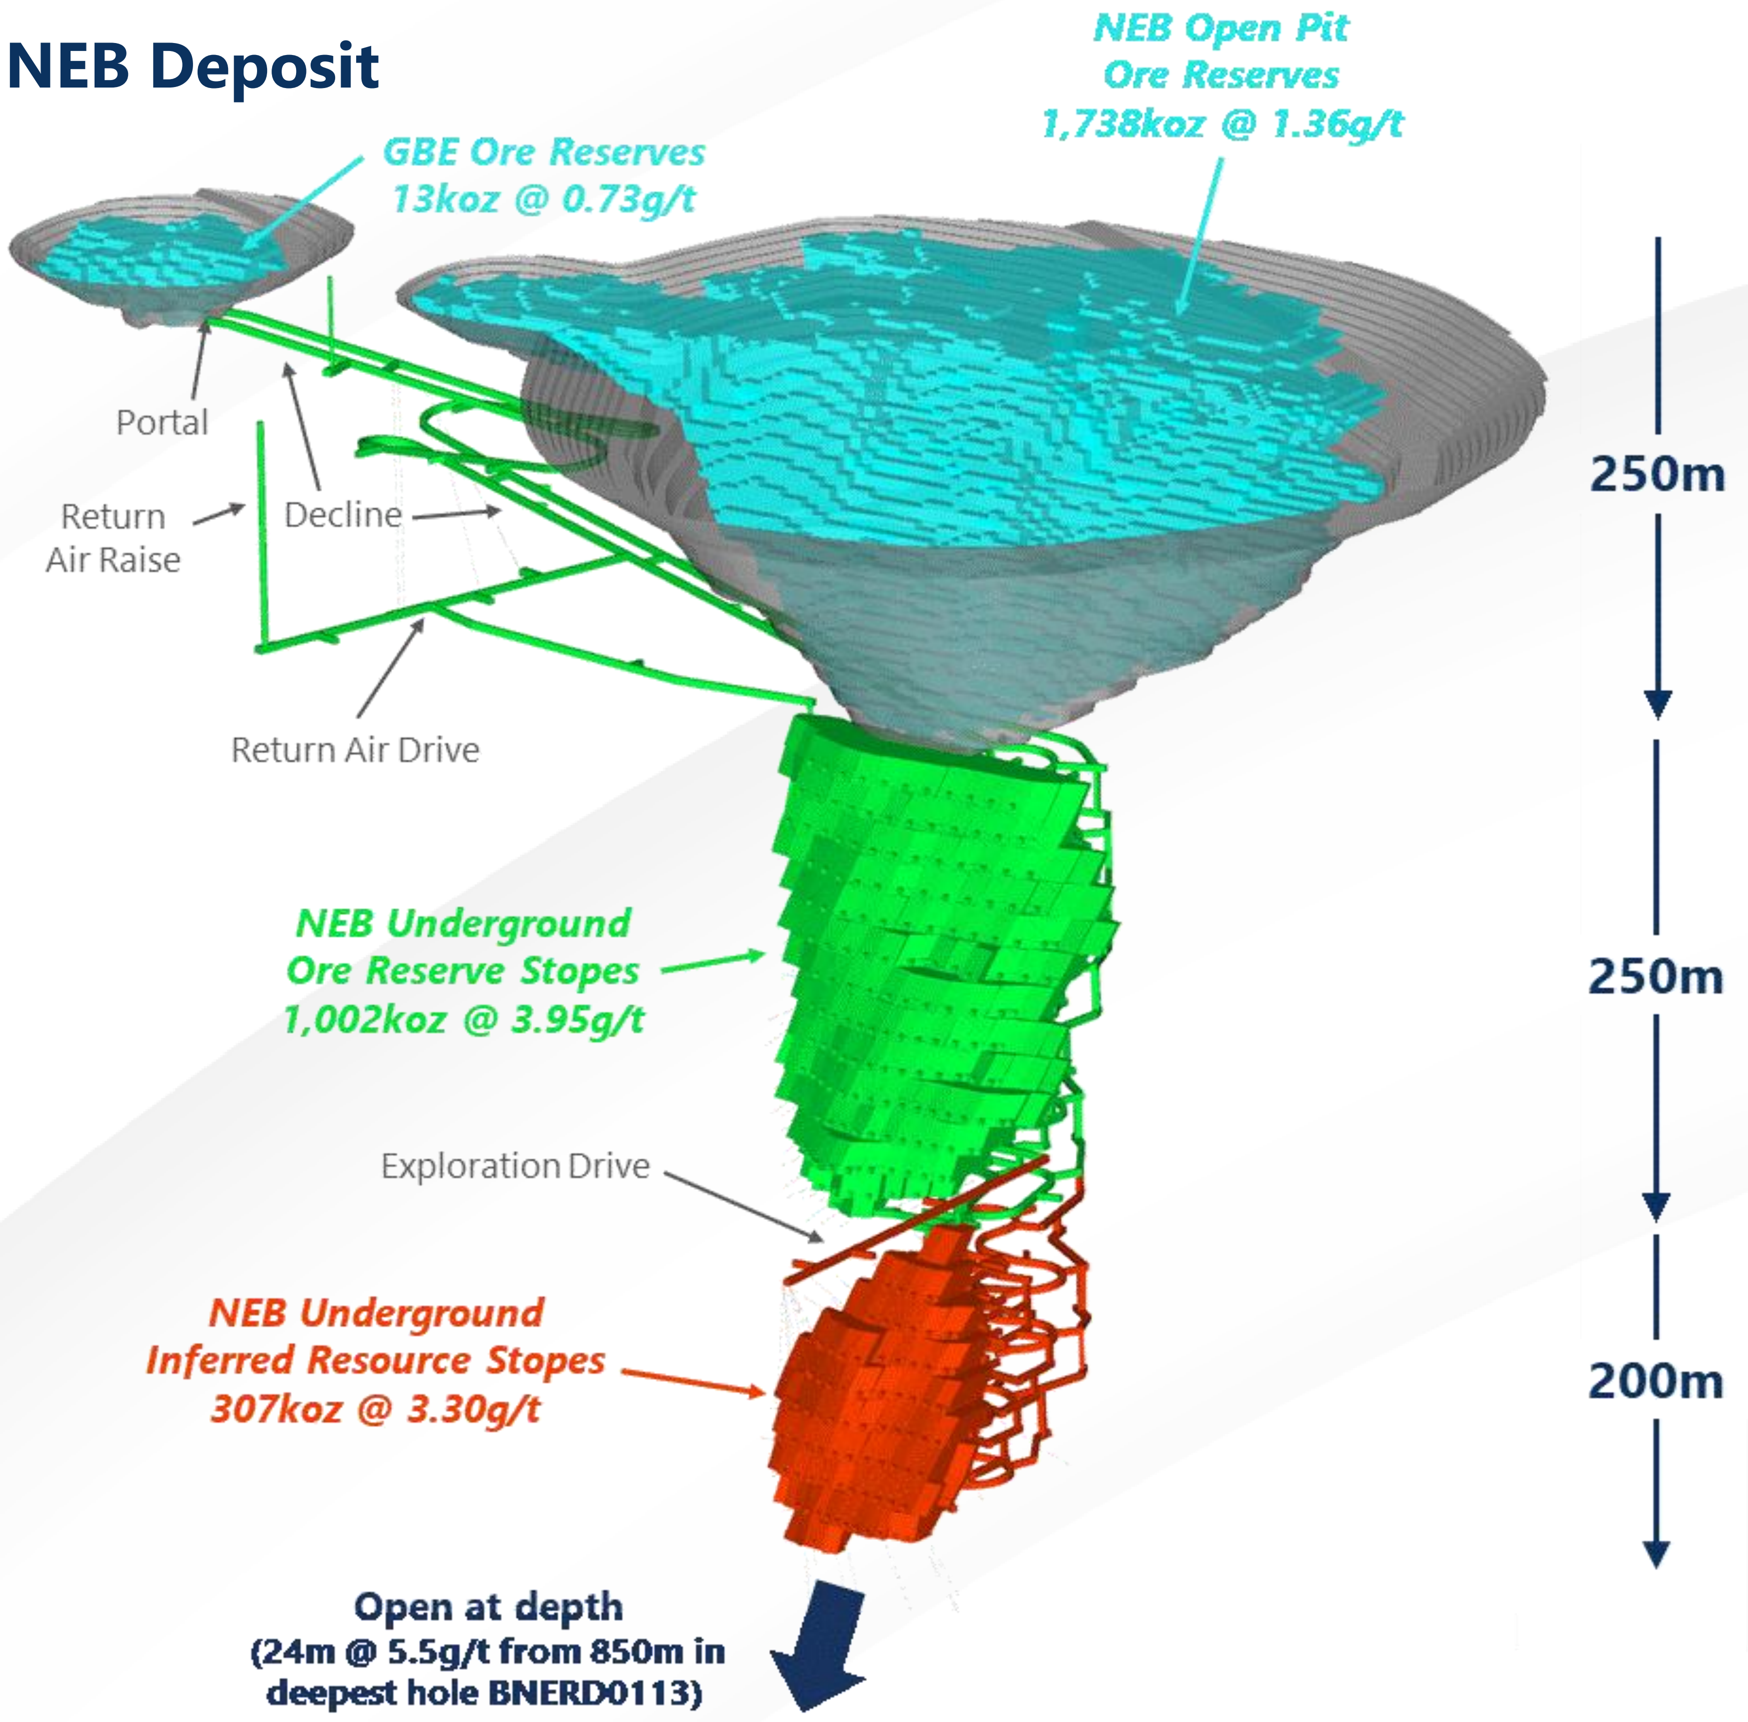
1. Inclusive of Ore Reserves. The Argo permit hosts 153koz of the 5.53Moz mineral resource in the Fouwagbe and Sounsoun deposits. PDI intends to appeal the Argo and Bokoro revocations announced on 28 May 2025 in accordance with the Mining Code. Refer to PDI ASX release "Argo and Bokoro Exploration Permits Update" dated 28 May 2025
2. Financial metrics reported on a post-tax basis for 100% of the Project

Bankan Update

Tier-1 development project approaching construction-ready status

- Exploitation Permit application has passed all required steps in the Government's approvals process and is awaiting sign-off by the President of Guinea
- Execution planning advanced; focus on critical path and long lead items to allow construction to commence once Exploitation Permit is granted
- Primero awarded front end engineering design
  - Optimised flowsheet and process design criteria nearing completion
  - Process and instrumentation diagrams advancing
  - Layout development progressing – primary and oxide crushing areas well-defined
- Long lead items identified and packages being advanced
  - Power station, SAG and ball mills, primary crusher, primary feeder and vibrating grizzly feeder packages issued for tender and processes advancing
  - Tender packages for structural steel and platework fabrication are in development
- Environmental and social workstreams continued to advance

NEB Deposit



Bankan Exploration Upside

35km of Siguiri Basin margin; positive results at multiple exploration targets in the NEB area and at Argo[1]

Near-Resource Targets

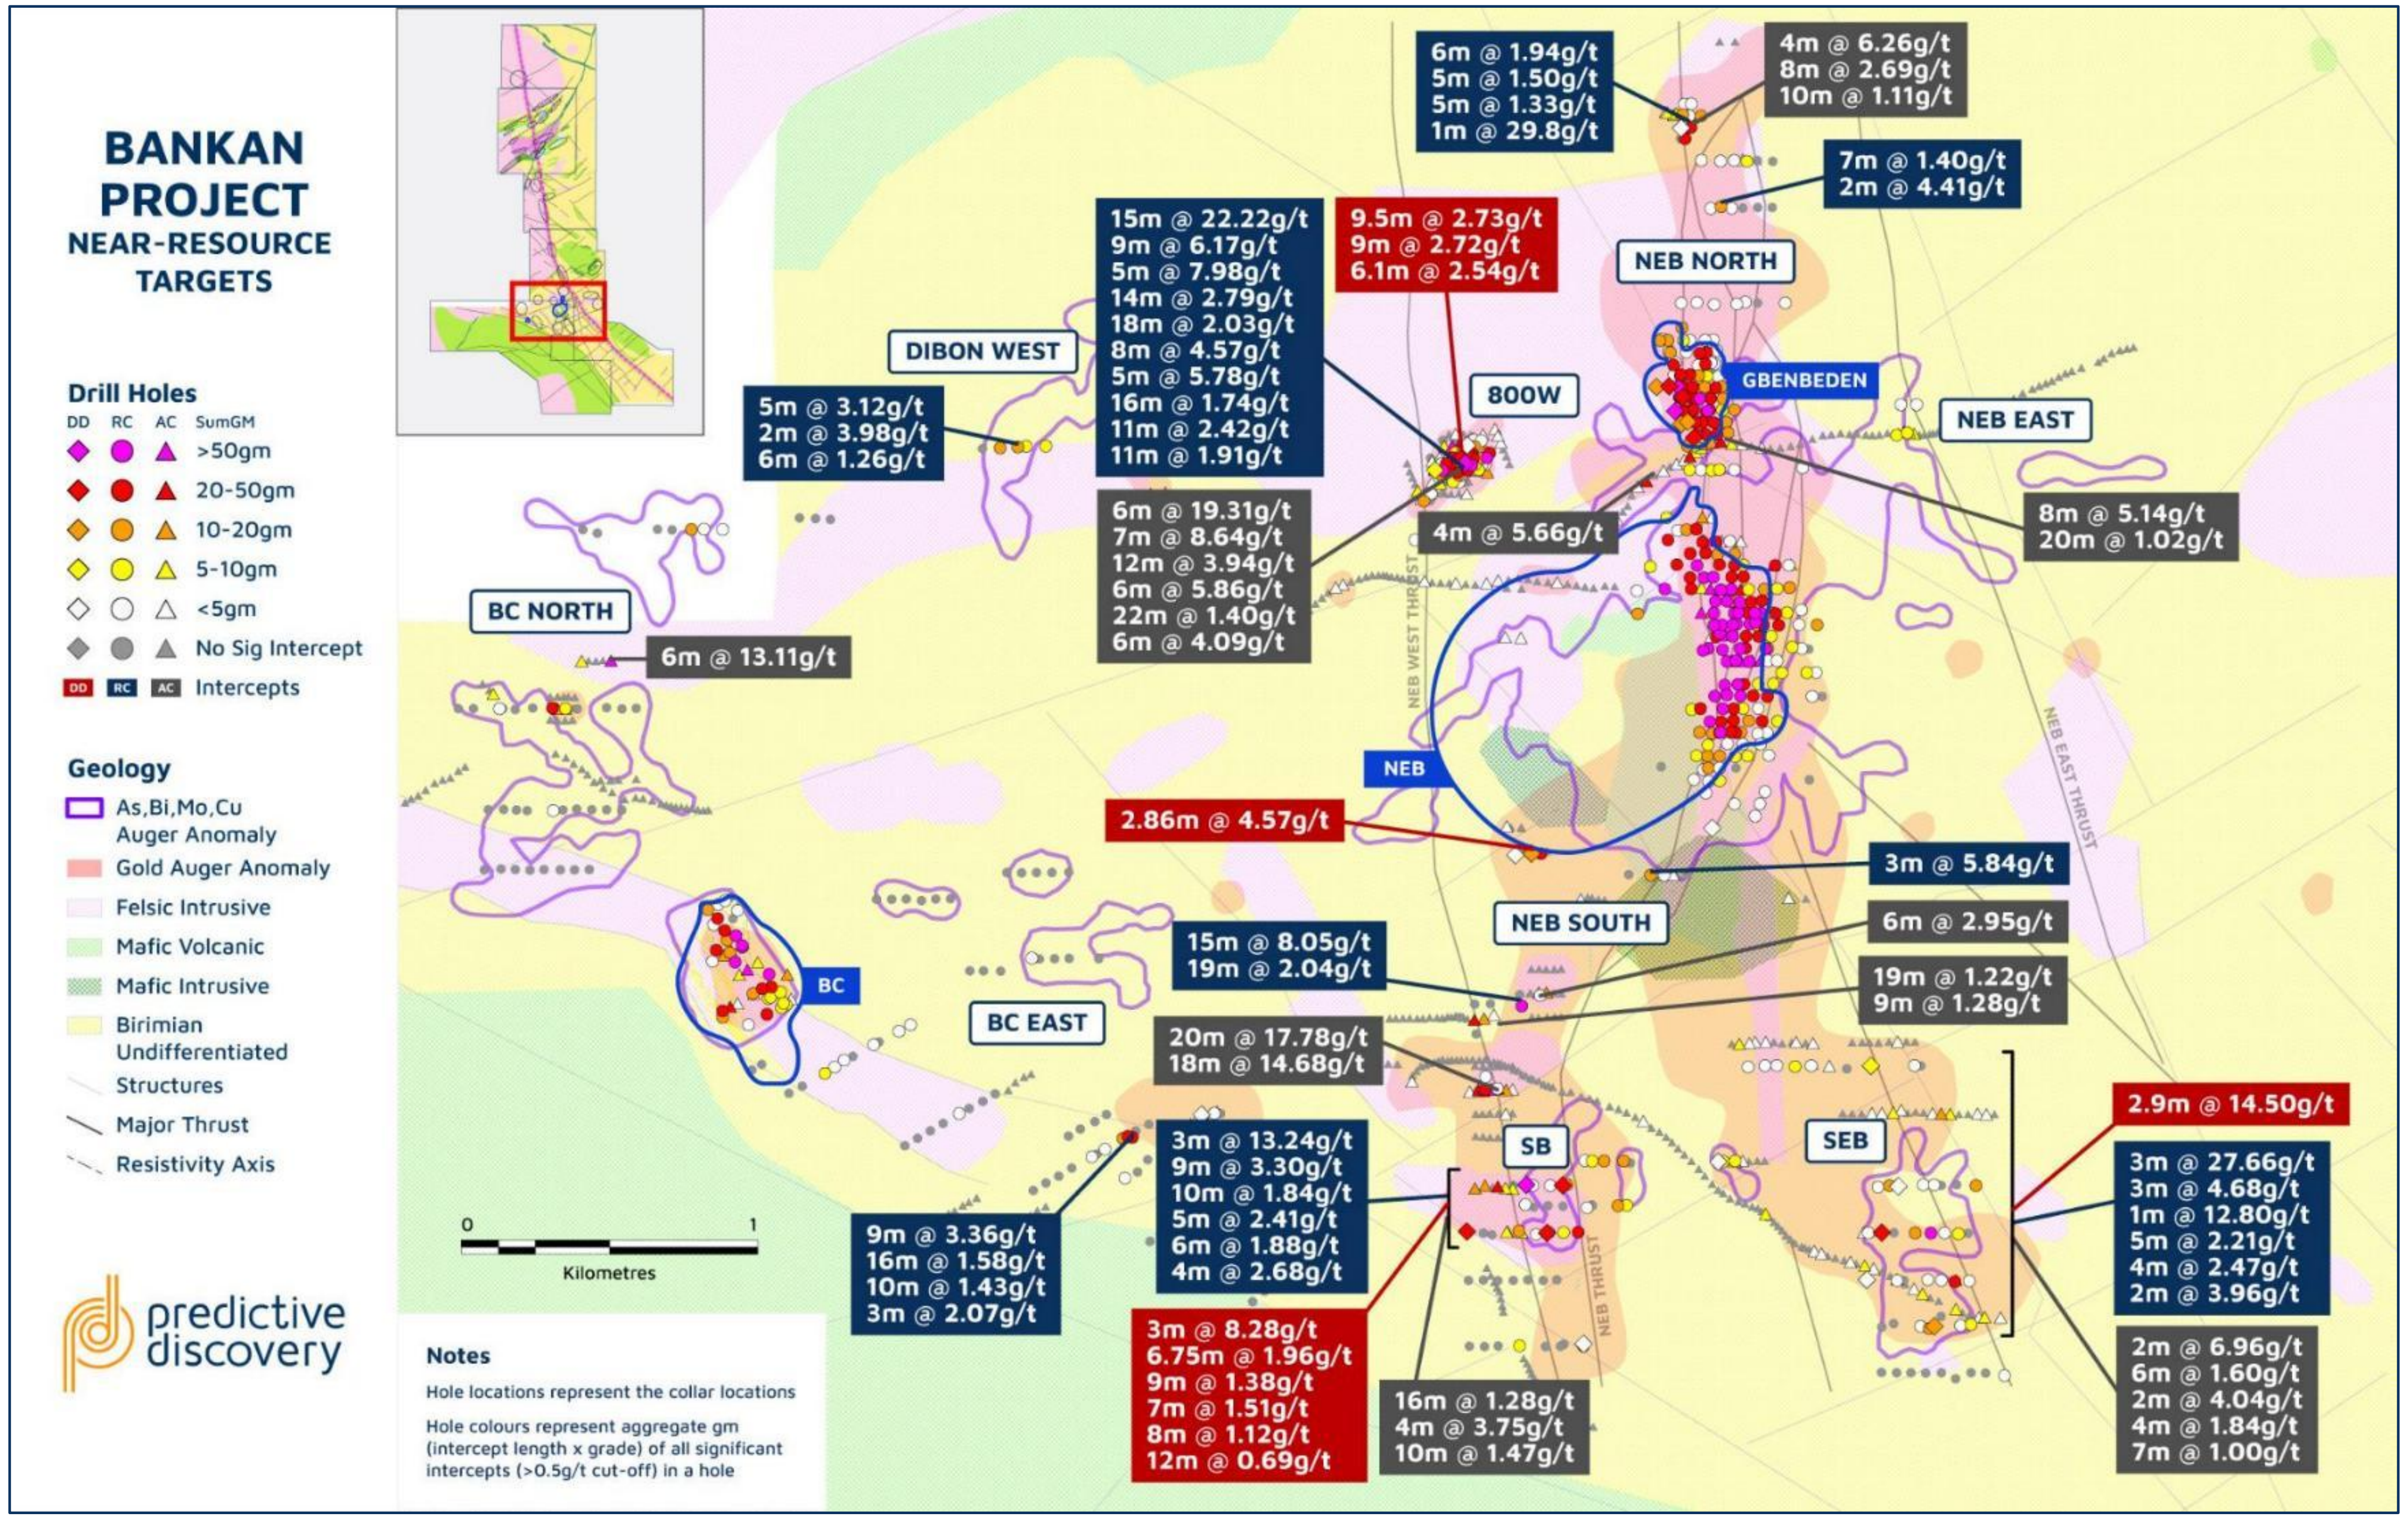
- Numerous near-surface prospects have been identified within 3kms of the NEB and BC deposits
- Targets defined from shallow drilling and geophysics surveys
- Positive results from multiple targets confirms extent of gold mineralisation in the NEB and BC area
- Potential for multiple satellite deposits to be defined over time

Argo[1]

- Multiple specific target areas plus 23 line kms of anomalous auger trends to be tested
- 153Koz maiden Mineral Resource for Fouwagbe and Sounsoun

Bokoro South Targets[1]

- Extensive auger drilling and first pass aircore program completed to test structural and geophysical targets
- Further auger and aircore drilling planned following wet season



Note: Results from various ASX releases. Refer to "Material ASX releases" slide 24 in the appendix

1. PDI intends to appeal the Argo and Bokoro revocations announced on 28 May 2025 in accordance with the Mining Code. Refer to PDI ASX release "Argo and Bokoro Exploration Permits Update" dated 28 May 2025

Nampala Overview

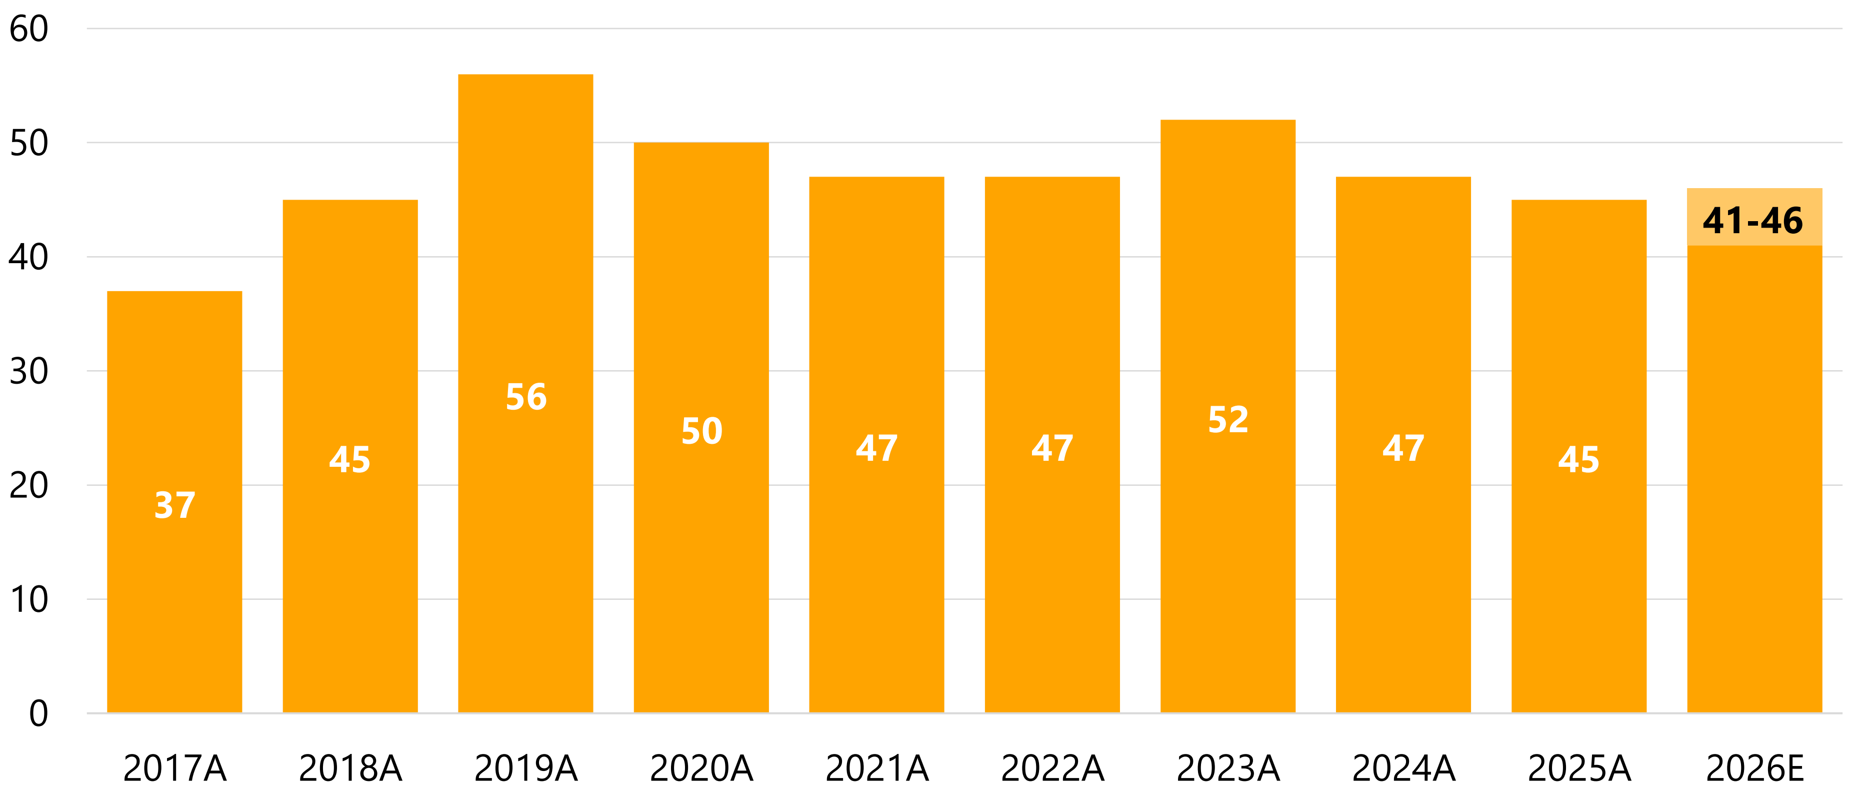
Established producer delivering stable output and monthly free cash flow

Nampala Operations

Location	Mali
Ownership	80% Robex / 20% Mali Government
Type	Conventional Open Pit Mining
Plant	3.0 Mtpa Gravity and CIL Processing Plant
Mine End	2026

- Located in southern Mali within the Leo-Man Shield of the West Africa Craton
- Reliable production base of 40-50koz annually
- Typically generates US$2-3m FCF per month with current gold price amplifying margins
- Positive, constructive relationship with the Malian Government; Mining Convention signed February 2025
- 121koz @ 0.93 g/t reserves as at 30-Sep-24; current mine-life end 2026
- Near-mine and regional exploration provide potential for incremental mine life extension

Gold Production (koz Au)



Source: Robex ASX release titled "Replacement Prospectus" dated 6 May 2025

2026 Objectives

A transformational year off to a great start with a strong March quarter

2026 Objectives

Production guidance: 198,000 – 220,000oz
Kiniero: 157,000 – 174,000oz
Nampala: 41,000 – 46,000oz

Exploitation permits granted for Bankan and Mansounia

Bankan final investment decision and construction underway for the 250,000oz per annum project

Exploration success at Kiniero, Nampala and Bankan to increase Resources/Reserves and extend mine life

Growth: develop pipeline asset opportunities to leverage competitive advantage in mine building

March 2026 Quarter Highlights

Safety: one recordable injury;
PDI TRIFR of 0.0 and Robex TRIFR of 2.3

Total production: 48,177oz at US$1,192/oz AISC;
Average realised price of US$4,806/oz

Kiniero production: 38,178oz at US$1,043/oz AISC

Nampala production: 10,000oz at US$1,699/oz AISC

Bankan: Execution planning advancing to be ready to commence construction once Exploitation Permit is granted

Strong financial platform: Significant cash generation;
Pro-forma combined cash of US$263M[1] and debt of US$130M

1. Includes US$80M in restricted cash and a US$10M term deposit maturing on 9 April 2026. Doesn't factor in transaction costs associated with the PDI/Robex merger

Appendix

About Guinea

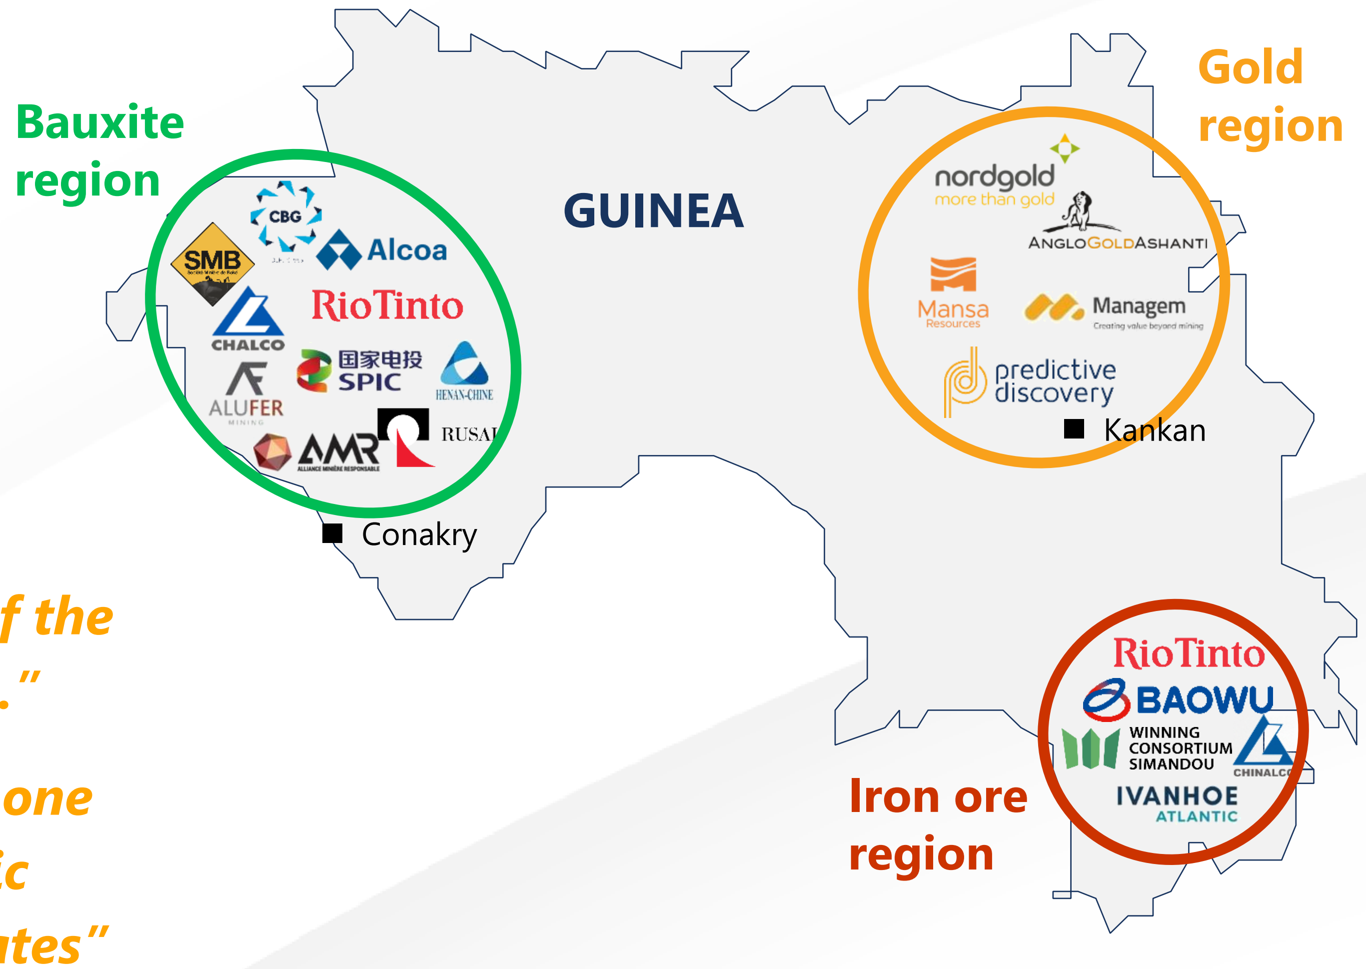
Guinea is an established gold-producing jurisdiction with long term exploration and mining activity

- Host to multiple world-class mining projects operated by leading international companies
- Established gold industry
- Global leader in bauxite
- Home to the Simandou Iron Ore Project, the world's largest mining-related development with backing from Rio Tinto, WCS and the Republic of Guinea
- Mining has contributed significantly to exports and GDP growth
- Strong pipeline of infrastructure developments
- Large-scale job creation across mining, construction, and infrastructure supporting employment growth
- Established mining code & fiscal regime
  - 5% royalty plus 1% local development contribution
  - 30% corporate tax rate
  - 15% free carried equity interest
  - Stable fiscal terms since 2013
- Increasing emphasis on community partnerships and sustainable local benefits

"The Guinean economy is one of the most resilient in West Africa."

"The budget deficit…. remains one of the lowest in the Economic Community of West African States"

- African Development Bank Group

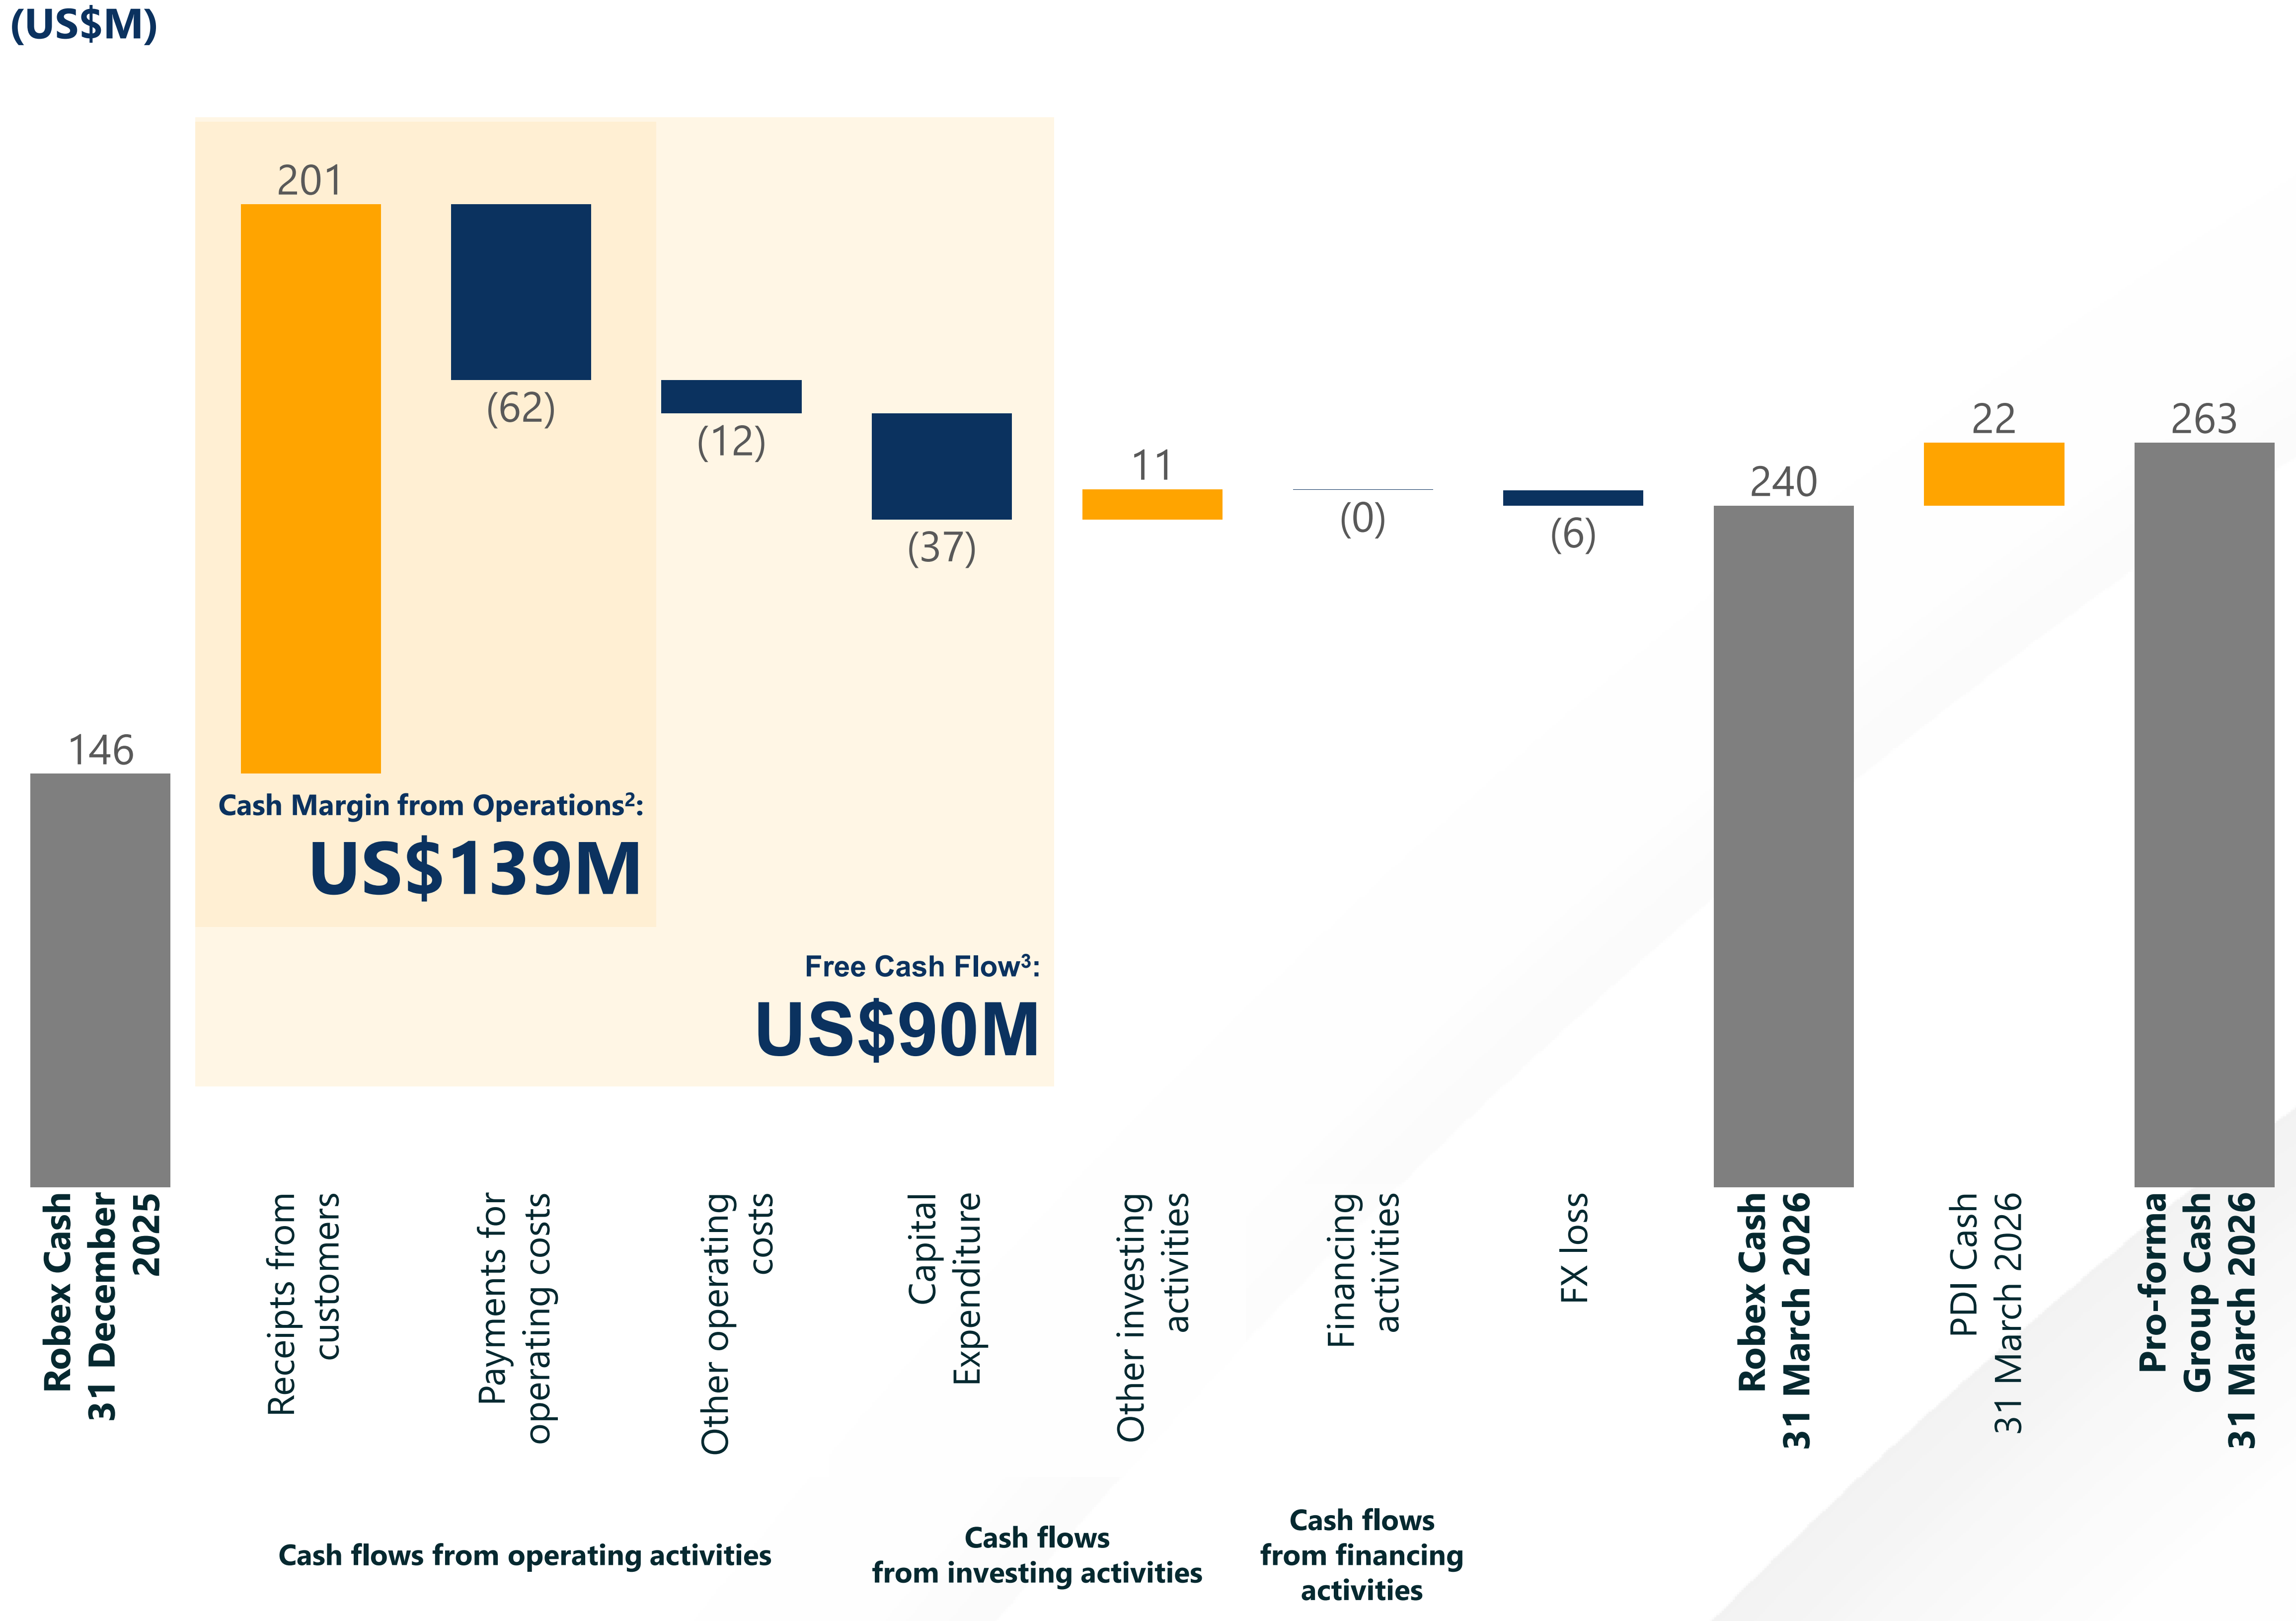


Benefits to Guinea

Builds a fast growth gold hub in the Siguiri Basin, consolidating a significantly underexplored geological belt	**Supports Guinea's community through employment, infrastructure upgrades, and programs**
Expected to deliver substantial and sustained tax revenue to the Government of Guinea	**Catapults Guinea into being a top gold producer in Africa**

March 2026 Quarter Cash Flow Bridge[1]

Strong cash flow generation supported by Kiniero ramp-up and high realised pricing



- **Robex cash balance** increased to **US$240M[4]**
- Additional PDI cash of **US$22M**, delivering pro-forma cash of **US$263M[5]**
- **Total cash inflow** for Robex of **US$94.6M** driven by strong operational cash generation
- **Cash margin from operations** of **US$139M**
- **Free cash flow** of **US$90M**
- **Total capex expenditure** of **US$37M** primarily related to growth capex at Kiniero for construction activities with a smaller component attributable to sustaining capital
- **Other investing activities** results in cash inflows of US$11M related to proceeds from maturity of short-term investments and interest received
- **Foreign exchange movements** results in US$6M negative impact on cash

1. All figures in this presentation are unaudited. Amounts may not sum due to rounding
2. Cash margin from operations is called as receipts from customers less payments for operating costs
3. Free cash flow (FCF) represents net cash from operating activities less capital expenditure
4. Robex's cash balance as at 31 March 2026 includes restricted cash of US$80M and a term deposit of US$10M maturing on 9 April 2026
5. Pro-forma cash doesn't factor in transaction costs associated with the PDI/Robex merger
