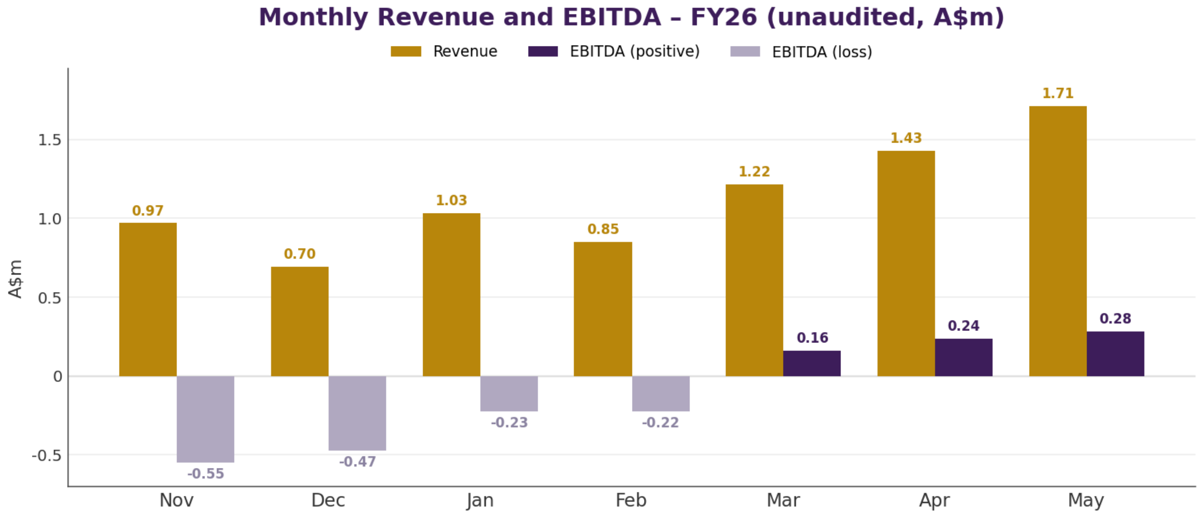
PKP Strong Trading Momentum

Third consecutive month of positive EBITDA; Q4 production lifted to ~1.6m units

- **Positive EBITDA at the consolidated Group level (after corporate and head-office costs) in March, April and May 2026 of A$159k, A$235k and A$282k respectively (unaudited).**
- **May revenue of A$1.71m, the highest monthly result of FY26**
- **Q4 FY26 production now expected to reach ~1.6m beverage units, ahead of the original guidance of ~1.4m units (refer ASX announcement: 17 March 2026), on confirmed customer purchase orders**



Figures are unaudited, drawn from management accounts and reported on a consolidated Group basis, after corporate and head-office costs. EBITDA is stated before non-operating and non-cash items. Monthly figures are provided to illustrate the H2 FY26 earnings inflection; the Company reports financial results on a quarterly basis.

Peak Processing Limited (ASX: **PKP**) ('**PKP'** or '**the Company**') is pleased to advise that the earnings inflection reached in H2 FY26 has continued, with three consecutive months of positive EBITDA and Q4 production now tracking ahead of original guidance. Q4 FY26 production is now expected to reach approximately 1.6m beverage units, ahead of the original guidance of approximately 1.4m units provided in March 2026 (refer ASX announcement: 17 March 2026).

With the rising production base, the reduced fixed-cost structure established in H1 FY26, and more than 30 additional product listings scheduled to launch between June and September 2026, the Company expects the operating leverage demonstrated in the second half of FY26 to support continued positive trading into Q4 FY26 and beyond.

Managing Director & CEO, Barry Katzman, said:

"March marked a clear turning point for Peak, and delivering positive EBITDA in each of the three months since, each stronger than the last, shows the inflection is real and holding. With Q4 production now tracking ahead of our original guidance and a materially lower cost base, we are now converting volume growth into sustainable positive performance."
