Prominence Appoints Chief Financial Officer

Prominence Energy Limited **(ASX: PRM) ("Prominence" or "the Company")** is pleased to announce the appointment of Mr Darren Olsen as part time Chief Financial Officer ("CFO").

Mr Olsen is an experienced taxation, business and corporate advisor with over 25 years in the accounting industry. He is a CPA accredited accounting professional and has developed broad expertise across tax accounting, business planning and corporate finance, supporting businesses with practical financial and commercial advice.

The Company welcomes Mr Olsen to the role and looks forward to his contribution to Prominence's ongoing corporate and financial management.

Commenting on the appointment, PRM's Chairman Ian McCubbing said;

"We are delighted to welcome Darren to PRM. Darren has extensive expertise in financial management and small company statutory and management accounting. Darren's expertise will be instrumental as we continue to strengthen our financial position and drive long term value for our shareholders in this next stage of PRM's journey."

The key terms of Mr Olsen's appointment are set out in Annexure A.

Authorised for release by the Board of Prominence Energy Limited.

Annexure A

Key terms of appointment

- Position: Chief Financial Officer (part time)
- Commencement Date: 30 July 2026
- Remuneration: $96,000 per annum, excluding statutory superannuation (working 2 days a week unless otherwise agreed or as required).
- Term: Fixed term of two years, subject to standard termination provisions.
- Annual Leave: 20 days per annum, pro-rata.
- Incentives: 20,000,000 unlisted options, exercisable at $0.004 per option and expiring on 24 June 2029, to be issued upon completion of his probationary period.
- Otherwise on terms and conditions considered standard for an appointment of this nature.

About Prominence Energy

Prominence Energy Limited is an ASX-listed energy company headquartered in Perth. PRM's strategy is to identify and secure high upside energy opportunities at an early stage and unlock value through disciplined, science led exploration. The Company's South Australian helium, natural hydrogen and associated natural gas portfolio provides exposure to an emerging exploration play with the potential to deliver significant shareholder value through exploration success.

About Natural Hydrogen

Natural hydrogen (also known as white or geologic hydrogen) is formed from natural processes within the earth and accumulates underground. It can be identified using conventional, low-cost, non-invasive exploration methods and represents a zero-carbon fuel, producing only water vapour when combusted.

About Helium

Helium is a naturally occurring noble gas generated through the radioactive decay of uranium and thorium within ancient crustal rocks, particularly Archean granites. Helium is a high-value, non-renewable resource with essential applications in medical imaging, semiconductor manufacturing, space technologies and cryogenics, and is currently subject to global supply constraints.
