- The plan to increase the perceived value of Prodigy Gold's defined Mineral Resources may be achieved through a longer-term development pipeline for each project, including mining studies, mineral lease applications and environmental approvals
- All mining studies to be updated in 2026 using updated mineral resources, testwork results, costs and gold price assumptions
- Hyperion Mineral Lease application is underway with approvals occurring throughout 2026-27, with final approval expected in 2027, production could commence once the ML application and Environmental (Mining) Licence is approved by the NT Government
- Plans include to apply for an ML at Tregony following the granting of the Hyperion Mineral Lease, with approval excepted by 2029, production likely possible at that time
- Old Pirate has previously approved Environmental Impact Assessment (EIA) completed but Environmental (Mining) Licence (NT Gov.) & EPBC (Federal Gov.) approvals will be required before mining can re-commence, this is underway and expected in 2026
- Once open pit mining approvals at Old Pirate are finalised, application for mining approval for underground operation at Old Pirate and open pit mining at Buccaneer may be instigated, this project could then transition to a larger operation
