A total of 19,510,592 Piggyback Options were exercised out of the 20,141,793 issued, representing a 97% conversion rate. This extraordinary participation rate reflects the remarkable support and engagement of Racura’s shareholders in our mission.

When combined with the proceeds from the original Bonus Option offer, which closed on 4 June 2024 (ASX Announcement: 6 June 2024), total funding raised across both offers totalled \$29.4 million.

Executive Chair, Dr Pete Smith, said: *“The support from our shareholders is deeply appreciated. Achieving a 97% conversion rate is a remarkable outcome and an endorsement of our clinical development program for RC220. This funding enables us to fund the HARNESS-1, CPACS and Stage A of our Phase 3 AML to meaningful clinical readouts. On behalf of the Board and Management of Racura, I thank all shareholders who participated.”*

CEO and Managing Director, Dr Daniel Tillett, said: *“This option offer was launched at a time of considerable volatility. Achieving such an outstanding result demonstrates the commitment of our shareholders and allows us to progress our clinical programs with the funds to complete. This funding outcome is a significant milestone for Racura, and we look forward to delivering on the promise RC220 offers.”*

Racura acknowledges and sincerely thanks its shareholders for their enthusiastic participation in this option issue and their continued support of the company.

About Racura Oncology

Racura Oncology (ASX: RAC) is a Phase 3 stage clinical biopharmaceutical company with a mission to silence cancer.

Racura's lead asset, (E,E)-bisantrene, is a small molecule anticancer agent that primarily functions via G4-DNA & RNA binding, leading to potent silencing of the important cancer growth regulator MYC. (E,E)-bisantrene has demonstrated therapeutic activity in cancer patients with a well characterised safety profile. Recent discoveries made by Racura have enabled composition of matter IP filings that provide for 20 years of patent protection over (E,E)-bisantrene.

Racura is advancing a proprietary formulation of (E,E)-bisantrene (RC220) to address the high unmet needs of patients across multiple oncology indications, with a Phase 3 clinical program in acute myeloid leukaemia (AML), a Phase 1a/b program in mutant epidermal growth factor receptor non-small cell lung cancer (EGFRm NSCLC), and a Phase 1a/b program in combination with the anthracycline doxorubicin, where we aim to deliver both cardioprotection and enhanced anticancer activity for solid tumour patients.

Racura has collaborated with Astex, Emory University, Purdue University, MD Anderson, Sheba City of Health, UNC School of Medicine, University of Wollongong, and University of Newcastle. Racura is actively exploring partnerships, licence agreements, or a commercial merger and acquisition to accelerate access to RC220 for patients with cancer across the world.
