

QUARTERLY ACTIVITIES AND CASHFLOW REPORT

ASX RELEASE: 31 July 2026

The Board of Resource Base Limited (ASX: RBX, Resource Base or the Company) is pleased to present its quarterly activities report for the June 2026 quarter.

South Australian Projects

The Company holds two exploration licences in the Gawler Craton, South Australia:

- **EL7054** – located approximately 100 km south of Coober Pedy and approximately 14 km from PTR Minerals' (ASX: PTR) Muckanippie heavy mineral sands project. The tenement lies directly adjacent to PTR's Artemis rare earth prospect. Access to the Woomera Prohibited Area over EL7054 was previously granted by the Department of Defence.
- **EL7060** – located approximately 15 km south of Tarcoola. The tenement adjoins an interpreted anorthosite complex and is proximate to prospects held by Indiana Resources (ASX: IDA) and Barton Gold (ASX: BGD).

During the June quarter the Company continued desktop evaluation of both tenements, including further review of historic drilling data, geophysical datasets and satellite spectral imagery. No on-ground exploration was undertaken. The Company maintains the view that both tenements remain prospective for titanium-bearing heavy mineral sands and related mineralisation associated with anorthosite complexes.

Geological Review of Historic Exploration

EL7060 covers approximately 69km² within the northern Gawler Craton, a region known for its complex Proterozoic magmatic history and association with a variety of mineral systems including intrusion-related gold, nickel sulphides and titanium-bearing heavy mineral sands.

The Company commissioned a review of historic exploration conducted by several previous explorers including Amoco Minerals Australia, CSR Ltd, Aurelius Resources and Minex Australia. The work involved the compilation of historic drilling data, geochemical results, petrology reports and regional geophysical datasets.

The review identified several geological indicators that suggest EL7060 may host titanium-bearing mafic intrusive rocks associated with anorthosite complexes.

Mitre Hill REE Project

The Mitre Hill Project comprises multiple exploration licences on the South Australia / Victoria border and is prospective for clay-hosted rare earth elements. The project hosts a JORC Inferred Mineral Resource of 21 Mt @ 767 ppm TREO (announced 3 February 2023).

No exploration work was undertaken at Mitre Hill during the June quarter.

New Project Opportunities

Resource Base continues to actively review and assess new project and corporate opportunities. The Company remains focused on identifying assets that are strategically aligned with its critical minerals strategy and that have the potential to deliver meaningful value for shareholders. The Board maintains a disciplined approach to evaluating opportunities and will update the market as appropriate.

Tenement Schedule

This section is provided in compliance with ASX Listing Rule 5.3. Please refer to Annexure 1 for a listing of tenements.

Corporate & Administration

Cash Position

As at 30 June 2026 the Company held cash and cash equivalents of \$211,000.

Exploration Expenditure

In accordance with ASX Listing Rule 5.3.1, the Company advises that exploration and evaluation expenditure for the quarter totalled approximately \$90,000.

In accordance with ASX Listing Rule 5.3.2, the Company confirms that there were no mining production and development activities undertaken during the Quarter.

Related Party Payments

In accordance with ASX Listing Rule 5.3.5, payments to related parties of the Company and their associates during the quarter totalled \$21,000. These payments relate to directors' fees and superannuation.

Funding

The Appendix 5B reports that the Company has approximately 1.2 quarters of funding available at the current expenditure rate. On 31 July 2026, the Company announced that it had received firm commitments from sophisticated investors to raise \$700,000 (before costs) through a placement of shares at \$0.025 each.
