RESOURCING REVOLUTION

**30 July 2026**

# ASX RELEASE

# QUARTERLY ACTIVITIES REPORT

## For the period ended 30 June 2026

**Revolver Resources Holdings Limited** (ASX:RRR) (**Revolver** or the **Company**) is pleased to report on its activities for the quarter ended 30 June 2026.

## Dianne Project

**Dianne Copper Mine Project**

- Key workstreams advancing strongly at the Dianne Copper Mine Project with several key milestones achieved in the June quarter.
- Final Dianne 3D earthworks (~800,000$m^3$) and facilities layout complete.
    - Compact and environmentally conscious design minimizes operational footprint.
- Mining, crushing, heap leach and cathode output scheduling approaching finalisation.
- Procurement activities for key SX-EW facility items in progress.
- Appointment of experienced local contractor to undertake all development civil earthworks followed by mining, crushing and leach pad loading services.
- Site access road upgrades complete with Dianne site fully traversable via heavy haul transport.
- Accommodation village refurbishment, upgrade and expansion also complete.
- Negotiations well progressed to deliver an attractive funding solution for Dianne.
- Positive Final Investment Decision (**FID**) on Dianne targeted in the coming months, subject to funding.
- Civil earthworks program set to commence upon FID being taken.
- **First copper cathode production from Dianne expected within 12 months of FID.**

## Dianne Copper Project (RRR: part 100%, part 70% (Gossan Ridge JV))

The broader Dianne Project is located in northern Queensland, approximately 260km north-west of Cairns within the polymetallic Hodgkinson Province.

The Dianne Deposit, which previously hosted one of the highest-grade operating copper mines in the world, is situated in the eastern part of the Dianne Project. Revolver's Dianne Copper Mine Project is focused on a low capital cost, heap leach / SX-EW development of the existing Mineral Resource at the Dianne Deposit.

Revolver's regional exploration strategy at the broader Dianne Project continues to test the district scale volcanogenic massive sulphide (**VMS**) and intrusive related gold system (**IRGS**) potential in the adjacent Larramore Volcanics Belt, located to the west of the Dianne Deposit.

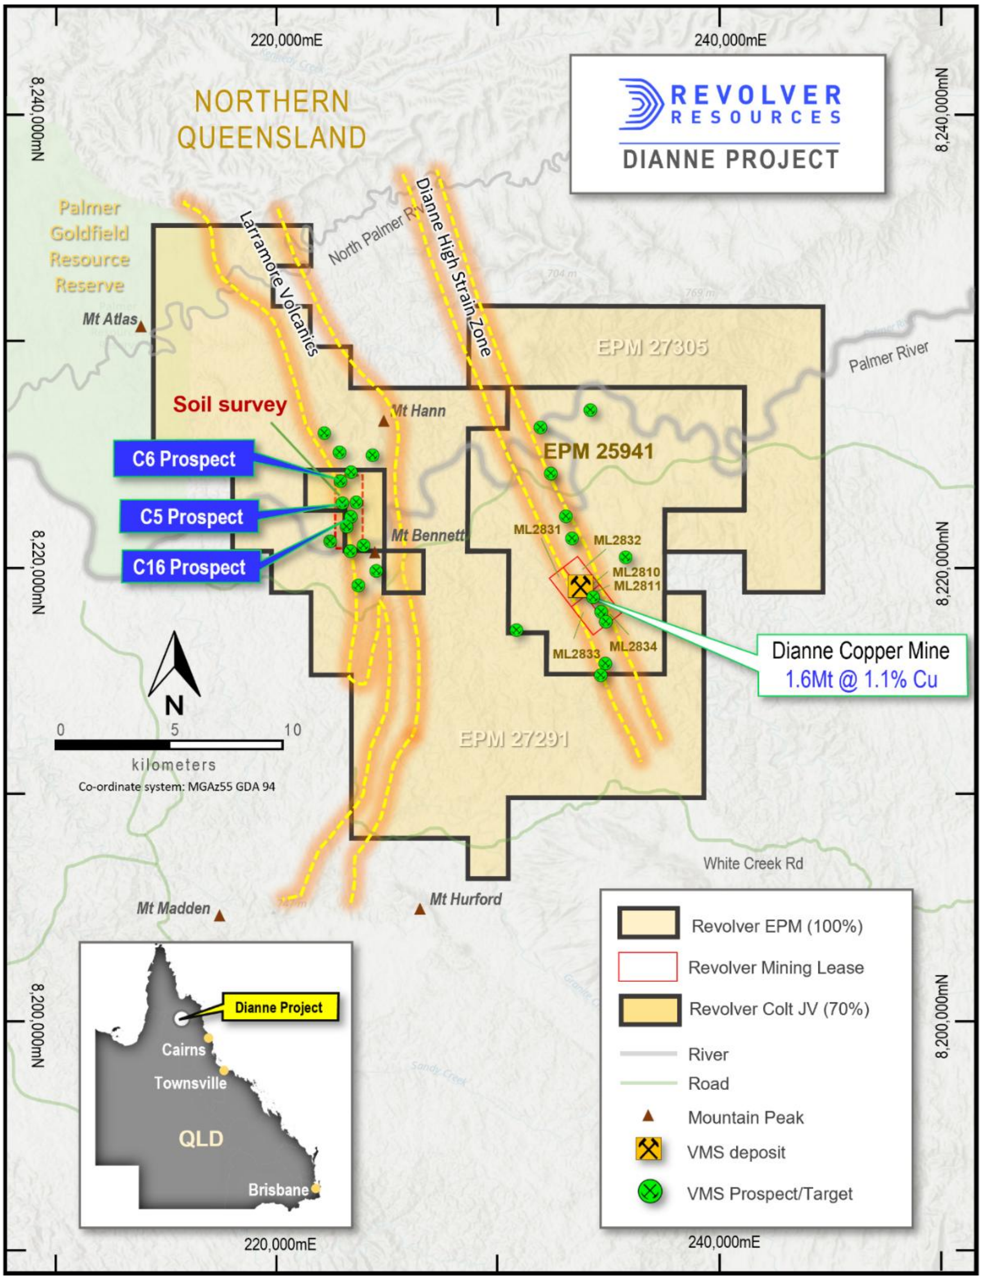

***Figure 1:*** *Dianne Project tenure, main geological trends, and EM targets.*

## Earthworks and mining contract awarded

During the June quarter, Revolver contracted experienced local Cape York services business, Complete Earthmoving Machinery and Civil Construction Pty Ltd (CEMACC), to undertake all civil earthworks activities required for development of its Dianne Copper Mine Project (including site roads, drains, dams, leach pads and material importation area).

Following completion of these development activities, CEMACC will then transition into the provision of mining, crushing and leach pad loading services for Dianne operations. Major equipment to be supplied by CEMACC and delivered to site in coming weeks includes: 70t hydraulic excavator, 50t hydraulic excavator, D9 dozer, 140 grader, 4 x 45t articulated dump trucks, and water and support trucks. The civil earthworks program is scheduled to commence promptly upon Revolver taking a positive FID on the Dianne Copper Mine Project.

## Accommodation village and site access road upgrades complete

Upgrade works were completed on the 10km Dianne site access road, following the end of the wet season. The access road is key to enabling the inflow of supplies and equipment required for the construction and operation of the Dianne Copper Mine Project.

***Figure 2:*** *Dianne Copper Mine Project site access road*

The completion of these upgrade works means that the road is now traversable by heavy haul trucks, supporting the next phase of development activities at Dianne.

Refurbishment, upgrade and expansion of the existing Dianne accommodation village was also completed. These works deliver capacity to support an initial 25 personnel for the targeted commencement of full-scale construction activities at Dianne.

***Figure 3:*** *Upgraded and expanded Dianne accommodation village*

## Dianne site layout finalised

During the quarter, Revolver completed the final 3D earthworks and facilities layout for the proposed Dianne Copper Mine Project. This design features a highly granular level of detail within a tightly defined and well understood scope. Total civil construction earthworks encompass approximately 800,000m$^3$ material moved, which represents a small scale of operation enabling a compressed delivery timeframe.

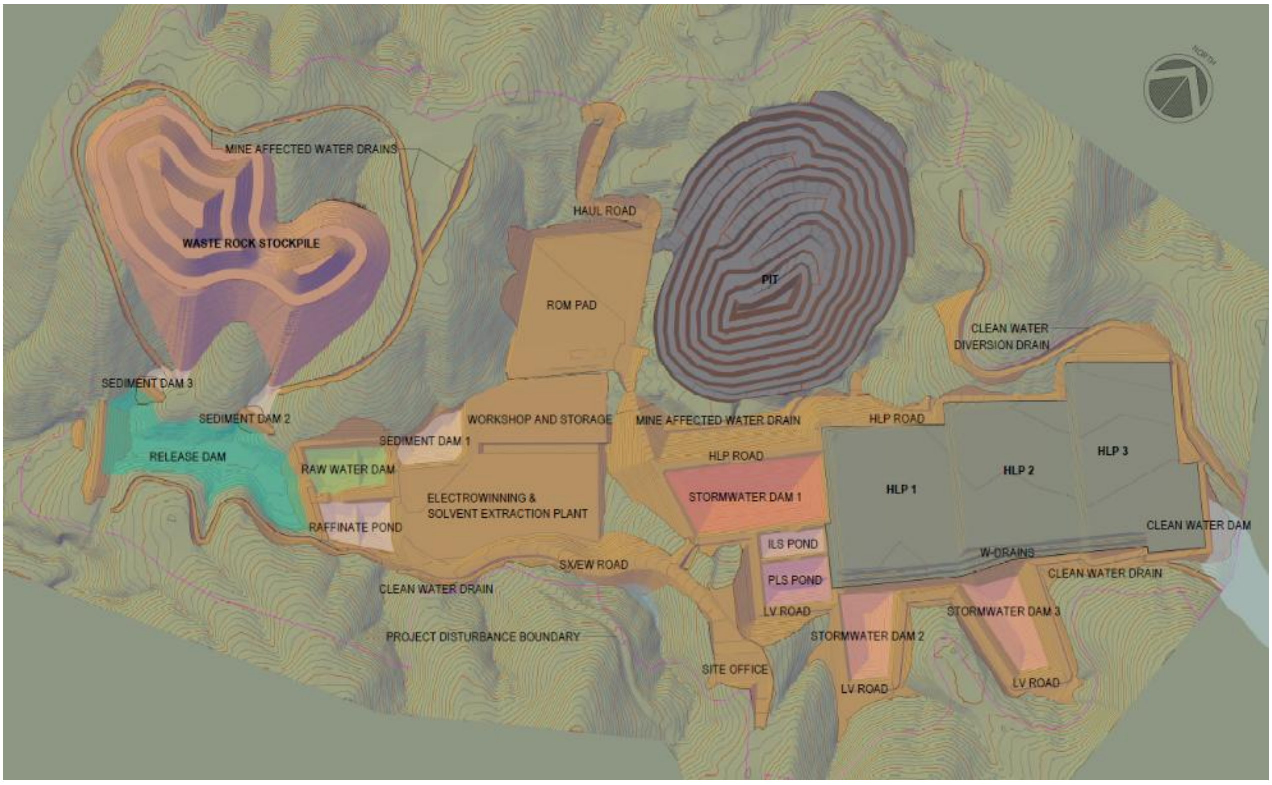

***Figure 4:*** *Dianne Copper Mine Project finalised site layout (design images, construction not yet completed)*

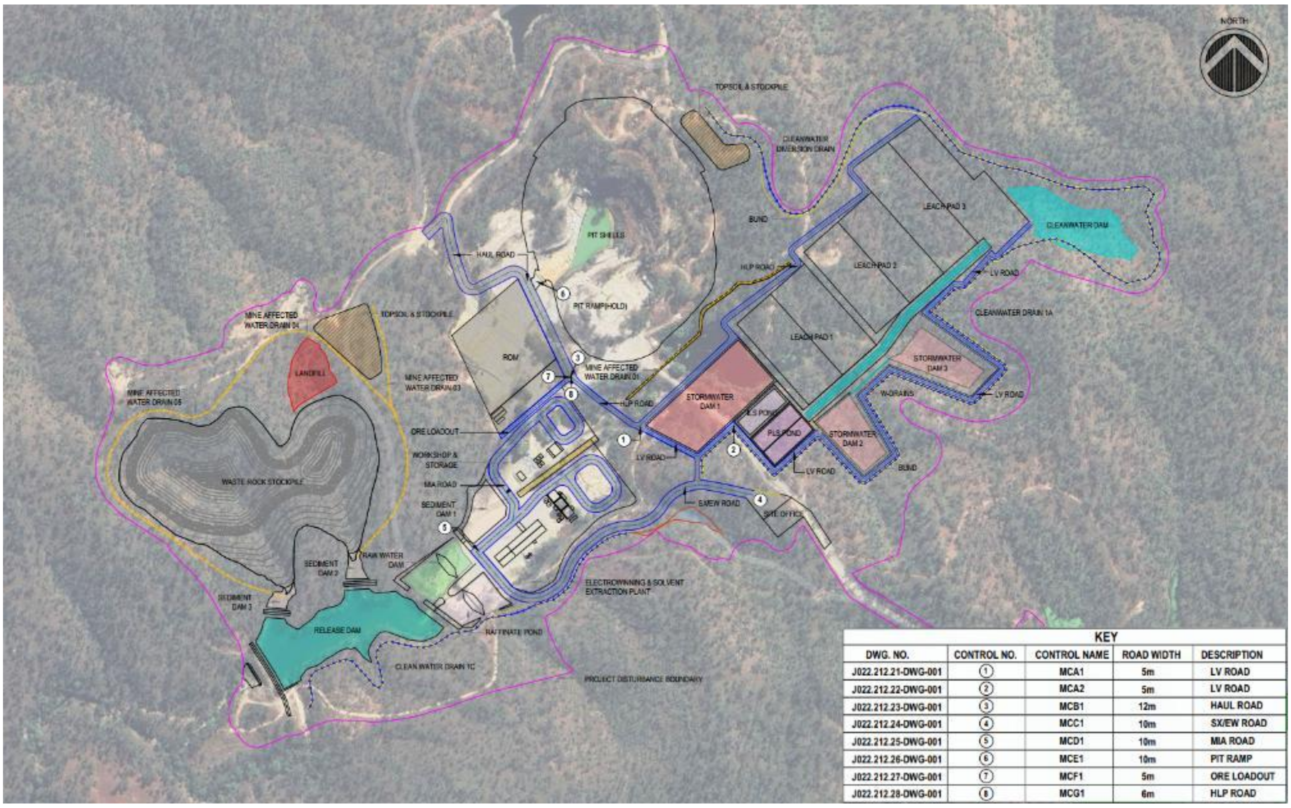
As detailed in Figures 4 and 5, the layout is both compact and well-tailored across key aspects including access, utility and geography. It also incorporates highly environmentally conscious design features embedded via collaborative consultation with specialist consultants and key stakeholders.



| DWG. NO. | CONTROL NO. | CONTROL NAME | ROAD WIDTH | DESCRIPTION |
|---|---|---|---|---|
| J022.212.21-DWG-001 | 1 | MCA1 | 5m | LV ROAD |
| J022.212.22-DWG-001 | 2 | MCA2 | 5m | LV ROAD |
| J022.212.23-DWG-001 | 3 | MCB1 | 12m | HAUL ROAD |
| J022.212.24-DWG-001 | 4 | MCC1 | 10m | SX/EW ROAD |

| J022.212.26-DWG-001 | 6 | MCE1 | 10m | PIT RAMP |
| J022.212.27-DWG-001 | 7 | MCF1 | 5m | ORE LOADOUT |
| J022.212.28-DWG-001 | 8 | MCG1 | 6m | HLP ROAD |

***Figure 5:*** *Dianne site layout with detailed road and access design (design images, construction not yet completed)*

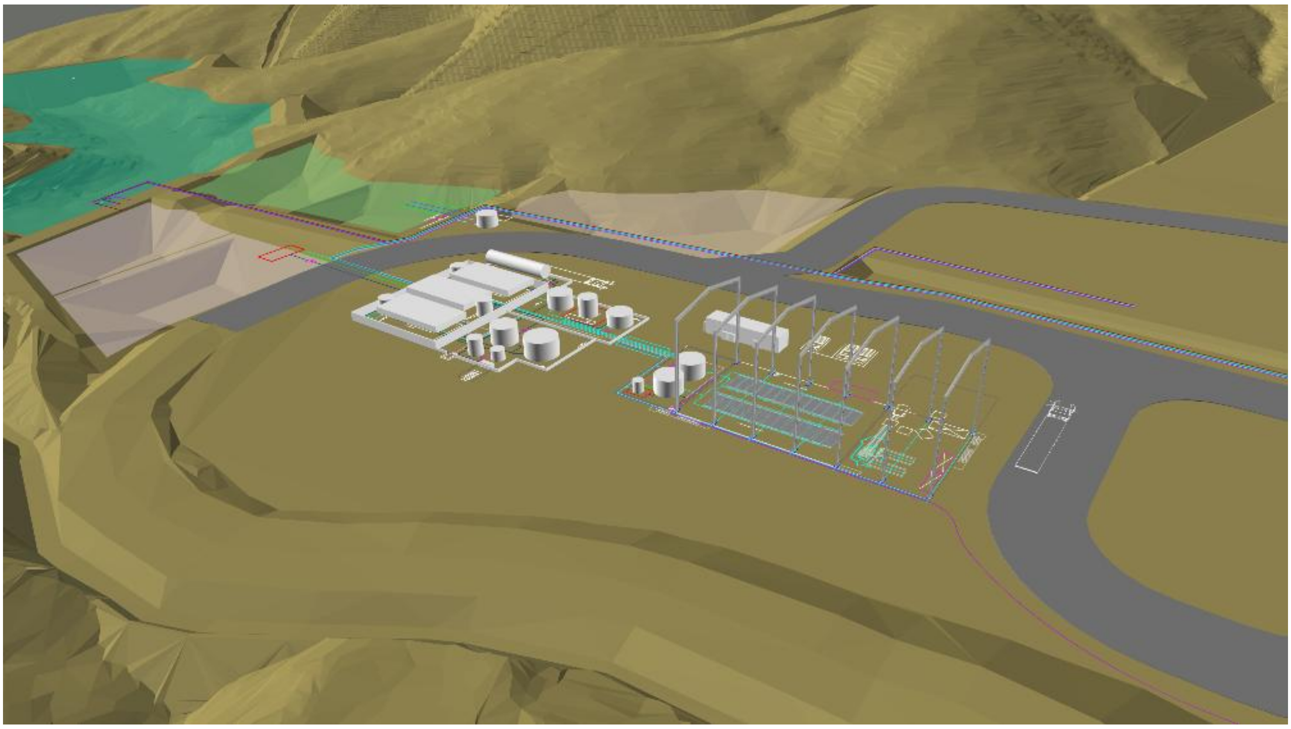

***Figure 6:*** *Dianne SX-EW facility design and area layout (design images, construction not yet completed)*

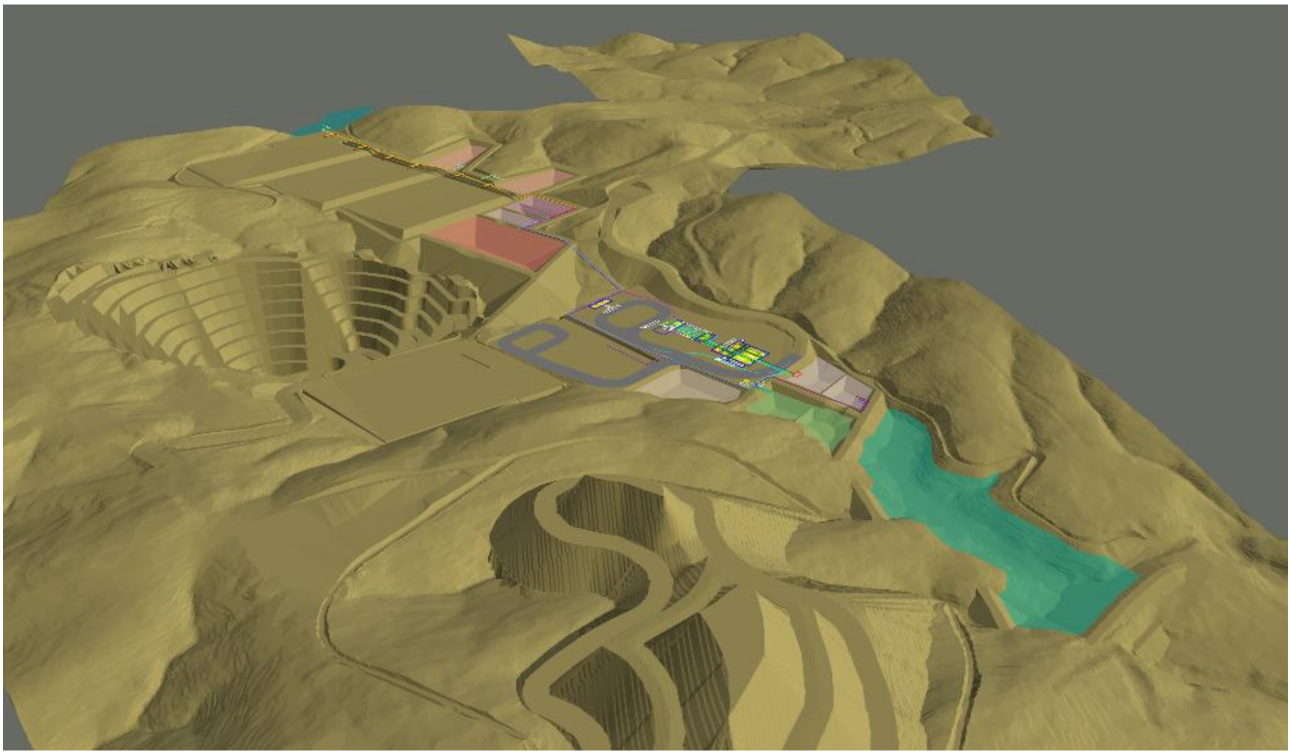

***Figure 7:*** *Location of Dianne SX-EW facility relative to heap leach pads within overall site layout (design images, construction not yet completed)*

### SX-EW facility procurement advancing

Revolver has commenced procurement activities for key elements of the Solvent Extraction and Electrowinning (SX-EW) process facility to be installed at Dianne. This new build plant (refer Figures 6 and 7) will process the pregnant liquor solution (PLS) from the heap leach and is set to have a nameplate production capacity of 5ktpa copper cathode.

Operational scheduling across open pit mining, crushing and processing (leach pad activities through to plated metal production) is also approaching finalisation.

## Osprey Copper Project (100% RRR)

Revolver's Osprey Project covers 765km$^2$ over six adjoining EPMs and is located in northwest Queensland, approximately 220km north of Mount Isa (refer Figure 8). The project lies within the Paleoproterozoic Mount Isa block beneath a shallow cover of sediments of the Carpentaria Basin.

The host geological province is one of the world's richest mineral producing regions, with world-class producing mines (Zn, Pb, Cu and Ag). The geological setting of the Osprey Project tenure is considered by Revolver to be conducive for Tier-1 deposits of Iron Oxide Copper Gold (**IOCG**) and Mt Isa-style base metal deposits.

Revolver's current strategy at Osprey is to rapidly and cost-effectively screen the tenure for new Mt Isa-style (and potential Iron Sulphide Copper Gold systems (**ISCG**)) targets.

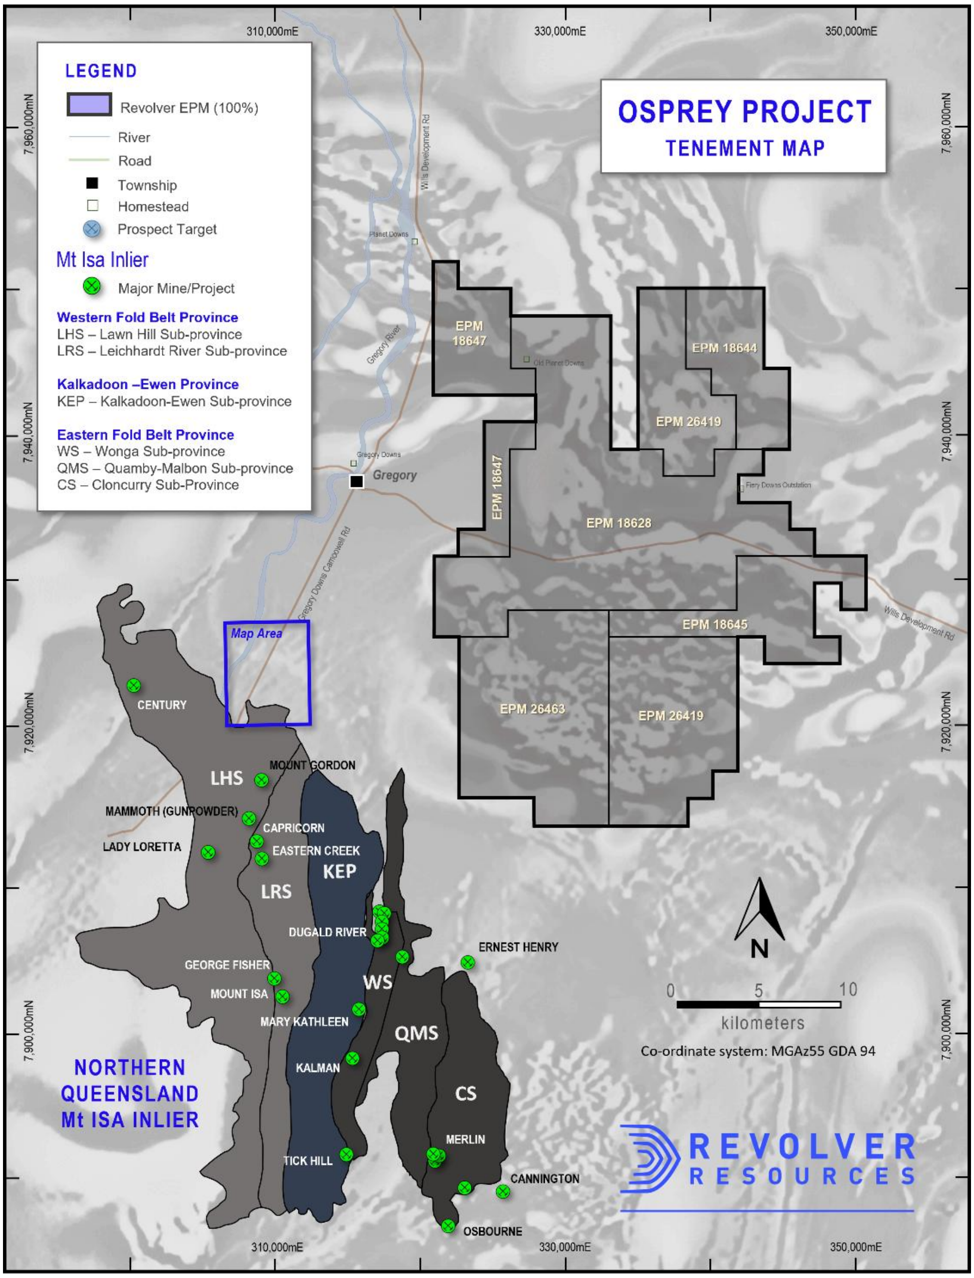

***Figure 8**: Project tenure, main regional belts and priority prospects.*

## Structural-stratigraphic interpretation of geophysical data

Revolver previously completed a detailed structural and stratigraphic interpretation of the Osprey Project area (refer Figure 9) using a combination of gravity, IP and EM data, calibrated by outcropping basement geology to the south and previous diamond drill intersections.

This work has provided the exploration team with additional, high-value, multi-factor criteria, which was then fed into a revised targeting exercise undertaken over the Osprey tenure. Fourteen (14) high priority zones were identified from this exercise as being strong targets for Mt Isa-style epigenetic copper mineralisation.

## Ongoing workstreams

Artificial Intelligence (**AI**) is being utilised by current exploration personnel to assist targeting criteria to generate an updated Mineral Prospectivity Index (**MPI**) for direct targeting.

Planning and design for a ground-based geophysical work program is also in progress to test the various high-priority targets generated by the geological interpretation and planned AI modelling overlay. The purpose of this work program will be to define direct drill targets in the areas of the most prospective geology.

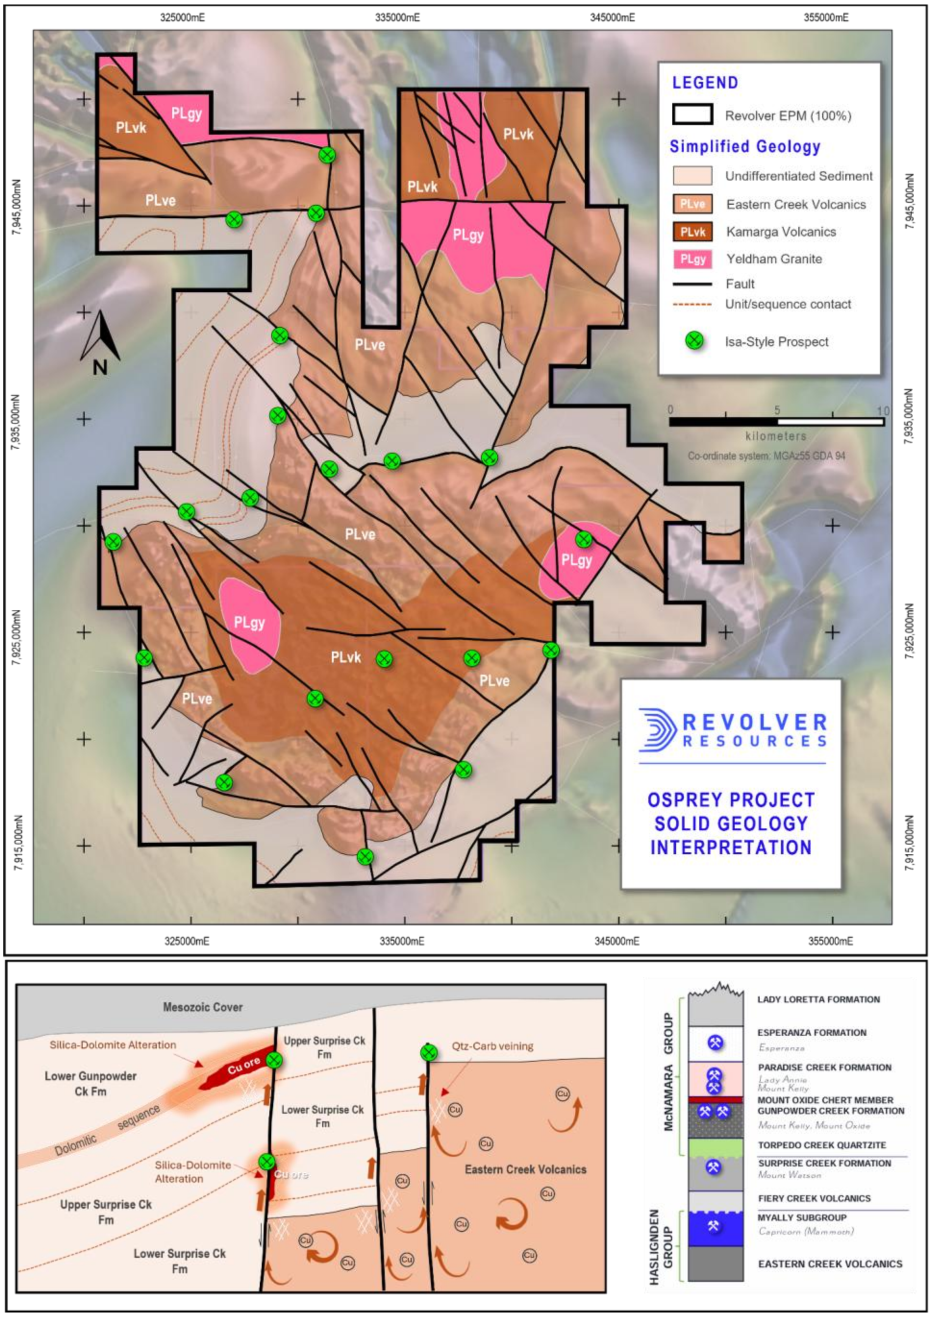

***Figure 9:*** *Osprey Project interpretation and geological conceptual model.*

# Corporate

### Successful completion of A$2.6M capital raising

In February 2026, Revolver conducted a capital raising for approximately A$2.6 million, consisting of a A$0.825 million equity placement and A$1.775 million convertible note issue. Shareholder approval for the issue of the convertible notes (and attaching options) and ratification of the placement was received at the General Meeting held during the quarter on 5 May 2026.

### Cashflows for the quarter

Attached to this report is the Appendix 5B containing the Company's cash flow statement for the quarter.

The significant cashflows relating to the quarter included A$810k spent on exploration and evaluation expenditure. This was primarily associated with the costs relating to the Dianne Copper Mine Project recommencement activities and pre-construction works. A$185k was spent on administrative and corporate costs. There were no payments made to related parties.

As at 30 June 2026, the Company had total cash of approximately A$537k.

### June 2026 quarter – ASX announcements

Further details referred to in this Quarterly Activities Report can be found in the following announcements lodged on the ASX:

| | |
|---|---|
| 1 June 2026 | *Dianne Site Layout Finalised & Procurement Progressing* |
| 25 May 2026 | *Key Contract Awards and Infrastructure Upgrades* |
| 5 May 2026 | *Results of 2026 Extraordinary General Meeting* |

These announcements are available for viewing on the Company's website www.revolverresources.com.au.

Revolver confirms that it is not aware of any new information or data that materially affects the information included in any original ASX announcement.

**This announcement has been authorized by the Board of Revolver Resources Holdings Limited.**

## About Revolver Resources

Revolver Resources Holdings Limited is an Australian public company focused on the development of natural resources for the world’s accelerating electrification. Our near-term focus is copper exploration in proven Australian jurisdictions. The company has 100% of two copper projects:

1) Dianne Project, covering six Mining Leases, three Exploration Permit and a 50:50 JV over a further Exploration Permit in the proven polymetallic Hodkinson Province in north Queensland, and;

2) Project Osprey, covering six exploration permits within the North-West Minerals Province, one of the world’s richest mineral producing regions. The principal targets are Mount Isa style copper and IOCG deposits.

***Competent Persons Statement***

*The information in this report that relates to Drilling Exploration Results is based on, and fairly represents, information compiled by Dr Bryce Healy (PhD Geology), a Competent Person who is a member of the Australasian Institute of Geoscientists (AIG No: 6132). Dr Healy is a Principal Geologist and Chief Operating Officer (COO) for Revolver Resources Ltd (Revolver) has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Dr Healy consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.*

<u>No New Information or Data:</u> *This announcement contains references to exploration results, Mineral Resource estimates, Ore Reserve estimates, production targets and forecast financial information derived from the production targets, all of which have been cross-referenced to previous market announcements by the relevant Companies. Revolver confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements. In the case of Mineral Resource estimates, Ore Reserve estimates, production targets and forecast financial information derived from the production targets, all material assumptions and technical parameters underpinning the estimates, production targets and forecast financial information derived from the production targets contained in the relevant market announcement continue to apply and have not materially changed in the knowledge of Revolver.*

*This document contains exploration results and historic exploration results as originally reported in fuller context in Revolver Resources Limited ASX Announcements–- as published on the Company's website. Revolver confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements. In the case of Mineral Resource estimates, Ore Reserve estimates, production targets and forecast financial information derived from the production targets, all material assumptions and technical parameters underpinning the estimates, production targets and forecast financial information derived from the production targets contained in the relevant market announcement continue to apply and have not materially changed in the knowledge of Revolver.*

<u>Disclaimer regarding forward looking information:</u> *This announcement contains "forward-looking statements". All statements other than those of historical facts included in this announcement are forward looking statements. Where a company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward-looking statements re subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, copper and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, as well as political and operational risks and governmental regulation and judicial outcomes. Neither company undertakes any obligation to release publicly any revisions to any "forward-looking" statement.*

*The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements in relation to the exploration results. The Company confirms that the form and context in which the competent persons findings have not been materially modified from the original announcement.*

***Copper Equivalence Methodology***

*The Copper equivalency calculation based solely on a USD pricing ratio from August 2025 with Cu @ $5.00/lb, Zn @ $1.22/lb, Ag @ 37.85/toz, and Au @ $3350/toz. It does not include any consideration for variable recovery and is subject to review as the project progresses.*

*The final formula is:*
<u>**CuEq%**</u> = (1 x Cu%) + (0.21 x Pb%) + (0.28 x Zn%) + (0.01267 x Ag (ppm)) + (1.121375 x Au (ppm)).

*In terms of materiality, the metal equivalence calculations result in increases to the reported optimized open-pit component of the Resource of only 6.9%. The pit optimizations have been completed on Copper only and have not used the equivalence numbers. The metal equivalence calculations result in increases to the reported underground component of the Resource of 46%, a material change to the Primary (+/- Supergene) reported Resource on a copper equivalent basis. No optimizations have been undertaken on an underground development pathway, however Resource grade cut-offs (1.5% Cu) are not reliant on copper equivalent values due to the already high-grade copper content.*

*In the Company's opinion, all elements included in the metal equivalents calculation have a reasonable potential to be recovered and sold.*

*In relation to the Primary ore type, the final copper equivalent calculations assume equivalent recoveries are achievable for copper, zinc, silver and gold which has been informed by metallurgical bench-scale test work completed by CORE Resources Metallurgical Laboratory (CORE) in 2022[1]. This program for the primary massive sulphide samples demonstrated the feasibility of generating copper (95.9% recovery) and zinc concentrates (97.1% recovery) via floatation with marketable copper and zinc grade characteristics and the potential for credits from silver (84.3%) and gold (71.9%).*

*Further metallurgical testwork is required to further optimise processing workflow and improved recoveries*

[1] Refer to Revolver's ASX announcement dated 5 December 2022, Initial Metallurgical Test Work Completed at Dianne

| 7.5 | **Unused financing facilities available at quarter end** | | 0 |
| 7.6 | Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well. | | |

| 8. | **Estimated cash available for future operating activities** | **$A'000** |
|---|---|---|
| 8.1 | Net cash from / (used in) operating activities (item 1.9) | (175) |
| 8.2 | (Payments for exploration & evaluation classified as investing activities) (item 2.1(d)) | (810) |
| 8.3 | Total relevant outgoings (item 8.1 + item 8.2) | (985) |
| 8.4 | Cash and cash equivalents at quarter end (item 4.6) | 537 |
| 8.5 | Unused finance facilities available at quarter end (item 7.5) | 0 |
| 8.6 | Total available funding (item 8.4 + item 8.5) | 537 |
| 8.7 | **Estimated quarters of funding available (item 8.6 divided by item 8.3)** | 0.5451 |

*Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.*

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: Yes.

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: The Company is undertaking discussions with potential financiers of the Dianne project which will include sufficient funding to advance the project and also fund the Company.

| | |
|---|---|
| 8.8.3 | Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis? |
| Answer: | Yes. The Company has an ability to fund operations, and has a history of successfully raising money. |

*Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.*

## Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: 30 July 2026

Authorised by: The Board of Directors
(Name of body or officer authorising release – see note 4)

**Notes**

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
