ASX ANNOUNCEMENT

Senetas Corporation Limited – Completion of Capital Management Initiative

MELBOURNE, AUSTRALIA – Senetas Corporation Limited (ASX: SEN) (**Senetas/the Company**), a global leader in sovereign-grade, mission-critical network encryption solutions, today announced the completion of the following capital management initiative relating to:

- an equal capital reduction to return approximately \$3.5 million of capital to shareholders by the Company paying to each shareholder as at the record date of 7:00 pm (Melbourne time) on 31 July 2026 the amount of \$0.2111 per ordinary share held at that time (**Capital Return**).

Details of the Capital Return were set out in the explanatory memorandum to the Company's Notice of Extraordinary General Meeting (**EGM**) released to ASX on 22 June 2026.

Shareholder approval for the Capital Return was obtained at the Company's EGM held on 24 July 2026, the results of which were announced to the ASX on the same day.

This announcement has been authorised by Francis Galbally, Executive Chairman.

ABOUT SENETAS CORPORATION LIMITED

Cutting-edge encryption built for a quantum future

Senetas is an Australian cybersecurity pioneer dedicated to safeguarding the world's most vital data streams. For more than 25 years, we have powered defence-grade secure, high-speed network communications for governments, defence agencies and leading enterprises in over 60 countries. Our journey began when we solved a critical encryption challenge for an Australian government law enforcement team, setting us on a path of constant innovation that has now spanned over two and a half decades.

Shortly after Senetas was established, the US Government and defence agencies came to us to solve their own high-speed data network encryption issues. They remain among our most loyal customers alongside national security agencies, critical infrastructure providers and leading enterprises in sectors such as defence, government, finance and cloud services.

Significant industry firsts include the development of the world's first quantum-resistant encryption (QRE) solution to the launch of the ultra-fast CN9000 Series – the first commercially available 100Gbps encryptor supporting fully meshed network topologies.

Today, our portfolio comprises advanced encryption systems – both in robust hardware and versatile virtual formats – and secure file-sharing and collaboration software. Certified by leading authorities such as Common Criteria, FIPS and NATO, our solutions not only protect against today's threats but are also built with end-to-end security and to withstand the future challenges of quantum computing. Designed for crypto-agile performance, without compromising speed or user experience, our solutions can be customised to accommodate sovereign encryption requirements.

Our technology is trusted by customers in some of the world's most demanding environments, ranging from military and government communications to financial institutions and manufacturing that rely on certified encryption to comply with global regulations. Whether it's securing battlefield communications, protecting sensitive intellectual property or ensuring seamless, high-speed file sharing, Senetas delivers uncompromising protection with innovative ease.

Partnered with Thales – a global leader in advanced technologies – we offer global support and distribution, ensuring our clients receive responsive, world-class service wherever they are. From our humble beginnings next to a motor mower shop in suburban Melbourne, Australia, to becoming an internationally recognised name in cybersecurity innovation, Senetas remains committed to making digital communications safer, faster and more resilient in an ever-changing threat landscape.
