ASX RELEASE

29 April 2026

Exclusive Distribution Agreement secured for Saudi Arabia with tender submitted for major King Salman International Airport infrastructure project

Highlights

- **Exclusive distribution agreement signed with Washnah Trading Co. LLC (“Washnah”) for Sprintex’s full range of G-Series, GA and GR high-speed Jet Blowers across the Kingdom of Saudi Arabia**
- **Performance-based exclusivity with minimum secured order commitments of US\$500k (A\$701k) per annum following regulatory approvals**
- **Washnah has also submitted a tender for the prestigious King Salman International Airport Wastewater Treatment Works using exclusively Sprintex high-speed turbo blowers**
- **King Salman International Airport is the planned new airport in Saudi Arabia, expected to open in 2030 covering 57km² and representing a major opportunity for SIX**
- **The tender incorporates approximately 30 Sprintex high-power turbo blowers (ranging from 11 kW to 675 kW) for the full wastewater treatment facility**
- **Tender represents in excess of AU\$5m opportunity, based on supply only of Sprintex blower content**
- **Initial term to 31 March 2029, with option for a further two-year extension subject to milestone achievement**
- **Joint action plan includes National Water Company (“NWC”) vendor registration, product approvals with key Saudi Arabia government departments and technical/sales training programs**

Sprintex Limited (ASX: SIX) (“Sprintex” or “the Company”) is pleased to advise that it has entered into an exclusive distribution agreement with Washnah for the supply of its G-Series, GA and GR high-speed Jet Blowers, which covers the entire Kingdom of Saudi Arabia (“Saudi Arabia”).

The agreement marks the appointment of Washnah as Sprintex’s sole and exclusive distributor in Saudi Arabia and is another major milestone in the Company’s stated strategy of expanding its industrial blower business into high-growth emerging markets with significant infrastructure investment.

King Salman International Airport Tender

As an immediate demonstration of the strength of the new partnership, Washnah has submitted a tender for the wastewater treatment works at the landmark King Salman International Airport project² on 31 March 2026. The project is a flagship, major infrastructure development proposed under Saudi Vision

2030³. As part of the tender, Sprintex's high-speed turbo blower technology has been specified as exclusive, providing a near term deployment opportunity for the Company. Tender award is anticipated during the second half of calendar year 2026.

The tender covers the full range of process stages including grease/grit removal tanks, aeration tanks, membrane bioreactor tanks, sludge holding tanks and equalisation tanks. It incorporates approximately 30 Sprintex units ranging from 11 kW to 675 kW, together with comprehensive packages including acoustic enclosures, control panels with variable frequency drives and program logic controllers, IoT monitoring, and commissioning support by Sprintex engineers.

Agreement Details and Market Opportunity

The agreement includes clear performance milestones, notably completion of vendor registration with the NWC and product approvals (G15 and GA/GR series) via the SABER platform, part of the Saudi Standards, Metrology and Quality Organisation system. Following approvals, Washnah is required to achieve minimum secured orders of US\$500k (A\$701k) per 12-month period (with excess orders carried forward).

The agreement comes at a pivotal period, while Saudi Arabia is executing one of the most ambitious water and infrastructure programs globally under Saudi Vision 2030³, alongside the National Water Strategy.

Saudi Arabia is targeting multiple hundred-billion-dollar-plus investments in water, wastewater treatment, desalination and related infrastructure to support sustainable economic diversification and urban development.

Key priorities from the government include significantly expanding wastewater treatment capacity and increasing treated water reuse rates, with energy efficiency a critical driver in continuous-duty municipal applications. This positions Sprintex's high-efficiency, oil-free Jet Blower technology as a compelling solution for these large-scale projects.

Management Commentary

Sprintex Managing Director & CEO Jay Upton said: *"This exclusive distribution agreement with Washnah, combined with the submission of a major tender for the iconic King Salman International Airport wastewater treatment facility, represents a significant milestone in our international expansion."*

The scale of the tender — approximately 30 high-power turbo blowers up to 675 kW across the full wastewater treatment works — provides powerful early validation of both our technology platform and the strength of the partnership. Saudi Vision 2030's ambitious infrastructure program creates a compelling long-term opportunity for Sprintex's energy-efficient blower solutions."

This ASX announcement has been authorised for release by the Board of Sprintex Limited.

About Sprintex:

Sprintex is a prominent company specialising in the engineering, research, product development, and manufacturing of ultra high-speed electric motors and clean air compressors. The Company is dedicated to creating energy-efficient solutions for various applications, significantly impacting both industrial and automotive sectors. Sprintex's innovation-driven approach has positioned it as a leader in the development of clean air technologies, continually advancing the standards in these industries.

In the industrial sector, Sprintex's G Series blowers are designed for high-speed air movement in wastewater treatment, aquaculture, paper milling, and pharmaceuticals, ensuring efficient and reliable performance. Additionally, Sprintex develops fuel cell compressors for clean energy applications, particularly in hydrogen and natural gas fuel cells, promoting sustainable energy solutions. In the automotive realm, the Company focuses on enhancing hybrid and petrol vehicles with high-speed electric motor-driven compressors, while its legacy in twin screw superchargers continues to influence modern advancements.

About Washnah Trading Co. LLC

Washnah Trading Co. LLC, established in 1992, is a Jeddah-based specialist in water and wastewater treatment solutions with established technical capability and strong relationships with key government authorities including the NWC and Saudi Water Authority.

Forward Looking Statements

This announcement contains 'forward-looking information' that is based on the Company's expectations, estimates and projections as of the date on which the statements were made. This forward-looking information includes, among other things, statements with respect to the Company's business strategy, plans, development, objectives, performance, outlook, growth, cash flow, projections, targets and expectations and related expenses. Generally, this forward-looking information can be identified by the use of forward-looking terminology such as 'outlook', 'anticipate', 'project', 'target', 'potential', 'likely', 'believe', 'estimate', 'expect', 'intend', 'may', 'would', 'could', 'should', 'scheduled', 'will', 'plan', 'forecast', 'evolve' and similar expressions. Persons reading this announcement are cautioned that such statements are only predictions, and that the Company's actual future results or performance may be materially different. Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance, or achievements to be materially different from those expressed or implied by such forward looking information.
