

Quarterly Activities Report to 30 June 2026

Highlights

- Wilgeena remains a high priority target with strong and coherent gold anomalism exceeding 30ppb within the Peak Hill Schist, a stratigraphic sequence which hosts the nearby Hermes South (114koz @ 1.6g/t)¹ and Peak Hill gold deposits (481koz @ 1.6g/t)².
- Gold anomalism >39.3ppb in conjunction with strong alteration in surface outcrop present key targets at Wilgeena, and follow-up drilling is being planned with heritage and permitting underway.
- Planning is in progress for the next phase of exploration activities across the project portfolio with a soil sampling program planned for Wagtail in September, and reconnaissance trips taking place at Myrnas Hill, Bow River and Mikhaburra.
- Additional tenements in application E52/4617 (Kelly West) and E52/4580 (Wandery) were successful in a ballot, currently pending. Both tenements are positioned along east-west trending regional faults and straddle the western extents of the Padbury and Bryah basins.
- Solara continues to evaluate acquisition opportunities that align with its strategic objectives, with a focus on identifying value through the current commodities cycle.

Solara Minerals Limited (ASX: SLA) (the **Company** or **Solara**) is pleased to report on its activities for the quarter ended 30 June 2026.

¹ Refer to Alchemy Resources Limited's ASX announcement dated 8 May 2019

² Refer to Westgold Resources Limited's ASX announcement dated 16 September 2024

Projects

Bryah Basin Project Portfolio (Gold-Copper in the Bryah Basin)

During the quarter Solara focussed on exploration at the Bryah Basin Project Portfolio, which comprises gold and copper projects in the Bryah Basin (Figure 1). The Bryah Basin district is highly prospective for gold and copper-gold mineralisation and has recently been the focus of several substantial mining operations, including Westgold Resources Ltd's multi-million ounce Fortnum and Peak Hill gold mining projects and Sandfire Resources Ltd's high-grade Degruessa and Monty copper-gold mines.

Figure 1. Solara's project locations with regional geology, with significant gold and copper mines and gold occurrences.

The Company's portfolio of Bryah Basin projects include:

Degrussa West Project (E52/4313 & E52/4438)

Located 17km to the west along strike from Sandfire Resources Limited's (**Sandfire**) Degrussa Copper Gold Mine (**13.8Mt @ 4.8% Cu & 1.8g/t Au**)³ and 10km north of the Old Highway Gold Deposit (**206Koz Au**)⁴ recently purchased by Catalyst Metals Ltd. The property is characterised by strong magnetic features and untested conductors along prospective stratigraphy with anomalous indicator elements in historic soil sampling.

In 2025, RC drilling at Degrussa West tested gold-copper targets identified during the project acquisition process and subsequent exploration activities. Target selection was based on anomalous geochemical signatures, the intersection of interpreted faults, a magnetic anomaly and an associated EM conductive feature.

Of the eleven planned holes (see Figure 2), five were completed during this program for a total of **1,032m**. The Company plans to recommence the drill program once high priority targets at Wilgeena have been tested.

SDWRC004 was drilled to 381m as an RC hole and a diamond drill is planned to deepen the hole to test the deep geophysical anomaly (see Figure 3). A strongly carbonate-altered mafic intrusive unit was intersected lower in the hole as it approached the geophysical anomaly, which is considered a prospective target. Anomalous copper (**>150ppm**) and nickel (**>500ppm**) values were returned from this hole⁵.

In the three holes drilled to the west, anomalous gold and copper within the Naracoota volcanics was distinguished, though no values require follow up drilling.

³ Refer to Sandfire Resources Limited's ASX announcement dated 16 May 2013

⁴ Refer to Catalyst Metals Limited's ASX announcement dated 8 May 2025

⁵ Refer to Solara's ASX announcement dated 27 April 2026

Figure 2: Degruessa West - 2025 Magnetics (RTP1VD) map showing MLEM lines from recent survey covering the contact between the Karalundi and the Naracoota Volcanics with hole locations. N-S red line represents cross section location in Figure 3.

Figure 3: Section of SDWRC004 with Cu (ppm) and logged lithology, showing planned target of intersecting EM plate and magnetic target.

Wilgeena Project (E52/4369 & E52/4370)

Located 1.5km south of Hermes South gold deposit (**JORC resources of 114koz Au**)⁶ and 15km south of the Hermes gold deposit (historical production in 2016-2019 of 65koz and **current NI43-101 resources of 243koz**)⁷. The property is also proximal to Westgold Resources Ltd's Peak Hill Gold Mine (JORC resources of 481koz), 15km to the northwest⁸.

Historical anomalous gold up to **5m at 1.03 g/t Au** from 25m and **2m at 1.9 g/t Au** from 51m⁹ in air core drilling with essentially no follow up work completed.

UFF soil sampling was completed at Wilgeena in late 2025, targeting historically under-explored areas of **E52/4369**. Results defined coherent gold anomalism primarily in the eastern portion of the tenement, spatially coincident with increasing hydrothermal alteration intensity. The Company considers this area a high priority for drill targeting.

The sampling program focused on two sampling regions, representing contrasting geology and differences in exploration maturity.

⁶ Refer to Alchemy Resources Limited's ASX announcement dated 8 May 2019

⁷ Refer to Catalyst Metals Limited's ASX announcement dated 12 December 2024

⁸ Refer to Westgold Resources Limited's ASX announcement dated 16 September 2024

⁹ Refer to Solara's ASX announcement dated 27 August 2025

Figure 4. Wilgeena West - Soil sampling locations coloured according to the scale shown in the legend, drainage channels (blue) were avoided.

The eastern zone was sampled on a 50m x 100m grid and returned anomalous gold results up to **39.3ppb** Au over several discrete areas, with the largest measuring 70m x 100m. These results corroborate observations on the ground of increasing sericitic alteration toward the eastern portion of the tenement, defining an alteration corridor prospective for hydrothermal gold mineralisation. This alteration corridor is near shallow aircore holes drilled by Sandfire, two of which returned **5m at 399ppb** Au in PHAC1320 and **5m at 250ppb** Au in PHAC1318¹⁰. These anomalous drill intersections were not followed up.

¹⁰ Refer to Solara's ASX announcement dated 27 August 2025

The eastern anomaly is well-defined and spatially coherent, characterised by a consistent hydrothermal alteration signature across multiple pathfinder elements and presents obvious targets for follow-up drilling.

Follow up air core drilling is planned to test the anomalous regions, particularly those that fall near the Peak Hill Schist/Karalundi contact where the broadly spaced historic drilling did not test. A heritage survey is planned to cover the small area not covered.

Additional Tenements

Mikhaburra and Karalundi (E52/4265 & E51/2164)

The two adjoining EL's covering 148.8sqkm are located on the southern side of the Bryah Basin along the Murchison structural corridor. The project sits 15km along geological strike from the Beatty Park Project currently being explored by Tambourah Metals Ltd (ASX: TMB) where the company recently drilled **6m at 25.8g/t Au from 30m¹¹** and **10m at 38.9g/t Au from 22m¹²**.

In addition, the property sits proximal to the historic Mikhaburra mining area, where a number of shafts and workings exist. Solara has completed a targeting study and will follow up with a site visit in the coming weeks, ahead of drill planning.

Karalundi is a single EL covering 43.4sqkm and transected by the Great Northern Highway, with prospective geology and geochemical indicators. Much of the area southeast of the highway remains undercover and untested.

Wagtail (E52/4511)

A single 2 BL tenement located 25km south of Fortnum Gold Mine operated by Westgold Resources Limited (ASX: WGX) and proximal to significant gold prospects such as Harrods and Wilthorpe prospects. No drilling and almost no geochemical sampling has taken place on the tenement. The tenement geology consists of intersecting regional faults within the Labouchere Formation.

Wandery and Kelly West (E52/4581 & E52/4617)

As part of an ongoing program of tenement monitoring in the Bryah Basin, additional tenements E52/4617 (Kelly West) and E52/4581 (Wandery) were applied for and subsequently successful in a ballot. The tenements remain pending. Both tenements sit along east-west trending regional faults and straddle the western extents of the Padbury and Bryah basins which overlie Archean granites.

¹¹ Refer to Tambourah Metals Ltd's ASX announcement dated 4 August 2025

¹² Refer to Tambourah Metals Ltd's ASX announcement dated 13 October 2025

Stansmore – West Arunta Project (NB-REE ± Intrusion Related Gold-Copper)

The 100% owned West Arunta Stansmore Nb-REE Project granted tenure extends over 173km² and is approximately 90km north of WA1 Resources Limited's Luni and P2 discoveries (see Figure 5).

The project hosts three potentially significant magnetic anomalies (Stansmore, Volt and Ions) and three secondary targets (Edi, Earl and Menlo) interpreted to be prospective for carbonatite-hosted Nb-REE and intrusion-related gold copper mineralisation.

Figure 5. Location of the West Arunta Project, results from the drilling shown on the inset image.

Myrnas Hill (Cu/Au/Li)

The exploration licence E45/6809 (Myrnas Hill) is located in the Pilbara region of Western Australia and was granted on 2 July 2025 (Figure 6).

The tenement is located adjacent to the Pear Creek and DOM's Hill projects held by Kali Metals Limited (ASX: KM1) approximately 40km northeast of Marble Bar. KM1 opted to acquire the remaining 30% interest of the Dom's Hill tenure held by Sociedad Química y Minera de Chile (SQM) earlier this year as part of the SQM Option and Earn-in Agreement¹³.

The tenement covers the historic copper-gold prospect, Myrnas Hill, which has returned up to **42.8% Cu, 7.05% Cu and 6.49g/t Au** in rock chip samples¹⁴.

The Company has made a reconnaissance visit, taken rock chip samples and followed up on geophysical and geochemical anomalies identified during desktop studies. An announcement will be made once results have been interpreted and more definitive next steps are in place.

¹³ Refer to Kali Metal Limited's ASX announcement dated 25 February 2026

¹⁴ Myrnas Hill, Minedex Site Code S0023297, Geoview, Department of Energy, Mines, Industry Regulation and Safety

Figure 6. Myrnas Hill prospect on tenement E45/6809.

Bow River Prospect (Ni/Cu/Co±PGE)

The Bow River Project in the East Kimberley region of Western Australia is prospective for Ni-Cu-Co (±PGE) sulphide. The granted tenement E80/4955 covers the Bow River mafic intrusion. Historic drilling identified Ni-Cu-Co mineralisation on the tenement with analogues to the Savannah Ni-Cu-Co deposit located approximately 65km to the southwest.

Additional Project Opportunities

As part of its ongoing business development model, Solara continues to actively evaluate new project opportunities that align with the Company's strategic objectives and offer the potential to drive value for shareholders.

ASX Additional Information

As per ASX Listing Rule 5.3.1: Exploration and Evaluation Expenditure during the Quarter was \$116,000. Full details of exploration activities during the Quarter are set out in this report.

As per ASX Listing Rule 5.3.2: There were no substantive mining production and development activities during the Quarter.

As per ASX Listing Rule 5.3.5: Payments to related parties of the Company and their associates during the Quarter was \$70,000. The Company advises that this relates to directors' fees.

1. East Kimberley Resources Pty Ltd, West Arunta Resources Pty Ltd and OD4 Tom Price Pty Ltd are 100% owned subsidiaries of Solara Minerals Limited. There are no Farm-in or Farm-out Arrangements held by Solara Minerals Limited.

Cautionary Statement

This announcement and information, opinions or conclusions expressed in the course of this announcement contains forecasts and forward-looking information. Such forecasts, projections and information are not a guarantee of future performance and involve unknown risks and uncertainties. Actual results and developments will almost certainly differ materially from those expressed or implied. There are a number of risks, both specific to Solara, and of a general nature, which may affect the future operating and financial performance of Solara, and the value of an investment in Solara including and not limited to title risk, renewal risk, economic conditions, stock market fluctuations, commodity demand and price movements, timing of access to infrastructure, timing of environmental approvals, regulatory risks, operational risks, reliance on key personnel, reserve estimations, native title risks, cultural heritage risks, foreign currency fluctuations, and mining development, construction and commissioning risk.

Competent Person's Statement

The information in this document that relates to Exploration Results, Mineral Resources or Ore Reserves is based on, and fairly represents, information and supporting documentation compiled by Ms Jennifer Neild who is a member of the Australian Institute of Geoscientists (MAIG). Ms. Jennifer Neild is an employee of Solara Minerals Ltd and holds options in the Company and accordingly has a vested interest in the Company's performance. Ms Neild has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which she is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Ms Neild consents to the inclusion in this document of the matters based on her information in the form and context in which it appears.

Information in this report that relates to previously reported Exploration Results has been cross-referenced in this report to the date that it was reported to ASX.

The Company confirms that it is not aware of any new information or data that materially affects the information in the original reports, and that the form and context in which the Competent Person's findings are presented have not been materially modified from the original reports.

Proximate Statement

This release contains references to mineral exploration results derived by other parties either nearby or proximate to the Company's projects and includes references to topographical or geological similarities to that of the Company's projects. It is important to note that such discoveries or geological similarities do not in any way guarantee that the Company will have similar exploration successes on the Company's projects, if at all.

4.3	Net cash from / (used in) investing activities (item 2.6 above)	(108)	(975)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	-	-

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (12 months) \$A'000
4.5	Effect of movement in exchange rates on cash held	-	-
4.6	Cash and cash equivalents at end of period	2,034	2,034

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	284	549
5.2	Call deposits	1,750	1,750
5.3	Bank overdrafts	-	-
5.4	Other (provide details)	-	-
5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)	2,034	2,299

6.	Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	70
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-
<i>Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.</i>		

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	-	-
7.5 Unused financing facilities available at quarter end		-
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
N/A		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(157)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(108)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(265)
8.4 Cash and cash equivalents at quarter end (item 4.6)	2,034
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	2,034
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	7.67
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A	

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 31 July 2026

Authorised by: By the Board of Directors of Solara Minerals Limited
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
