

ASX ANNOUNCEMENT

3 August 2026

Stavely Copper-Gold Project, Western Victoria
Thursday's Gossan Scoping Study Update

Stavely Minerals Limited ("Stavely Minerals", ASX: SVY) advises that the Scoping Study on potential production from the Thursday's Gossan and Cayley Lode copper-gold-silver deposit, part of the Company's 100%-owned Stavely Project in western Victoria, is being finalised pending receipt of final engineering study documents.

The Company's lead engineering consultant, Melbourne-based Mincore Engineering, has advised that completion of the Scoping Study report documentation is in its final stages while final supporting engineering reports are awaited. The delay in receipt of final engineering study documents is likely being exacerbated by attendance at the current Diggers and Dealers mining conference in Kalgoorlie.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Chris Cairns".
