# Titomic Receives a Contract from Deutsche Bahn Fahrzeuginstandhaltung GmbH

## Purchase Order received to support Maintenance or Rolling Stock Components on German Railways

**HUNTSVILLE, AL – *Titomic Limited (ASX: TTT)*** is an advanced manufacturing company delivering high-performance products and sustainment services for aerospace, defense, energy, and industrial markets. Titomic manufactures and repairs mission-critical components at speed and with material performance beyond traditional manufacturing and repair methods, supporting both production and in-service sustainment. These capabilities are enabled by Titomic's proprietary Cold Spray Additive Manufacturing platform, which allows the Company to rapidly produce, repair, and protect complex metallic structures without thermal distortion or degradation. Titomic announces that it has received a purchase order valued for the sale of a low pressure Titomic TKF™ 523 system to support Deutsche Bahn's maintenance efforts for the German railways infrastructure and trains.

Deutsche Bahn is Germany's state-owned railway system operating Europe's largest railway network for passengers and freight, managing extensive infrastructure, and offering logistics services globally, known for its long-distance (ICE, IC) and regional trains.

Mr Thorsten Hein, CTO of Deutsche Bahn stated, "we have tested and studied Titomic Kinetic Fusion™ over that past several months and have been very impressed with the technology's ability to allow us to rapidly repair and perform maintenance on key aspects of our rolling stock saving both time and money minimizing down time of our railway network".

"This order is the first for Titomic in German railways, and we are very excited about working with such a key railway network in Europe. Our TKF™ systems are excellent for repair of railway parts and structures as well as anti-corrosion efforts and additively manufacturing parts. We have been working with railways in Australia for the past several years and are now very honored to be working with the largest railway network in Europe", said Jim Simpson, CEO and Managing Director of Titomic.

This achievement underscores Titomic's ongoing commitment to commercializing its technology across industries where advanced performance, speed, and precision are paramount. The railway sector supporting a wide variety of parts and systems represents a significant strategic growth area for the Company, and we look forward to working with Deutsche Bahn.

This announcement has been authorized for release by Titomic's Board of Directors.

**ABOUT TITOMIC LIMITED**

Titomic Limited (ASX: TTT) is a leading American manufacturing company specializing in large integrated solutions for industrial- scale metal additive manufacturing, coating, and repairs using its patented kinetic fusion cold spray (Titomic Kinetic Fusion™) technology. Titomic Kinetic Fusion™ cold spray solutions provide OEM production and R&D services to the global Aerospace, Defense, Shipbuilding, Oil & Gas, Mining and Automotive industries. Titomic also offers global sales and support for all its Titomic Kinetic Fusion™ cold spray AM activities from its Huntsville, Alabama Head Office, as well as through local presence in the Australia and Europe. Titomic delivers competitive advantages in metal additive manufacturing at every stage in the product value chain. For more information, please visit www.titomic.com.

**FORWARD LOOKING STATEMENTS**

Certain statements made in this release are forward-looking statements and are based on Titomic's current expectations, estimates and projections. Words such as "anticipates", "expects," "intends," "plans," "believes," "seeks," "estimates," "guidance" and similar expressions are intended to identify forward-looking statements. Although Titomic believes the forward-looking statements are based on reasonable assumptions, they are subject to certain risks and uncertainties, some of which are beyond Titomic's control, including those risks or uncertainties inherent in the process of both developing and commercializing technology. As a result, actual results could materially differ from those expressed or forecasted in the forward-looking statements. The forward-looking statements made in this release relate only to events as of the date on which the statements are made. Titomic will not undertake any obligation to release publicly any revisions or updates to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date of this release except as required by law or by any appropriate regulatory authority.
