ASX ANNOUNCEMENT

30 January 2026

ASX CODE: VMC

Bridgetown Greenbushes Venus-IGO JV Project Exploration Update

Venus Metals Corporation (VMC or Company) is pleased to announce that IGO received Ministerial approval for low impact field work within areas of the Bridgetown-Greenbushes JV tenements (Figure 1) covered by State Forest in late 2025. These activities include soil sampling and geological mapping. All activities within the State Forests are regulated by a comprehensive Conservation Management Plan.

IGO commenced soil and lag sampling within the State Forests in mid-January. This program comprises approximately 3500 samples to be collected from areas where residual laterite is best preserved and the signal strength for any lithium pathfinder elements should be strongest (Figure 2).

The soil and lag program will test the strike extension of the coherent 2.8 km long by 1.2 km wide Li-Ta-Nb-Cs anomaly at Ti Tree (Figure 3) as well as areas adjacent to other soil anomalies at Cowslip, Greenbushes East, and Flying Duck (refer ASX announcement 27 October 2025).

IGO has also commenced a geological mapping program in late January to outline and sample areas of outcropping bedrock and lateritic regolith within the State Forests. Both the soil and mapping programs are scheduled for completion during FY26_Q3 with full results expected during FY26_Q4. IGO is also evaluating the use of low impact auger or vacuum drilling rigs to obtain bedrock samples from the defined Ti Tree target (outside of the State Forest) during FY26_Q4.

Figure 1. Location of Bridgetown-Greenbushes Project JV tenements.

Figure 2. Location of planned soil samples over regional RTP 1VD aeromagnetic data.

Figure 3. A coherent Ta/Nb anomaly at Ti Tree (for details refer ASX release 27 October 2025 and JORC Table) and planned soil sampling points.

This announcement is authorised by the Board of Venus Metals Corporation Limited.

Competent Person's Statement

The information in this report that relates to Exploration Results of Bridgetown-Greenbushes Project is based on and fairly represents, information and supporting documentation provided by IGO to and/or compiled by Mr Kumar Arunachalam, who is a Member of The Australasian Institute of Mining and Metallurgy and Director of the Company. Mr Arunachalam has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Arunachalam consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Forward-Looking Statements

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Venus Metals Corporation Limited planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may", "potential," "should," and similar expressions are forward-looking statements. Although Venus Metals Corporation Ltd believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.
