Gold Duke Project

Western Gold Resources Secures Extension of Toll Milling Agreement with Wiluna Mining Corporation

Western Gold Resources Limited (ASX: Western Gold Resources) (“WGR” or “Company”), is pleased to advise that it has executed a six-month extension to its binding Toll Milling Agreement¹ with Wiluna Mining Corporation Limited in support of the development of WGR’s Gold Duke Project.

The extension provides increased certainty for processing arrangements and delivers several important benefits for the Gold Duke Project, including:

- **Ensuring all currently defined Stage 1 ore can be processed, enabling the Company to realise full value from the Stage 1 mine plan; and**
- **Providing increased surety for the planned Life-of-Mine (LOM) Extensional Drilling Campaign², supporting potential growth in tonnes and ounces beyond Stage 1.**

The extended milling agreement aligns with WGR’s strategy to progress Stage 1 development while advancing opportunities to expand the production profile at Gold Duke through Life-of-Mine (LOM) extensional drilling.

Managing Director Cullum Winn commented:

“The execution of this extension is an important de-risking milestone for the Gold Duke Project. It ensures all currently planned Stage 1 ore has a clear processing pathway while also providing greater confidence to advance the LOM Extensional Drilling Campaign, which has the potential to increase the scale and value of the project.”

The six-month extension enhances operational flexibility and strengthens the Company’s ability to optimise mine planning and project development as it moves toward production.

WGR looks forward to updating shareholders on further progress at Gold Duke in due course.
