2025 U.S. Critical Infrastructure (CI) Threat Landscape

Cyber Threats to Critical Infrastructure

FBI IC3 Report on 2025 – Reported U.S. Losses, to include:

- Business Email Compromise – \$3.05 B
- Phishing/Spoofing Victims – 191,561
- Personal Data Breach – 67,456
- 3,611 reported ransomware, losses \$32M
- The 2025 IC3 report does not provide a single aggregate loss or complaint total for critical infrastructure, but highlights ransomware as a primary threat, with over 3,600 complaints and more than \$32M in reported losses.

Based on the answers provided, your focus should be on providing basic cybersecurity without spending too much of the budget and money. Small businesses are popular cybercrime targets because many have not implemented basic protections. While your business explicitly, they will launch relatively simple attacks against everyone they can find. Typically, cyber criminals use the data they steal to commit financial fraud. By making your security posture significantly better than that of the average, you can avoid being targeted by cyber criminals. They will instead move on to softer targets. In addition, attackers may see attacking your business partners.

Your company has well-developed plans and instructions for what to do in a wide variety of situations. Because of this, your tools are up-to-date and providing the detail necessary to identify and address gaps that can be exploited. It is vital to your maturing your cybersecurity posture with the use of automation. Keep your analysts focused on high level alerts.

Our evaluation of your responses indicates that your current overall cyber threat posture is good. Your company should continue to monitor and update its security posture. This will also ensure your stakeholders that you are taking

0-60

The Cyber Risk Rating measures a company's relative security effectiveness.

This company falls into the 81-100 range, or A / B grade, meaning its relative security effectiveness is high, having a strong security performance and low risk.

Quixxi Potential Acquisition

- ❖ Quixxi brings a proven cybersecurity technology heritage, in API security, mobile and application protection, threat detection, digital asset resilience, and cyber breach monitoring - directly aligned to the layer of the digital stack where most modern attacks occur.
- ❖ Built upon this foundation, Clarity AI SaaS Solution extends Quixxi's cybersecurity lineage into a new strategic domain: AI systems operational risk management. The solution assesses AI model governance, data protection, model safety, ethical safeguards, and compliance requirements across an organization's rapidly deploying AI capabilities.
- ❖ 30 April 2026 APRA Letter to 320 APRA-regulated entities (banks, insurers, super funds) - buying capacity concentrated in the top 50 by AUM <https://www.apra.gov.au/apra-letter-to-industry-on-artificial-intelligence-ai>
- ❖ ClarityAI is the only Australian-built platform delivering the full APRA-aligned governance stack, with Atturra as the contracted channel.
- ❖ IER currently being finalized, in preparation for an EGM for WHK Shareholders to vote on the Resolution.

Cybersecurity Maturity Model Certification 2.0

The Cybersecurity Maturity Model Certification (CMMC) is a standard for implementing cybersecurity in the Defense Industrial Base (DIB) aimed at measuring the maturity of an organization's processes toward enhancing the protection of Federal Contract Information (FCI) and Controlled Unclassified Information (CUI). The CMMC framework was developed in cooperation between the United States Department of Defense (DOD), DOD stakeholders, University Affiliated Research Centers (UARC)s Federally Funded Research and Development Centers (FFRDCs), and the Defense Industrial Base (DIB) sector.

AC.L1-b.1.i: Authorized Access Control

Control Who Can Access Your Systems

Make sure only the right people can access your computers and data.

Just like you lock your office door, you need to control who can access your digital information to protect government data.

Examples:

- Each employee has their own username and password
- Contractors get temporary accounts that expire when their work is done
- Old employee accounts are disabled when they leave the company

Common Mistakes:

- Sharing passwords between employees
- Not removing access when employees leave
- Using generic accounts like "admin" or "user"

Technical Description

Limit information system access to authorized users, processes acting on behalf of authorized users, or devices (including other information systems).

Assessment Objectives

OBJECTIVE A

Are authorized users identified?

OBJECTIVE B

Are processes acting on behalf of authorized users identified?

OBJECTIVE C

Are devices (and other systems) authorized to connect to the system identified?

OBJECTIVE D

Is system access limited to authorized users?

OBJECTIVE E

Is system access limited to processes acting on behalf of authorized users?

OBJECTIVE F

Cyber Security Maturity Model Certification (CMMC)

CMMC Compliance Solution (M365)

- ❖ Automating end-to-end CMMC Level 1 and Level 2 compliance for Microsoft 365 environments.
- ❖ Traditional path is months of consulting with persistent gaps.
- ❖ A four-stage model: Assess, Deploy, Handover, and Assure - culminating in quarterly reports and risk monitoring.
- ❖ Configures M365-native controls and delivers the System Security Plan, POA&M, and evidence package

CMMC Compliance, Accelerated

WhiteHawk delivers end-to-end CMMC Level 1 and Level 2 compliance for Microsoft 365 environments, covering scoping, control deployment, and assessor-ready documentation.

THE CHALLENGE

For most defense contractors, CMMC compliance is a long, resource-intensive effort. Reaching and sustaining certification (whether Level 1 for FCI or Level 2 for CUI) means configuring, documenting, and continuously validating up to 110 NIST SP 800-171 controls across Entra, Intune, Exchange, and SharePoint. The cost, complexity, and timeline leave gaps while compliance teams are stretched thin, and for organizations handling FCI or CUI the stakes are too high for slow, ad-hoc approaches.

THE ENGAGEMENT

01 Assess

Baseline your Microsoft 365 posture against NIST SP 800-171 and identify gaps at your target CMMC level.

02 Deploy

Automated configuration of CA policies, MFA, FIPS encryption, DLP, and audit logging, in hours rather than months.

03 Handover

Client-ready procedures, policy templates, and governance artifacts so your team owns the baseline from day one.

04 Assure

Quarterly compliance reports and control health monitoring to sustain your CMMC posture.

FULL COVERAGE OF CMMC

Conditional Access

MFA Enforcement

Endpoint Hardening

FIPS Crypto

Audit Logging

DLP

SSP and POAM

Continuous Monitoring

WHY WHITEHAWK

CMMC-RP expertise

Deep knowledge of NIST SP 800-171 and DFARS 7012 requirements, not generic Microsoft consulting

Purpose-built methodology

CMMC365 automation tooling engineered specifically for CMMC, across Commercial, GCC, and GCC High environments

Your team enabled

We hand over sustainable controls, documentation, and governance, ending the cycle of consultant dependency

Speed

Deploy CMMC-aligned baselines in hours, not months, so projects finish in weeks rather than quarters

Accuracy

Every control mapped directly to NIST SP 800-171 requirements, with no interpretation gaps

Repeatability

The same validated, version-controlled control set, consistently applied across every customer enclave we deliver

Global Critical Infrastructure Entity Illumination

WhiteHawk's Approach for Adversary & Critical Infrastructure Mapping of the Digital Terrain.

Starting at \$10 per Global Legal Entity by Region, Sector

Our approach, utilizes data markers and relevant characteristics of known entities such as regional commercial codes, business relationships, social media, marketing, and legal documents, enables Artificial Intelligence (AI) / Large Language Module (LLM) agents to comprehensively discover and illuminate unknown but knowable entities mapped to the eleven AU CI Sectors.

Cyber Risk to Resilience Service of Common Concern

The Leadership Team

CHIEF EXECUTIVE OFFICER, PRESIDENT & FOUNDER

Terry Roberts

A global risk analytics, cyber intelligence and national security professional with over 20 years of Executive level experience across government, industry, and academia. Previously the Deputy Director of US Naval Intelligence, TASC VP for Intelligence and Cyber Engineering, and an Executive Director of Carnegie Mellon Software Engineering Institute (established the Emerging Tech Center now the AI Division) with an MSSI w/ AI concentration.

CHIEF OPERATING OFFICER & CHIEF PRODUCT OFFICER

Soo Kim

Previously the cybersecurity, technology strategy expert at Accenture Federal Services, Hewlett Packard Federal and VP at TASC. Experience in technical and business leadership, tactical execution, business operation, and solutions delivery. Bachelor's degree in mathematics from Virginia Tech, a Certified Enterprise Architect and Scrum Master and AI/ML Solution Architect.

CHIEF INFORMATION OFFICER

Mike Ferris

Technology executive with nearly 20 years of experience in IT and cybersecurity. Previous roles include Director of IT Operations & Security, Director of Advisory Services, and Senior Cyber Analyst & Program Manager. Led cybersecurity initiatives for both government and commercial entities, managing multi-year contracts focused on cyber and business intelligence, and regulatory compliance. Began his career as a Technical Controller in the US Marine Corps before transitioning to the commercial sector in 2010.

CHIEF TECHNOLOGY OFFICER

Michael Good

A Technical Program Manager with over 30 years of experience in cyber operations and technology development for military, government, and commercial cybersecurity solutions. Previous assignments include Raytheon, Vencore, L3 Communications and the US Census Bureau. Before entering private industry, Michael was a US Army Ops Research and Cyber Warfare officer at US Cyber Command, leading cyber operations planning for NSA's IA Directorate, with an MS in Computer Network Operations.

The Board

Melissa King, Non-Executive Director

Melissa King brings more than 20 years global experience as a senior executive, including her roles as Chief Executive Officer for the Australian Veterinary Association, FIBA Women’s Basketball World Cup 2022 Organising Committee and Surf Life Saving Australia (SLSA) and executive roles with Sydney Opera House, Department of the Prime Minister and Cabinet APEC Australia 2007 Taskforce and the Governance Institute. A strategic, agile and innovative leader with extensive transformation, commercial and communications experience, Melissa has advised Boards and Government Agencies on strategy, governance and fundraising, and mentors emerging leaders.

Brian Hibbeln, Non-Executive Director

Brian Hibbeln is currently a venture partner at Sinewave Venture Capital LLC, a venture capital firm with the mission of accelerating new technologies across the public and commercial sector. He was the Director of the US Remote Sensing Center- National Capital Region (Washington D.C.) for almost a decade, being instrumental in supporting the DoD and Intelligence Community with technology demonstrations and operational support to combatant commanders around the world. Brian Hibbeln has advised Boards and Government Agencies on Cyber Technologies, Intelligence Activities, Mergers and Acquisitions and the deep understanding of Government needs or requirements. Mr. Hibbeln’s extensive global networks and experience will open new channels for Whitehawk into the Australian, British and other markets globally.

Giuseppe Porcelli, Chief Strategy Officer, Executive Director

Giuseppe Porcelli is the Founder, Chairman & Group CEO of Lakeba Group Limited. A visionary entrepreneur, investor, and business leader with a proven track record in building and scaling innovative technology ventures, leading a global enterprise dedicated to developing and commercializing AI-driven solutions that optimize business operations, drive automation, and enhance digital transformation. Giuseppe is also the Chairman of Assetora (ASX: AOH), where he plays a pivotal role in guiding the company's growth and market strategy in fractional property investment. His expertise in corporate governance, M&A, and capital markets has been instrumental in driving strategic initiatives, including cross-border expansions and high-profile partnerships.

Proposed Board Structure*

The Board is considering the composition of its members in light of the current activities of the Company, regulatory requirements, and the Company's finances:

- ✓ AU-based Chair
- ✓ 1 AU Board Member
- ✓ 1 US Board Member

In accordance with, clause 15.3 of the Company's Constitution a Director may be elected at a General Meeting of Shareholders to fill a casual vacancy. Noting that two Directors had been put forward by Shareholders of the Company.

Any changes to the Board composition will be announced via the ASX.

**For Shareholder Reference Only – final structure to be determined by the Board*
